

Upper GI Cancer Study Day

Tuesday 17th October 2017

Education Centre (Dept. 17), The Christie, Manchester, M20

Overview

Learn from a multidisciplinary panel of gastric cancer experts in oncology, surgery and radiology to discuss current/future treatments and evidence based practice. There will be opportunities to ask questions to our specialist MDT panel and speakers and network with your peers

Intended Audience

All healthcare professionals who work with an oncology diagnosis. Suitable for all members of the MDT, specialist nurses, research nurses, AHPs, supportive care and junior doctors. The event is relevant to those new to oncology wishing to find out more about this disease group

Introduction

This event intends to use case studies to explore the patient's journey associated with the diagnosis and treatment of Upper GI. Participants will be exposed to the various dilemmas faced by health care professionals involved in caring for this patient group from diagnosis onwards

Topics covered

- Neoadjuvant pathological complete response
- Locally advanced and metastatic treatment
- Metastatic gastric her 2+ve sarcopenia
- Anorexia and sarcopenia
- Nutritional considerations
- Curative treatments
- The future for Upper GI cancer

Learning outcomes

Participants will be able to:

- Better understand the MDT approach to decision making
- Understand the complex nutritional requirements of Upper GI cancer patients
- Understand what treatment options are available

Intended Audience

All healthcare professionals who work with an oncology diagnosis. Suitable for all members of the MDT, specialist nurses, research nurses, AHPs, supportive care and junior doctors

Key themes

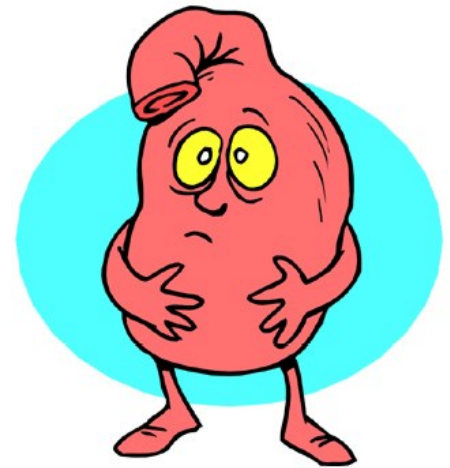

Using the MDT process as a base, we will explore the key themes of:

- Diagnosis
- Treatment
- Practical guide to frequent issues faced by this patient group
- The future of Upper GI cancer

Fees

£90 General Admission
£80 Early Bird (before 31 Aug)
£50 Christie Staff
