A UNIQUE OPPORTUNITY

to learn from known masters of ESD and POEM .

The American Society for Gastrointestinal Endoscopy (ASGE) and the Japan Gastroenterological Endoscopy Society (JGES) invite you to participate in this one-of-a-kind immersion course in endoscopic submucosal dissection (ESD) taught by highly skilled experts, representing the largest team of outstanding masters in ESD ever assembled in this country.

This two-day course, which will be held at the state-of-the-art ASGE Institute for Training and Technology (IT&T), has been developed to provide a comprehensive experience in ESD that will take the advanced endoscopist from theory to the hands-on practice of ESD, discussing and demonstrating the fine points of the technique.

WHAT YOU WILL LEARN

ASGE and JGES have collaborated to bring advanced techniques to endoscopists in the U.S. The course will include presentations from the faculty covering indications and methods for ESD and followed by demonstrations of these techniques by the Masters in ex vivo and animate models. Participants will engage in intensive hands-on experience with expert teachers. The goal of this course will be to familiarize the attendees with all aspects of ESD that have not been taught before, such as treatment of GI bleeding during ESD using devices including the hemostatic forceps and clips.

WHO SHOULD ATTEND

This course has been specifically designed for practitioners of gastrointestinal endoscopy, especially gastroenterologists, gastrointestinal surgeons, gastrointestinal nurses, and fellows in training. This course is equally relevant to those in private practice and academic practice.

Registration is limited to ensure ample opportunity for hands-on experience.

Optional POEM ADD-ON

An exclusive add-on opportunity taking place on Monday, July 22nd will allow a limited number of participants to perform the Per-oral Endoscopic Myotomy (POEM) technique using animate models (*additional fee required*).

COURSE HIGHLIGHTS

- Presentations covering indications and methods for ESD and differing methods of the technique
- Demonstrations of these techniques by the ESD masters using ex vivo and animate models
- Intensive hands-on experience with expert faculty
- Exposure to aspects of ESD rarely taught in the US, including treatment of GI bleeding during ESD using devices including the hemostatic forceps and clips
- Exclusive add-on opportunity to perform the POEM procedure
