

Acute Lymphoblastic Leukaemia and Teenage & Young Adults: Expanding Nursing Expertise

Monday 20th November 2017

Education Centre (Dept. 17), The Christie, Manchester, M20 4BX

Overview

This day will provide specific knowledge on how to diagnose, treat, and manage complications of teenage and young adult ALL patients from a multidisciplinary perspective.

The morning will focus on acute lymphoblastic leukaemia in general and the afternoon will focus more specifically on the management of TYA patients

Intended Audience

Nursing and other allied health professionals looking after haematology patients and teenage and young adults

Learning outcomes

This event will expand on basic and intermediate levels of knowledge for nurses and AHPs caring for young acute lymphoblastic leukaemia patients which can then be applied in the clinical environment

Topics covered

- Diagnosis
- Treatment options including radiotherapy
- Clinical trials in acute leukaemia
- Managing complications of acute leukaemia
- Managing leukaemia from an outpatient perspective and adherence
- Case studies
- The patient perspective

Aim/objectives

To provide specific knowledge on how to diagnose, treat, and manage complications of teenage and young adult ALL patients from a multidisciplinary perspective.

Intended Audience

Nursing and other allied health professionals looking after haematology patients and teenage and young adults

Delivery format

The morning will focus on acute lymphoblastic leukaemia in general and the afternoon will focus more specifically on the management of teenage and young adult patients

Fees
