ONSITE COURSE # 144 Evidence-informed, Integrative Evaluation & Treatment of Rotator Cuff Impairments

Instructor:
Eric Wilson, PT, DSc, DPT, OCS,
SCS, CSCS, FAAOMPT

Audience: Physical Therapists, Occupational
Therapists, and Athletic Trainers

Two-day Course from
8:00 am – 4:30 pm Daily

Motivations, Inc.

SUMMARY: The course will introduce the participant to the most up-to-date literature as it pertains to treating rotator cuff impairments. Using a combination of patient cases, lecture, lab experience, demonstration and video, the participant will gain a deeper understanding of how to correctly place a patient with rotator cuff impairment into the rehabilitation continuum as well as be provided with hands on lab sessions to practice creative hands on and exercise-based interventions.

Diagnoses covered will include: Rotator cuff impingement both subacromial and internal, tendinopathies, strains, partial and full thickness tears, chronic rotator cuff syndrome, scapular dyskinesia and anterior glenohumeral instability.

Dr Eric Wilson is a nationally recognized physical therapist and instructor, who will teach efficient and effective techniques to build and grow shoulder rehabilitation referrals for your practice, based on successful outcomes.

INSTRUCTOR: Eric Wilson, PT, DSc, DPT, OCS, SCS, CSCS, FAAOMPT is the founding Program Director and current Deputy Program Director for the USAF's Tactical Sports & OMPT Fellowship – a training pipeline preparing Air Force PTs to become embedded in Special Warfare units. Prior to retiring from the USAF in 2016 as a Lieutenant Colonel, he served as the USAF Academy's Associate Athletic Director for Sports Medicine and the USAF's PT consultant for Special Warfare PT. Eric has taught continuing education courses since 1999 and has presented at numerous state and national meetings and has published in both peer-reviewed journals and medical texts. He resides in Colorado Springs, CO.

Eric enlisted in the US Army after high school and served over 4 ½ years as an Airborne Infantryman, earning the rank of Sergeant and fighting in the first Gulf War with the 82nd Airborne Division. While stationed in the Army's Airborne Battalion Combat Team in Italy, Eric was able to travel across Europe and Africa, which gave him a permanent aversion to foreign food and riding in the back of C-130's. After the Army, he earned a Masters degree from the Medical College of Virginia in 1998 and worked for three years as a civilian PT prior to accepting a USAF commission in 2001. He was Rocky Mountain University of Health Profession's first terminal doctorate graduate, earning his Doctor of Science in Orthopedic Physical Therapy in 2001. Eric graduated from Regis University's Post-Professional Fellowship in Manual Therapy in 2008 and earned his FAAOMPT credential at that time. He also completed his Transitional DPT from MGH Institute of Health Professions in 2010.

Eric developed and taught the USAF's first dry needling course in 2013. He was also one of the USAF's "original seven" embedded PTs, serving as the 93rd Air Ground Operations Wing's Director of Human Performance from 2012-2015 and is the only USAF PT to have graduated from the US Army's Flight Surgeon course as well as NOAA's Dive Medical Officer course. He has taught in Residency and Fellowship programs and has been a full-time Fellowship instructor since 2016. The instructors have no relevant financial or nonfinancial relationships to disclose.

OBJECTIVES: Upon completion of this course, the participant will be able to:

1. List appropriate medical screening questions for patients complaining of shoulder pain
2. Recall evidence-informed physical examination measures for patients complaining of shoulder pain
3. Sequence evidence-informed interventions for patients complaining of shoulder pain based on individual patient presentation
4. Identify functional improvements that lead to patients restored independence in activities of daily living in dressing, grooming, and personal care.

FORMAT: This is a 14-hour course equivalent to 1.4 CEUs. Motivations Inc is an approved provider by The Texas Chapter of the APTA and many additional state and chapter approvals. This course is posted on CE Broker for licensed state boards that participate in reporting on their national registry.

The assignment of Texas PT CCUs does not imply endorsement of specific course content, products, or clinical procedures by TPTA or TBPE.

Motivations Inc. is an AOTA Approved Provider of professional development. Course approval ID# 07184. AGENDA ON NEXT PAGE:

AGENDA:

Day 1: 8.5 hours total, 7 hours of class

8:00-8:20am: Welcome, introduction, course objectives and course group pre-test
8:20-9:00am: Subjective hx and medical screening
9:00-9:30am: Subjective hx and medical screening cases
9:30-9:45am: BREAK
9:45-10:15am: Rehabilitation Continuum for patients with shoulder impairments
10:15-11:30am: Evidence-informed tactics to reduce shoulder pain (lecture & lab combination)
11:30am-12:30pm: LUNCH
12:30-1:00pm: Questions & Answers from morning session
1:00-1:30pm: Evidence-informed tactics to reduce shoulder pain (lecture & lab combination)
1:30-2:15pm: Treating impairments of sensitized neural tissue, mobility, and flexibility
2:15-2:30pm: BREAK
2:30-3:30pm: Identification and treatment of scapular dyskinesia
3:30-4:00pm: Questions & Answers from Day 1 morning and afternoon sessions
4:00-4:30pm: Day 1 post-course group quiz

Day 2: 8.5 hours total, 7 hours of class

8:00-8:30am: Questions and Answers from Day 1 and pre-course group quiz (Day 2 material)
8:30-9:30am: Lab review for Day 1 skills
9:30-9:45am: BREAK
9:45-10:45am: Motor Control assessment & treatments for patients with shoulder pain (lecture & lab)
10:45-11:30am: Cases
11:30am-12:30pm: LUNCH
12:30-1:00pm: Questions & Answers from morning session
1:00-2:15pm: Functional Optimization for patients with shoulder pain
2:15-2:30pm: BREAK
2:30-3:30pm: Cases
3:30-4:00pm: Questions and Answers for Days 1 & 2 materials
4:00-4:20pm: Day 2 post-course group quiz
4:20-4:30pm: Final Q&A and course wrap up

Successful Completion: Based on attendance and participation in the lab experiences.

Certificates: Certificate are furnished from completion online evaluation survey sent by auto email as a PDF document.
