

AO Trauma Course-Basic Principles of Fracture Management

October 26, 2017 - October 29, 2017
Toronto, ON, Canada

This Basic Course is designed to provide the participant with a fundamental knowledge of operative treatment of fractures according to the AO principles. The four guiding AO principles of fracture fixation are: 1. Anatomic reduction of the fracture fragments, particularly in joint fractures; 2. Stable fixation to ensure proper healing of the fracture allowing surrounding tissue to move and strengthen; 3. Atraumatic surgical technique to preserve the blood supply to the bone fragments and soft tissue; 4. Early, pain-free mobilization returning the patient to function as soon as possible. The course will cover the concepts of absolute and relative stability, as applied in context, of the soft tissue injury for each limb segment's major fracture types. This course is the foundation for the AONA curriculum, which teaches the surgeon how to manage trauma and trauma reconstruction. The goal of this course is not to advocate the treatment of all fractures by surgical fixation, but rather to help ensure that when surgery is carried out, that it is done properly based upon principles, appropriate preoperative planning, and decision making.

Event Summary

Tuition:

Level Name: Participant - Orthopaedic
Pricing Tier: Attending
Tuition: \$1,495.00

Level Name: Participant - Orthopaedic
Pricing Tier: Resident
Tuition: \$1,095.00

Course Prerequisite(s):
No Prerequisites

Venue:

Hilton Toronto Markham Suites
8500 Warden Avenue
Markham, Ontario, Canada
Phone Number: 905-470-8500

Please Note: This course is available to physicians only.

Language(s):

English

Directly Provided by:

Professional Level Prerequisite(s):

- Residency Year 1
- Residency Year 2
- Residency Year 3
- Residency Year 4
- Residency Year 5
- Residency Year 6
- Residency Year 7
- Residency Year 8
- Attending
- Fellow

CME

Continuing Education Credit: 31.00

•

AO North America is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

AONA has been resurveyed by the Accreditation Council for Continuing Medical Education (ACCME) and awarded Accreditation with Commendation.

- **Designation Statement** - AO North America designates this live educational activity for a maximum of 31.00 **AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The Continuing Medical Education (CME) mission of AO North America (AONA®) is to provide comprehensive multidisciplinary needs based education to surgeons, fellows, and residents in the specialties of orthopedic, hand, craniomaxillofacial, spine, neurosurgery, and veterinary surgery in the areas of trauma (i.e., operative reduction and fixation), degenerative disorders, deformities, tumors, and reconstruction.

Expected results of AONA's CME activities for surgeons, fellows, and residents are to:

- Increase their knowledge base and surgical skill level
- Improve competence by applying advances of knowledge in patient care in the areas of trauma, degenerative disorders, deformities, tumors, and reconstructive surgical techniques
- Address practice performance gaps by improving management of aspects of traumatic injuries and musculoskeletal disorders (i.e., pre-operative planning to post-operative care)

Learner Objectives

Upon completion, participants should be able to:

- Discuss the concepts of stability, their influence on bone healing, and how to apply implants to achieve appropriate stability
- Plan a treatment based on assessment, imaging, classification and decision making
- Apply reduction techniques in fracture management with attention to the importance of the soft tissue
- Plan the initial treatment of a polytraumatized patient
- Apply related psychomotor skills to the practical application of orthopaedic implants to fractured bones

Faculty

Axelrod, Terry - Chairperson

MD, MSc, FRCSC
Professor
Division of Orthopaedic Surgery
University of Toronto
Toronto, ON

**Smith, Carla - Coach**

MD, PhD
St Lukes Health System
Boise, ID

**Volgas, David - Coach**

MD
Associate Professor
Program Director
Department of Orthopaedic Surgery
University of Missouri
Columbia, MO

David Volgas is an orthopaedic surgeon who specializes in trauma. He has practiced at University of Missouri Health System since Sept 2010. His special interests are in pilon fractures, calcaneus fractures, proximal humerus fractures and in soft tissue reconstruction. Dr. Volgas attended medical school from 1983-87 at the University of Tennessee Center for the Health Sciences in Memphis. After medical school, he was assigned to Dwight D Eisenhower Army Medical Center for his transitional internship year. As common at that time for military residents, he was sent to the field for one year as a General Medical Officer at Ft. Polk, LA. He served as the Brigade Surgeon for the 2nd Battalion, 5th Infantry Division (Mechanized) where he was the primary medical officer for 4,000 troops and participated in field training for battalion personnel. He then was selected for orthopaedic residency training. He began orthopaedic residency in 1988 at DDEAMC in Augusta, GA at Ft. Gordon. As a junior resident (PGY-3), he was the senior resident on a service staffed by Reserve orthopaedic surgeons and more junior residents during Desert Storm. He did a 3-month trauma rotation during his PGY-4 year at Grady Hospital in Atlanta and fell in love with trauma surgery. He also did a 6-month pediatric rotation in Miami, FL at Jackson Memorial Hospital during his PGY-4 year. He completed his orthopaedic residency in 1993. He was transferred to Killeen, TX after residency and assigned to Darnall Army Community Hospital (DACH), where he served as a general orthopaedic surgeon. He applied for a trauma fellowship, but Army policy at the time precluded training in trauma and there were few trauma fellowships in the US. Because of his enjoyment of spine surgery and his enjoyment of being able to operate everywhere in the body, he applied for and was accepted to a pediatric fellowship at Jackson Memorial Hospital in Miami, FL. He began pediatric orthopaedic training in Aug 1994. During this training, he was exposed to a large volume of scoliosis, operative clubfoot and limb deformity cases. After fellowship, he was assigned to Brooke Army Medical Center as a pediatric orthopaedic surgeon. The military decided about 6 months later to combine the pediatric orthopaedic programs of Wilford Hall (the Air Force medical center in San Antonio). Fortuitously, at the same time, the Institute for Surgical Research at BAMC decided to begin extremity research and named Dr. James Stannard as the chief of this new unit. Dr. Stannard requested a second trauma surgeon. Dr. Volgas volunteered for this position, since it was his first love. He served in this role for almost 3 years, until his resignation from active duty in 1998. During the spring of 1998, Dr. Volgas spent one month with Dr. Stannard and Dr. Jorge Alonso at the University of Alabama - Birmingham (UAB) on an AO fellowship. Dr. Volgas joined Dr. Stannard and Dr. Alonso at UAB in August 1998. During his 12-year tenure at UAB, he was appointed the Program Director of the residency and served in that capacity for 7 years. He also noted very early in his career at UAB, that many patients had large soft tissue injuries and began to study simple coverage techniques such as sural flaps under the tutelage of a plastic surgeon. When Dr. Tad Heinz, a plastic surgeon who was keenly interested in orthopaedic traumatic wounds moved to Colorado, Dr. Volgas began doing soft tissue coverage independently. He also developed an extensive practice in reconstructive surgery including bone transport, limb lengthening, and flap coverage. He also developed a keen interest in pilon and calcaneal fractures. He developed a database to track the outcomes of these cases and, over the course of his final 3 years at UAB, he entered data about 126 pilon fractures and more than 100 flap cases. Recognizing the importance of soft tissue handling in orthopaedic trauma, Dr. Volgas met Prof Thomas Ruedi at an AO course and discussed with him the idea of writing a book on soft tissue techniques for the AO. Over the next 5 years, Dr. Volgas developed the concept of a soft tissue manual for the AO and as the chief editor, guided the format and presentation of the material which was eventually published in 2012 as the Manual of Soft Tissue Management for Orthopaedic Trauma. Dr. Volgas has gained an international reputation for soft tissue management and has served as chairman of several international and national courses on soft tissue management.

Chief, Orthopaedic Trauma and Fracture Service
University of Pennsylvania Health System
Philadelphia, PA

Samir Mehta, MD is an Associate Professor in the Department of Orthopaedic Surgery at the Perelman School of Medicine at the University of Pennsylvania. After completing his undergraduate work at Northwestern University in the Integrated Science Program with a minor in English, Samir returned to his home-town of Philadelphia for medical school at Temple University. He stayed in Philadelphia for his Orthopaedic Surgery residency at the University of Pennsylvania where he was a research fellow and was also awarded the DeForest Willard Award. Having developed an interest in Orthopaedic Traumatology, Samir furthered his education as an orthopaedic trauma fellow at Harborview Medical Center in Seattle, Washington. Upon completion of his orthopaedic trauma fellowship, Samir was awarded the AO John Border Award and continued his education at the University of Saarland in Homburg, Germany. Upon his return the United States, Samir took a faculty position at the University of Pennsylvania as Chief of the Orthopaedic Trauma and Fracture Service. He is also the clinical research advisor of the Biedermann Lab for Orthopaedic Research at the University of Pennsylvania and the interim medical director for clinical research for the Department of Orthopaedic Surgery. As a result of a busy clinical practice, he has developed a particular interest in pelvic and acetabular fractures, repair of non-unions and malunions, and reconstruction of peri-articular fractures. Samir is also actively involved with the American Academy of Orthopaedic Surgery, the American Orthopaedic Association, the Orthopaedic Trauma Association, and the AO Foundation. He has been awarded the prestigious American Orthopaedic Association-North American Traveling Fellowship, the AO Howard Rosen Teaching Award, and also has served as an AAOS Health Policy Fellow on Capitol Hill. His research interests include non-unions, open fractures, traumatic articular cartilage injury, and fracture healing. He has participated in over one-hundred peer review publications, has multiple current funded studies, and has presented on numerous occasions nationally and internationally. He has been awarded several grants from agencies such as the DOD, PCORI, and NIH. He has been actively involved in multiple research projects examining graduate medical education and is currently a faculty member for the AAOS Course for Orthopaedic Educators. Samir is actively involved in the Department of Orthopaedic Surgery at the University of Pennsylvania serving on the Graduate Medical Education Committee, Finance Committee, as the Trauma Liaison, and participating in Resident Applicant Interviews. In addition, Samir enjoys running, coaching little league, and traveling.

Agenda

Day1

Thursday, October 26, 2017 - 07:15 - 18:55 - (includes breaks, travel-time and meals)

Schedule	Title	Moderator	Faculty	Room
07:45 - 08:00	Introduction / Welcome			
08:00 - 08:20	AIRS PreTest			
08:20 - 09:20	MODULE 1: SOFT TISSUE			
08:20 - 08:35	History of Fracture Care and Evolution of Principles			
08:35 - 08:45	Bone: Fracture Classification - A Guide to Clinical Decision Making			
08:45 - 09:00	Soft Tissue Injury and Compartment Syndrome			
09:00 - 09:10	Open Fractures			
09:10 - 09:20	Questions / Answers and AIRS			
09:20 - 10:20	MODULE 2: STABILITY AND BONE HEALING			
09:20 - 09:35	Bone Healing			
09:35 - 09:50	Spectrum of Stability			
09:50 - 10:05	Surgical Reduction Techniques: Respecting the Behavior of Bone			
10:05 - 10:20	Questions / Answers and AIRS			
10:20 - 10:40	Coffee Break			
10:40 - 11:30	MODULE 3: PRINCIPLES - ABSOLUTE STABILITY			
10:40 - 10:50	Screw Design and Function			
10:50 - 11:00	Plate Design and Function			
11:00 - 11:10	Tension Band Principles			
11:10 - 11:30	Questions / Answers and AIRS			
11:30 - 12:15	Lunch			
12:15 - 13:55	PRACTICAL EXERCISE I: (Absolute Stability); A. Introduction to Implants; B. Lag Screw; C. Neutralization Plate; D. Buttress Plate			
13:55 - 14:05	Break			
14:05 - 15:45	PRACTICAL EXERCISE I: (Absolute Stability-Continued); E. Axial Compression with Plates; F. Oblique Fracture: Lag Through Plate; G. Olecranon Fixation			
15:45 - 16:05	Coffee Break / Travel to Lectures			
16:05 - 17:15	MODULE 4: PRINCIPLES - RELATIVE STABILITY			
16:05 - 16:15	External Fixation Relative Stability			
16:15 - 16:30	Bridge Plating with Traditional Implants and Techniques			
16:30 - 16:45	Locked Plating - Biology, Biomechanics, Clinical Applications			
16:45 - 16:55	Intramedullary Techniques, Relative Stability			
16:55 - 17:15	Questions / Answers and AIRS			
17:15 - 17:25	Travel to Lab			
17:25 - 18:55	PRACTICAL EXERCISE II: (Relative Stability); A. External Fixation; B. Bridge Plating; C. Comparison of Locked and Unlocked Screws in Osteoporotic Bone			

Day2

Friday, October 27, 2017 - 07:15 - 19:00 - (includes breaks, travel-time and meals)

Schedule	Title	Moderator	Faculty	Room
07:15 - 08:00	Daily Morning Huddle			
08:00 - 09:30	Discussion Group One: Review of Principles and Decision Making			
09:30 - 09:40	Travel to Lab			
09:40 - 11:40	PRACTICAL EXERCISE III: AO Skills Lab			
11:40 - 12:30	Lunch			
12:30 - 13:40	MODULE 5: DIAPHYSEAL MANAGEMENT			
12:30 - 12:40	Radiation Safety			
12:40 - 12:50	Femur			
12:50 - 13:00	Tibia			
13:00 - 13:10	Humerus			
13:10 - 13:20	Radius & Ulna			
13:20 - 13:40	Questions / Answers and AIRS			
13:40 - 13:50	Travel to Breakouts			
13:50 - 14:40	Discussion in Small Group Roms: Review of Intramedullary Nailing			
14:40 - 14:50	Travel to Lab			
14:50 - 16:00	PRACTICAL EXERCISE IV: (Intramedullary Nailing); A. Femur; B. Tibia			
16:00 - 16:10	Travel to Lectures			
16:10 - 16:25	Unique Learning Resources of the AO Foundation			

16:25 - 16:40	Preoperative Planning
16:40 - 17:50	PRACTICAL EXERCISE V: Preoperative Planning - Forearm Model
17:50 - 18:00	Filler Time
18:00 - 19:00	Reception

Day3

Saturday, October 28, 2017 - 07:00 - 18:45 - (includes breaks, travel-time and meals)

Schedule	Title	Moderator	Faculty	Room
07:15 - 08:00	Daily Morning Huddle			
08:00 - 09:30	Discussion Group Two: Diaphyseal Fractures			
09:30 - 09:40	Travel to Lab			
09:40 - 10:50	PRACTICAL EXERCISE VI: Fixation of Radius / Ulna			
10:50 - 11:00	Coffee Break / Travel to Lectures			
11:00 - 12:00	MODULE 6: LOWER EXTREMITY - ARTICULAR FRACTURES			
11:00 - 11:10	Principles of Management - Articular			
11:10 - 11:25	Ankle Fractures			
11:25 - 11:35	Introduction to Pilon Fractures			
11:35 - 11:45	Introduction to Tibial Plateau			
11:45 - 12:00	Questions / Answers and AIRS			
12:00 - 12:45	Lunch			
12:45 - 13:50	PRACTICAL EXERCISE VII: Ankle Fractures - Type C Malleolar			
13:50 - 14:00	Travel to Lectures			
14:00 - 14:50	MODULE 6 (continued): LOWER EXTREMITY - ARTICULAR FRACTURES			
14:00 - 14:10	Distal Femur			
14:10 - 14:20	Extracapsular Hip Fracture			
14:20 - 14:30	Intracapsular Hip Fracture			
14:30 - 14:40	Olecranon and Patellar Fractures			
14:40 - 14:50	Questions / Answers and AIRS			
14:50 - 15:00	Travel to Lab			
15:00 - 16:15	PRACTICAL EXERCISE VIII: Fixation of an Intertrochanteric Hip Fracture - Nail vs. Plate			
16:15 - 16:25	Coffee Break / Travel to Lectures			
16:25 - 17:10	MODULE 7: UPPER EXTREMITY - ARTICULAR FRACTURES			
16:25 - 16:35	Proximal Humerus			
16:35 - 16:45	Distal Humerus			
16:45 - 16:55	Distal Radius			
16:55 - 17:10	Questions / Answers and AIRS			
17:10 - 18:45	MODULE 8: SPECIAL FRACTURE PROBLEMS			
17:10 - 17:25	Polytrauma			
17:25 - 17:35	Radiographic Evaluation and Classification of Pelvic Ring Disruptions			
17:35 - 17:45	Acute Management of Pelvic Ring Injuries			
17:45 - 17:55	Questions / Answers and AIRS			
17:55 - 18:45	AIRS PostTest			

Day4

Sunday, October 29, 2017 - 08:00 - 12:10 - (includes breaks, travel-time and meals)

Schedule	Title	Moderator	Faculty	Room
08:00 - 09:15	Discussion Group Three: Articular Fractures			
09:15 - 09:20	Travel to Lab			
09:20 - 10:50	PRACTICAL EXERCISE IX: (External Fixation); A. Pelvic Fracture; B. Spanning External Fixation			
10:50 - 10:55	Travel to Lectures			
10:55 - 12:10	MODULE 8 (Continued): SPECIAL FRACTURE PROBLEMS			
10:55 - 11:10	Infection			
11:10 - 11:20	Nonunions			
11:20 - 11:30	Malunions			
11:30 - 11:50	Violations of AO Principles: How Not To Do AO			
11:50 - 12:00	Questions / Answers and AIRS			
12:00 - 12:10	Closing Comments (Introduce Principles II) / End of Course AIRS Questions			

Presentation Information

Faculty Disclosure:

It is the policy of AO North America to abide by the Accreditation Council for Continuing Medical Education Standards for Commercial Support. Standard 2: "Disclosures Relevant to

It is the policy of AO North America to abide by the Accreditation Council for Continuing Medical Education Standards for Commercial Support. Standard 2. "Disclosures Relevant to Potential Commercial Bias and Relevant Financial Relationships of Those with Control over CME Content," requires all planners, including course directors, chairs, and faculty, involved in the development of CME content to disclose their relevant financial relationships prior to participating in the activity. Relevant financial relationships will be disclosed to the activity audience. The intent of the disclosure is not to prevent a faculty with a relevant financial or other relationship from teaching, but to provide participants with information that might be of importance to their evaluation of content. All potential conflicts of interest have been resolved prior to the commencement of this activity.

Off-Label / Experimental Discussions:

Some medical devices used for teaching purposes and/or discussed in AO North America's educational activities may have been cleared by the FDA for specific uses only or may not yet be approved for any purpose. Faculty may discuss off-label, investigational, or experimental uses of products/devices in CME certified educational activities. Faculty have been advised that all recommendations involving clinical medicine in this CME activity are based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications in the care of patients.

All scientific research referred to, reported or used in this CME activity in support or justification of a patient care recommendation conforms to the generally accepted standards of experimental design, data collection and analysis.

Disclaimer:

AO North America does not endorse nor promote the use of any product/device of commercial entities. Equipment used in this course is for teaching purposes only with the intent to enhance the learning experience.

Conflict of Interest Resolution Statement:

When individuals in a position to control or influence the development of the content have reported financial relationships with one or more commercial interests, AO North America utilizes a process to identify and resolve potential conflicts to ensure that the content presented is free of commercial bias.

Liability Statement:

AO North America faculty and staff assume no personal liability for the techniques or the use of any equipment and accessories used for teaching purposes in the laboratory. The certificate provided pertains only to the participants' completion of the course and does not, in any way, attest to the proficiency of the participants' clinical experience.

Acknowledgment

In-Kind Support

AO North America gratefully acknowledges in-kind support for equipment and technical staff from DePuy Synthes.

Educational Grant

AO North America gratefully acknowledges funding for its education activities from the AO Foundation. The AO Foundation receives funding for education from Synthes GmbH.
