★ Life-Long Tradition and Excellence ★

Speakers

Joyce M. Galligan, RN, DDS

Associate Professor of Clinical Dentistry, Division of Periodontology, Diagnostic Sciences & Dental Hygiene, Director of Safety and Infection Control as well as the Chair of the Patient Safety - Infection Control Committee at the Herman Ostrow School of Dentistry of USC. Dr. Galligan is a past recipient of the Organization for Safety and Asepsis (OSAP) James A. Cottone Award.

Patricia M. Galligan, JD, LL.M in taxation

An attorney whose practice includes business and tax planning for her clients and their businesses. She has over 25 years of legal experience advising clients regarding operating businesses, acquisition and sale of businesses, estate and tax planning and retirement planning.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Synopsis

New diseases, as well as the return of some once thought eradicated diseases, are a major concern in the modern dental practice. It seems as if every few months a disease is developing and or capturing headlines. The signs and symptoms of many emerging diseases such as community-acquired methicillin-resistant *Staphylococcus aureus* (CA-MRSA), Legionnaires' disease, the Zika virus, mumps, and seasonal flu will be described and effective preventive measures will be discussed. The course will also cover topics such as general disease transmission, universal and standard precautions, disinfection and sterilization as well as proper waste management.

The course will review Cal-OSHA's top dental office citations, discuss the CDC guidelines as well as the current mandated minimum standards for infection control in the dental setting from the Dental Board of California regulations. Participants will be provided with an easy-to-apply checklist for reviewing their office's compliance with infection control and safety policies and guidelines.

The section on the California Dental Practice Act will present the recent changes in the laws that impact the practice of dentistry. It will cover the topics necessary for renewal of your license, including your duties as mandated reporter of child, elder, and domestic partner abuse; violations of the Dental Practice Act; and powers of enforcement held by the Dental Board.

Upon Completion of the Course Participants Should Be Able To:

- Know the principles of disease transmission and Universal/Standard precautions
- Understand Cal-OSHA compliance issues, sterilization and disinfection
- Become familiar with the updated CDC infection control guidelines
- Understand the infection control practices mandated by the Dental Board of California
- Know the recent changes in the Dental Practice Act and the basic rules for avoiding problems that could place your dental license in jeopardy
- Know how to use dental auxiliaries effectively within current California law
- Provide a safer environment for patients and the dental team

** This class satisfies the California Infection Control and California Dental Practice Act license renewal requirements for dentists, dental hygienists, and currently licensed registered dental assistants.*
