Course Introduction

Course Overview

The New Advances in Inflammatory Bowel Disease conference will highlight the latest concepts in the diagnosis, treatment and management of Crohn's disease and ulcerative colitis. The course will be taught by nationally known experts who not only treat patients in the clinical setting, but are also actively involved in various research projects aimed at continuously improving the treatment and management of IBD. Health care providers will be presented with the necessary context to integrate relevant information into their daily practice thereby improving quality of care for their afflicted patients.
