

22nd Annual Primary Care in Paradise

*Medical Specialties
from the Primary Care Perspective*

March 27–30, 2017
Hyatt Regency Maui • Lahaina – Maui, Hawaii

Course Information

Course Overview

Scripps Health's Primary Care in Paradise conference was designed by primary care physicians for primary care physicians and will present content from their unique perspective. This important CME conference will educate and promote improved patient outcomes in a broad range of therapeutic areas commonly encountered in the busy primary care practice. The 2017 conference will focus on neurology, diabetes management, cardiology, gastroenterology, women's health, and various other internal medicine topics. In addition to an overview of the history and current science of a variety of specialty areas, content will be presented in a very practical, patient-focused manner relevant to the specific primary care setting and challenges.

Conference Highlights

- Presentation of a wide variety of therapeutic areas commonly encountered in primary and urgent care settings
- Practical and useful content, including pearls, additional resources, course materials, and recordings for later reference
- Dynamic and interactive formats including case studies, audience response system, and ample opportunities for Q&A
- Half-day schedule at one of Hawaii's most popular vacation destinations allowing time for learning and relaxation

Educational Objectives

After attending this activity, participants should be able to:

- Discuss the history, science and evidence of commonly encountered therapeutic areas.
- Integrate current trends in preventive health care into patient care strategies.
- Diagnose frequently encountered medical conditions using office examinations and formal diagnostic techniques.
- Formulate a comprehensive treatment program for various health issues, coordinating other team members within the practice to support the patient care strategy.
- Manage the specialist referral process: assess when to refer, recognize what the specialized treatment will consist of, and determine the role of the primary care physician in cohesive care and follow-up.
- Identify common overlapping or related conditions.
- Access and/or recommend resources for both physicians and patients to acquire additional information pertinent to a range of therapeutic areas.
- Effectively discuss with patients their personal responsibilities in prevention and treatment.

Target Audience

- Family Medicine
- Internal Medicine
- General Practitioners
