International Symposium September 27 – 29, 2017 Freiburg, Germany

Dear friends and colleagues,

It is our great pleasure to invite you to the symposium on „Development of Tissue- and Pathogen-specific Cellular Innate Immunity“ in September 2017 in Freiburg.

This relatively small meeting (300 participants) will bring together leaders and young scientists in the field. We expect lively interdisciplinary discussions on original data, which may lead to new concepts in this dynamic research area. Moreover, we aim at connecting researchers on a personal level, in order to promote lasting scientific networks.

Overall, we hope to make this conference a lasting experience. The venue, a Renaissance town palace, and most of the hotels are located around the medieval market of Freiburg. Social events will be a poster night with excellent regional food and wine, and a get together party featuring famous scientists on stage.

We can't wait to see you in Freiburg!

Philipp Henneke
