Aim of the course

The ESSO-EYSAC Anatomy Course on Pancreatic Cancer is a hands-on workshop on surgical anatomy and operative diagnosis techniques combined with an update on the current concepts of treatment of pancreatic cancer. The course will focus on obtaining a thorough understanding of surgical anatomy and technical aspects of the operative treatment of pancreatic cancer within the framework of evidence-based clinical practice and multidisciplinary approach.

Educational Methods

- Hands-on anatomy and surgery workshops with anatomical specimens and human cadavers
- Pre-course anatomy e-learning module
- Plenary lectures
- MDT case discussions

Ideal participants

- Young surgeons or surgical trainees/residents interested in surgery of pancreatic cancer
- Aged between 25 and 40 years old
