MESSAGE from Director General of ASSR

On behalf of the ASSR* Board of Directors, it is my pleasure to encourage you to attend the 9th ASSR Congress on May 12 & 13 in Manila, Philippines. The main objective of the Society is to develop and support Stoma Rehabilitation in Asian Countries, which exhibit many differences in lifestyle, culture, religion, politics and economy from Western. Common to most Asian nations, however, is the poor welfare system to ostomates and the low accessibility to proper stoma care. Without a good surgically created stoma, an appropriate stoma care program and a suitable appliance, a satisfactory rehabilitation of ostomates can never be achieved. To improve stoma rehabilitation, collaboration among the many parties concerned, especially surgeons, entero-stomal therapists, nurses, manufacturers of appliances, etc. is mandatory. In Asia, however, closer or familiar collaboration is possible among them, although each field is too much westernized and specialized for professionalism to contribute to Asian ostomates. Asian order or discipline must not be disturbed.

Asian ostomates have to receive the information and care which will enable them to live self-determined and independent life and to participate in all decision making processes as declared in Charter of Ostomates' Rights of IOA (International Ostomy Society), and any surgeons and general nurses with basic knowledge and skills of ostomy could serve for ostomates to achieve above, even if they are not trained as specialized entero-stomal therapists. Therefore, it is quite appropriate for those who are directly involved in this field to continue with the exchange and sharing of ideas concerning the problems encountered, and to devise ways to overcome the various difficulties facing our region. During the two full days of this Congress, the scientific program will focus on providing an intensive study of the various aspects of stoma rehabilitation. Our aim is not only to enrich and deepen the scientific basis of ostomy care, but also to develop ties and friendship among all delegates from participating nations through a common goal of enhancing the quality of life for ostomates throughout the Asian region.

Finally, the Philippines is a stable and safe country with full of cultural attraction, tasty foods and hospitality. I am sure you will find Manila to be an interesting and friendly city where you will feel that particular sense of warmth and friendship extended by Filipinos to all attendants.

I am very much looking forwards to seeing you all in Manila.

With warmest regards,

Katsuhisa Shindo, MD, PhD.

Director General of ASSR

ASSR
ASIAN SOCIETY OF
STOMA REHABILITATION

and

Message from the Congress President

Dear colleagues and co-advocates for better stoma care in the ASEAN region,

Allow me extend to you a warm welcome to the 9th Annual Congress of the Asean Society of Stoma Rehabilitation (ASSR) Manila, Philippines.

We are very happy and proud to be hosting for the first time in our country the ASSR congress. This event certainly gives us the opportunity to participate in international efforts on improving the quality of stoma and wound care in the region. We have prepared quite an interesting and educational program for you, inviting both local and foreign speakers to share their expertise on various topics. Poster presentations and abstracts will also be an important element of the program. The venue for the congress will be in The Medical City, one of the largest tertiary hospital networks in the Philippines. The Medical City houses one of the busiest stoma and wound care clinics in the country. The sessions will be held in the spacious and elegant Augusto Barcelon Hall. The hospital itself is located in the Ortigas business district, in the center of Metro Manila, and home to various shopping malls, fine restaurants, and hotels.

This congress is also a wonderful opportunity for all the participants to interact and bond together in a spirit of friendship, community, and shared advocacy. The fellowship night will feature a Philippine cultural show and much merry-making between faculty, care-givers and ostomates.. A day tour to Manila's ancient historical site is also provided for.

We look forward to welcoming you and your family to Manila, offering our famous Philippine hospitality..

Manuel Francisco T. Roxas, MD, FPCS, FPSCRS, FACS

Congress President, 9th Annual ASSR Congress

COLON AND RECTAL SURGEON

Message from the Congress Vice President

Dearest Colleagues

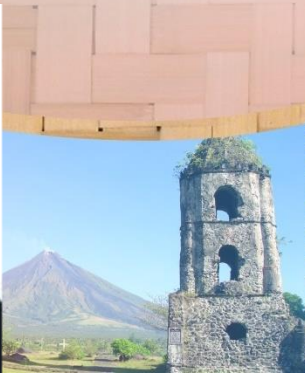

In behalf of the organizing committee of the 9th Annual Asean Society of Stoma Rehabilitation we would like to extend a warm welcome to all. Ostomy care in the Philippines is now becoming a trend, wherein more and more nurses and other allied health care professionals do get involved and interested. It is where doctors, nurses, and other health care professionals work hand in hand as partners in giving compassionate and competent ostomy care. That is why the congress aims to provide topics that are multi-disciplinary and coming from speakers who are experts in their field from different institutions, locally and internationally.

It will be the first time that the Philippines will host such prestigious event and that makes us both proud and honoured. We would also like to invite all of those who are advocates for ostomy care to come and join us on May 12 & 13 2016 for this wonderful event that would make us more aware and knowledgeable in ostomy care.

The Medical City Hospital welcomes you all.

NOTICE TO CONTRIBUTORS of the 9th Congress of ASSR¹.

Submit your full manuscripts in a format of "MS-Word file" or "Text style" for publication of our Journal "ASIAN OSTOMY" as the Congress proceeding after your presentation in March 2016.

Tables in your manuscripts should be in the form of "Word" or "Excel" and figures may be added in the Word file or should be in the form of "Power Point" or "JPEG". All tables and figures are requested to be in black and white. Other colors will not be available in the publishing.

2. All materials must be in English and typed in single-spaced.
3. The first page must include following items: Your presentation number in the Congress, Title of your article, Authors' names with highest degrees and affiliations or institute. Full postal address, E-mail address, Facsimile numbers for correspondence.
4. Text should follow this order:

Introduction, Methods, Results, Discussion, Conclusions, Acknowledgments, References, Tables, Legends for Illustrations, Figures (less than 8).

Remarks: General remarks or invited lecture may not follow this form.

5. Reference listings should use the form in Index Medicus: For example,

a) Book: Shindo K: Informed consent for ostomy surgery. 2nd ed. Kyoto, Kinpodo, 1999; 156-234.

b) Journal Article:

Shindo K, Shindo M: Study for international standard of skin barriers. STOMA 1998; 8:165-168.

6. Permissions of original authors and publishers must be obtained in the case of direct use of articles, tables from existing materials by yourself before submit.

7. Manuscripts should be submitted in the following ways.

a) Data Size is less than 3 MB: Send the manuscript by e-mail¹⁾ attachment.

b) If data size is over 3 MB or in case you do not have e-mail.

Send your manuscript in SD card, USB stick or CD ROM. Address is as follows²⁾.

1) E-mail address: katsuhisashindo0@gmail.com

2) Mail address: Prof. K. Shindo, Director General of ASSR

13 - 4, Ohnodai 7-chome, Osaka-Sayama 589-0023, Japan

8. Dead-line: March 31, 2016. Any manuscripts afterwards may not be published. You may hand it to Prof. Shindo during our 9th Congress ASSR2016 in Manila, Philippines.

9. A book of the proceeding will be given to authors without charge or shipped to your postal address as soon as published.
