BREASTFEEDING
SUMMIT

January 27-29, 2026

Why Attend the 2026 Virtual California Breastfeeding Summit?

Presented by the California Breastfeeding Coalition, the California Breastfeeding Summit is the premier statewide convening of lactation advocates from every corner of the Golden State! The summit is a catalyst for action, empowering attendees to address the structural and institutional racism, inequities of lactation care and support that prevent California families from meeting their infant feeding intentions.

The Summit enables us to present the effectiveness of programs, research, and interventions for continuity of care in human milk feeding support. In addition, the Summit is a forum for attendees to learn best practices, acquire new skills, gain resources, collaborate, and network with peers, colleagues, and exhibitors.

Our annual conference typically attracts about 500 lactation advocates from throughout the state to:

Who Should Attend?

- **Hospital administrators, maternity department managers and hospital nurses** who want tools and resources to implement the Baby-Friendly Hospital Initiative and Model Hospital Policies to improve quality lactation support.
- **Physicians and advanced practice healthcare providers** who want to improve continuity of care to support chest/breastfeeding families prenatally and beyond hospital discharge.
- **Leaders and staff of community clinics, community-based organizations, local WIC programs and public health departments** who want clinical updates to improve lactation support and the opportunity to collaborate with hospitals and other community health care providers to improve the continuity of lactation support.
- **Breastfeeding Coalition members** (lactation advocates and professionals) who want to network and share best practices across professional disciplines to improve collective efforts and the continuity of care to support families.
- **Community educators, doulas, advocates and supporters** such as La Leche League Leaders, Nursing Mother's Counsel and Breastfeeding USA counselors to lift the voices of families.

Summit Objectives

After attending the California Breastfeeding, attendees will be able to:

1. Integrate chest/breastfeeding education, promotion, protection and support into existing community health improvement strategies and as a component of health promotion programs.
2. Create environments that proactively promote, protect and support chest/breastfeeding throughout the community in spaces where families birth, live, work, play, worship, shop, travel, receive medical services, and raise children.
3. Identify family-centered lactation care and policies that are responsive to the intersectionality of families' multiple identities, their social determinants of health, and other factors impacting their infant feeding journey.
4. Participate in health advocacy activities and take on a champion role beyond the provision of direct services, by engaging key stakeholders and decision makers to identify and help remove structural barriers to chest/breastfeeding within systems, organizations, and the community.
