About Us

The Talks is formed to arrange international conferences and establish direct communications between the researchers from either similar field or interdisciplinary research activities. We support and promote the free exchange of innovative thoughts in the research areas of Science, Technology, Engineering and Mathematics.

We provide specialized, professional services, and experience from start to finish. Based on our deep associations with an array of convention centers, vendors, and hotel chains, we are devoted to the peak standards of service and reliability. We also encourage and are keen on open communication with the sponsors and the associations. Along with that, we also support project processes, financing, scientific preparation, and industry liaison tracking.

We understand the importance of networking and collaboration for scientific research, and hence, ensure to track more views, genuine feedback, and suggestions from the audience who have incredible insight into the same field.

The Talks provides a valuable means of spreading ideas in ways that are not achieved through the usual scientific meetings. Our focus is to get the best scientific outcome from every event.

How different are we from others?

- Topic specific talks
- Global Collaborations
- Multi-disciplinary talks & events
- Networking specified events
- Indexed journals support
- High designated organizing members
- Collaborative event approach
- Conference Proceedings in reputed journals
- Added advantage to be published in INDEXED journal

About THE ONCOLOGY TALKS

Scientific Sessions:

- Gynecologic Cancer

- Tumor Immunology
- Cancer Genetics
- Surgical Oncology
- Cancer Metabolomics
- Cancer palliative Care
- Oncology Nursing
- Artificial Intelligence in Oncology

THE ONCOLOGY TALKS is the appointment in the USA for clinicians, researchers, patient advocates, journalists and the pharmaceutical industry from all over the world to get together, learn about the latest advances in oncology and translate science into better cancer patient care.

This year's conference features a cutting-edge agenda with renowned speakers, scientific sessions and networking opportunities. We aim to showcase state-of-the-art advances in oncology research, patient management and practice, standards in surgical oncology, key guidelines, practice-changing developments through Plenary Lectures, Meet the Expert Sessions, Debates, Scientific Symposia and Poster Sessions in well-defined tracks covering the main tumor sites.

The Future of oncology research, latest technology advances, and patient care We also believe that only collaboration across disciplines and industries will result in sustainable innovation and that it's differentiated discourse that drives society forward.

One more main advantage of attending THE ONCOLOGY TALKS is the location where we would like you to explore. San Antonio, Texas, USA is one of the prime locations in the United States which has a mix of ultramodern and traditional.
