Tutorial on Pathology of the
GI Tract, Pancreas and Liver

Course Goals & Objectives

This course is designed to update physicians on advances in our understanding of gastrointestinal diseases, address problems faced during the pathologic evaluation of tissue samples, and provide pathologists with a framework for interpretation of both histologic patterns of disease and results of molecular analyses. The course will be conducted under the direction of Rhonda K. Yantiss, MD at the Marriott Miami Biscayne Bay, located in Miami, Florida from **November 12-16, 2018**. The program will consist of lectures, case presentations and discussions designed to provide attendees with an in-depth discussion of diagnostic problems that arise when evaluating materials obtained from the gastrointestinal tract, pancreas, and liver, and inform them regarding the application and interpretation of immunohistochemical and molecular studies in the diagnosis and classification of these diseases. An extensive compilation of presentations, lecture notes, and reference citations will be available online.

Target Audience

Surgical pathologists and pathologists-in-training.

General Information

The Tutorial consists of five days of lectures, case presentations and discussions. It will be held at the Marriott Miami Biscayne Bay, 1633 North Bayshore Drive, Miami, Florida 33132, United States. Phone: (305) 374-3900
