Continuing Respiratory
Care
Education Credit

Application has been made to the American Association for Respiratory Care (AARC) for continuing education contact hours for respiratory therapists. This conference meets the Respiratory State Licensure Requirements for 1 ethics and 1 patient safety credit.

13th Annual Fall Into Step with Respiratory Care

September 15, 2017

Intended Audience

This program is designed for the respiratory therapist whose practice includes a patient population with disorders of the respiratory system. Do you need the most current and up-to-date information or do you need a review to keep your clinical skills and knowledge fresh? Come join us for this day-long conference and expand your knowledge base related to respiratory issues.

Objectives

At the completion of this course, the participant should be able to:

- describe the medical treatment specific to Alpha-1 deficient patients
- review the indications, pros and cons and the patient perspective of lung transplantation
- discuss biophysical sequelae of mechanical ventilation
- explain the complexity of the mammalian lung and the highly nuanced management strategies of mechanical ventilation
- cite the theoretical advantages and improved patient safety of high frequency oscillatory ventilation in the setting of PARDS
- review the evidence of how compassion is necessary for optimizing therapeutic outcomes in our patients

Program
