

EAP Winter Meeting

6-7 December, 2019

Invitation

Dear Colleagues and Friends,

The meeting is scheduled to take place during 6-7 December, 2019.

The European Academy of Paediatrics (EAP) continues to promote child health and to harmonize standards of paediatric training and services throughout Europe. This meeting is a platform for all our National delegates and other members to discover new knowledge, to promote research and ensure their continuing professional development.

In this increasingly fragmented society, the EAP understands the importance of sharing experience, exchanging ideas and expanding personal contacts. Now, more than ever, we need to support each other, and show that the welfare of children should transcend national boundaries and politics. There is no better forum than our Spring and Winter Meetings for sharing this combined knowledge with colleagues across Europe and beyond.

We urge you to participate and to help us form a strong and unified team, working for the advancement of our children's health.

Come and join this networking meeting in the beautiful city of Brussels.

Sincerely,

Prof. Adamos Hadjipanayis
EAP President

About Brussels

The City of Brussels is the location of many national institutions. The Royal Palace, where the King of Belgium exercises his prerogatives as head of state, is situated alongside the Brussels Park.

The Palace of the Nation is located on the opposite side of this park, and is the seat of the Belgian Federal Parliament.

Since the founding of the Kingdom of Belgium in 1830, Brussels has transformed from being almost entirely Dutch-speaking, to being a multilingual city with French as the majority language and lingua franca.

Brussels is known for its local waffle, its chocolate, its French fries and its numerous types of beers.

Many events are organized or hosted in Brussels throughout the year. In addition, a large number of festivals animate the Brussels' scene.

Brussels contains over 80 museums. The city has had a distinguished artist scene for many years.

The architecture in Brussels is diverse, and spans from the clashing combination of Gothic, Baroque, and Louis XIV styles on the Grand Place to the postmodern buildings of the EU institutions.
