Prof. Bruno van Herendael
PRESIDENT
International Society
for
Gynecologic Endoscopy

The International Society for Gynecologic Endoscopy was formed in 1989 by a group of committed Endoscopists from Europe and North America, who were soon joined by others from all over the world. They recognised the need for a scientific group who would meet at regular intervals to share their knowledge and expertise in Gynecologic Endoscopy.

The Goals of our Society are:

- To establish an international forum for the exchange of information and new ideas between Gynecologic Endoscopists. This function is provided by annual scientific meetings and by contributions to the affiliated Journal, one of the premier journals in this field.
- To provide leadership and unprejudiced academic excellence in this highly important field. The quality of the scientific meetings and workshops will be maintained by the Scientific Committee. Advice is always readily available from the Board Members.
- To promote safety and competence in Gynecologic Endoscopy through education. Regular courses and training programs are run in many countries. Their content is scrutinized by the Scientific Committee before they gain approval of the Society. The Society does not control, but does maintain an influence on the quality and teaching content of the courses which are organised under its auspices.
- To scientifically investigate and evaluate new endoscopic techniques which may be of benefit to women and report to members their use and effectiveness.

A unique opportunity to meet and interact with the "Who's Who" in Hysteroscopic and Laparoscopic Surgery from the world over.

"Join us for an exciting Scientific session in Nairobi, August 2015".

The Kenya Society of Endoscopic Specialities (KESES) at its 6th Annual General Meeting and 4th Annual Scientific Conference in 2015 takes great pride in hosting the 3rd ISGE African Meeting in Nairobi, Kenya.

Dr. Rafique B. Parkar
CHAIRMAN

Kenya Society of Endoscopic Specialities
& Local Organising Committee

The Society has over the years been at the forefront in the development in an interest in Laparoscopic Surgery in this Region and at the same time disseminating skills extensively amongst the younger Surgeons on the African Continent.

We are indeed honoured to partake this very important meeting.

Uncover memories that will last a life time!

Unlike any other destination on earth, Kenya is the essence of diversity. Kenya - 'the Safari Capital of the World' and where you will find some of the finest beaches on the Indian Ocean.

Unlike anywhere else on the planet, in Kenya you will find savagely beautiful wildernesses and ethereally snow-capped peaks; crater-studded valleys and wildlife-teeming plains; flamingo-frosted lakes and tropical rainforests.

The last true Eden, Kenya is home to the longest rift in the earth's crust and its youngest volcanoes.

Kenya is the only land in which you can visit the "Cradle of Mankind", sail a Swahili dhow past a 16th century Portuguese fort and meet a Maasai warrior.

Kenya . . . a world of wonder in a world of its own

From the moment you touch down and step into the gentle African air, Kenya will give you a warm welcome.

Ancient civilizations and cosmopolitan resorts, Kenya has something for everyone . . . From places of interest around Kenya's capital city, Nairobi - to the beating heart of the African bush - or the vast plains of the Masai Mara or the pristine white sands, lapped with the gentle waves of the Indian Ocean on the Kenya Coast.

Travel to these magical corners of Kenya and discover the beauty of Kenya.

Magical Kenya

An ancient land born of ice and fire, only Kenya offers such a uniqueness of bio-diversity. Such are the extremes of the Kenyan climate, ranging from tropical heat to glacial ice, that it has formed a diversity of habitats found nowhere else on Earth.

A vast mosaic of lion-gold savanna, rolling grasslands, ancient rainforests and volcanic plains, Kenya rises from the idyllic shores of the Indian Ocean to the snow-capped peaks of Mount Kenya which, at 5,199 metres above sea level, is an extinct volcano some three and a half million years old.

Kenya shelters some of the most ancient, fragile and diverse wildlife on Earth. The Eden of the planet, Kenya's plains and forests offer refuge to the last of the big cats, the world's greatest herds of elephant, the endangered white and black rhino and a number of endemic species that occur nowhere else on Earth.

It is highly recommended to book, confirm and pay for your Safaris EARLY to avoid last minute disappointments. August is peak safari season and places at good facilities are limited and are booked early.

LAKE NAKURU NATIONAL PARK

Just two hours drive from Nairobi, Lake Nakuru is among Kenya's finest national parks. Though famous for the pink flamingoes lining the shores of the lake and the hundreds of preening white pelicans, the small park (only 180 sq km) is home to the black and white rhino, the tree-climbing lions, leopard, large herds of buffaloes and the rare Rothschild's giraffes as well as many other animals and birds.

"There might have been fifty thousand birds in a bay"

MASAI MARA

Set in the heart of Africa's Great Plains in Kenya, the Masai Mara boasts 1,672 sq. kilometers of unspoilt wilderness. With its abundant wildlife and over 450 species of birds, Masai Mara is Kenya's most spectacular and finest wildlife reserves, offering the best game and bird-viewing not only in Kenya, but anywhere in Africa. The views across the rolling golden grasslands studded with acacia trees, rivers and forests are dazzling, the sense of space is overwhelming. The Reserve borders Tanzania and the two countries share the vast Serengeti plains, with wildlife free to roam between Kenya and Tanzania in search of food.

Throughout the year the Masai Mara is a place of natural drama, a kaleidoscope of colour and life. Most stunning of all are the months between July and October, when the savannah teems with animals during the Great Wildebeest Migration. Millions of wildebeest gather in the Masai Mara in one of the natural wonders of the world - 'The Great Wildebeest Migration'.

'The Eight Wonder of the Natural World - The Great Wildebeest Migration'

MOMBASA

Located on the Eastern coastline of Kenya bordering the Indian Ocean, Mombasa is the ideal beach destination with sparkling white sands and lush greenery. Mombasa offers a diverse marine life, world-class hotels and friendly atmosphere. Whether you're looking for a relaxing break on the white beaches, lapped by the azure waters of the Indian Ocean, or something a bit more adventurous- diving, snorkelling, water-skiing or wind-surfing, Mombasa offers it all.

OL PEJETA CONSERVANCY

The Ol Pejeta Conservancy – a 90,000-acre private wildlife conservancy – situated on the equator, in Kenya's Laikipia District, between the foot hills of the Aberdares and the magnificent snow-capped Mount Kenya. The Conservancy boasts an astounding variety of animals, including the Big Five (the rhino, leopard, elephant, buffalo and lion), Grevy's zebra, Jackson's hartebeest, cheetah and chimpanzee. The combination of amazing wildlife and stunning views across the open plains of Ol Pejeta guarantees an unforgettable safari experience.
