There will be resident rates, group discounts and discounts for AFPSS members.

Dear Friends and Colleagues,

On behalf of the 7th Septorhinoplasty Course and the 7th Asian Facial Plastic Surgery Society Congress organizing committee, I would like to extend a warm welcome to you to participate in this premier facial plastic surgery meeting. It is no coincidence that both courses are into their 7th instalments since facial plastic surgery has quickly established itself within the region. This conjoint course aims to provide a comprehensive program which would have practical value to you and your patients by emphasizing contemporary principles and techniques.

The program will run from the 6th to the 8th of July 2016 and includes a cadaveric workshop focused on surgical techniques in septorhinoplasty and facial plastic surgery, two workshops targeted at office based techniques and procedures, panel discussions, video instructional sessions and systematic didactics covering all aspects of this specialty.

We set out to assemble an outstanding faculty of who's who in facial plastic surgery from the region. Over 25 faculty will bring a diversity of knowledge and expertise making the meeting a truly multidisciplinary symposium. Our keynote speakers, known internationally for their knowledge and scientific contributions, promise to bring a concise and up to date perspective of

facial plastic surgery. The highlight of this symposium of course will be the Symposia, cadaveric and office based workshops as well as the video instructionals.

To engage budding facial plastic surgeons and residents, time and place has been set aside for free papers and poster presentations with awards for the best speaker and poster presented.

Aesthetic physicians and practitioners keen on office based procedures will also benefit from the "Live" filler and Botulinum toxin workshop that will be run by some of the leading practitioners from the region.

It is with great pleasure that I welcome you to Singapore to join us at this wonderful meeting. We are confident that you will find the 7th Setorhinoplasty Course and 7th Asian Facial Plastic Surgery Society Congress to be an amazing educational experience and one that you can't afford to miss.
