

Gynecologic Ultrasound Course

May 8-9, 2026

**Now
Accredited!**

**MOC Section 1
Credits**

Organized & Facilitated By:

Mathew Leonardi, MD, PhD

Gynecologic Surgeon Sonologist, Hamilton Health Sciences
Associate Professor, McMaster University Department of
Obstetrics & Gynecology

Guest Lecturer

Jessica Priesler Romanow, MD
Hospital Clínico U. de Chile

Target Audience

Gynecologists, Radiologists, Sonographers

Location

St. Joseph's Healthcare Hamilton & McMaster University
Medical Centre; Hamilton, ON

Learning Objectives

By the end of the program the registrants will:

- Define normal anatomy, variants, and sonographic evaluation of the uterus to accurately identify and interpret uterine abnormalities.
- Analyze the sonographic evaluation of endometriosis in extra-uterine/ovarian regions.
- Familiarize themselves with interventional gynecologic ultrasound procedures, specifically sonohysterography and tubal patency evaluation.
- Discuss challenging cases and make informed clinical decisions through interactive case studies.
- Demonstrate increased knowledge by participating in hands-on scanning opportunities on live patients.
