IFBLS 2018 has three themes:

E-health, Gender Medicine and Personalised Medicine

This era is characterized by great technological development. Biomedical Laboratory Science plays an important role in each of these new areas of medicine.

IFBLS2018 will focus on the impact of technology in Biomedical Laboratory Science.

Attendees will have the opportunity to learn how gender and personalised medicine are important to providing patient-centred healthcare and how they will become integral to Biomedical Laboratory Science.

Topics to be presented include:

- Biosafety
- Laboratory management and patient safety
- Pre-analytical phase
- Transplantation and Transfusion Programs
- Stem Cells and Transplantation
- Pediatrics and Biomedical Laboratory Science
- Pharmacogenomics, OMICS
- Microbioma
- Code of Ethics
- Emergency Biomedical Laboratory Testing
- Application of Information Communication Technology in Biomedical Laboratory Science
- Transplantation and Transfusion Programs: role of Biomedical Laboratory Science
- Biobanking
- Digital Medicine and Biomedical Laboratory Science
- Prenatal Diagnostics/In Vitro Fertilization
- Citology/Istology
- Education CPD
- Antibiotic resistance in microbiology
- New prospectives in mass spettrometry iphenate techniques on trace identification in the field of environmental and occupational toxicology
- New approach in industrial Hygiene and toxicology labs
