Learn about the patented McGinley Vascular Pressure (MVP) Treatment, featured in the March 2017 issue of **Runner's World Magazine** as one of **"five cutting-edge therapies"** in sports medicine.

COURSE DIRECTOR

Joseph McGinley is a Stanford University fellowship trained MSK radiologist with graduate degrees in Mechanical Engineering and Physiology. Dr. McGinley is the past President of Wyoming Medical Society and is a Clinical Instructor at the University of Washington. Dr. McGinley is the Founder and CEO of McGinley Orthopedics, a medical device company developing handheld robotic technologies. Dr. McGinley holds over 75 issued and pending patents for various medical procedures and devices related to orthopedic medicine and medical imaging. Dr. McGinley has been featured on NBC and CBS News as well as in Runner's World and Hemisphere Magazines for development of novel medical treatments.

COURSE DESCRIPTION

Now in its 7th year, this course covers common image guided procedures along with new and developing topics in musculoskeletal intervention. Integrated patient assessment and new treatment options can help physicians expand their practice and skills. The techniques presented address a wide range of clinical issues including arthritis intervention, sports medicine treatments and foot and ankle procedures. Office-based musculoskeletal intervention is a rapidly growing field of medicine. Treating these common medical problems in a time and cost effective manner can strengthen and build a practice.
