WAR ON CANCER 2017

Affordable cancer care in Asia

War on Cancer 2017 will present new thinking on scaling up the response to cancer in lower and middle income countries and innovative ways to finance cancer control in Asia. The Forum will provide an opportunity to re-think how governments, the international community and the private sector can accelerate the funding of improved cancer care. The event will tease out which cancer interventions make best sense, and how they can be efficiently and sustainably financed.

The conference will bring together regional cancer and healthcare stakeholders for a wide-ranging and robust discussion with the broader finance community—with finance ministry officials, global and regional experts in financing healthcare, and private-sector financing and investment, including philanthropic and impact investors.

KEY TOPICS:

- A global or regional fund for cancer control?
- Innovative financing for cancer care in Asia
- Access to cancer medications, palliative care and scaling up radiotherapy and surgery
- Winning with vaccinations?
- Implementing practical strategies
- Cities as the engine to accelerate cancer control

Register before **December 30th** to take advantage of the advance purchase rate.
