Hospital Medicine 2018:

BEST EVIDENCE IN PRACTICE

Hospital Medicine 2018: Best Evidence in Practice symposium will provide cutting-edge information on the most relevant and common conditions seen in the inpatient setting allowing improvement of quality of medical care for hospitalized patients. The symposium features diverse sessions designed to engage you with colleagues and experts. We will discuss anticoagulation management for atrial arrhythmias and venous thrombosis, current management of severe infections, pain management strategies with both opioid and non-opioid alternatives, as well as updates in COPD, asthma and sleep apnea. Take advantage of the opportunity to learn from nationally recognized experts in their fields.

Improve Your Knowledge To:

- Describe effective pain management strategies for using opioid and non-opioid alternatives
- Highlight the importance of diagnosis and management of obstructive sleep apnea in the inpatient setting
- Interpret current guidelines for treating atrial fibrillation and atrial flutter and apply them to clinical practice
- Recognize optimal inpatient management of severe infections, particularly pneumonia, skin and soft tissue infections, and sepsis
- Review current strategies for inpatient treatment of asthma and COPD

Who Should Attend
