President's Invitation

I would like to invite you to this year's Wisconsin Society of Anesthesiologists (WSA) Annual Meeting being held in Milwaukee at the Potawatomi hotel. The facility is elegant and has lots of entertainment onsite. This is conveniently located

near downtown Milwaukee with lots of fine dining options onsite and nearby. The Harley Davidson museum is next door as well.

This year's meeting is being organized by Dr. Peggy Kim and Dr. Alaa Abd-Elseyed, who are pain practitioners at the University of Wisconsin, Madison. They have put together a great program with many topics on timely issues such as perioperative pain management, marijuana and CBD oil, infusion therapy and demonstrating value of our specialty. We again will offer multiple ultrasound workshops. We will also feature a panel discussion on physician wellness, burnout and suicide.

A special session this year includes four nationally recognized speakers who will speak on safety considerations when using opioid analgesics. This session is being sponsored by the American Society of Anesthesiologists (ASA).

We have also planned a special event for Saturday night. We have reserved tickets to the Northwestern Mutual Legends Club at Miller Park to watch the Milwaukee Brewers play the Chicago Cubs. Be sure to purchase your tickets early as there are limited spots available.

This will be a great chance to earn continuing medical education and is one of the benefits of your WSA membership, so please join us for this easily accessed learning opportunity.

James J. Nicholson, MD

President, Wisconsin Society of Anesthesiologists

Goals & Objectives

After participating in this activity, the attendee will be able to:

- Discuss common usages and indications for medical marijuana and/or CBD oil, as well as the medicolegal issues and anesthetic/perioperative implications associated with use of these substances.
- Appreciate opportunities for utilizing different infusions for pain in the perioperative setting.
- Develop strategies and/or protocols for improving pain management in adult and child ICU settings.
- Articulate opportunities for implementing value-added services to their institution/hospital such as ERAS, chronic pain clinic, and acute/regional/inpatient pain services.
- Demonstrate anatomical placement and understand the use of ultrasound guidance for common regional/chronic pain blocks and/or point of care uses.
- Identify important current medicolegal issues facing anesthesiologists.
- Describe ways and strategies to improve preoperative patient care.
- Recognize the warning signs of physician burnout and suicidality and discuss ways to mitigate these risks and improve physician wellness.
- Develop individualized pain treatment plans, including nonpharmacologic and/or pharmacologic (non-opioid and opioid analgesics) as appropriate.
