19 Dental CE Hours Approved
Nationally Approved PACE Program
Provider for FAGD/MAGD credit.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
1/1/2023 to 12/31/2024
Provider ID# 218165

David Sarver D.M.D., M.S. Irwin Smigel Keynote Speaker

“Contemporary Concepts in Dentofacial Esthetics”

Dentistry has undergone a digital transformation ranging from diagnostics to aligners, custom fixed appliances and appliances printed in the office. Diagnosis comes first followed by the treatment methodology. The orthodontic profession has changed in stride with all the changes that have occurred in dentistry and remains in lockstep with how dentists plan their cases. The interaction between the two is important for excellent collaborative care. This transformative presentation will address contemporary smile design coupled with facial characteristics to “fit the smile to the face.” Learn how to elevate good results to great results.

David Hornbrook D.D.S. *“Taking Control for Aesthetic and Functional Success”*

One of the hottest topics in dentistry is how to provide predictability and success when taking bite records for large restorative cases. If muscles are given the freedom to place the condyles in their most stable position, long-term perceptibility and health can be achieved. Learn how to use the “Freedom Appliance” to obtain a muscle driven bite termed “Muscle Centric,” Step-by-step sequencing will be discussed about determining vertical dimension and developing optimal aesthetics when restoring a debilitated dentition.

Ben Miraglia D.D.S. *“A Collaborative Approach to Malocclusion”*

Malocclusion is a relatively new disease for humans. This course will discuss the relationships of occlusion to sleep disordered breathing as well as Temporomandibular Disorders. The primary focus will be on treating the cause versus treating the symptoms. Understand the differences between nose breathing and mouth breathing. Clinical cases will be shown to share a collaborative treatment approach in all age groups. Learn how to implement airway health into your practice.

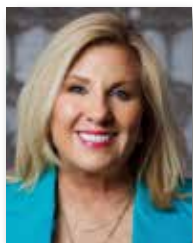

Joyce Bassett D.D.S. *“Catapult Your Restorative Workflow and Aesthetic Cases with the Power of Digital Design - A Game Changer for Precision”*

This course will outline the steps necessary to digitally take a case from data collection through design, using in-house CAD software. This digitally generated approach will guide the dentist and expedite important design decisions, provide unique patient communication options, and improve the predictability of the aesthetic outcome. Develop presentation skills to instill confidence and brand you as the go-to dentist. You will leave the course ready to catapult your practice to the top level of Aesthetic Dentistry.

Jason Olitsky D.M.D. *“No-Preparation Porcelain Laminate Veneers”*

No-preparation veneers are a high-demand dental treatment option that can attract patients to your office. See how to produce highly aesthetic and healthy long-lasting results with no preparation porcelain veneers. Learn important criteria in case selection and how to make more cases fit the criteria. Observe the details of the technique from diagnosis and design to final cementation of upper and lower arch smile transformations with results that rival traditional preparation cases.

Debra King D.M.D. *“The Power of ‘Can I’ and How it Relates to Your Dental Practice”*

Building competence and confidence are paramount for the success of your practice. Partnering with your team with shared goals and ideals is a vital part of this process. Achieving a win-win for your patients, your team and your business requires a clear vision and plan. Learn important aspects of how to motivate yourself and your team to build the practice of your dreams. See how the implementation of these principles has been instrumental in building a world-renowned dental practice.

2024 AMERICAN SOCIETY FOR DENTAL AESTHETICS *Amelia Island* HANDS-ON WORKSHOPS

R-1 Howard S. Glazer D.D.S. "I Have It...You Need It!"

This is a program about real dentistry for real people by a real dentist! See a potpourri of materials and techniques that will make your day at the office easier, more productive and fun! Topics may include Composites, Adhesives, Bio-Active Materials & Techniques, Impression & Provisional Materials, Rotary Cutting Instruments, Lasers, Curing Lights, Patient Communication Tools, and Cements. Learn how to integrate these new concepts into your practice to enhance patient outcomes and profitability.

R-2 Marcos Vargas D.D.S., M.S. "Anterior Composites: A Blueprint for Daily Success"

Patient demands for aesthetic, conservative dentistry have driven the need to produce imperceptible anterior restorations. Modern resin composite materials have the potential to create functional, long-lasting, cost effective, predictable anterior restorations. This hands-on will demonstrate shade selection, cavity preparation design, resin composite manipulation, contouring, surface characterization, and polishing to predictably create highly aesthetic restorations.

R-3 Rolando Nunez D.D.S., M.S. "Bonding and Beer: Crafting the Perfect Bond"

Robert Margeas D.D.S. "Practical Techniques to Improve Practice Profitability"

Dental ceramics have revolutionized restorative dentistry, offering unparalleled aesthetics and durability. However, achieving reliable bonding to these materials presents unique challenges for clinicians. This course will cover the intricacies of bonding to dental ceramics, specifically porcelain, lithium disilicate and zirconia. Participants will learn the latest bonding techniques, materials, and technologies to optimize adhesion to these three distinct ceramic types and gain invaluable insights into surface treatment protocols for each material.

In today's competitive healthcare landscape, it's essential for dental practitioners to optimize their workflows, maximize patient throughput, and streamline processes while maintaining the highest standards of patient care. This course is designed to equip dental professionals with practical strategies and techniques to enhance productivity and efficiency. Learn real-world techniques and gain practical skills while delivering exceptional patient skill from this talented and renowned clinician and teacher.

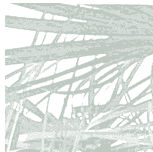

F-1 George Freedman D.D.S. "3-D Printing: The Future is Here and Will Change Your Practice"

3-D printing will change the dental world far more than the cosmetic/esthetic revolution did a generation ago and far more quickly. The challenges lie in the new materials, new technologies and limitless applications. How to bond, cement, impress (yes!) for the ultimate digital workflow. Innovative diagnostic technologies are also equipping the dental profession with ever greater latitude for treatment and maintenance opportunities.

F-2 Jason Olitsky D.M.D. "Dental Photography Workshop"

Learn the skills and techniques needed to incorporate intra-oral photography into your practice. This course will show you how to take and manage high quality digital photographs in promoting,

documenting, evaluating and communicating the key elements of comprehensive dentistry. An easy-to-understand system of how to use photography to get better aesthetic results will be presented, that can be immediately implemented into your practice.

F-3 Marcos Vargas D.D.S., M.S. "Daily Posterior Composites Made Easy"

Posterior composite resin restorations are a daily procedure in practice. Sometimes they can be challenging to perform in an efficient matter and obtain sensitive free restorations with great proximal contact and shape. This hands-on will provide the practitioner with tips and techniques to efficiently perform posterior composite restorations in daily practice. Learn step-by-step procedures from a master in direct composite restorations.

S-1 Michael Gelb D.D.S., M.S. "Airway Centric® Workflow"

This hands-on session will give you the opportunity to see how the airway can be stabilized with nightguards and devices and can be enhanced with orthodontic appliances and clear aligners. The focus will be on a digital workflow beginning with diagnosis and recognition and include bite taking, design and insertion of these devices. Learn how to implement these new techniques and devices into your practice and improve the quality of life for your patients.

S-2 David Hornbrook D.D.S. "Tack and Wave® Veneer Cementation: Optimizing Efficiency and Predictability"

One of the most stressful procedures dentists do is placement of porcelain veneers. There are so many factors, including fit, shade tissue response, and meeting patient expectations. Discussions will include try-in, cement selection, dentinal adhesion, cement cleanup, and finishing all in a very sequential step-by-step format. Each participant will have the opportunity to place veneers on a prepped model. Don't miss this opportunity to learn from this great master.

S-3 Thomas Dudley D.M.D. "Achieving Excellent Results with Versatile Bioactive Materials"

Akimasa Tsujimoto D.D.S., Ph.D. "The Aesthetic Potential of Translucent Zirconia with Universal Resin Luting Cement"

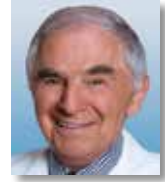

Bioactive materials represent a revolutionary approach in restorative dentistry, offering enhanced biocompatibility, durability, and therapeutic benefits compared to traditional materials. Versatile ion-releasing materials have been developed that can be used in a variety of applications including direct restorations, liners and bases, sealants, and cementation. Learn practical skills to effectively use bioactive materials in various dental procedures, leading to superior clinical outcomes and patient satisfaction.

Recent material advances in zirconia have broadened its range of applications. Translucent zirconia has high mechanical properties that enable its use as a thin veneer. Highly aesthetic natural tooth matching creates new options for minimally invasive restorative treatments with veneers. Improvements in universal resin luting cements have greatly simplified the procedures, making them more widely applicable. Learn how to use translucent zirconia and universal resin luting cement to place minimally invasive aesthetic veneers.

2024 Program Schedule

Wednesday, October 30, 2024

3:30-5:00 pm Registration
6:30-8:00 pm Welcome Reception (light hors d' oeuvres)

Thursday, October 31, 2024

7:30-8:30 am Breakfast and Registration-EXHIBITS OPEN
8:30-10:15 am David Sarver DMD MS
"Contemporary Concepts in Dentofacial Esthetics" *Irwin Smigel Keynote Speaker*
10:15-10:45 am Break-EXHIBITS OPEN
10:45am-Noon David Hornbrook DDS "Taking Control for Aesthetic and Functional Success"
Noon-1:30 pm Lunch & Learn-EXHIBITS
1:30-4:30 pm *Hands-On Workshops*
(R-1) *Howard Glazer DDS "I Have It.. You Need It"*
(R-2) *Marcos Vargas DDS MS "Anterior Composites: A Blueprint for Daily Success"*
(R-3) *Rolando Nunez DDS MS "Bonding & Beer: Crafting the Perfect Bond"*
Robert Margeas DDS "Practical Techniques to Improve Practice Profitability"
7:00-9:30pm Honors Buffet Dinner
Induction of Smigel Scholars, New Members, Fellows, and ABAD

Friday, November 1, 2024

7:30-8:30 am Breakfast and Registration-EXHIBITS OPEN
8:30-10:00 am Ben Miraglia DDS "A Collaborative Approach to Malocclusion"
10:00-10:30 am Break-EXHIBITS OPEN
10:30-Noon Joyce Bassett DDS "Catapult your Restorative Workflow and Aesthetic Cases with the Power of Digital Design - A Game Changer for Precision and Predictability"
Noon-6:00 pm Golf Tournament
Noon-1:30 pm Lunch- EXHIBITS OPEN
1:30-4:30 pm *Hands-On Workshops*
(F-1) *George Freedman DDS "3-D Printing: The Future is Here & Will Change Your Practice"*
(F-2) *Jason Olitsky DMD "Dental Photography Workshop"*
(F-3) *Marcos Vargas DDS MS "Daily Posterior Composites Made Easy"*

Saturday, November 2, 2024

7:30-8:30 am Breakfast and Registration-EXHIBITS OPEN
8:30-10:00 am Jason Olitsky DMD "No-Preparation Porcelain Veneers"
10:00-10:30 am Break-EXHIBITS OPEN
10:30am-Noon Debra King DDS "The Power of 'Can I' and How it Relates to Your Dental Practice"
Noon-1:30 pm Lunch
1:30-4:30 pm *Hands-On Workshops*
(S-1) *Michael Gelb DDS MS "Airway Centric® Workflow"*
(S-2) *David Hornbrook DDS "'Tack & Wave' Veneer Cementation: Optimizing Efficiency and Predictability"*
(S-3) *Thomas Dudley DMD "Achieving Excellent Results with Versatile Bioactive Materials"*
Akimasa Tsujimoto DDS PhD "The Aesthetic Potential of Translucent Zirconia with Universal Resin Luting Cement"
6:30-7:15 pm Reception
7:00 pm Commemorative Members Portrait
7:30-10:30 pm Directors' Dinner/Dance "BISCO DISCO" (optional disco chic attire)

Conference Registration

Each participant must complete a separate registration form including contact information. Guest's names should be added to the attendee registration. Hotel registration is separate.
