Third Annual Advances in Pulmonary Medicine CME Symposium

Course directors

**Sangeeta M. Bhorade, MD, and
Sharon R. Rosenberg, MD, MS**

The existence of gaps between established scientific evidence and actual care gives rise to the need for dedicated knowledge translation. There have been several recent advances in the treatment of patients with various pulmonary conditions, including COPD, cystic fibrosis, IPF, lung cancer, noninvasive ventilation, pulmonary hypertension, pulmonary transplantation and sarcoidosis.

This educational program is designed for pulmonologists and other healthcare providers involved in the care of patients with pulmonary disease. There will be didactic lectures, two hands-on breakout sessions and case discussions. We hope you will join the Northwestern faculty on Friday, September 16 for an informal and interactive discussion.

Program objectives

After attending this educational activity, participants should be able to:

- 1 Recognize the latest developments in the diagnosis and treatment of pulmonary disorders.
- 2 Describe the risks and benefits of therapeutic options including clinical trials for patients with lung diseases.
- 3 Discuss multidisciplinary technological advances in the treatment of patients with lung diseases.
- 4 Explain the role of lung transplantation in the treatment of patients with advanced lung diseases.

To register online, please visit www.cme.northwestern.edu/conferences. For more information, please contact Sarah Baggs, Continuing Medical Education Administrator, at Northwestern Memorial HealthCare at 312.926.7975.
