INVITATION

We are pleased and honored to invite you to participate in the

1st World Congress of Dermatologic and Aesthetic Surgery /
38th Annual Meeting of the International Society for Dermatologic Surgery

to be held November 8-12, 2017 in Bangkok, Thailand.

ISDS 2017 is an international congress of dermatologic surgery renowned for generations, hosted by the International Society of Dermatologic Surgery (ISDS).

Approaching our 38th conference, we anticipate over 1,000 participants (ranging from Dermatologists to aesthetic specialists including Plastic Surgeons, ENTs, Gynecologists and Maxillar Facial Surgeons) from all over the world including 650 APAC dermatologists and other aesthetic practitioners, making ISDS 2017 one of the largest aesthetic conferences to date.

So far the range and depth of the cosmetic and dermatologic surgery field is growing remarkably and the growth is forecast to continue in the future. During the ISDS 2017 we will demonstrate the newest innovations in medical devices, pharmaceuticals, cosmetics and other relevant industries to all participants.

Moreover, ISDS 2017 will also provide opportunities to effectively promote sponsoring companies through a variety of exhibitions and sponsorship programs with a specific goal in mind: to increase sales and to broaden domestic and overseas networks.

We cordially ask for your participation and support of the exhibition and sponsorship program. We are confident that this is a golden opportunity not only for the ISDS 2017, but also for the development of your company.

Sincerely,

Deborah S. Sarnoff, M.D.
ISDS President

ABOUT ISDS

The International Society for Dermatologic Surgery (ISDS) was founded in 1978 in response to a need for a worldwide forum for dermatologists who offer surgical treatment to their patients and is a time honored society that has held annual meeting 34 times. The ISDS brings dermatologic surgeons together so they may exchange innovative techniques and work for standardization and improvement of training programs in dermatologic surgery.

In addition, the ISDS encourages continuing education and research in the field of dermatologic and cosmetic surgery and related fields through an Annual scientific Congress. The annual meeting is concerned with discussing new advances in classical Dermatologic Surgery such as dermatologic surgery cancer and beyond in other innovative fields such as laser therapies, the use of botulinum toxin, alternative wrinkle treatments and a variety of other cosmetic procedures.

The international annual meeting gives the participants the opportunity to create individual visions and discuss the latest advances, share experiences and form international friendships with the leaders in the field during the scientific program as well as the events of the social agenda.
