WHO SHOULD ATTEND

Dermatologists, dermatology residents, family practitioners, physician assistants, nurse practitioners, nurses, and other healthcare professionals who treat diseases of the skin.

LEARNING OBJECTIVES

At the conclusion of this live activity, participants should be better able to:

- Apply the most current treatments for common skin diseases.
- Identify potential adverse effects and levels of efficacy of newer dermatologic treatments.
- More effectively individualize patient treatment strategies by considering the full range of current and emerging therapeutic options for atopic dermatitis.
- Discuss the most recent information on the epidemiology and pathogenesis of atopic dermatitis and how likely to affect the management of patients with atopic dermatitis.
- Evaluate the role of emerging and currently available biologic agents in treating psoriasis and how they will be incorporated into practice.
- Diagnose problems in patients with complex medical dermatoses more accurately.
- Summarize the recent updates on the pathophysiology and treatment of acne and rosacea.
- Recognize and apply novel therapeutic developments for contact dermatitis and eczema.
- Analyze current and investigational treatments for the management of tinea and onychomycosis.
- Discuss approaches to treating pediatric inflammatory skin disease.
