

Fourth International Conference on Cancer and the Heart
November 4-5, 2016

Preliminary Agenda

Friday, November 4, 2016

Registration and Continental Breakfast: 7:00-8:00 am

Sessions: 8:00 am - 6:00 pm

Final Lecture: 4:10-4:30 pm

Welcome Reception / Poster Session: 4:30-6:00 pm

Saturday, November 5, 2016

Registration and Continental Breakfast: 7:00-8:00 am

Sessions: 8:00 am - 4:30 pm

Educational Methods

- Lectures
- Question and Answer
- Panel Discussion
- Case Studies
- Poster Session
- Poster Presentations

Topic List

Onco-Cardiology: Past, Present, Future

Establishing an Onco-Cardiology Service

Understanding the Mechanisms of Cardiotoxicity

Chemotherapy-induced Cardiotoxicity

Childhood Cardio-Oncology

Extending the Lifespan of Aging Survivors of Childhood Cancer

No Safe Dose for Anthracyclines: Preclinical and Clinical Data

Non-Anthracycline Cardiotoxicity

Managing Breast Cancer Patients with Heart Disease from the Oncologist's Perspective

Novel Anti-Cancer Therapies and the Cardiovascular Effects

Management of Leukemia: Ibrutinib, Hypertension and Atrial Fibrillation

New Toxicities with Targeted and Immune Therapies

Immunotherapy: BRAF+MEK Inhibitors and Incidence of Myocarditis

Imaging and Detection

Use of Imaging in Managing Cardiotoxicity

Use of Biomarkers in Onco-Cardiology

Utilizing MRI in Cancer Patients

Prevention of Cardiotoxicity

Cardiovascular Complications of Radiation Therapy

Reduction of Late Radiation Induced Cardiac Toxicity: Utilization of Technology to Spare the Heart

Exercise Training to Optimize Heart Health for Cancer Prevention and Control

Vascular Toxicity in Cancer Patients

Endothelial Dysfunction in Cancer-Induced Cardiovascular Disease

Updates in the Management of Neoplastic Pericardial Diseases

Advances in the Prevention and Treatment of Cancer-Associated VTE: NOACS

Cardiac Interventions in Cancer Patients with Thrombocytopenia

Carotid Artery Diseases Relate to Radiation Therapy: Challenges & Opportunities

Special Issues

Cardiovascular Issues in Pregnancy after Cancer

Cardiac Tumor Management

Heart Failure Syndromes and Treatment Strategies

Management of Advanced Heart Failure in Early and Late Stage Cancer

Mesenchymal Stem Cell Therapy for the Treatment of Anthracycline Cardiomyopathy

Differential Diagnosis in Cancer Patients with Left Ventricular Dysfunction

Cancer Survivors and Chemotherapy-induced Left Ventricular Dysfunction: Can Heart Failure Medications be Safely Withdrawn after LVEF Recovery?

MD Anderson Practices in Onco-Cardiology

Management of Cardiac Devices During Radiation Therapy

QT Monitoring In Chemotherapy

Left Ventricular Ejection Fraction

Radiation and Cardiovascular Complications

Managing Acute Coronary Syndrome with Thrombocytopenia

Review of Drugs Causing Cardiotoxicity
