**To RSVP, please contact:
lorikucharski@
emdrcenterofthepikespeakregion.com**

PLUS: Optional Advanced Training Opportunity!

Approved for 6 EMDRIA CEU's

This live, online workshop will explore how, why, and when to make clinically- sound modifications to the EMDR protocol to best serve the youngest of clients. EMDR can result in rapid and sustaining results.

Learning developmentally-appropriate adjustments will help ensure that this effective treatment will offer healing for children affected by trauma, decreasing maladaptive behaviors, and increasing self-awareness and regulation. Learning ways to use EMDR with children and their families can facilitate healing and attachment within the parent/child dyad.

This training will include lecture, videos, and practice exercises. Participants will learn adaptations to using of EMDR children of various ages and their families when appropriate.

About EMDR Therapy: EMDR Therapy is for all ages and most populations, and this training covers an overview of using EMDR Therapy with PTSD, anxiety, panic, phobias, complex trauma, dissociation, children and adolescents, pain, grief, addictions, and more! For more information, please visit www.emdria.org.
