How to Become a **CARDIOVASCULAR INVESTIGATOR**

In response to the growing national shortage of clinician scientists in general and cardiovascular researchers in particular, the American College of Cardiology (ACC) offers *How to Become a Cardiovascular Investigator*, with the overall goal of priming the “pipeline” of potential cardiovascular investigators. This mission-critical conference offers a unique curriculum of didactic workshops, intimate interactive sessions and numerous opportunities for one-on-one networking with the faculty.

As a Program Director, your input is critical to evaluating the individuals who are accepted into this free course. Please fill out the fields in this form below, and please feel free to reach out to the course manager, Veronica Wilson (202-375-6555; vwilson@acc.org) with any questions.

Program Director Recommendation Form	
Program Director Name	
Program Director Phone #	
Applicant's Name	
Your Institution	
Will you approve time off for the applicant if they are selected to participate in this course?	☐ Yes ☐ No
How would you rate the applicant's interest and potential for pursuing cardiovascular research?	(1 = Poor; 5= Excellent) 1 2 3 4 5
