LEARNING OBJECTIVES_

This two day conference will allow delegates to refresh their understanding of venous return, cardiac output and the main differences between the right and the left sides of the heart.

Key take home messages on how to interpret adequacy of perfusion, understand the cause of haemodynamic instability and set individualised therapeutic targets will also be provided. At the conclusion of this two day comprehensive conference, delegates will be able to interpret and guide therapy for different pathologies using arterial and central venous pressure traces, echocardiography and advanced cardiac output monitors.
