115 W 5th St

Tulsa, OK 74103

Friday, August 10, 2018

7:00 – 8:30 pm **Social / Dinner Program @ El Guapo**

7:30 – 8:30 pm **Current and Emerging Therapies in X-linked Hypophosphatemic Rickets**

Eric T. Rush, MD, FAAP, FACMG

Objectives:

1. Understand the pathophysiology of X-linked hypophosphatemic rickets (XLH)
2. Contrast the benefits and the limitations of current XLH therapy
3. Explore emerging use of FGF-23 antibody to treat underlying cause in XLH

Saturday, August 11, 2018

7:00 – 8:00 am **Registration / Continental Breakfast**

8:00 – 8:15 am **Welcome / Pre-Program Assessment**

8:15 – 9:15 am **Role of metagenomic determinants in childhood obesity and body fat partitioning**

Nicola Santoro, MD, PhD

Objectives:

1. Understand the role of human gut microbiome
2. Understand the relationship between gut microbiome and obesity
3. Understand the potential therapeutic role of human microbiome in obesity

9:15 - 10:15 am **MTC and MEN2: Past, Present, and Future**

Steven G. Waguespack, MD, FACE

Objectives:

1. To define MTC and MEN2 and review their pathophysiology
2. To describe the clinical presentations of MTC and MEN2
3. To discuss management of MTC and MEN2 in the context of guidelines and novel therapeutics

10:15 – 10:45 am **Break**

10:45 - 11:45 am **Interactive Case Discussion**

Steven G. Waguespack, MD, FACE

11:45 – 12:45 pm **Diagnosis and Treatment of Diabetic Retinopathy 2018**

Blake Cooper, MD

Objectives:

1. Identify who would benefit from seeing an eye care professional
2. Describe and identify the levels of diabetic retinopathy
3. Have a better understanding of the current management of advanced diabetic eye disease

12:45 – 1:45 pm **Lunch / w Presentation (Non-CME)**

1:45 – 2:15 pm **Dessert break with exhibitors**

2:15 – 3:15 pm **Endocrinology & Telemedicine**

Morgan Waller, MBA, BAPsy, BSN, RN

Objectives:

1. Reflect on the current status of telemedicine practice in endocrinology

2. Identify a telemedicine business/practice model that would work for patients cared for by an endocrinologist
3. Present the benefits of telemedicine for endocrinology patients

3:15 – 4:15 pm

Neuroendocrine Tumor Monitoring and Surgical Treatment

Nelson Royall, MD

Objectives:

1. Describe the available modalities for neuroendocrine tumor surveillance
2. Identify indications and options for curative surgical therapies for neuroendocrine tumors
3. Describe the role for surgical therapies for palliation in neuroendocrine tumors

4:15 – 4:30 pm

Post-Program Assessment

7:00 – 9:00 pm

Bowling @ Dust Bowl

Sunday, August 12, 2018

8:00 – 8:15 am

Pre-Program Assessment

8:15 - 9:15 am

Brain Injury and Pituitary Dysfunction

Michael Sokol, MD, FACP, FACE, CCD

Objectives:

1. Recognize that brain injury can cause pituitary dysfunction
2. Recognize the high incidence of pituitary dysfunction following traumatic brain injury
3. Understands the timing of when to test for pituitary dysfunction following brain injury

9:15 – 10:15 am

Estrogen blocking agents in men in the treatment of hypogonadism and infertility

Ajay Nangia, MBBS, FACS

Objectives:

1. To demonstrate literature of the role of estrogen blockers in hypogonadism and male infertility
2. To demonstrate the male patient type that might benefit from treatment with estrogen blockers
3. To educate about the limitations of the use of estrogen blockers

10:15 – 10:30 am

Post-Program Assessment

10:30 am

Family Brunch
