

ANNUAL SCIENTIFIC MEETING

NOVEMBER 1-2, 2024

HYATT REGENCY • TORONTO • #OOA2024

AT-A-GLANCE PROGRAM - DRAFT

"Evolution of Orthopaedic Care: Where Are We in Ontario?"

The new legislation by the Ontario Government – [Bill 60, Your Health Act, 2023](#) (Bill 60) – regulates “integrated community health services centres,” which are health facilities that may be licensed to provide services in respect of which facility costs are paid by the Ontario government, including surgical and/or diagnostic services (Centres). This has spurred dramatic changes in the landscape of orthopaedic care delivery. Leadership by our surgeons will be required to ensure that patient care is delivered in a manner that addresses latest evidence, efficiency, and is above all patient centric. This meeting will highlight the latest evidence that will drive our decisions and practice, provide an update on the latest developments in care delivery models and technology that is changing the way we practice medicine, and discuss the role of surgeons as leaders in the changing landscape of orthopaedic care.

Overall Learning Objectives:

At the end of this meeting, participants will be able to:

- review the latest published evidence on topics of orthopaedic trauma and elective practice;
- review how to integrate the best available evidence into well-informed practice decisions;
- review the latest developments in orthopaedic care delivery from a systems perspective;
- review the latest developments in orthopaedic care delivery from a technological perspective; and
- discuss how surgeons will need to be creative leaders in the changing landscape of orthopaedic care delivery.

A minimum of 25% of each session will be dedicated to interactivity.
