**American Academy of
Clinical Neuropsychology**
FOUNDATION

The American Academy of Clinical Neuropsychology is approved by the American Psychological Association to sponsor continuing education (CE) for psychologists. The American Academy of Clinical Neuropsychology is also recognized by the New York State Education Department's State Board for Psychology as an approved provider of continuing education for licensed psychologists (#PSY-0094). The American Academy of Clinical Neuropsychology maintains the responsibility for this program and its content.

- Up to 19 CE credits may be earned by attending the live conference workshops.
- Up to 60 additional CE credits may be earned by viewing the pre-recorded workshops.¹

The American Academy of Clinical Neuropsychology receives funds from various test companies and publishers to provide financial support for the conference; however, no financial support from these sponsors is provided for individual workshops that offer CE credit.

¹Please note that per APA guidelines, viewing pre-recorded workshops is considered "home study" for CE purposes and requires passing a quiz based on the content. Some states/provinces may limit the number of CEs that may be earned through home study. Attendees are responsible for knowing their [licensing board's requirements](#).
