**Closing Panel Discussion: Integrating Evidence, Experience, and Everyday Practice**

This interactive panel will bring together all four symposium speakers to synthesize key concepts from the day's presentations and explore their application in real-world endodontic practice. Moderated discussion will focus on clinical decision-making, case selection, management of complications, and strategies for integrating advances in ergonomics, disinfection, follow-up assessment, and guided surgery into daily workflows. Attendees will have the opportunity to ask questions, compare approaches, and gain practical insight into how experienced clinicians navigate complex endodontic challenges while maintaining predictable, patient-centered outcomes.
