LIVE Educational Case

Welcome to EuroPCR 2025

Complex PCI in a TAVI patient: Opening LIVE Educational Case from Clinique Pasteur - Toulouse, France

Anchorperson: J. Fajadet
Spokesperson: T. Cuisset
Procedural Analyst: C. Cook
Operators: N. Dumonteil, B. Farah
Discussants: A. Al Nooryani, M. Coylewright (Pending confirmation), T. Engstrom, K. Hayashida
Cathlab Medical Coordinator: D. Tchetché

- › Welcome and session objectives
J. Fajadet
- › Patient presentation
T. Cuisset
- › Discussion and audience interaction
- › Operator strategy
J. Fajadet
- › LIVE Case procedure
- › Debriefing and audience interaction
- › Session evaluation and key learnings
J. Fajadet

11:30 - 13:00

MAIN ARENA

LIVE Educational Case

TAVI in bicuspid aortic valve disease: LIVE Educational Case from Cleveland Clinic - London, United Kingdom

Anchorperson: P. Maccarthy
Spokesperson: H. Eltchaninoff (Pending confirmation)
Procedural Analyst: N. Piazza
Operators: B. Prendergast, S. Redwood
Discussants: K. Almerri, R. Parma, H. Treede, C. Zukowski
Cathlab Medical Coordinator: V. Androshchuk (Pending confirmation)

- › Welcome and session objectives
P. Maccarthy
- › Patient presentation
H. Eltchaninoff (Pending confirmation)
- › Imaging analysis
N. Piazza
- › Discussion and audience interaction
- › Operator strategy
P. Maccarthy
- › LIVE Case procedure
- › Debriefing and audience interaction
- › Session evaluation and key learnings
P. Maccarthy

11:30 - 13:00

ROOM 253

International Collaboration

How Should I Treat?

Stable CAD and multivessel disease

With the collaboration of the Kazakhstan Society of Interventional Cardiologists and SASCI - South African Society of Cardiovascular Intervention and Swiss Working Group of Interventional Cardiology

Anchorpersons: O. Gaemperli, S. Khan, O. Sakhov

Join us if you want:

- To understand what clinical and procedural factors influence revascularisation strategies in patients with stable angina and multivessel disease
- To know if complete revascularisation should be the management objective in the majority of patients
- To discuss the preferred method in the decision-making process on revascularisation – Should it be anatomic complete revascularisation or functional complete revascularisation?

- › Welcome and session objectives
O. Sakhov
- › Case 1 - Kazakhstan
- › How would I treat case 1?
- › Discussion and audience interaction
- › Case 1 treatment
- › Key learnings Case 1
O. Sakhov
- › Case 2 - South Africa
- › How would I treat case 2?
- › Discussion and audience interaction
- › Case 2 treatment
- › Key learnings Case 2
S. Khan
- › Case 3 - Switzerland
- › How would I treat case 3?
- › Discussion and audience interaction
- › Case 3 treatment
- › Key learnings Case 3
O. Gaemperli
- › Session evaluation and key learnings
S. Khan
- › Closing remarks
O. Gaemperli

ROOM 342A

Abstracts

Nurses and Allied Professionals abstracts session

11:30 - 13:00

ROOM 343

International
CollaborationHow Should I
Treat?**Session with international
collaborations: Bangladesh /
Indonesia / Philippines**

With the collaboration of the Bangladesh Society of Cardiovascular Intervention and Indonesian Society of Interventional Cardiology (ISIC) and Philippine Society of Cardiac Catheterisation and Intervention

Anchorpersons: R. Encabo (Pending confirmation), T. Santoso, M. J. Uddin (Pending confirmation)
Discussants: A. S. Mangkuanom (Pending confirmation), K. Mohsin (Pending confirmation)

- › Welcome and session objectives
M. J. Uddin (Pending confirmation)
- › Case 1 - Bangladesh
N. Alam
- › How would I treat case 1?
A. S. Mangkuanom (Pending confirmation)
- › Discussion and audience interaction
- › Case 1 treatment
N. Alam
- › Key learnings Case 1
M. J. Uddin (Pending confirmation)
- › Case 2 - Indonesia
A. Saboe
- › How would I treat case 2?
A. Saboe
- › Discussion and audience interaction
- › Case 2 treatment
A. Saboe
- › Key learnings Case 2
T. Santoso
- › Case 3 - Philippines
K. Mohsin (Pending confirmation)
- › How would I treat case 3?
K. Mohsin (Pending confirmation)
- › Discussion and audience interaction
- › Case 3 treatment
R. Encabo (Pending confirmation)
- › Key learnings Case 3
R. Encabo (Pending confirmation)
- › Session evaluation and key learnings
T. Santoso
- › Closing remarks
R. Encabo (Pending confirmation)

11:30 - 13:00

ROOM 353

International
CollaborationHow Should I
Treat?**Session with international
collaborations: Hong Kong /
Japan / Taiwan**

With the collaboration of the Cardiovascular Intervention Chapter, Hong Kong College of Cardiology and Japanese Association of Cardiovascular Intervention and Therapeutics and Taiwan Society of Cardiovascular Intervention

Anchorpersons: A. W. K. Chan, H. L. Kao, K. Kozuma (Pending confirmation)
Discussants: K. T. Chan, Y. C. Kao (Pending confirmation), H. Matsumura

Join us if you want:

- To learn the tips and tricks of contemporary PCI intervention with reference to specific algorithms, to enhance efficiency and safety
- To learn the ways to overcome obstacles encountered in daily antegrade and retrograde approach in CTO interventions
- To be aware of potential complications in CTO PCI and how to institute effective measures to rescue the complications

- › Welcome and session objectives
A. W. K. Chan
- › Case 1 - Hong Kong
A. Chan
- › How would I treat case 1?
H. Matsumura
- › Discussion and audience interaction
- › Case 1 treatment
A. Chan
- › Key learnings Case 1
A. W. K. Chan
- › Case 2 - Japan
W. Nagamatsu (Pending confirmation)
- › How would I treat case 2?
Y. C. Kao (Pending confirmation)
- › Discussion and audience interaction
- › Case 2 treatment
W. Nagamatsu (Pending confirmation)
- › Key learnings Case 2
K. Kozuma (Pending confirmation)
- › Case 3 - Taiwan
S. C. Liu (Pending confirmation)
- › How would I treat case 3?
K. T. Chan
- › Discussion and audience interaction
- › Case 3 treatment
S. C. Liu (Pending confirmation)
- › Key learnings Case 3
H. L. Kao
- › Session evaluation and key learnings
K. Kozuma (Pending confirmation)
- › Closing remarks
H. L. Kao

12:00 - 13:00

THEATRE BLEU

Imaging
Case-based
Discussion

Troubleshooting in left main stenting: the role of imaging and physiology

Anchorperson: J. Legutko
Discussants: M. Kovacevic, J. F. Lassen, A. Witkowski

Join us if you want:

- To expand your knowledge on the use of intravascular imaging and physiology during left main stenting
 - To learn how to avoid, detect and treat stent deformation
 - To learn how and when to treat ostial left circumflex after crossover stenting
- Welcome and session objectives
J. Legutko
 - Case 1 - Unintended stent deformation during left main PCI
 - Discussion and audience interaction
 - Case 1 - complication treatment and PCI result
 - Discussion and audience interaction
 - Lecture - My personal guide to unintended stent deformation during left main PCI
N. Holm
 - Discussion and audience interaction
 - Case 2 - Physiology-guided provisional left main PCI
M. Kovacevic
 - Discussion and audience interaction
 - Case 2 - Side-branch physiology and intravascular imaging assessment and treatment
M. Kovacevic
 - Discussion and audience interaction
 - Lecture - My personal guide how to assess and treat side-branch during provisional left main PCI
C. Collet
 - Discussion and audience interaction
 - Session evaluation and key learnings

12:00 - 13:00

THEATRE
BORDEAUX

My Toolbox

My approach for a calcified bifurcation lesions

Anchorperson: M. Abdel-Wahab
Spokesperson: M. Ferenc
Discussants: K. Al Faraidy (Pending confirmation), P. Chiam, C. Gandolfo, T. Gori

Join us if you want:

- To learn how to interpret angiographic and intravascular images of a calcified bifurcation lesion
 - To plan the intervention with the adequate devices in order to make it simple and safe
 - To understand how to analyse the final result and how this may impact clinical outcome
- Welcome and session objectives
M. Abdel-Wahab
 - Case 1 - Calcified "major" bifurcation
D. Milasinovic
 - Discussion and audience interaction
 - Case 1 - Imaging and strategic planning
D. Milasinovic
 - Discussion and audience interaction
 - Case 1 - Bifurcation lesion preparation and intervention
D. Milasinovic
 - Discussion and audience interaction
 - Case 2 - Calcified "minor" bifurcation
M. Mcentegart (Pending confirmation)
 - Discussion and audience interaction
 - Case 2 - Imaging and strategic planning
M. Mcentegart (Pending confirmation)
 - Discussion and audience interaction
 - Case 2 - Bifurcation lesion preparation and intervention
M. Mcentegart (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
M. Abdel-Wahab

12:00 - 13:00

THEATRE
HAVANE

Hot line / Late-
Breaking Trials

Mitral and tricuspid hotline: long-term outcomes

Anchorperson: M. Sitges
Spokesperson: J. Hausleiter (Pending confirmation)
Discussants: R. Makkar, M. Metra (Pending confirmation), G. Nickenig, M. Wild

- Two-year outcomes of T-TEER for tricuspid regurgitation: the TRILUMINATE pivotal trial
G. Singh
- Discussion and audience interaction
- TRI-SCORE for mortality risk prediction after tricuspid valve TEER – the EuroTR registry
M. Gröger
- Discussion and audience interaction
- Management and outcome of failed transcatheter tricuspid edge-to-edge repair: the FATE registry
F. De Marco
- Discussion and audience interaction
- Two-year real-world outcomes for tricuspid edge-to-edge repair: the BRIGHT study
R. Bekerredjian
- Discussion and audience interaction
- Impact of transcatheter edge-to-edge repair on prognosis in atrial functional mitral regurgitation
T. Kaneko
- Discussion and audience interaction

12:00 - 13:00

ROOM MAILLOT

My Toolbox

Integrative step-by-step approach to perform successful CTO interventions: from angiographic evaluation to strategy selection

Anchorperson: E. Smith
Spokesperson: R. Garbo
Discussants: M. Ariotti, T. Hovasse

Join us if you want:

- To master angiographic analysis: learn how to systematically evaluate CTO lesions and identify key angiographic details for success
- To navigate the hybrid algorithm: understand how to select strategies for CTO interventions, from simple to complex techniques
- To attend innovative session with true blinded CTO cases and strategy discussion
- Welcome and session objectives
E. Smith
- How to evaluate CTOs - Reading and interpreting angiograms
A. Gagnor
- Case-based learning - Step-by-step analysis and performing CTO case
A. Avran
- Challenge the audience: how would you have done it?
K. Mashayekhi, A. Nap
- Session evaluation and key learnings
R. Garbo

12:00 - 13:00

ROOM
LEARNING

Learning

ACS with multivessel disease

Facilitators: S. Brugaletta, A. Mcinerney
Media Driver: G. Occhipinti

Join us if you want:

- To learn how to integrate intracoronary imaging findings to determine the culprit lesion in a patient with ACS and multivessel disease
- To discuss the rationale for complete versus culprit only PCI in patients with ACS and multivessel disease, including revascularisation strategy and timing
- To discuss the use of coronary physiology

12:00 - 13:00

IMAGING SKILLS
LAB 1 (352A)

Imaging

Hands on

Simulation-based
Learning

Hands-on TAVI CT

This session has been made possible thanks to the in-kind support of Pie Medical Imaging

Facilitators: M. Barbanti, C. De Biase

Join us if you want:

- To understand, why CT is fundamental in pre-TAVI assessment
- To learn, the essentials of a correct CT pre-TAVI analysis in different scenarios
- To discuss, what findings are of key impact in post TAVI CT

12:00 - 13:00

ROOM 241

Abstracts

Novelty in no-reflow management in STEMI patients

Facilitator: F. Alfonso

- Novel strategies to reduce microvascular obstruction in primary PCI: the OPTI-STEMI trial
V. Cesario
- Discussion and audience interaction
- EnVast mechanical thrombectomy for patients with myocardial infarction and large thrombus burden
M. Valgimigli
- Discussion and audience interaction
- No-reflow and coronary slow flow after STEMI and the role of Cangrelor
I. Gul
- Discussion and audience interaction
- Predicting the unpredictable - Plasma osmolality's role in no-reflow and PCI success in STEMI patient
F. Raja Khan (Pending confirmation)
- Discussion and audience interaction
- Super saturated oxygen therapy in patients with STEMI and action on coronary microcirculation
B. Caullery
- Discussion and audience interaction

12:00 - 13:00

IMAGING SKILLS
LAB 2 (352B)

Imaging

Hands on

Simulation-based
Learning

From CT to PCI: practical insights and hands-on training

This session has been made possible thanks to the in-kind support of GE HealthCare

Facilitators: D. Andreini, F. Bouisset, N. Pinilla

Join us if you want:

- To understand the fundamentals of coronary CT reconstructions
- To gain hands-on experience in manipulating CT reconstructions using dedicated software
- To learn how to plan a coronary PCI effectively using CT data

12:00 - 13:00

SIMULATION
LEARNING
ROOM (STUDIO
A)

Simulation-based
Learning

Left main PCI - provisional one stent strategy

This session has been made possible thanks to the kind support of Boston Scientific

Facilitators: N. Amabile, M. Lesiak (Pending confirmation), G. Stankovic

12:00 - 13:00

ROOM 242AB

Hot line / Late-Breaking Trials

Contemporary challenges in acute coronary syndromes

Anchorperson: M. Sabate (Pending confirmation)
Spokesperson: G. Campo
Discussants: H. Amin (Pending confirmation), V. Kunadian, S. Rab, H. Thiele

- Deferred or conventional stenting in patients with STEMI: 10-year outcome of DANAMI-3-DEFER
J. Lønborg
- Discussion and audience interaction
- Stent-retriever thrombectomy in STEMI with large thrombus Burden. The randomised RETRIEVE-AMI trial
R. Kotronias
- Discussion and audience interaction
- PCI in multivessel disease and STEMI-related cardiogenic shock: A DanGer Shock substudy
R. P. Beske
- Discussion and audience interaction
- Alternative antithrombotic strategies in STEMI with large thrombus burden: ARISE-ARMYDA 7 trial
M. G. Mennuni (Pending confirmation)
- Discussion and audience interaction
- Complete or culprit-only revascularisation in STEMI: 10-year outcome of DANAMI-3-PRIMULTI
T. Engstrom
- Discussion and audience interaction
- FAMOUS-NSTEMI Trial Extended: the prespecified analysis of longer term clinical outcomes
C. Berry
- Discussion and audience interaction

12:00 - 13:00

ROOM 243

Tutorial

How to build a tricuspid programme?

With the collaboration of the PCR Tricuspid Focus Group

Anchorperson: N. Karam
Spokesperson: F. Praz
Discussants: M. Borger (Pending confirmation), N. Buzzatti, J. C. Deharo (Pending confirmation), E. Ho

Join us if you want:

- To discuss the protocols for optimal patients screening
 - To specify the role of each of the heart team members in the tricuspid management
 - To discuss the post-procedural management
- Welcome and session objectives
N. Karam
 - Organisation and minimal requirements on-site for a successful tricuspid programme
R. S. Von Bardeleben (Pending confirmation)
 - Discussion and audience interaction
 - How to optimise the referral network?
N. Ajmone Marsan (Pending confirmation)
 - Discussion and audience interaction
 - Synergy with electrophysiologists to achieve optimal outcomes
J. C. Deharo (Pending confirmation)
 - Successful collaboration with surgery
M. Borger (Pending confirmation)
 - Discussion and audience interaction
 - Quality assessment and measure of success for tricuspid procedures
R. Hahn (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
F. Praz

12:00 - 13:00

ROOM 251

Clinical Cases

Challenging scenarios in patient with multivessel disease

Facilitator: U. Kaul (Pending confirmation)

- Coronary artery disease and aneurysm: a challenging combination
A. Lux
- Discussion and audience interaction
- When all coronary bypass grafts fail and OMT isn't enough: a wild ride on the CTO-PCI roller coaster
J. A. Borovac
- Discussion and audience interaction
- Intravascular lithotripsy is not a panacea for all severely calcified lesions
S. Kageyama
- Discussion and audience interaction
- A rare case of multivessel disease: a young patient with Takayasu's arteritis
L. Esposito (Pending confirmation)
- Discussion and audience interaction
- Simplicity in complexity: navigating long diffuse multivessel disease
M. T. Mohd Noor (Pending confirmation)
- Discussion and audience interaction

12:00 - 13:00

ROOM 252A

Abstracts

PCR's Got Talent Round 1 - Session 1

Jury members: A. Asgar, L. Buchanan (Pending confirmation), A. De Belder (Pending confirmation), O. Wendler (Pending confirmation)
Facilitator: V. Ferrero

- Introduction
- Impact of residual shunt on cardiovascular events after transcatheter patent foramen ovale closure
A. Apostolos (Pending confirmation)
- Impact of mild-to-moderate chronic kidney disease on plaque morphology assessed by OCT
F. M. Di Muro (Pending confirmation)
- Endovascular treatment of vascular complications in mine-explosive injuries
S. Furkalo
- Functional assessment of coronary microvascular disease in patients with kidney dysfunction
C. L. Lui
- Clinical utility of a CT-derived algorithm to predict coronary artery obstruction during TAVI
A. Abdelhafez (Pending confirmation)
- vpFFR - A novel benchmark for FFR surrogates
N. Odanovic
- Right heart failure and mortality in patients undergoing transcatheter tricuspid valve interventions
E. Pancaldi (Pending confirmation)
- Coronary microvascular dysfunction with both abnormal CFR & IMR correlate with diastolic dysfunction
J. Namkoong (Pending confirmation)
- Deep learning-enabled biopsy of aortic valve from CT angiography to predict outcomes after TAVI
K. Grodecki
- Robotic-assisted CABG vs PCI strategies for ostial LAD lesions
E. Gültekin Güner (Pending confirmation)
- Outcomes of diabetic patients with or without ACS carrying non-ischemic high-risk coronary lesions
A. Rroku
- Early left ventricle remodeling after TAVI with JenaValve Trilogy in severe aortic regurgitation
F. Pensotti
- Deliberation
- Results announcement

12:00 - 13:00

ROOM 252B

Case-based
Discussion

Tailoring transcatheter mitral therapies: a new era

With the collaboration of the PCR Mitral Focus Group

Anchorperson: P. Lurz
Spokesperson: T. Modine
Discussants: M. Guerrero, T. Patterson
(*Pending confirmation*), P. Sorajja (*Pending confirmation*), H. Weich

Join us if you want:

- To understand in which direction a transcatheter mitral valve programme should be developed
 - To learn how phenotyping will inform on procedural success, devices selection and deciding on repair vs. replacement
 - To get up to date on latest development of transcatheter mitral valve replacement innovations and recent and upcoming device approvals
- › Welcome and session objectives
P. Lurz
 - › Transcatheter treatment of mitral regurgitation – Almost there or just the beginning
F. Maisano (*Pending confirmation*)
 - › Discussion and audience interaction
 - › Opportunities and limitations of M-TEER
 - › Discussion and audience interaction
 - › Where is the role of transcatheter mitral valve replacement - A phenotyping approach
 - › Discussion and audience interaction
 - › Innovations in transcatheter mitral valve replacement
T. Modine
 - › Discussion and audience interaction
 - › Session evaluation and key learnings
T. Modine

12:00 - 13:00

ROOM 341

International
Collaboration

Case-based
Discussion

Managing complex STEMI patients in diverse healthcare systems - Adapting best practices to local realities

With the collaboration of Stent - Save a Life! Initiative (SSL)

Join us if you want:

- To understand the challenges in STEMI management in different geographies
 - To learn optimal management strategies appropriate to the clinical situation and available facilities in the different regions
- › Welcome and session objectives
 - › Asia - Large thrombus load
 - › Commentary on topic - View from Latin America
 - › Discussion and audience interaction
 - › Africa - Late presentation and the management of slow-flow / no reflow
 - › Commentary on topic - View from Asia
 - › Discussion and audience interaction
 - › LATAM - Cardiogenic shock presenting to a non-PCI centre
 - › Commentary on topic - View from Europe
 - › Discussion and audience interaction
 - › Europe - Patient with complex multivessel disease with STEMI
 - › Commentary on topic - View from Latin America
 - › Discussion and audience interaction
 - › Session evaluation and key learnings

12:00 - 13:00

ROOM 342B

Clinical Cases

Which techniques for the treatment of left main lesions ?

Facilitators: R. Beyar (*Pending confirmation*), E. Stabile

- › Precise positioning and T modified bifurcation technique for the treatment of left main
A. Zago (*Pending confirmation*)
- › Discussion and audience interaction
- › "La Elegans": CHIP PCI of left main coronary artery bifurcation and left anterior descending artery subtotal occlusion
Y. Vijayachandra Reddy (*Pending confirmation*)
- › Discussion and audience interaction
- › Modified proximal optimisation technique
S. Somendra
- › Discussion and audience interaction
- › Discussion and audience interaction
- › RODIN-CUT technique in left main
A. Jossart
- › Discussion and audience interaction

12:00 - 13:00

ROOM NEXTGEN
(351)

NextGen
Learning

Bifurcation PCI - Fundamentals of provisional strategy

Facilitators: A. N. Calik, V. Paradies
Media Driver: H. Kadioglu

Join us if you want:

- To learn how to evaluate coronary bifurcation anatomy
- To review the steps of the provisional stenting strategy
- To understand the indications for converting to a two-stent strategy

12:00 - 13:00

ROOM
ARLEQUIN

Abstracts

Impact of transcatheter mitral valve treatment on ventricular dimensions and functions

Facilitator: A. Duncan

- Consequences of mitral regurgitation eradication on invasive biventricular physiology: STRESS-MR
O. Chehab
- Discussion and audience interaction
- Impact of TEER on left ventricular remodeling in ischemic vs non-ischemic FMR
G. Papadopoulos
- Discussion and audience interaction
- Effect of edge-to-edge repair on mitral annulus geometry: results from the VEGA Registry
C. Carassia
- Discussion and audience interaction
- Right ventricular function improvement after TEER
T. Arai
- Discussion and audience interaction
- Left ventricular remodeling after TMVR with the HighLife system
C. Dubois
- Discussion and audience interaction

12:00 - 13:00

ABSTRACT &
CASE CORNER A

Abstracts

The rise of intracoronary imaging: current use and new tools

Facilitator: J. M. Sinning

- Factors determining the frequency of optical coherence tomography and intravascular ultrasound use i
B. Stanislaw
- Discussion and audience interaction
- Benefit of stent optimisation using intracoronary tools in high risk patients - The OPTIXENCE study
R. Moreno
- Discussion and audience interaction
- Plaque burden assessed from OCT with deep learning - In vitro validation using co-localised histology
J. Huang
- Discussion and audience interaction
- Feasibility and imaging quality of saline flush in high-frequency OCT for intracoronary imaging
Y. Ciftcikal (Pending confirmation)
- Discussion and audience interaction
- Saline OCT imaging at 400 frames/s (Raywatt)
J. S. Kim
- Discussion and audience interaction

12:00 - 13:00

ABSTRACT &
CASE CORNER B

Abstracts

What is new in radial access in 2025

Facilitator: C. Trani (Pending confirmation)

- Effect of distal transradial access versus transradial access on radial artery occlusion after PCI
L. Gao (Pending confirmation)
- Discussion and audience interaction
- Effect of pigtail assisted tracking on forearm complications during transradial navigation
N. Garg (Pending confirmation)
- Discussion and audience interaction
- Sheathless versus sheath-based approach in transradial PCI: a systematic review and meta-analysis
M. Basile
- Discussion and audience interaction
- Dual artery compression for patent hemostasis and prevention of radial artery occlusion
T. Cieza (Pending confirmation)
- Discussion and audience interaction
- Feasibility of distal radial access in high bleeding risk patients who underwent PCI
Y. Kim
- Discussion and audience interaction

12:00 - 13:00

ABSTRACT & CASE CORNER C

Clinical Cases

Challenging scenarios in ACS

- › Triple trouble
T. Dissanayake
- › Discussion and audience interaction
- › It is myocarditis until you look again - The utility of lumenography.
T. Bampali (Pending confirmation)
- › Discussion and audience interaction
- › Unexpected clinical outcome of ACS caused by giant coronary artery aneurysm
C. Turgul (Pending confirmation)
- › Discussion and audience interaction
- › Rescue fibrinolysis during primary PCI
I. Paizis
- › Discussion and audience interaction
- › A life-saving method in the treatment of anterior STEMI complicated with cardiogenic shock
S. Róna (Pending confirmation)
- › Discussion and audience interaction

12:00 - 13:00

ABSTRACT & CASE CORNER D

Clinical Cases

DCB in de novo lesions: new valid option?

Facilitators: A. Colombo, T. Schmitz

- › Traceless touch
A. Sakalidis
- › Discussion and audience interaction
- › Tackling Complexity: DCB use in left main and diffuse left anterior descending artery disease
N. Y. Sulaiman (Pending confirmation)
- › Discussion and audience interaction
- › DEB: ready for the prime time?
A. R. Pereira
- › Discussion and audience interaction
- › It is all about decisions: DES or DCB
I. Iveljic
- › Discussion and audience interaction
- › DEB vs. DES: a valuable alternative for high bleeding risk patient
H. O. Arabaci (Pending confirmation)
- › Discussion and audience interaction

12:00 - 13:00

ABSTRACT & CASE CORNER E

Complexity
Clinical Cases

Best companion's case on complications for stable coronary artery disease PCI: episode 1

Facilitator: H. Alosaimi

- › Triple trouble
M. Fares (Pending confirmation), S. Neoh (Pending confirmation)
- › Discussion and audience interaction
- › Unexpected complication of PCI
D. Dabovic
- › Discussion and audience interaction
- › From routine to rescue - Navigating severe dissection in coronary angioplasty
K. Abdalwahid (Pending confirmation)
- › Discussion and audience interaction
- › Discussion and audience interaction
- › Simple right coronary artery PCI: when a haematoma disrupts the plan
M. Barycki
- › Discussion and audience interaction

12:00 - 13:00

ABSTRACT & CASE CORNER F

Complexity
Clinical Cases

TAVI - Procedural complications

- › Rare complication during TAVI procedure
M. Tuleuova
- › Discussion and audience interaction
- › To pull or not to pull
M. Sfeir
- › Discussion and audience interaction
- › Balloon rupture during deployment in a balloon-expandable prosthesis: when you're in deep water
J. Perea
- › Discussion and audience interaction
- › A novel method to manage fatal annulus rupture with cardiac tamponade during TAVI
T. Moriizumi
- › Discussion and audience interaction
- › A holy situation: an unexpected complication during a TAVI procedure
I. Ferreira Neves (Pending confirmation)
- › Discussion and audience interaction

12:00 - 13:00

ABSTRACT AND
CASE CORNER G

Clinical Cases

Primary PCI outside of the box: unusual STEMI cases

Facilitators: R. S. Arjan Singh, G. Ducrocq

- Hanging by a thread: A STEMI patient with heavily calcified thread-like lesion at ostial LAD
Y. W. Chen
- Discussion and audience interaction
- My tool kit Penumbra
M. Alghamdi (Pending confirmation)
- Discussion and audience interaction
- Two cases of STEMIs in non-flow-limiting coronary stenosis with high level of radial wall strain
K. Xu
- Discussion and audience interaction
- Heart-stopping double trouble – left anterior descending artery and right coronary artery occlusion in STEMI with cardiac arrest
E. Beirne (Pending confirmation)
- Discussion and audience interaction
- A bend in the plan
S. S. Kanoun Schnur
- Discussion and audience interaction

12:00 - 13:00

THE EXCHANGE

Moderated E-
Poster

Real world outcomes of transcatheter LAA closure

Facilitators: M. Price (Pending confirmation), J. Saw

- Long-term performance of LAA closure: Watchman vs. Amplatzer platforms – analysis from the LEADER registry
A. Rotholz (Pending confirmation)
- Discussion and audience interaction
- Incidence and predictors of six-month mortality after percutaneous left atrial appendage closure
E. Valero
- Discussion and audience interaction
- Omega LAA occluder for tiny left atrial appendages: a European multi-centric case series
G. Tumminello (Pending confirmation)
- Discussion and audience interaction
- Watchman FLX vs. Watchman 2.5 for left atrial appendage closure: a propensity score-matched analysis
R. Galea (Pending confirmation)
- Discussion and audience interaction
- Outcomes of percutaneous LAA closure in patients with non-valvular atrial fibrillation and cancer
E. Valero
- Discussion and audience interaction

13:15 - 14:45

Symposium

Cardiogenic shock and high-risk interventions with percutaneous mechanical circulatory support: new evidence and insights

See session details in the Sponsored Programme section at the end of this document.

13:15 - 14:15

ROOM 242AB

Imaging
Symposium

Advanced imaging in structural heart disease interventions

See session details in the Sponsored Programme section at the end of this document.

13:15 - 14:15

ROOM 243

Symposium

RevoEdge high pressure cutting balloon in PCI: innovate, cut, and conquer

See session details in the Sponsored Programme section at the end of this document.

13:15 - 14:45

ROOM 251

Symposium with
Recorded case

Supraflex for high-risk patients and lesions: from practice to evidence-based medicine proven through FIRE and COMPARE

See session details in the Sponsored Programme section at the end of this document.

13:15 - 14:15

ROOM 252A

Symposium

Advancing renal denervation in China: from guidelines to practice

See session details in the Sponsored Programme section at the end of this document.

13:15 - 14:00

ROOM 252B

Symposium

Key procedural factors in pulmonary embolism treatment with computer-assisted vacuum thrombectomy

See session details in the Sponsored Programme section at the end of this document.

13:15 - 14:15

ROOM 341

Clinical Cases

Prevention of coronary obstruction during TAV-in-TAV

Facilitators: M. Akodad, J. Siller-Matula

- A complex TAV-in-TAV procedure
F. Sawaya (Pending confirmation)
- Discussion and audience interaction
- Look at the hook! A debated chimney strategy in a TAVI in TAVI case
V. gritti
- Discussion and audience interaction
- The UNICORN procedure for high coronary obstruction risk in redo TAVI
H. C. Lin (Pending confirmation)
- Discussion and audience interaction
- How to modify leaflets with a dedicated device prior to TAV-in-TAV
D. Dvir (Pending confirmation)
- Discussion and audience interaction

13:15 - 14:15

ROOM 342B

Clinical Cases

DCB in challenging scenarios - Part 2

Facilitator: C. Spaulding (Pending confirmation)

- Intravascular plaque phenotype-guided DCB treatment in recurrent extensive calcified stenosis
W. Chu
- Discussion and audience interaction
- Could leaving nothing behind be an option?
A. Spano' (Pending confirmation)
- Discussion and audience interaction
- The more you gain the more you get
S. Fezzi
- Discussion and audience interaction
- Left main PCI only with kissing DCBs in young female with systemic lupus erythematosus & cardiogenic shock
M. Kaluzna Oleksy
- Discussion and audience interaction
- Left main stenting and DCB for in-stent restenosis
S. Reddy (Pending confirmation)
- Discussion and audience interaction

13:15 - 14:15

ROOM 343

Clinical Cases

Management of stent-failure in bifurcation lesions

- There is no shortcut to success
W. Etman
- Discussion and audience interaction
- A very late asymptomatic presentation of a severe stent malapposition in distal left main coronary artery bifurcation
S. Kahraman
- Discussion and audience interaction
- Case of refractory VT, left main instent occlusion, left main bifurcation
A. Sharma
- Discussion and audience interaction
- A deeper look in moments of rush: gaining insights from stent-failure
F. Ciotola
- Discussion and audience interaction
- Same same, but bifferent
W. Tassanawiwat (Pending confirmation)
- Discussion and audience interaction

13:15 - 14:15

ROOM 353

Clinical Cases

Devices combination for calcified lesion

Facilitators: *H. Amin (Pending confirmation), A. Dagne*

- Breaking barriers: planning the route through the coronary orbit
A. Sakalidis
- Discussion and audience interaction
- Calcium nodes identified by OCT and treated with rotatrisky strategy
A. Zago (Pending confirmation)
- Discussion and audience interaction
- Rota-Cut is good technique for tackled heavily calcified vessel
F. Malik
- Discussion and audience interaction
- Between a rock and a hard place: surgical turn down - Ostial right coronary artery subtotal occlusion
M. Mckittrick
- Discussion and audience interaction
- How to solve calcium riddle?
M. Wrobel (Pending confirmation)
- Discussion and audience interaction

13:15 - 14:15

ROOM
ARLEQUIN

Clinical Cases

TMVR in challenging scenarios

Facilitators: *M. Guerrero, M. Urena (Pending confirmation)*

- A patient with heart failure and severe mitral regurgitation: what to do when you can't clip?
B. Melica
- Discussion and audience interaction
- Percutaneous intervention for a double surgical complication
A. Cano (Pending confirmation)
- Discussion and audience interaction
- Multivalvular disease treatment: ready to be all in!
B. Caneiro-Queija (Pending confirmation)
- Discussion and audience interaction
- Sequential use of advanced techniques to cross the interatrial septum during a mitral valve-in-valve
D. Siqueira (Pending confirmation)
- Discussion and audience interaction
- What to do if a non-surgical candidate is not eligible for current mitral repair or replacement tech?
N. Wunderlich
- Discussion and audience interaction

13:15 - 14:15

ABSTRACT &
CASE CORNER B

Clinical Cases

Intracoronary imaging real world clinical cases

- An intermediate lesion at middle left anterior descending artery with unexpected Pd/Pa 0.4
Y. W. Chen
- Discussion and audience interaction
- Intravascular imaging of left circumflex occlusion after mitral valve surgery
V. Galli (Pending confirmation)
- Discussion and audience interaction
- Marker Wire technique using IVUS for precise ostial left anterior descending artery stent placement
P. Manoria
- Discussion and audience interaction
- Left anterior descending artery aneurysm with an intermediate stenosis: how to prepare optimal treatment strategy?
I. Hadzibegovic
- Discussion and audience interaction
- Under pressure: dealing with complexity
G. Rizzo (Pending confirmation)
- Discussion and audience interaction

13:15 - 14:15

ABSTRACT &
CASE CORNER C

Clinical Cases

Transcatheter management of structural defects

Facilitators: P. Calvert, X. Freixa Rofastes
(Pending confirmation)

- › Unusual late complication of inferolateral wall myocardial infarction
A. Kapetanopoulos
- › Discussion and audience interaction
- › Multidisciplinary management of cardiogenic shock with ventricular septal rupture
S. Agarwal
- › Discussion and audience interaction
- › A catastrophe averted
G. Joshi
- › Discussion and audience interaction
- › Post-TAVI restrictive ventricular septal defect: a real challenging case
F. Liberman (Pending confirmation)
- › Discussion and audience interaction
- › Getting round the problem – Plan accordingly
S. Narasimhan (Pending confirmation)
- › Discussion and audience interaction

13:15 - 14:15

ABSTRACT &
CASE CORNER D

Clinical Cases

Techniques for the treatment of left main lesions

Facilitators: A. Ochala, C. Saint Etienne
(Pending confirmation)

- › Ultra low-contrast protected PCI in a complex and high-risk patient
M. Lombardi
- › Discussion and audience interaction
- › Treatment of Medina 0-0-1 Lesion with Severe Calcification in Left Circumflex Coronary Artery Ostium
Y. Murasato
- › Discussion and audience interaction
- › Perf the Pap - Do you dare?
A. Singal (Pending confirmation)
- › Discussion and audience interaction
- › DK crush pitfalls
D. L. Munawar
- › Discussion and audience interaction
- › Protected PCI with left main intravascular lithotripsy troubleshooting
K. Triantafyllou
- › Discussion and audience interaction

13:15 - 14:15

THE EXCHANGE

Clinical Cases

Catheter-based treatment of pulmonary embolism

Facilitator: N. Meneveau (Pending confirmation)

- › Double trouble
J. Kroupa
- › Discussion and audience interaction
- › Dealing with high-risk pulmonary embolism
M. Leoncini (Pending confirmation)
- › Discussion and audience interaction
- › Massive thrombus aspiration in acute pulmonary embolism
P. Caramori
- › Discussion and audience interaction
- › Misfortunes come in threes
A. Kazik (Pending confirmation)
- › Discussion and audience interaction
- › Successful management of a severe complication during the treatment of a pulmonary embolism
S. Shahi (Pending confirmation)
- › Discussion and audience interaction

14:45 - 16:15

MAIN ARENA

LIVE Educational
Case

Complex PCI in calcific coronary artery disease: LIVE Educational Case from Clinique Pasteur - Toulouse, France

Anchorperson: E. Barbato
Spokesperson: M. A. Rosli
Procedural Analyst: J. F. Lassen
Operators: N. Dumonteil, B. Honton
Discussants: A. Kirtane, A. Ricalde, M. Traina
(Pending confirmation), B. Vaquerizo
Cathlab Medical Coordinator: B. Farah

- › Welcome and session objectives
E. Barbato
- › Patient presentation
M. A. Rosli
- › Discussion and audience interaction
- › Operator strategy
E. Barbato
- › LIVE Case procedure
- › Debriefing and audience interaction
- › Session evaluation and key learnings
E. Barbato

15:00 - 16:00

THEATRE BLEU

How Should I
Treat?

How to manage coronary artery disease in TAVI candidates?

Anchorperson: M. Barbanti
Spokesperson: M. Gilard
Discussants: I. J. Amat-Santos, F. Baslaib
(Pending confirmation), R. Campante Teles,
C. Zukowski

Join us if you want:

- To understand the evidence base for management of coronary artery disease in patients undergoing TAVI
 - To know how to evaluate coronary artery disease in patients with severe aortic stenosis
 - To learn the key considerations when treating severe left main stem or multivessel coronary artery disease in patients undergoing TAVI
- Welcome and session objectives
M. Barbanti
 - Case 1 - A TAVI patient with significant proximal coronary lesion and no angina
A. Mangieri
 - Case 1 - How should I treat?
R. Parma
 - Discussion and audience interaction
 - Case 1 - How did I treat the case?
A. Mangieri
 - Case 2 - TAVI patient with severe left main stem disease
I. J. Amat-Santos
 - Case 2 - How should I treat?
R. Campante Teles
 - Discussion and audience interaction
 - Case 2 - How did I treat the case?
I. J. Amat-Santos
 - Session evaluation and key learnings
M. Gilard

15:00 - 16:00

THEATRE
BORDEAUX

Imaging

Case-based
Discussion

Role of imaging in ACS: from non-invasive to invasive investigations

Anchorperson: S. Brugaletta
Spokesperson: G. Guagliumi
Discussants: M. Barreiro Perez (Pending confirmation), J. Gomez Lara, T. Johnson

Join us if you want:

- To understand the role of coronary CT angiography in the ACS diagnostics
 - To learn how to implement intravascular imaging in identifying culprit lesion
 - To discuss the added value of intracoronary imaging in PCI optimisation during ACS
- Welcome and session objectives
S. Brugaletta
 - Case 1 - Coronary CT angiography in ACS - Part 1
M. Barreiro Perez (Pending confirmation)
 - Discussion and audience interaction
 - Case 1 - Coronary CT angiography in ACS - Part 2
M. Barreiro Perez (Pending confirmation)
 - Summarisation and discussion
 - Case 2 - OCT to identify culprit lesion - Part 1
J. Gomez Lara
 - Discussion and audience interaction
 - Case 2 - OCT to identify culprit lesion - Part 2
J. Gomez Lara
 - Discussion and audience interaction
 - Case 2 - OCT to identify culprit lesion - Part 3
J. Gomez Lara
 - Discussion and audience interaction
 - Session evaluation and key learnings
S. Brugaletta

15:00 - 16:00

THEATRE
HAVANE

Hot line / Late-
Breaking Trials

Mitral hotline: new devices

Anchorperson: T. Modine
Spokesperson: J. Granada (Pending confirmation)
Discussants: A. Asgar, P. Denti, N. Wunderlich

- TEER for moderate to severe or severe functional mitral regurgitation: DRAGONFLY-FMR study
G. Nickenig
- Early feasibility experience of posterior leaflet restoration to reduce mitral regurgitation
U. Schaefer
- Feasibility of transfemoral mitral annuloplasty: EU Pilot Trial - First Report
F. De Marco
- 1-year outcomes of a novel transcatheter edge-to-edge mitral repair system in patients with function
G. Wang (Pending confirmation)
- Novel 28-French transseptal TMVR system: first-in-human experience
A. Latib

15:00 - 16:00

ROOM MAILLOT

Case-based
Discussion

Getting started with renal denervation programme

Anchorperson: F. L. Ribichini
Discussant: K. Tsioufis

Join us if you want:

- To understand the importance of the hypertension team
 - To know how to perform renal denervation using available devices
 - To understand what results we can expect
-
- Welcome and session objectives
F. L. Ribichini
 - Why hypertension should be managed in a team? - Case examples
R. M. Bruno
 - Discussion and audience interaction
 - How to perform renal denervation with available devices?
F. Sharif
 - Discussion and audience interaction
 - What are the expected results in different sub-groups?
 - Discussion and audience interaction
 - Session evaluation and key learnings
F. L. Ribichini

15:00 - 16:00

ROOM
LEARNING

Imaging
Learning

Optimise your TAVI outcome by pre-CT evaluation

Facilitators: O. De Backer, A. Khokhar (Pending confirmation)
Media Driver: J. Curio

Join us if you want:

- To learn the fundamentals of CT analysis in TAVI work-up
- To understand which factors may determine TAV type selection and sizing
- To understand how to use cardiac CT optimally for planning of TAVI in bicuspid aortic stenosis and valve-in-valve TAVI

15:00 - 16:00

IMAGING SKILLS

Hands on
Simulation-based
Learning

Hands-on TAVI CT

This session has been made possible thanks to the in-kind support of Pie Medical Imaging

Facilitator: C. De Biase

Join us if you want:

- To understand, why CT is fundamental in pre-TAVI assessment
- To learn, the essentials of a correct CT pre-TAVI analysis in different scenarios
- To discuss, what findings are of key impact in post TAVI CT

15:00 - 16:00

IMAGING SKILLS
LAB 2 (352B)

Imaging
Hands on
Simulation-based
Learning

From CT to PCI: practical insights and hands-on training

This session has been made possible thanks to the in-kind support of GE HealthCare

Facilitators: N. Amabile, D. Andreini, F. Bouisset

Join us if you want:

- To understand the fundamentals of coronary CT reconstructions
- To gain hands-on experience in manipulating CT reconstructions using dedicated software
- To learn how to plan a coronary PCI effectively using CT data

15:00 - 16:00

**SIMULATION
LEARNING
ROOM (STUDIO
A)**

Simulation-based
Learning

Stent optimisation in provisional strategy: when and how to perform kissing balloon inflation

Facilitators: G. G Toth, J. Legutko, S. Ojeda, G. Stankovic
Physician Trainer: Z. Mehmedbegovic

Join us if you want:

- To evaluate the role of systematic side branch intervention in left main and non-left main provisional stenting
- To learn how to optimally perform kissing balloon inflation
- To understand the difference between kissing balloon inflation and POT-Side-POT procedure
- To explore potential pitfalls of side branch intervention, using insights from bench testing and in-vitro beating heart simulation

15:00 - 16:00

ROOM 242AB

Hot line / Late-
Breaking Trials

New evidence for treatment of calcified CAD

Anchorperson: M. Abdel-Wahab (Pending confirmation)

Spokesperson: A. Low

Discussants: S. Gunasekaran, M.

McIntegart (Pending confirmation), H. Nef (Pending confirmation), H. Noor (Pending confirmation)

- A prospective, multicenter, randomized trial of cutting balloon for the treatment of calcified lesion
K. Koyama (Pending confirmation)
- Discussion and audience interaction
- Intravascular lithotripsy vs rotational atherectomy for coronary lesions: results from ICARE-OFDI
- Discussion and audience interaction
- Randomised comparison of lithoplasty vs. conventional preparation of severely calcified lesions
A. Kristensen
- Discussion and audience interaction
- Rotational atherectomy, lithotripsy or laser for calcified coronary stenosis. One-year outcomes
A. Jurado (Pending confirmation)
- Discussion and audience interaction
- The EMPOWER CAD study: women with calcified coronary arteries treated with intravascular lithotripsy
M. McIntegart (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ROOM 241

Abstracts

TAVI in patients with a small annulus

Facilitator: L. Rosseel

- Ballon expandable vs. Self-expandable valves in patients with small aortic annulus undergoing TAVI
I. Narciso (Pending confirmation)
- Discussion and audience interaction
- TAVI in small and very small aortic valve annuli
T. Itach (Pending confirmation)
- Discussion and audience interaction
- Prediction of small aortic annulus size in severe aortic stenosis patients
C. Cook
- Discussion and audience interaction
- Paravalvular regurgitation in patients with low-flow, low-gradient aortic stenosis undergoing TAVI
A. Silverio (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ROOM 243

Case-based
Discussion

How to deal with secondary mitral regurgitation in 2025?

With the collaboration of the PCR Mitral Focus Group

Anchorperson: T. Patterson (Pending confirmation)

Spokesperson: N. Karam

Discussants: A. Duncan, V. Esteves, J. Hausleiter (Pending confirmation), G. Lucchese (Pending confirmation)

Join us if you want:

- To appreciate the evolving role of the Heart Team in the modern management of secondary mitral regurgitation
 - To hear more about the latest clinical trials and treatment recommendations
 - To participate in a case-based discussion concerning medical and interventional treatment
- Welcome and session objectives
T. Patterson (Pending confirmation)
 - Heart team introduction
T. Patterson (Pending confirmation)
 - Secondary mitral regurgitation in 2025
J. Hausleiter (Pending confirmation)
 - Case presentation: clinical history and initial findings
E. Heng
 - Discussion and audience interaction
 - Optimal heart failure therapy
M. I. Koerber (Pending confirmation)
 - Frailty assessment
S. Roshan-Zamir
 - Case presentation: advanced imaging
E. Heng
 - Discussion and audience interaction
 - Treatment and follow up
E. Heng
 - Discussion and audience interaction
 - Session evaluation and key learnings
N. Karam

ROOM 251

Clinical Cases

Intracoronary value for PCI optimisation

Facilitators: T. Gori (Pending confirmation), M. Sobhy

- Plaque stabilisation in 15 minutes
K. Trusinskis
- Discussion and audience interaction
- Under pressure - A case study in coronary stent optimisation
D. Makarios
- Discussion and audience interaction
- No PCI is a simple PCI...Stay always on the lookout and don't trust angiography
L. Peter
- Discussion and audience interaction
- Traumatic coronary artery dissection - What should I do?
A. Pardo Sanz (Pending confirmation)
- Discussion and audience interaction
- Is delayed stent fracture possible? A combined enhanced stent visualisation and IVUS diagnosis
G. Venturi
- Discussion and audience interaction

15:00 - 16:00

PCR's Got Talent Round 1 - Session 2

ROOM 252A

Abstracts

Jury members: *N. Ajmone Marsan (Pending confirmation), J. Bartunek, M. Echavarría Pinto (Pending confirmation), N. Takahashi*
Facilitators: *F. J. Neumann, G. Richardt*

- Introduction
- Efficacy of primary retrograde approach in PCI of complex CTO
C. W. Lien
- Self-expandable valve vs. balloon-expandable valve in patients with small annuli undergoing TAVI
K. Hemelrijk
- PFO closure rate and clinical outcome beyond ten years
M. Rojko
- Durability of primary PCI - Ten-year target lesion failure
B. T. Özbeke
- CT-guided robotically-assisted PCI - A correct PCI sub-analysis
R. Ruggiero (Pending confirmation)
- Improving pacemaker prediction after TAVI - Development and validation of a machine learning model
F. Barbas De Albuquerque (Pending confirmation)
- Percutaneous and surgical management of aortic stenosis - Temporal trends from the SWEDEHEART registry
J. Tödt (Pending confirmation)
- Serial QFR measurements for a successfully recanalised coronary CTO
K. Elbasha (Pending confirmation)
- QFR predicts mortality in aortic stenosis patients post-TAVI: a novel insight
I. Colaïori
- Clinical outcomes of carotid artery stenting in acute stroke - Results of treating extracranial and I
T. Bekmirzayev
- Invasive coronary evaluation in INOCA - Uncovering the causes of angina
M. C. Coelho (Pending confirmation)
- Validation of RISA-PE risk classification in patients with acute pulmonary embolism
C. Real
- Deliberation
- Results announcement

15:00 - 16:00

ROOM 252B

Case-based Discussion

Decompensated heart failure: indication and management of mechanical circulatory support

With the collaboration of iHF initiative (improving Heart Function)

Anchorperson: *A. Mebazaa*
Spokesperson: *J. Kluin (Pending confirmation)*
Discussants: *O. Chioncel (Pending confirmation), M. Cikes (Pending confirmation), V. Delgado, A. Rakisheva*

Join us if you want:

- To appraise the state-of-the-art treatment strategies of life-threatening acute heart failure
 - To understand the indication and management of mechanical circulatory support (e.g. young myocarditis)
 - To review contemporary management of heart failure patients after mechanical circulatory support removal
- Welcome and session objectives
A. Mebazaa
 - Stimulate interaction
J. Kluin (Pending confirmation)
 - Acute heart failure case – Part 1
M. Cikes (Pending confirmation)
 - Discussion and audience interaction
 - Acute heart failure case – Part 2
M. Cikes (Pending confirmation)
 - Discussion and audience interaction
 - Acute heart failure case – Part 3
M. Cikes (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
J. Kluin (Pending confirmation)

15:00 - 16:30

ROOM 253

International
Collaboration

How Should I
Treat?

Session with international collaborations: Estonia / Romania / Scotland

With the collaboration of the Estonian Society of Cardiology and Interventional Cardiology Working Group of the Romanian Society of Cardiology and Scottish Cardiac Society

Anchorpersons: L. Calmac (Pending confirmation), P. Laanmets, S. Watkins

- Welcome and session objectives
P. Laanmets
- Case 1 - Spontaneous coronary artery dissection - Not only a feminine diagnosis
K. Lotamois (Pending confirmation)
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
K. Lotamois (Pending confirmation)
- Key learnings Case 1
P. Laanmets
- Case 2 - Romania
- How would I treat case 2?
A. Mahrous Abizaid (Pending confirmation)
- Discussion and audience interaction
- Case 2 treatment
- Key learnings Case 2
L. Calmac (Pending confirmation)
- Case 3 - Scotland
I. Rubenis (Pending confirmation)
- How would I treat case 3?
- Discussion and audience interaction
- Case 3 treatment
I. Rubenis (Pending confirmation)
- Key learnings Case 3
S. Watkins
- Session evaluation and key learnings
L. Calmac (Pending confirmation)
- Closing remarks
S. Watkins

Collaboration

Case-based
Discussion

Resilience and continuity of cardiovascular care in times of crises: the Resil-Card project

With the collaboration of RESIL-Card

Anchorperson: F. Saia (Pending confirmation)

Spokesperson: W. Wijns (Pending confirmation)

Discussants: P. Carli (Pending confirmation), N. S. Klazinga (Pending confirmation), F. Mauri, J. Piek (Pending confirmation)

Join us if you want:

- To take stock of the lessons learned during the pandemic
 - To find out more about the status of the RESIL-Card project initiated by the PCR community
 - To take a first look at the resilience tool that will be available to assess your preparedness for the next crisis
- Welcome and session objectives
F. Saia (Pending confirmation)
 - Lessons from the pandemic and objectives the EU-funded RESIL-Card project
M. Lunardi
 - Discussion and audience interaction
 - Complexity of cardiac care during the pandemic: the patient's perspective
T. Glynn (Pending confirmation)
 - Discussion and audience interaction
 - RESIL-Card: a resilience assessment tool to ensure continuity of care for cardiovascular patients
N. S. Klazinga (Pending confirmation)
 - Discussion and audience interaction
 - What is next and timelines
S. Wallace (Pending confirmation)
 - Session evaluation and key learnings
F. Saia (Pending confirmation)

ROOM 342A

Clinical Cases

Nurses and Allied Professionals clinical cases session

15:00 - 16:00

ROOM 342B

Abstracts

Insights into emerging prognostic predictors for patients with coronary artery disease

Facilitator: Y. Appelman

- Endothelial shear stress predicts cardiovascular risk in older patients with myocardial infarction
A. Candreva (Pending confirmation)
- Discussion and audience interaction
- The impact of intravascular imaging on clinical outcomes stratified by coronary artery disease patterns
T. Arai (Pending confirmation)
- Discussion and audience interaction
- Correlation between low diastolic blood pressure and severity of coronary artery disease using SYNTAX score
A. El Amrawy
- Discussion and audience interaction
- Functional complete revascularisation as determined by an optimised scoring system
R. Zhang
- Discussion and audience interaction
- Long-term wall shear stress risk prediction in stable coronary artery disease - 10-year follow-up of FAME 2 trial
D. Munhoz (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:30

ROOM 343

International Collaboration

How Should I Treat?

Session with international collaborations: Azerbaijan / Iraq / Moldova

With the collaboration of the Azerbaijan Society of Cardiology and Interventional Cardiology and Radiology Society of Moldova (SCRIM) and Working group on interventional cardiology/ Iraqi cardiovascular society

Anchorpersons: M. H. Al Quraishi (Pending confirmation), U. Mirzoyev (Pending confirmation), I. Popovici
Discussant: E. Isayev (Pending confirmation)

- Welcome and session objectives
U. Mirzoyev (Pending confirmation)
- Case 1 - Azerbaijan
R. Zeynalov (Pending confirmation)
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
R. Zeynalov (Pending confirmation)
- Key learnings Case 1
U. Mirzoyev (Pending confirmation)
- Case 2 - Iraq
- How would I treat case 2?
- Discussion and audience interaction
- Case 2 treatment
- Key learnings Case 2
M. H. Al Quraishi (Pending confirmation)
- Case 3 - Moldova
- How would I treat case 3?
E. Isayev (Pending confirmation)
- Discussion and audience interaction
- Case 3 treatment
- Key learnings Case 3
I. Popovici
- Session evaluation and key learnings
M. H. Al Quraishi (Pending confirmation)
- Closing remarks
I. Popovici

15:00 - 16:00

ROOM NEXTGEN (351)

NextGen Learning

Bifurcation PCI - Fundamentals of upfront two-stent strategy

Facilitators: D. Milasinovic, N. Ryan
Media Driver: H. Kadioglu

Join us if you want:

- To learn when to choose an upfront two-stent approach
- To review the steps of different two-stent techniques
- To learn how to use intracoronary imaging to optimise complex bifurcation stenting

15:00 - 16:30

ROOM 353

International
Collaboration

How Should I
Treat?

STEMI - What if a culprit lesion is not identifiable?

With the collaboration of the Cypriot Interventional Cardiology Working Group and Luxembourg Society of Cardiology and Working Group of Interventional Cardiology, Association of cardiologists in Bosnia and Herzegovina

Anchorpersons: J. Beissel (*Pending confirmation*), T. Ibrahim (*Pending confirmation*), K. Myrianthopoulos (*Pending confirmation*)

Join us if you want:

- To show that culprit lesion, also in STEMI cases, is not always as obvious as it seems
 - To emphasise how intravascular imaging can help decision-making
 - To demonstrate how intravascular imaging can guide percutaneous interventions for optimal results
- › Welcome and session objectives
T. Ibrahim (*Pending confirmation*)
 - › Case 1 - What to do with significant left main stenosis in acute STEMI?

Abstracts

DCB-PCI in de novo lesions

Facilitators: G. Dangas (Pending confirmation), C. Di Mario

- Effect of vessel diameter on the clinical benefits of DCB angioplasty
F. Krackhardt
- Discussion and audience interaction
- DCB vs. DES for small non-complex de novo coronary artery lesions
S. von Koch
- Discussion and audience interaction
- Outcomes of unstented coronary dissections after paclitaxel-coated balloon treatment in de novo coronary artery disease
S. Kim
- Discussion and audience interaction
- DCB-Based PCI for coronary artery disease with high bleeding risk
E. S. Shin
- Discussion and audience interaction
- Short vs. standard DAPT duration after PCI with DEB
A. Håkansson (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER D

Clinical Cases

Invasive treatment of refractory angina

Facilitator: L. Buchanan (Pending confirmation)

- Percutaneous management of an uncommon cause of exertional angina guided by coronary physiology
S. Ahmed (Pending confirmation)
- Discussion and audience interaction
- Strictly...no entry!
U. Rao
- Discussion and audience interaction
- Isolated coronary microvascular disease treated with next-generation coronary sinus reducer
M. Tomaniak
- Discussion and audience interaction
- Coronary sinus reducer implantation - When all is not lost!
K. Cheng (Pending confirmation)
- Discussion and audience interaction
- Provocative test-guided management of refractory vasospastic angina - A case report
R. Abo Fanne
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER C

Clinical Cases

Addressing complex anatomy in STEMI

Facilitator: H. C. Tan

- PCI for bilateral compromised coronary ostia due to aortic dissection
H. W. Lee
- Discussion and audience interaction
- Rare and challenging STEMI: overcoming anatomical complexity
S. Rahman
- Discussion and audience interaction
- When a steal is more than just a steal: how to recognise, and address, a double-trouble?
L. Czyz
- Discussion and audience interaction
- Young woman with STEMI and diffuse atherosclerotic coronary artery disease with multiple dissections
A. Krokos (Pending confirmation)
- Discussion and audience interaction
- Angioplasty of the aneurysmal right coronary artery in the course of IgG4-dependent disease
T. Suchecki (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER E

Complexity
Clinical Cases

Best companion's case for complications for stable coronary artery disease PCI: episode 2

Facilitator: S. Al Shaikh (Pending confirmation)

- A horror evening
D. Banik (Pending confirmation)
- Discussion and audience interaction
- When an easy start ends with a nightmare
A. Elhakim
- Discussion and audience interaction
- IVUS-guided triumph - Reentering an iatrogenic coronary dissection with precision
J. Zubiaur
- Discussion and audience interaction
- When a straight forward escalates!
A. Mirza
- Discussion and audience interaction
- The catheter twist: pingponging to success
S. S. Kanoun Schnur
- Discussion and audience interaction
- Iatrogenic left main artery dissection: saved by the retrograde flow?
I. Ferreira Neves (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

Managing TAVI complications

Facilitator: R. Moreno

ABSTRACT & CASE CORNER F

Complexity
Clinical Cases

- Mastering the snare: strategic retrieval of embolised self-expandable valve
K. Konstantinou (Pending confirmation)
- Discussion and audience interaction
- We planned to use one but ended by more
G. Shenoda
- Discussion and audience interaction
- When the pig doesn't want to leave
F. Caied (Pending confirmation)
- Discussion and audience interaction
- When successful TAVI creates a complication: a case series of suicide left ventricle phenomenon
L. Koliastasis
- Discussion and audience interaction
- When the structural heart intervention requires a coronary toolbox
S. F. Wong (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

PCI in cardiogenic shock without left ventricular support

Facilitators: A. Gasecka, T. Rissanen

ABSTRACT AND CASE CORNER G

Clinical Cases

- Is mechanical circulatory support mandatory for all cases of cardiogenic shock
M. Sreedharan (Pending confirmation)
- Discussion and audience interaction
- Last remaining patent vessel – Revascularisation in a STEMI setting with cardiogenic shock
Y. Samuel (Pending confirmation)
- Discussion and audience interaction
- A balancing act of strategy, resourcing and optimal PCI
K. Lwin
- Discussion and audience interaction
- Spread spontaneous dissection right coronary artery with life-threatening ventricular arrhythmia
H. Nguyen The
- Discussion and audience interaction
- Crush comes to the rescue in a sinking patient
S. Narasimhan (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

Mitral TEER: is there a limit

Facilitator: R. Estevez-Loureiro

THE EXCHANGE

Moderated E-Poster

- Mitral TEER for primary mitral regurgitation in the very elderly
M. Price
- Discussion and audience interaction
- Single Triclip SGC for combined Mitral and Tricuspid TEER - Sustained outcomes across age and mitral regurgitation etiology
G. Papadopoulos
- Discussion and audience interaction
- Age-independent success of TEER with MitraClip G4 - A 1-year propensity-matched study
G. Papadopoulos
- Discussion and audience interaction
- Clinical consequence of anatomical suitability for tricuspid edge-to-edge repair
A. Sugiura
- Discussion and audience interaction
- MitraClip at centres without on-site cardiac surgery department
C. Lluch Requerey (Pending confirmation)
- Discussion and audience interaction

16:30 - 18:00

THEATRE BLEU

Symposium with LIVE case

16:30 - 18:00

THEATRE BORDEAUX

Symposium with LIVE case

Align for the future with the Myval transcatheter heart valve series

See session details in the Sponsored Programme section at the end of this document.

Pioneering innovation in the treatment of mitral and tricuspid regurgitation

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:30

THEATRE
HAVANE

Imaging
Symposium with
Recorded case

From imaging to intervention: cutting-edge solutions for calcified coronary stenoses management

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:30

ROOM 251

Symposium with
Recorded case

Broadening OPTIONS for LAA closure: innovations and outcomes

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:15

ROOM MAILLOT

Symposium

Evolving bifurcation treatment practices: drug-coated balloons, angio-based FFR, and side branch optimisation

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:15

ROOM 252A

Imaging
Symposium

The future is now: QFR and RMS to optimise coronary artery disease patient management

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:30

ROOM 242AB

Symposium

Full physiology: why and how to assess beyond coronary epicardial disease

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:30

ROOM 252B

Symposium

From theory to practice: the versatility of drug-coated balloons around the world

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:30

ROOM 243

Symposium

Ultrasound renal denervation is now guideline-recommended: how do I get started?

See session details in the Sponsored
Programme section at the end of this
document.

16:30 - 17:30

ROOM 341

Clinical Cases

Tough cases, smart imaging

Facilitators: G. Guagliumi, H. C. Tan

- Innovative soft balloon angiography in nephropathy and heart failure patient during PCI
R. Lochan
- Discussion and audience interaction
- A case of mismatch in anatomical and physiological ischemic assessment due to lotus root-like appearance
J. Aoyama (Pending confirmation)
- Discussion and audience interaction
- Discussion and audience interaction
- Rare case of metal-clipping induced severe SVG stenosis, IVUS guided analysis
A. yaseen
- Discussion and audience interaction
- The Power of perspective
E. Bianchini (Pending confirmation)
- Discussion and audience interaction

16:30 - 17:30

ROOM 341

An Image is
Worth a 1,000
Words

How imaging can help us in recognising the problem and identifying the solution?

Facilitators: C. Aurigemma, E. Shlofmitz

- A rare nightmare in cathlab
S. K. Sahoo
- Honeycomb coronary artery
R. Shantouf
- When reflected light gives you a diagnosis
W. Camilleri
- Intravascular imaging in ACS
S. Reddy (Pending confirmation)
- What caused the decrease in calcium?
T. Suzuki (Pending confirmation)

16:30 - 17:30

ROOM 342B

Clinical Cases

Best companion's cases on imaging for calcified lesions

Facilitator: I. Lang

- OCT-guidance in complex PCI - The frog who became a prince
P. S. Simeoli (Pending confirmation)
- Discussion and audience interaction
- CT-guided PCI strategy for calcified lesions - A novel treatment approach using CT density analysis
H. Ohashi (Pending confirmation)
- Discussion and audience interaction
- Step-by-step ultra-low contrast PCI in a calcified setting
A. Jerónimo
- Discussion and audience interaction
- Zero-contrast RODIN CUT technique
M. Boukhris (Pending confirmation)
- Discussion and audience interaction
- Zero-contrast PCI with intravascular lithotripsy a viable alternative for kidney failure patients
L. Pyka
- Discussion and audience interaction

16:30 - 17:30

ROOM 343

Clinical Cases

CTO in special clinical scenarios

Facilitators: M. Mcentegart (Pending confirmation), A. Mohamed (Pending confirmation)

- CTO revascularisation with critical stenosis of donor arteries
T. X. López
- Discussion and audience interaction
- Coronary CTO intervention of right coronary artery with anomalous origin after TAVI
C. A. Zaragoza Cortes (Pending confirmation)
- Discussion and audience interaction
- Wires vs. scalpels - How should I manage coronary CTO after arterial switch operation?
J. Bulnes
- Discussion and audience interaction
- Treatment of CTO in a patient with multivessel disease, ventricular dysfunction and no vascular access
J. Perea
- Discussion and audience interaction
- Retrograde approach in a patient with CTO and TAVI
R. Esparza Corona
- Discussion and audience interaction

16:30 - 17:30

ROOM 353

Clinical Cases

Techniques and decision making in management of coronary bifurcation lesion

- › Discussion and audience interaction
- › High-risk PCI for calcified left main bifurcation in a nonagenarian with severe aortic stenosis
R. Ward
- › Discussion and audience interaction
- › Distal wire anchoring technique for PCI to angulated vessel
Y. H. Tang
- › Discussion and audience interaction
- › Suboptimal result after kissing balloon inflation in a Medina 001 lesion
C. Vélez
- › Discussion and audience interaction
- › DCB simplifying the complexity in PCI of ostial proximal left circumflex lesion
N. Am Haris (Pending confirmation)
- › Discussion and audience interaction

16:30 - 17:30

ROOM ARLEQUIN

Clinical Cases

Intracoronary imaging-guided MINOCA management

- › Interventional endarterectomy
C. Arthur
- › Discussion and audience interaction
- › Is an invasive coronary angiography enough?
B. Zdzierak (Pending confirmation)
- › Discussion and audience interaction
- › Cutting-balloon-only primary PCI in a spontaneous coronary artery dissection
G. Latsios
- › Discussion and audience interaction
- › Spastic vulnerable plaque – How to treat?
J. Boh (Pending confirmation)
- › Discussion and audience interaction
- › Not the usual suspect presenting as an acute STEMI
Y. Agrawal
- › Discussion and audience interaction

16:30 - 17:30

ABSTRACT & CASE CORNER B

Clinical Cases

When coronary angiography is not enough

Facilitators: J. Adedj, M. Echavarria Pinto (Pending confirmation)

- › Coronary vasospasm induced syncope with dynamic ST-changes confirmed by Holter electrocardiogram
- › Discussion and audience interaction
- › Full physiology and imaging assessment of an INOCA presented with ventricular fibrillation.
M. F. Crociani (Pending confirmation)
- › Discussion and audience interaction
- › When coronary chaos strikes twice
P. Gagliardi (Pending confirmation)
- › Discussion and audience interaction
- › Acetylcholine rechallenge for epicardial spasm
K. Nishimiya (Pending confirmation)
- › Discussion and audience interaction
- › Bridging the gap - Stratifying angina therapy through invasive physiology assessment
P. Macanovic (Pending confirmation)
- › Discussion and audience interaction

16:30 - 17:30

ABSTRACT & CASE CORNER C

Clinical Cases

The best clinical cases in PFO closure and carotid stenting

Facilitator: S. Verheye (Pending confirmation)

- › Intervention of bilateral carotid artery occlusion with repeated syncope
L. CHIEN-HSIEN
- › Discussion and audience interaction
- › Case of successful carotid stenting in the setting of acute cerebral circulatory insufficiency
T. Bekmirzayev
- › Discussion and audience interaction
- › High calcific diffuse peripheral artery disease after radiotherapy
E. Giacomini
- › Discussion and audience interaction
- › PFO closure in patient with inferior vena cava occlusion - A case report
T. Yi
- › Discussion and audience interaction
- › Managing a complex PFO with rare dual-device approach
P. N. Rudzinski
- › Discussion and audience interaction

16:30 - 17:30

ABSTRACT &
CASE CORNER D

Clinical Cases

Multimodality imaging and physiology for MINOCA diagnosis

Facilitators: *M. Kovacevic (Pending confirmation), P. Xaplanteris*

- Seeing the unseen - Hidden plaque vulnerability
I. Skolidis (Pending confirmation)
- Discussion and audience interaction
- When the diagnosis falls short - Uncovering the unexpected beyond MINOCA
G. Botti
- Discussion and audience interaction
- To stent or not to stent
A. Mukherjee
- Discussion and audience interaction
- Added value of artificial intelligence in MINOCA workup
D. Pellegrini
- Discussion and audience interaction

16:30 - 17:30

THE EXCHANGE

Clinical Cases

How to deal with ostial RCA-CTOs

- When there is no way forward
R. P. Singh
- Discussion and audience interaction
- PCI to ostial CTO of high take-off anomaly of right coronary artery
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction
- Retrograde PCI of ostial RCA-CTO by guide wire capture in a familial hypercholesterolemia patient
X. Wang (Pending confirmation)
- Discussion and audience interaction
- Into the dark - An ostial odyssey
G. Parale (Pending confirmation)
- Discussion and audience interaction
- Aorto-ostal in-stent CTO with stent protrusion in the aorta
A. Barmpas
- Discussion and audience interaction

08:30 - 10:00

MAIN ARENA

LIVE Educational Case

Complex PCI for stent failure: LIVE Educational Case from Hospital Clínico San Carlos - Madrid, Spain

Anchorperson: G. G Toth
Spokesperson: V. Paradies
Procedural Analyst: T. Johnson
Operators: J. Escaned (Pending confirmation), N. Gonzalo
Discussants: R. Al-Bawardy, Z. Ali, G. L. De Maria, A. Seth

- › Welcome and session objectives
G. G Toth
- › Patient presentation
V. Paradies
- › Discussion and audience interaction
- › Operator strategy
G. G Toth
- › LIVE Case procedure
- › Debriefing and audience interaction
- › Session evaluation and key learnings
G. G Toth

08:30 - 09:30

THEATRE BLEU

How Should I Treat?

Calcified nodules: a different beast?

Anchorperson: E. Barbato
Spokesperson: A. Øksnes
Discussants: M. Balghith (Pending confirmation), R. Gil (Pending confirmation), H. Möllmann, J. Sonck (Pending confirmation)

Join us if you want:

- To understand the specificities of calcified nodules and the challenges related to their percutaneous treatment
- To learn how to identify the calcified nodules with IVUS or OCT
- To select the appropriate plaque modification tool for a successful PCI result

- › Welcome and session objectives
E. Barbato
- › Case 1 – How should I treat?
E. Gallinoro
- › Discussion and audience interaction
- › Case 1 - How would I treat?
- › Case 1 - How I did treat!
E. Gallinoro
- › Discussion and audience interaction
- › Case 2 – How should I treat?
- › Discussion and audience interaction
- › Case 2 - How would I treat?
- › Case 2 - How I did treat!
- › Discussion and audience interaction
- › Session evaluation and key learnings
A. Øksnes

08:30 - 09:30

THEATRE BORDEAUX

All You Need to Know

Streamlining the TAVI pathway

Anchorperson: C. De Biase
Spokesperson: W. Paul
Discussants: G. Bieliauskas, H. Eltchaninoff (Pending confirmation), I. Malik (Pending confirmation), G. Mccalmon (Pending confirmation)

Join us if you want:

- To understand how best to optimise the TAVI pathway
- To deliver five cases on a list safely
- To minimise hospital stay for TAVI and safely implement a next day and same day discharge programme

- › Welcome and session objectives
C. De Biase
- › Planning the TAVI procedure
G. Mccalmon (Pending confirmation)
- › Discussion and audience interaction
- › Minimalist TAVI procedure - Patient preparation and access
H. Eltchaninoff (Pending confirmation)
- › Discussion and audience interaction
- › Minimalist TAVI procedure - Valve deployment and closure
G. Bieliauskas
- › Discussion and audience interaction
- › Post-procedure
I. Malik (Pending confirmation)
- › Discussion and audience interaction
- › Session evaluation and key learnings
W. Paul

08:30 - 09:30

THEATRE HAVANE

Hot line / Late-Breaking Trials

Hotline TAVI 1: extended analysis of the randomised trials

Anchorperson: M. Leon
Spokesperson: O. De Backer
Discussants: M. Borger (Pending confirmation), M. Gilard, D. Mylotte (Pending confirmation), T. Rudolph

- › The United Kingdom Transcatheter Aortic Valve Implantation (UK TAVI) trial: Five-year outcomes
W. Toff
- › Discussion and audience interaction
- › Incidence, evolution, and impact of cardiac damage in asymptomatic severe aortic stenosis
P. Genereux
- › Discussion and audience interaction
- › One-year outcomes of contemporary TAVI valves – a randomised, non-inferiority LANDMARK trial
P. Serruys
- › Discussion and audience interaction
- › Three-year results of a randomised study comparing two balloon-expandable TAVI valves
C. J. Terkelsen
- › Discussion and audience interaction

08:30 - 09:30

ROOM MAILLOT

Case-based
Discussion

How to avoid and manage complications in CTO interventions

Anchorperson: F. Hellig
Spokesperson: E. Smith
Discussants: R. Diletti, S. Harding (Pending confirmation)

Join us if you want:

- To learn how to anticipate and prevent complications during CTO PCI
- To discuss how to effectively manage CTO PCI complications that may arise
- To explore specific case examples of CTO complications

- Welcome and session objectives
F. Hellig
- Case 1 - Donor artery dissection
B. Stanislaw
- Discussion and audience interaction
- Case 2 - Main vessel perforation
M. Eged
- Discussion and audience interaction
- Case 3 - Distal vessel perforation
R. Garbo
- Discussion and audience interaction
- Team work in the cathlab
F. Hellig
- Session evaluation and key learnings
E. Smith

08:30 - 09:30

ROOM
LEARNING

Imaging
Learning

An ideal indication: intracoronary imaging use in stent failure

Facilitators: N. Amabile, L. Räber
Media Driver: R. Kakizaki

Join us if you want:

- To understand how imaging can help to determine the mechanisms of stent failure
- To learn how imaging can guide treatment decisions in stent failure
- To consider the impact of multiple stent layers on future management

08:30 - 09:30

IMAGING SKILLS
LAB 1 (352A)

Imaging

Hands on

Simulation-based
Learning

Hands-on OCT - PCI guidance and optimisation

This session has been made possible thanks to the in-kind support of Abbott

Facilitators: S. Gunasekaran, L. Koltowski (Pending confirmation), E. Shlofmitz
Media Driver: D. Tiong
Physician Trainers: V. Cesario, N. Chandra Mohan, K. Kyhl, M. Lombardi

Join us if you want:

- To understand the importance of a detailed planning guided with OCT imaging
- To learn the different tools that OCT offers for PCI planning and optimisation
- To understand the importance of assessing post-PCI result

08:30 - 09:30

IMAGING SKILLS
LAB 2 (352B)

Imaging

Hands on

Simulation-based
Learning

Hands-on IVUS - PCI guidance and optimisation

This session has been made possible thanks to the in-kind support of Boston Scientific

Facilitators: J. Daemen, G. Gasparini, M. Mcentegart (Pending confirmation)
Media Driver: S. I. Sandoval Hernandez
Physician Trainers: A. Mukherjee, G. Nardi, S. Paetzold (Pending confirmation)

Join us if you want:

- To understand the important of a detailed planning guided with IVUS imaging.
- To learn the different tools that AIVIGO viewer offers for PCI planning and optimisation
- To understand the importance of assessing post-PCI result

08:30 - 09:30

SIMULATION
LEARNING
ROOM (STUDIO
A)

Simulation-based
Learning

Unveil the secrets of a successful Mitral TEER

Facilitators: F. Maisano, T. Patterson (Pending confirmation), M. Swaans (Pending confirmation)
Media Driver: N. Buzzatti

Join us if you want:

- To understand anatomical insights to improve your outcomes in mitral TEER using the highest fidelity simulator
- To understand the basic and advanced imaging modalities
- To understand the mechanism of function of devices and the interaction with the valve anatomy

08:30 - 10:00

HANDS ON LAB

Hands on
Simulation-based
Learning

Bailout options and techniques during PCI: stent dislodgement

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: A. Aminian, M. Ando, M. Hawranek, P. Musialek, A. Sauguet, A. Toma

Join us if you want:

- To explore bailout options using existing devices
- To determine the steps to successful retrieval in a case of simulated stent loss
- To consider causes and avoidance strategies for stent dislodgement

08:30 - 09:30

ROOM 242AB

Innovation / CV
Pipeline

New devices for structural interventions

Anchorperson: A. Latib
Spokesperson: N. Piazza
Discussants: V. Bapat (*Pending confirmation*), D. Hildick-Smith (*Pending confirmation*), W. Wojakowski, S. Worthley

- Biomimetic design impacts flow dynamics: update from the DurAVR transcatheter heart valve studies
C. Meduri (Pending confirmation)
- Discussion and audience interaction
- One-year results of a new trans-catheter aortic valve system: the EMPIRE I study
J. A. Baz Alonso (Pending confirmation)
- Discussion and audience interaction
- Transcatheter Aortic Valve Repair for Aortic Insufficiency Using the Cusper Device
Y. Feld
- Discussion and audience interaction
- TRESect: Transcatheter leaflets resection device for aortic bioprosthesis
A. Latib
- The short self-expanding TAVR Valve: Optimum TAV
M. Thubrikar (Pending confirmation)
- Novel hybrid resorbable device to close the left atrial appendage
M. Buchbinder

08:30 - 09:30

ROOM 241

Abstracts

Clinical outcomes of left main PCI

Facilitators: T. Alexander, M. Pan

- Early and long-term outcomes of patients with ACS undergoing PCI to the left main coronary artery
M. Abdelghani
- Discussion and audience interaction
- Decoding the complexity and risk: validation of BCIS-CHIP score in left main PCI
E. S. Liu
- Discussion and audience interaction
- Five-year outcome after unprotected distal left main PCI according to complexity
O. Nemeth
- Discussion and audience interaction
- Clinical features, management and outcomes of left main spontaneous coronary artery dissection
R. Mazza (Pending confirmation)
- Discussion and audience interaction
- Comparison of clinical outcomes of different double-stent technique for left main bifurcation lesion
F. Malik
- Discussion and audience interaction

08:30 - 09:30

ROOM 243

How Should I Treat?

How should I treat this vulnerable plaque?

Anchorperson: A. Mcinerney
Spokesperson: N. Pinilla
Discussants: F. Alfonso, S. Brugaletta, D. Erlinge, H. Garcia

Join us if you want:

- To learn how intracoronary imaging can identify vulnerable plaque
- To understand the clinical implications of vulnerable plaque
- To gain an overview of the evidence for treating vulnerable plaque
- Welcome and learning objectives
A. Mcinerney, N. Pinilla
- Case 1 - Bystander disease with a vulnerable plaque
E. Gutierrez
- Discussion and audience interaction
- How to identify vulnerable plaque using intracoronary imaging
P. Canova
- Prognostic implications of vulnerable plaque
S. Brugaletta
- Discussion and audience interaction
- Current evidence for the treatment of vulnerable plaque
H. Garcia
- Discussion and audience interaction
- Case 1 - How did I treat?
E. Gutierrez
- Discussion and audience interaction
- Session evaluation and key learnings
A. Mcinerney

08:30 - 09:30

ROOM 251

Abstracts

Valve-in-valve TAVI

Facilitator: D. Dvir (Pending confirmation)

- Valve-in-valve TAVI for degenerated surgical valves in patients with small aortic annuli
M. Sato
- Discussion and audience interaction
- Impact of TAV design and implant strategy on hydrodynamic performance after valve-in-valve TAVI in small SAV
J. Curio
- Discussion and audience interaction
- Fracturing of biological surgical valves in valve-in-valve procedures
O. Angerås (Pending confirmation)
- Discussion and audience interaction
- Procedural outcomes of repeat TAVI with different valve combinations
W. H. Yin
- Discussion and audience interaction
- ACCURATE NEO 2 in valve-in-valve TAVI: procedural and mid-to-long-term outcomes from a single-centre study
G. Papadopoulos
- Discussion and audience interaction

08:30 - 09:30

ROOM 252A

Abstracts

PCR's Got Talent - Round 2 - Session 1

Jury members: U. Kaul (Pending confirmation), S. Pyxaras
Facilitators: V. Ferrero, M. Haude (Pending confirmation)

08:30 - 09:30

ROOM 252B

Case-based Discussion

Hostile access for TAVI procedure

With the collaboration of PVI (Paris Vascular Insights)

Anchorperson: A. Hertault (Pending confirmation)
Discussants: K. Deloose (Pending confirmation), E. Ducasse (Pending confirmation), Y. Goueffic (Pending confirmation)

Join us if you want:

- To identify challenging access for endovascular procedures, focus on TAVI, based on pre-operative imaging
- To learn five different techniques to overcome challenging access, pre-procedure
- To know how to manage peri-operative and post-operative complications associated to hostile access

08:30 - 09:30

ROOM 253

International
Collaboration

How Should I
Treat?

TEER for challenging anatomy: from myth to reality

With the collaboration of the Association of
Interventional Cardiology of the Spanish Society of
Cardiology and Sociedad Chilena de Cardiología,
SOCHICAR

Anchorpersons: A. B. Cid Alvarez, G.
Maluenda (Pending confirmation)
Discussants: X. Freixa Rofastes, A. Puentes
(Pending confirmation)

Join us if you want:

- To understand TEER indications and periprocedural steps
 - To learn how to perform a state-of-the-art TEER in contemporary practice
 - To discuss the optimal approaches for TEER in more challenging anatomies
 - To learn about the evaluation and treatment options for patients with failed surgical tricuspid annuloplasty
- Welcome and session objectives
G. Maluenda (Pending confirmation)
 - Case 1 - Severe mitral regurgitation following inferior infarction in an 81-year-old male
R. Venegas (Pending confirmation)
 - How would I treat case 1?
X. Freixa Rofastes
 - Discussion and audience interaction
 - Case 1 treatment
R. Venegas (Pending confirmation)
 - Key learnings Case 1
G. Maluenda (Pending confirmation)
 - Case 2 - Transcatheter treatment of recurrent severe tricuspid regurgitation after surgical tricuspid annuloplasty
M. Del Trigo Espinosa (Pending confirmation)
 - How would I treat case 2?
A. Puentes (Pending confirmation)
 - Discussion and audience interaction
 - Case 2 treatment
M. Del Trigo Espinosa (Pending confirmation)
 - Key learnings Case 2
A. B. Cid Alvarez
 - Session evaluation and key learnings
A. B. Cid Alvarez

08:30 - 09:30

ROOM 341

Abstracts

Treatment and prognostic stratification of ACS patients with cardiogenic shock

Facilitator: G. Musumeci

- In vivo analysis of hemodynamic performance of two mechanical cardiopulmonary resuscitation devices
U. Sajjad
- Discussion and audience interaction
- Dynamic change in SCAI shock grade is associated with circulatory mortality post cardiac arrest
P. Jeyaparakash
- Discussion and audience interaction
- Predictors of haemorrhagic events in patients with myocardial infarction complicated by cardiogenic shock
S. Azevedo (Pending confirmation)
- Discussion and audience interaction
- The predictors in different cardiogenic shock stages under ECMO: PCI strategies or cardiac reserve
T. W. Lu
- Discussion and audience interaction
- A 2-year evaluation of the BCIS conveyance algorithm for out-of-hospital cardiac arrest
U. Sajjad
- Discussion and audience interaction

08:30 - 09:30

ROOM 342A

Clinical Cases

When multivessel disease is so complex

- Rocky road
U. Rao
- Discussion and audience interaction
- Hide and seek
L. Peter
- Discussion and audience interaction
- Multivessel revascularisation in NSTEMI involving double chronic total occlusions
S. Atsawarat
- Discussion and audience interaction
- From blood fat to plaque: where is the fatty link?
B. Kokina
- Discussion and audience interaction
- Integrating mechanical circulatory support with CHIP-PCI: a comprehensive approach
C. T. Shih (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ROOM 342B

Abstracts

How to optimise radiation exposure in the cathlab

Facilitator: A. Azzano

- Workflow and safety of implementing a radiation protection cabin in the cathlab
S. Carvalho (Pending confirmation)
- Discussion and audience interaction
- Robotic system for percutaneous coronary intervention: the ROBO-SIL registry six-month outcomes
M. Bujak
- Discussion and audience interaction
- Reducing radiation exposure to cardiologists and cathlab personnel using radiation protection drape
Z. Farooq
- Discussion and audience interaction
- Role of the EggNest system in reducing radiation exposure in the cathlab
V. Fiorentini (Pending confirmation)
- Discussion and audience interaction
- First experience with an exoskeleton-based radiation protection suite in interventional cardiology
M. Brandt (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ROOM 343

International Collaboration

How Should I Treat?

A tale of two branches: lessons from complex bifurcation PCI

With the collaboration of the GISE - Italian Society of Interventional Cardiology and Working Group for Interventional Cardiology / Finnish Cardiac Society

Anchorpersons: T. Laakso (Pending confirmation), F. Saia (Pending confirmation)
Discussants: O. Kajander, G. G. Secco (Pending confirmation)

Join us if you want:

- To learn important lessons from complex bifurcation PCI
- To see how to tackle a stent loss in a stented left main bifurcation
- Welcome and session objectives
T. Laakso (Pending confirmation)
- Case 1 - Retrograde CTO PCI gets complicated in the left main bifurcation
E. Ilveskoski (Pending confirmation)
- How would I treat case 1?
G. G. Secco (Pending confirmation)
- Discussion and audience interaction
- Case 1 treatment
E. Ilveskoski (Pending confirmation)
- Key learnings Case 1
T. Laakso (Pending confirmation)
- Case 2 - Italy
G. Marchese (Pending confirmation)
- How would I treat case 2?
O. Kajander
- Discussion and audience interaction
- Case 2 treatment
G. Marchese (Pending confirmation)
- Key learnings Case 2
F. Saia (Pending confirmation)
- Session evaluation and key learnings
F. Saia (Pending confirmation)

08:30 - 09:30

ROOM NEXTGEN (351)

Imaging

NextGen

Learning

IVUS - Fundamentals

Facilitators: K. Mahadevan, E. Rafflenbeul
Media Driver: O. Weizman

Join us if you want:

- To understand why and when to use IVUS in PCI for better outcomes
- To review how to interpret IVUS images and optimise interventions step-by-step
- To discuss what IVUS adds beyond angiography for precise decision-making

08:30 - 09:30

ROOM 353

International Collaboration

How Should I Treat?

Session with international collaborations: Brunei Darussalam / Serbia

With the collaboration of the Cardiac Society Brunei Darussalam and Working group for interventional cardiology, Cardiology Society of Serbia

Anchorpersons: N. Juanda (Pending confirmation), M. Petrovic
Discussant: B. Maricic

- Welcome and session objectives
N. Juanda (Pending confirmation)
- Case 1 - Brunei Darussalam
- How would I treat case 1?
B. Maricic
- Discussion and audience interaction
- Case 1 treatment
- Key learnings Case 1
N. Juanda (Pending confirmation)
- Case 2 - Calcified left main and multivessel disease revascularisation after anterior wall STEMI
M. Cankovic
- How would I treat case 2?
- Discussion and audience interaction
- Case 2 treatment
M. Cankovic
- Key learnings Case 2
M. Petrovic
- Session evaluation and key learnings
M. Petrovic

08:30 - 09:30

ABSTRACT & CASE CORNER A

Abstracts

Non-antiplatelet drugs interventionalists should be aware of

Facilitators: A. Jeremias (Pending confirmation), M. Kaluzna Oleksy

- Pre-angiographic empagliflozin: effects on oxidative stress and glycan profiles
K. Cvitkusic Lukenda
- Discussion and audience interaction
- The impact of midazolam on radial spasm and periprocedural outcomes in primary PCI patients
K. Konstantinou (Pending confirmation)
- Discussion and audience interaction
- The role of pharmacological cocktails in preventing radial spasm during PCI
S. Ahmedov (Pending confirmation)
- Discussion and audience interaction
- Clinical condition and hydration strategy during cardiac catheterisation in kidney disease
C. B. Jong
- Discussion and audience interaction

08:30 - 09:30

ROOM ARLEQUIN

Abstracts

Novelties and future developments of sympathetic denervation to control blood pressure

Facilitator: K. Tsioufis

- Preclinical safety and efficacy of a novel extravascular bi-lateral renal denervation instrument
R. Tzafiri
- Discussion and audience interaction
- Lesion characteristics around the common hepatic and renal arteries using a radiofrequency catheter
M. Schlaich (Pending confirmation)
- Discussion and audience interaction
- Anatomic guidance to sympathetic denervation of the common hepatic artery
R. Tzafiri
- Discussion and audience interaction
- Multi-organ denervation in hypertensive patients pilot study design and rationale: SPYRAL GEMINI
F. Mahfoud
- Discussion and audience interaction
- The Electroductor sleeve : a breakthrough technology to unblind renal denervation interventions
L. Goffart (Pending confirmation)

08:30 - 09:30

ABSTRACT & CASE CORNER B

Abstracts

Left main stenting techniques

Facilitator: A. De Vos

- DK-crush or mini-crush stenting for complex left main bifurcation lesions
A. Y. Cizgici (Pending confirmation)
- Discussion and audience interaction
- Stent malapposition in left main trifurcations treated by stepwise provisional : a bench test
A. Maaroufi
- Discussion and audience interaction
- Stent expansion of novel everolimus-eluting platinum chromium stent in left main disease: MEGARS-LM
T. Warisawa
- Discussion and audience interaction
- Association between left main bifurcation angle and proximal left coronary artery disease
T. Tagashira
- Discussion and audience interaction
- Clinical outcomes of double kissing crush or double kissing culotte in left main bifurcation lesions
S. Kahraman
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER C

Clinical Cases

Unusual STEMI presentations: coronary embolism

Facilitators: C. Hengstenberg, G. Richardt

- Primary angioplasty: not everything that obstructs is a thrombus
B. Mohamed Redha
- Discussion and audience interaction
- The silent enemy strikes: Acute myocardial infarction after TAVI implantation
C. Lluch Requerey (Pending confirmation)
- Discussion and audience interaction
- Acute myocardial infarction caused by paradoxical coronary embolism
K. Xu
- Discussion and audience interaction
- Coronary artery pseudoaneurysm from septic emboli in mitral valve endocarditis: a rare complication
C. Kanaderm (Pending confirmation)
- Discussion and audience interaction
- STEMI in a patient with TAVI: not always straightforward
I. Abdulhabeeb
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER E

Complexity
Clinical Cases

Complications management in NSTEMI patients

Facilitators: M. Saad, H. Soeholm

- SVG stenting nightmare
S. Aljazzar (Pending confirmation)
- Discussion and audience interaction
- When you hear hooves think horses not zebras? Well not always!
S. Shakir (Pending confirmation)
- Discussion and audience interaction
- Dislodged stent in SVG in nightmarish day: blocking the graft with a cover stent was the solution
C. Floros
- Discussion and audience interaction
- Little lost stent
C. Dodgson (Pending confirmation)
- Discussion and audience interaction
- When complexity meets rarity: a case of coronary bifurcation perforation
I. ALTNJI
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER D

Clinical Cases

Imaging skills for successful TAVI procedure

- TAVI in left circumflex coronary artery abnormal origin
J. Molina-Martin De Nicolas (Pending confirmation)
- Discussion and audience interaction
- Potential risks of valve infolding with the new Evolut Pro+ FX platform: insights and recommendations
N. Veas
- Discussion and audience interaction
- Valvular bioprosthesis dysfunction and it's different faces
S. Tripi (Pending confirmation)
- Discussion and audience interaction
- When your hands are tied, what do you do?
W. Camilleri
- Discussion and audience interaction
- Zero-contrast TAVI - From patient preparation to successful treatment
L. Pyka
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER F

Complexity
Clinical Cases

Acute and late coronary complications post-TAVI

- A tale of angina post TAVI valve
M. Tahir
- Discussion and audience interaction
- Acute severe mitral regurgitation during TAVR: what is the mechanism?
B. Pant (Pending confirmation)
- Discussion and audience interaction
- Hidden coronary obstruction after TAVI
T. Carlos (Pending confirmation)
- Discussion and audience interaction
- Sudden haemodynamic collapse after self-expanding TAVI
K. Inanaga (Pending confirmation)
- Discussion and audience interaction
- Acute coronary occlusion following balloon aortic valvuloplasty
A. Abdalwahab (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT AND
CASE CORNER G

Clinical Cases

Left ventricle assist device for very high risk PCI

- One-stop shop: Impella, IVUS, Shockwave, Rotablation, bifurcations, CTO, DES/DEB
V. Cagnetta Domass
- Discussion and audience interaction
- When you have no other option remaining and nothing to lose
A. M. Rosu
- Discussion and audience interaction
- Left Main Calcium Nodule in Shock
R. Cheung (Pending confirmation)
- Discussion and audience interaction
- Completely percutaneous ECMO-assisted high-risk PCI with local anaesthesia
A. Griffioen
- Discussion and audience interaction
- Patient with unstable angina developing VT arrest needing urgent impella supported PCI
H. U. Rehman
- Discussion and audience interaction

08:30 - 09:30

THE EXCHANGE

Moderated E-
Poster

Optimising our approach to calcium treatment

Facilitators: *B. Hennessey (Pending confirmation), Y. Kim*

- Predictors of treatment success after intravascular lithotripsy in calcified coronary lesions
M. Van Oort (Pending confirmation)
- Discussion and audience interaction
- Comparison of intravascular lithotripsy, cutting and high-pressure balloons on calcium fracture
A. Finn (Pending confirmation)
- Discussion and audience interaction
- Evaluation of stent expansion after intravascular lithotripsy for concentric calcified lesion using
K. Shishido
- Discussion and audience interaction
- Functional assessment of intravascular lithotripsy for stent under expansion
J. Farina (Pending confirmation)
- Discussion and audience interaction
- Clinical impact of prespecified protocol for imaging-guided intravascular lithotripsy in coronary calcified lesions
S. Kuramitsu
- Discussion and audience interaction

09:45 - 10:45

THEATRE BLEU

How Should I
Treat?

Though decisions in complex left main PCI - Isolated ostial left circumflex

Anchorperson: *F. Burzotta*

Discussants: *L. Abudaqa, M. Balghith (Pending confirmation), H. J. Buettner, P. Chiam*

Join us if you want:

- To understand the role of imaging and physiology for ostial circumflex lesion assessment
 - To understand the available treatment options for ostial left circumflex artery
 - To learn about optimisation strategies that can help improve long-term outcomes
- Welcome and session objectives
F. Burzotta
 - Case Presentation - A case of isolated ostial left circumflex lesion referred to PCI and treated by inverted provisional up to T/TAP or Culotte
M. Lunardi
 - Discussion and audience interaction
 - Part 1 - How would I treat?
D. Hildick-Smith (Pending confirmation)
 - Part 2 - How would I treat?
G. Stankovic
 - Discussion and audience interaction
 - Part 1 - Case treatment
 - Part 2 - Case treatment
 - Part 3 - Case treatment
 - Discussion and audience interaction
 - Session evaluation and key learnings
F. Burzotta

09:45 - 10:45

THEATRE
BORDEAUX

Case-based
Discussion

Challenging vascular access and closure management

Anchorperson: A. Neylon
Spokesperson: F. Sawaya
Discussants: F. Hellig, E. Heng, Y. Watanabe
(Pending confirmation)

Join us if you want:

- To identify complex TAVI cases that may be treated via femoral approach
 - To learn how to select cases that may benefit from PTA/ intravascular lithotripsy assisted approach
 - To understand how to manage closure failure
 - To discover the essential toolbox for complex transfemoral TAVI
- Welcome and session objectives
A. Neylon
 - Why is the transfemoral approach favored?
E. P. Tigges
 - Case 1 - Challenging iliofemoral
N. Ali
 - Case 2 - Challenging arch
A. Mcinerney
 - Case 3 - Complications: major femoral complication or closure failure
F. Sawaya
 - Session evaluation and key learnings

09:45 - 10:45

THEATRE
HAVANE

Translate the TOP
trials into practice

Translate the TOP trials into practice - DCB after REC-CAGEFREE 1 - Vulnerable plaque PCI after PREVENT

Facilitators: M. Haude (Pending confirmation), A. Kirtane

09:45 - 10:45

ROOM MAILLOT

Imaging
How Should I
Treat?

ACS with normal coronary arteries: angiography done, job done?

Anchorperson: V. Kunadian
Spokesperson: S. Brugaletta
Discussants: P. Capranzano (Pending confirmation), F. Crea (Pending confirmation), L. Holmvang (Pending confirmation), D. Jones

Join us if you want:

- To understand the clinical importance of MINOCA
 - To learn how to correctly diagnose the etiology by implementing invasive and non-invasive tests
 - To become aware of therapeutic options customised on the specific endotype
- Welcome and learning objectives
V. Kunadian
 - Case 1 - Plaque erosion
M. Kovacevic
 - Discussion and audience interaction
 - Case 2 - Spontaneous coronary artery dissection
R. A. Montone (Pending confirmation)
 - Discussion and audience interaction
 - What do the latest data show on the heterogeneous conditions of MINOCA?
R. A. Montone
 - Discussion and audience interaction
 - Session evaluation and key learnings
S. Brugaletta

09:45 - 10:45

ROOM
LEARNING

Learning

Provisional strategy for non-left main true bifurcation lesion

Facilitators: G. Di Gioia, J. F. Lassen

Join us if you want:

- To understand how to choose the best technique with or without imaging
- To clarify when and how to treat the side branch and discuss the potential role for DCBs
- To discuss how to choose the appropriate technique when the second stent is needed

09:45 - 10:45

**IMAGING SKILLS
LAB 1 (352A)**

Imaging
Hands on
Simulation-based
Learning

**Hands-on OCT-guided treatment
of calcified lesions**

This session has been made possible thanks to the in-kind support of Abbott

Facilitators: F. Bardooli, A. Jeremias (Pending confirmation), N. Pinilla
Media Driver: M. Lombardi
Physician Trainers: V. Cesario, N. Chandra Mohan, K. Kyhl, D. Tiong

Join us if you want:

- To learn how to recognise the different morphologies of calcified plaque by OCT
- To plan the best calcium modification strategy depending on the type and degree of calcification
- To understand the importance of calcified plaque modification before stent implantation

09:45 - 10:45

**SIMULATION
LEARNING
ROOM (STUDIO
A)**

Simulation-based
Learning

**Transitioning from Mitral TEER
to Tricuspid TEER: how to make
it smooth**

Join us if you want:

- To understand anatomical insights to improve your outcomes in tricuspid TEER using the highest fidelity simulator
- To understand the similarities and differences between mitral and tricuspid anatomy
- To understand the mechanism of function of devices and the interaction with the valve anatomy

09:45 - 10:45

**IMAGING SKILLS
LAB 2 (352B)**

Imaging
Hands on
Simulation-based
Learning

**Hands-on IVUS-guided
treatment of left main and
bifurcation**

This session has been made possible thanks to the in-kind support of Boston Scientific

Facilitators: S. Al Shaikh (Pending confirmation), J. Hung (Pending confirmation), J. Spratt (Pending confirmation)
Media Driver: G. Nardi
Physician Trainers: A. Mukherjee, S. Paetzold (Pending confirmation), S. I. Sandoval Hernandez

Join us if you want:

- To discuss benefits of IVUS guidance for left main and bifurcation PCI.
- To understand the importance of plaque morphology assessment, landing zones and predictors of side branch occlusion
- To decide provisional vs. 2-stent technique ad-hoc and plan step-by-step.
- To assess the need for optimisation in left main PCI

09:45 - 10:45

ROOM 241

Abstracts

**Optimising CTO outcomes by
lesion selection**

Facilitator: C. Cosgrove

- › Coronary calcium patterns detected with CT and their impact on procedural outcomes in CTO-PCI
G. Panuccio (Pending confirmation)
- › Discussion and audience interaction
- › Is procedural outcome of proximal chronic total occlusion recanalisation dependent on target vessel?
E. N. Holck
- › Discussion and audience interaction
- › Remodelling of distal coronary vessels in CTO: prediction based on coronary hemodynamic parameters
A. Griffioen
- › Discussion and audience interaction
- › Optimizing CTO-PCI: a comparative study of imaging-guided vs conventional strategies
G. Panuccio (Pending confirmation)
- › Discussion and audience interaction
- › Long RCA CTO with blunt distal cap at distal R-PLA/PDA bifurcation
M. Ochiai
- › Discussion and audience interaction

09:45 - 10:45

ROOM 242AB

Hot line / Late-Breaking Trials

Hotline TAVI 2: outcomes with new and established devices

Anchorperson: S. Baldus

Spokesperson: T. Patterson (Pending confirmation)

Discussants: H. Herrmann, T. Pilgrim (Pending confirmation), L. Rosseel, L. Testa

- Pooled analysis of two randomised controlled trials comparing balloon-expandable TAVI valves
C. J. Terkelsen
- Discussion and audience interaction
- TAVI with intra- vs. supra-annular self-expanding valves
P. P. Leone
- Discussion and audience interaction
- Early ACURATE prime: multicenter study to evaluate safety and effectiveness
A. Rück
- Discussion and audience interaction
- ACURATE neo2 under-expansion in the ACURATE IDE study: a post-hoc analysis
R. Makkar
- Discussion and audience interaction

09:45 - 10:45

ROOM 243

Case-based Discussion

How to select appropriate cardiovascular intervention for a patient with tricuspid regurgitation?

With the collaboration of the PCR Tricuspid Focus Group

Anchorperson: J. Hausleiter (Pending confirmation)

Spokesperson: V. Rudolph

Discussant: C. Davidson

Join us if you want:

- To learn how comorbidities in tricuspid regurgitation patients will impact decision making
 - To understand the anatomical factors which predict success of transcatheter tricuspid regurgitation treatment
 - To learn the imaging criteria useful for device selection
- Welcome and session objectives
J. Hausleiter (Pending confirmation)
 - Patient vignette
J. Bartkowiak (Pending confirmation)
 - Discussion and audience interaction
 - The clinical spectrum tricuspid regurgitation of patients: can we define futility?
E. Donal
 - Discussion and audience interaction
 - Predictors for successful tricuspid regurgitation reduction by T-TEER
L. Stolz
 - Discussion and audience interaction
 - Imaging considerations for device selection: T-TEER vs annuloplasty vs transcatheter tricuspid valve replacement
M. I. Koerber
 - Discussion and audience interaction
 - How was the patient treated?
J. Bartkowiak (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
V. Rudolph

09:45 - 10:45

A journey into the ANOCA and INOCA dilemma

ROOM 251

Abstracts

- Endotypes of angina with non-obstructive coronary arteries
O. Velollari
- Discussion and audience interaction
- Prognostic stratification across ischemia with non-obstructive coronary arteries endotypes
E. Rumiz
- Discussion and audience interaction
- Associations between metabolic phenotypes and cardiovascular outcomes in patients undergoing PCI
B. Li
- Discussion and audience interaction
- Role of ischaemic mitral regurgitation in predicting patient-reported outcomes in patients undergoing PCI
K. Sakai (Pending confirmation)
- Discussion and audience interaction
- Microvascular Resistance Reserve: a dynamic insight in to the microvasculature
A. Babu (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

PCR's Got Talent - Round 2 - Session 2

ROOM 252A

Abstracts

Jury members: *P. Kolh (Pending confirmation), A. Mohamed (Pending confirmation), M. Ntsekhe (Pending confirmation), B. Stähli*
Facilitator: *G. Richardt*

09:45 - 10:45

Academic Research Consortium on LAA closure

ROOM 252B

International Collaboration

Case-based Discussion

With the collaboration of Academic Research Consortium

Anchorperson: *R. Mehran*
Spokesperson: *M. C. Morice (Pending confirmation)*
Discussants: *D. Capodanno, P. Garot, J. Saw*

Join us if you want:

- To know the achievements of the academic research consortium
- To learn how to streamline standardised endpoints for RCTs
- To understand how definitions are homogenised through a collaborative work

09:45 - 10:45

ROOM 253

International Collaboration

How Should I Treat?

Session with international collaborations: Australia New Zealand / Canada

With the collaboration of the Canadian Association of Interventional Cardiology / Association Canadienne de Cardiologie d'intervention and Interventional Council, Cardiac Society of Australia and New Zealand (CSANZ)

Anchorpersons: *A. Lavoie (Pending confirmation), S. Lo (Pending confirmation)*

- Welcome and session objectives
S. Lo (Pending confirmation)
- Case 1 - Australia or New Zealand
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
- Key learnings Case 1
S. Lo (Pending confirmation)
- Case 2 - Canada
- How would I treat case 2?
- Discussion and audience interaction
- Case 2 treatment
- Key learnings Case 2
A. Lavoie (Pending confirmation)
- Session evaluation and key learnings
A. Lavoie (Pending confirmation)

09:45 - 10:45

ROOM 341

Abstracts

DES and DCB for bifurcation treatment

Facilitator: *C. Di Mario*

- A comparison of drug eluting balloons with drug eluting stents in medina 001 bifurcation lesions
N. Corballis (Pending confirmation)
- Discussion and audience interaction
- Comparison of sirolimus- versus everolimus-eluting stent systems in coronary bifurcation lesions
S. Gunasekaran
- Discussion and audience interaction
- Drug-coated balloons versus non-coated balloons for the side branch: a meta-analysis
L. Tua
- Discussion and audience interaction
- Length of DAPT in patients treated with percutaneous revascularization on coronary bifurcations.
M. Nebiolo (Pending confirmation)
- Discussion and audience interaction
- Proximal side-branch optimisation and re-intervention: a pooled analysis of EVOLUTE-CRUSH registries
A. Y. Cizgici (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

ROOM 342A

Nurses and Allied Professionals

Case-based Discussion

Career and recognition for nurses and allied professionals in the cathlab: where are we?

Join us if you want:

- To explore how nurses and allied professionals are recognised, rewarded, and supported in their careers, including pathways for progression and professional development
- To discover extraordinary career opportunities within nurses and allied professional roles, including areas you might not have considered
- To gain insights and inspiration to shape your career journey, helping you define where your role could take you next

09:45 - 10:45

ROOM 342B

Abstracts

New diagnostic and therapeutical tools in the coronary field

- The prognostic effect of QFR-based functionally complete versus incomplete revascularisation
N. Pyrryris
- Discussion and audience interaction
- Cardiac computed tomography and echocardiography for invasive hybrid perfusion quantification
E. Gallinoro
- Discussion and audience interaction
- Clinical validation of AI-QCA with automated frame selection: a pioneer european multi-center study
A. Candreva (Pending confirmation)
- Discussion and audience interaction
- A national audit of coronary sinus reducer implantation in the United Kingdom
K. Cheng (Pending confirmation)
- Discussion and audience interaction
- Cryotherapy for vulnerable plaque: preliminary report from Polarstar, a first-in-human study
C. Collet
- Discussion and audience interaction

09:45 - 10:45

ROOM 343

International Collaboration

How Should I Treat?

Session with international collaborations: Denmark / Netherlands

With the collaboration of the Danish Society of Cardiology and Dutch Working Group of Interventional Cardiology

Anchorpersons: *G. Leenders (Pending confirmation), J. Lønborg*
Discussants: *E. Lipsic (Pending confirmation), N. T. Olsen (Pending confirmation)*

- Welcome and session objectives
J. Lønborg
- Case 1 - Denmark
E. Christiansen (Pending confirmation)
- How would I treat case 1?
E. Lipsic (Pending confirmation)
- Discussion and audience interaction
- Case 1 treatment
E. Christiansen (Pending confirmation)
- Key learnings Case 1
J. Lønborg
- Case 2 - Netherlands
M. Grundeken (Pending confirmation)
- How would I treat case 2?
N. T. Olsen (Pending confirmation)
- Discussion and audience interaction
- Case 2 treatment
M. Grundeken (Pending confirmation)
- Key learnings Case 2
G. Leenders (Pending confirmation)
- Session evaluation and key learnings
G. Leenders (Pending confirmation)

09:45 - 10:45

ROOM NEXTGEN (351)

Imaging

NextGen

Learning

OCT - Fundamentals

Facilitators: *N. Ryan, A. Sticchi*

Join us if you want:

- To understand how to set up and use OCT
- To discuss key clinical indications for OCT
- To learn how to interpret various OCT findings

09:45 - 10:45

ROOM 353

International
Collaboration

How Should I
Treat?

TAVI in challenging cases: pushing the limits

With the collaboration of the Brazilian Society of
Interventional Cardiology (SBHCl) and Portuguese
Association of Interventional Cardiology (APIC)

Anchorpersons: J. Delgado Silva, R.
Sarmiento-Leite

Discussants: A. Abizaid (Pending
confirmation), J. Silva Marques

Participants: A. Abizaid (Pending
confirmation), B. Falcao (Pending
confirmation)

Join us if you want:

- To master valve-in-valve TAVI in
challenging anatomical settings
 - To tackle TAVI challenges in
multivessel disease and impaired
left ventricular function
 - To optimise procedural planning
with advanced imaging, access
strategies, and device selection
- Welcome and session objectives
R. Sarmiento-Leite
 - Case 1 - Brazil
B. Falcao (Pending confirmation)
 - How would I treat case 1?
J. Silva Marques
 - Discussion and audience interaction
 - Case 1 treatment
B. Falcao (Pending confirmation)
 - Key learnings Case 1
R. Sarmiento-Leite
 - Case 2 - Valve-in-valve in chronic aortic
dissection
J. Brito
 - How would I treat case 2?
A. Abizaid (Pending confirmation)
 - Discussion and audience interaction
 - Case 2 treatment
J. Brito
 - Key learnings Case 2
J. Delgado Silva
 - Session evaluation and key learnings
J. Delgado Silva

09:45 - 10:45

ROOM
ARLEQUIN

Abstracts

Novel tools and strategies in chronic heart failure

Facilitators: J. Bartunek, A. Dague

- Impact of tricuspid regurgitation on
outcomes in patients with various heart
failure phenotypes
I. Mattig (Pending confirmation)
- Discussion and audience interaction
- Renal artery denervation improves
myocardial function in patients with heart
failure and atrial fibrillation
T. Skowerski
- Discussion and audience interaction
- The elevate promise: high-flow, 10 Fr
pLVAD for cardiogenic shock
D. Israeli
- Discussion and audience interaction
- Synchronised diaphragmatic stimulation
for symptomatic heart failure
P. Bauer
- Discussion and audience interaction
- Early clinical experience with a novel
chronically-adjustable, pressure sensing
interatrial shunt
G. Singh
- Discussion and audience interaction
- A dedicated device for transcatheter
closure of sinus venosus atrial septal
defects
J. Vettukattil (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

Multi-modality assessment of coronary disease

Facilitator: N. Holm

ABSTRACT & CASE CORNER A

Abstracts

- Diagnostic yield of OCT and CMR for MINOCA
B. Yosofi (Pending confirmation)
- Discussion and audience interaction
- Coronary plaque vulnerability: the transition from invasive to non-invasive assessment
S. Fezzi
- Discussion and audience interaction
- Relationship between QFR and IVUS parameters post-PCI in complex coronary lesions
F. Alqahtani
- Discussion and audience interaction
- Combined high-frequency OCT and coronary microvascular dysfunction testing for CAV
D. Quimby
- Discussion and audience interaction
- Prevalence, anatomic features and predictors of angina in myocardial bridges using coronary CT
C. Aduba
- Discussion and audience interaction

09:45 - 10:45

New tools for left main treatment

Facilitator: C. Aurigemma

ABSTRACT & CASE CORNER B

Abstracts

- Real-world efficacy in routine intracoronary imaging guidance in left main coronary intervention
Y. Murasato
- Discussion and audience interaction
- The effectiveness of post-PCI FFR assessment after provisional-T stenting true left main bifurcations
D. Maximkin
- Discussion and audience interaction
- Safety & efficacy of intravascular lithotripsy for calcified left main disease: a subgroup analysis of shock India registry
A. Gupta (Pending confirmation)
- Discussion and audience interaction
- DCB based treatment of left main true bifurcation lesion
A. Y. Her
- Discussion and audience interaction
- To stent or not to stent in true bifurcation: the side branch in a left main artery bifurcation?
R. Louro (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

TAVI: contemporary practice

Facilitator: R. Kharbanda

ABSTRACT & CASE CORNER C

Abstracts

- The 2024 European TAVI PATHWAY Registry
L. Rosseel
- Discussion and audience interaction
- Comprehensive risk stratification in patients with moderate aortic stenosis
D. Besana (Pending confirmation)
- Discussion and audience interaction
- Repeat TAVI: assessing its safety and efficacy in patients with prior TAVI
N. Ktenopoulos (Pending confirmation)
- Discussion and audience interaction
- Explant vs redo-TAVI after transcatheter valve failure: a systematic review and meta-analysis
A. Nasrollahizadeh (Pending confirmation)
- Discussion and audience interaction
- Long-term neurological outcomes after tavr in high-volume cardiovascular care centre
S. Jonik (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

Intracoronary imaging for complex PCI: a must!

ABSTRACT & CASE CORNER D

Clinical Cases

- Evolution of multivessel disease NSTEMI using DES, BRS, DCB and intravascular imaging
S. Tarbine (Pending confirmation)
- Discussion and audience interaction
- Recurrent in-stent restenosis involving multiple overlapping stent layers
A. Kolyviras
- Discussion and audience interaction
- Imaging solutions to complex problems
T. Bhatia
- Discussion and audience interaction
- The route shall not be taken
S. Kuppan (Pending confirmation)
- Discussion and audience interaction
- In-stent restenosis planned for PCI: a diagnostic twist
G. Occhipinti
- Discussion and audience interaction

09:45 - 10:45

Management of stent-related complications

Facilitator: N. Mankerious

ABSTRACT &
CASE CORNER E

Complexity
Clinical Cases

- › Unbelievable
A. Hussein (Pending confirmation)
- › Discussion and audience interaction
- › From routine to crisis: a primary PCI case turned nightmare
M. Zehra
- › Discussion and audience interaction
- › When you fail to stent
Y. T. Lee (Pending confirmation)
- › Discussion and audience interaction
- › Methodical approach to an unexpected situation
M. Abdirashid
- › Discussion and audience interaction
- › STEMI complicated with stent embolisation
- › Discussion and audience interaction

09:45 - 10:45

Iatrogenic causes for shock treated with LV support

Facilitator: F. J. Neumann

ABSTRACT AND
CASE CORNER G

Clinical Cases

- › Cardiogenic shock in a patient with Bentall procedure and Hemi-Cabrol graft to left main
E. Sanchez
- › Discussion and audience interaction
- › Suck and support
S. Narasimhan (Pending confirmation)
- › Discussion and audience interaction
- › Dramatic complications demand strategic approaches
R. Ruggiero (Pending confirmation)
- › Discussion and audience interaction
- › A case of simultaneous occlusion of right coronary artery and left main trunk osmium during anesthesia induction in bypass surgery
F. Yoshimachi
- › Discussion and audience interaction
- › When protection helps avoiding trouble
I. Vosko
- › Discussion and audience interaction

09:45 - 10:45

TAV-in-TAV complications

Facilitators: D. Blackman, C. Fraccaro (Pending confirmation)

ABSTRACT &
CASE CORNER F

Complexity
Clinical Cases

- › Valve-in-valve TAVI for aortic bioprosthetic valve regurgitation: planning ahead to keep the flow
K. Konstantinou (Pending confirmation)
- › Discussion and audience interaction
- › When TAVI valve-in-valve takes a twist
M. Al Asmar
- › Discussion and audience interaction
- › LVOT calcium and large anatomy – predictably unpredictable
G. Hamilton (Pending confirmation)
- › Discussion and audience interaction
- › Decompensated severe bicuspid aortic valve stenosis, extremely large annulus & severe left ventricle dysfunction
L. Van Nunen
- › Discussion and audience interaction
- › Managing bioprosthesis deterioration in the elderly: first steps to deal with a future problem
J. Certo Pereira (Pending confirmation)
- › Discussion and audience interaction

09:45 - 10:45

TAVI clinical considerations

Facilitators: J. Byrne, O. Goktekin

THE EXCHANGE

Moderated E-Poster

- › Bicuspid aortic valve is associated with higher risk for subclinical leaflet thrombosis after TAVI
Z. Zhao (Pending confirmation)
- › Discussion and audience interaction
- › Clinical impact and anatomical differences of fused type and forme fruste bicuspid aortic valves
B. Bellini
- › Discussion and audience interaction
- › Kidney function after percutaneous transcatheter aortic valve implantation in hospitalised patients
C. Santos-Jorge
- › Discussion and audience interaction
- › Impact of transcatheter aortic valve implant height on haemodynamic flow
L. Llamas Fernández (Pending confirmation)
- › Discussion and audience interaction
- › Performance of JenaValve vs. Evolut Heart Valves for aortic valve stenosis - a matched comparison
M. Geyer (Pending confirmation)
- › Discussion and audience interaction

10:45 - 12:15

MAIN ARENA

LIVE Educational Case

Transcatheter tricuspid valve repair: LIVE Educational Case from University Medical Centre - Mainz, Germany

With the collaboration of the PCR Tricuspid Focus Group

Anchorperson: F. Maisano
Spokesperson: M. Adamo
Procedural Analyst: D. Tchetché
Operators: P. Lurz, T. Ruf
Imaging analyst: M. Swaans
Discussants: E. Ho, F. Praz, S. Samargandy, M. Sitges

- Welcome and session objectives
F. Maisano
- Patient presentation
M. Adamo
- Imaging analysis
- Discussion and audience interaction
- Operator strategy
F. Maisano
- LIVE Case procedure
- Debriefing and audience interaction
- Session evaluation and key learnings
F. Maisano

10:45 - 12:15

HANDS ON LAB

Hands on
Simulation-based Learning

Bailout options and techniques during PCI: distal perforation

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: A. Aminian, H. Benamer, A. Endo, T. Hovasse, J. Kefer, G. K. Olivecrona (Pending confirmation)

Join us if you want:

- To explore bailout options using existing devices
- To determine the different solutions to successfully treating distal perforation using simulation
- To consider causes and avoidance strategies for distal perforation

11:15 - 12:15

THEATRE BLEU

Hot line / Late-Breaking Trials

Major Late-Breaking Trials from EuroPCR 2025

Anchorperson: B. Prendergast (Pending confirmation)
Spokesperson: T. Cuisset (Pending confirmation)
Discussants: D. Capodanno, D. Moliterno, G. Montalescot (Pending confirmation), S. Windecker

- Meta-Analysis of individual patient data from the PROTECTED TAVR and BHF PROTECT-TAVI studies
R. Kharbanda
- Discussion and audience interaction
- Angiography versus physiology-guided PCI in patients undergoing TAVI: the functional assessment in TAVI (FAITAVI) trial
F. L. Ribichini
- Discussion and audience interaction
- One-month DAPT followed by dose reduction of prasugrel after drug-coated stent insertion in Acute Coronary Syndrome
W. C. Kang (Pending confirmation)
- Discussion and audience interaction

11:15 - 12:15

THEATRE BORDEAUX

How Should I Treat?

Treatment dilemmas in STEMI patients with multivessel disease

Anchorperson: M. Götzberg
Spokesperson: N. Pinilla
Discussants: G. Campo, A. Mcinerney, V. Paradies

Join us if you want:

- To understand which is the current role of imaging and physiology in planning guidance for patients with STEMI and multivessel disease
- To discuss the best treatment strategy in acute STEMI not interfering with a clear CABG indication
- To learn what influences the optimal timing of revascularisation of non-culprit vessels during hospital admission or at a later stage
- Welcome and session objectives
M. Götzberg
- Case 1 - Using physiology to guide revascularisation in patients with STEMI and multivessel disease
T. Engstrom
- Discussion and audience interaction
- Case 2 - Multivessel disease case with CABG indications presenting with a STEMI
A. Jerónimo
- Discussion and audience interaction
- Case 3 - STEMI and severe vs. intermediate non-culprit lesions: timing of non-culprit vessel revascularisation
- Discussion and audience interaction
- Session evaluation and key learnings
N. Pinilla

11:15 - 12:15

THEATRE
HAVANE

Hot line / Late-
Breaking Trials

Stent technologies, last evidence in coronary interventions

Anchorperson: M. Lesiak
Spokesperson: A. Seth
Discussants: S. Kedev, P. Lemos, A. Neylon, M. A. Rosli

- Long-term clinical performance of Resorbable Magnesium Scaffolds in Acute Coronary Syndrome
E. Cerrato
- Discussion and audience interaction
- Final 7-year outcome of the COMPARE-ABSORB trial
P. C. Smits (Pending confirmation)
- Discussion and audience interaction
- Percutaneous coronary treatment with bioadaptor versus stent: 3-year outcomes from BIOADAPTOR-RCT
S. Saito
- Discussion and audience interaction
- Randomized comparison of dual therapy sirolimus-eluting stent vs. biolimus-eluting stent
A. Eftekhari
- Discussion and audience interaction
- A randomised clinical trial on direct stenting versus pre- and postdilatation in stable CAD
R. M. Oemrawsingh (Pending confirmation)
- Discussion and audience interaction

11:15 - 12:15

ROOM MAILLOT

How Should I
Treat?

Case-based learning on different aspects of transcatheter LAA closure

Anchorperson: P. Garot
Spokesperson: O. De Backer
Discussants: C. Hammerstingl, F. Nietlispach, N. Wunderlich

Join us if you want:

- To learn how to secure a safe transseptal puncture for LAA closure
 - To learn how to perform a state-of-the-art standard LAA closure
 - To know how to assess the final device implant position in challenging anatomies.
 - To understand the fine tuning of post-procedure antithrombotic therapy in high-risk LAA closure patients
- Welcome and session objectives
P. Garot
 - How to perform a safe and effective transseptal puncture for LAA closure?
L. Rosseel
 - Discussion and audience interaction
 - How to perform a state-of-the-art standard LAA closure?
X. Freixa Rofastes
 - Discussion and audience interaction
 - How to handle challenging LAA anatomy?
L. Räber
 - Discussion and audience interaction
 - Optimal post-LAA closure antithrombotic treatment intensity and duration in a patient with high stroke and/or bleeding risk
F. Nietlispach
 - Discussion and audience interaction
 - Session evaluation and key learnings
O. De Backer

11:15 - 12:15

ROOM
LEARNING

Learning

Two-stent strategy: when and how

Facilitators: F. Burzotta, A. Cader
Media Driver: M. Lunardi

Join us if you want:

- To reflect when the need for two stents can be anticipated
- To plan an optimal strategy based on anatomy
- To share tips and tricks to optimise procedural results

11:15 - 12:15

IMAGING SKILLS
LAB 1 (352A)

Imaging
Hands on
Simulation-based
Learning

Hands-on OCT - Bifurcation PCI

This session has been made possible thanks to the in-kind support of Abbott

Facilitators: M. Alasnag, N. Amabile, T. Johnson
Media Driver: N. Chandra Mohan
Physician Trainers: K. Kyhl, M. Lombardi, N. Sidik, D. Tiong

Join us if you want:

- To consider the benefits of OCT guidance for bifurcation PCI
- To understand the importance of plaque morphology assessment and predictors of side branch occlusion
- To learn how to utilise OCT in the optimisation of bifurcation stenting

11:15 - 12:15

ROOM 241

Abstracts

Choices, choices: a global perspective on multiple modalities for calcium modification

Facilitators: C. Cosgrove, R. Costa (Pending confirmation)

- Orbital, shockwave, rotational atherectomy, and cutting balloon in calcified lesions: SCAAR-analysis
M. Zhou (Pending confirmation)
- Discussion and audience interaction
- Rotational atherectomy vs. modified balloons for calcified nodules: a PREPARE-CALC sub-analysis
M. Buske (Pending confirmation)
- Discussion and audience interaction
- The use of rotational atherectomy in Australia: evolving practices in the era of intravascular lithotripsy
E. Chuah
- Discussion and audience interaction
- Intravascular lithotripsy vs. rotational atherectomy for calcified coronary lesions: a meta-analysis
R. Suruagy-Motta (Pending confirmation), R. Suruagy-Motta (Pending confirmation)
- Discussion and audience interaction
- Coronary lithotripsy in calcified lesions: preliminary results from the GISE Shockcalcium registry
G. Nardi
- Discussion and audience interaction

11:15 - 12:15

IMAGING SKILLS
LAB 2 (352B)

Imaging
Hands on
Simulation-based
Learning

Hands-on IVUS-guided treatment of calcified lesions

This session has been made possible thanks to the in-kind support of Boston Scientific

Facilitators: S. Brugaletta, K. Mahadevan, P. O'kane
Media Driver: A. Mukherjee
Physician Trainers: S. Paetzold (Pending confirmation), S. I. Sandoval Hernandez

Join us if you want:

- To learn how to recognise the different morphologies of calcified plaque by IVUS
- To plan the best calcium modification strategy depending on the type and degree of calcification
- To consider the role of IVUS in optimising stent results

11:15 - 12:15

SIMULATION
LEARNING
ROOM (STUDIO
A)

Simulation-based
Learning

Managing peripheral access

Facilitator: A. Beneduce

Join us if you want:

- To understand how to plan access on CT scan, choose the best (simplest safest) setup
- To choose the ideal closure device choice
- To manage closure device failure and peripheral complications

11:15 - 12:15

ROOM 242AB

Innovation / CV
Pipeline

Novel devices for edge-to-edge mitral repair

Anchorperson: C. Grasso (*Pending confirmation*)
Spokesperson: T. Rudolph
Discussants: A. Asgar, R. Parma, P. Sorajja (*Pending confirmation*)

- 1 year result of a cost-effective TEER system in heart failure patients with MR
L. Zhiling (Pending confirmation)
- Discussion and audience interaction
- Initial Experience in PulveClip™ Transcatheter Mitral Valve Edge-to-edge Repair Device for DMR
L. Zhiling (Pending confirmation)
- Discussion and audience interaction
- First-in-man application of unique designed TEER system in high-risk patients with severe DMR
X. Pan (Pending confirmation)
- Discussion and audience interaction
- Initial Experience in GeminiOne™ TEER Device for degenerative mitral regurgitation
X. Pan (Pending confirmation)
- Discussion and audience interaction
- Transcatheter edge-to-edge mitral valve repair with a novel device: a case series
B. Caneiro-Queija (Pending confirmation)
- Discussion and audience interaction

11:15 - 12:15

ROOM 243

Case-based
Discussion

Refractory heart failure: combining oral therapy and device is key

With the collaboration of iHF initiative (improving Heart Function)

Anchorperson: E. Barbato
Spokesperson: A. Mebazaa
Discussants: J. Bartunek, J. L. Merino (*Pending confirmation*), G. Rosano

Join us if you want:

- To recognise heart failure refractory to medical therapy that requires treatment escalation
- To appraise the contemporary indications of cardiovascular interventions
- To understand how to achieve optimal synergy between oral therapy and devices

- Welcome and session objectives
E. Barbato
- Stimulate interaction
A. Mebazaa
- Chronic heart failure case – Part 1
J. Bartunek
- Discussion and audience interaction
- Chronic heart failure case – Part 2
J. Bartunek
- Discussion and audience interaction
- Chronic heart failure case – Part 3
J. Bartunek
- Discussion and audience interaction
- Session evaluation and key learnings
A. Mebazaa

11:15 - 12:15

ROOM 251

Abstracts

DCB PCI: are we ready for complex de novo lesions?

Facilitators: R. Garbo, E. Regar (*Pending confirmation*)

- DCB-based versus DES-only strategy for de novo CAD across CHIP risk categories
D. O. Kang
- Discussion and audience interaction
- A retrospective analysis of long-term outcomes of DCB vs DES in heavily calcified lesions
R. Natarajan (Pending confirmation)
- Discussion and audience interaction
- Impact of diabetes on de novo lesions treated with DCB
X. He (Pending confirmation)
- Discussion and audience interaction
- DEB catheters for PCI of true left main bifurcations: 5-years follow-up
D. Maximkin
- Discussion and audience interaction
- Long-term outcomes following DCB vs thin-strut DES for treatment of in-stent restenosis in chronic kidney disease patients
R. Januszek (Pending confirmation)
- Discussion and audience interaction

11:15 - 12:15

ROOM 252B

International
Collaboration

Case-based
Discussion

Unconventional situations and complications during cardiovascular interventions

With the collaboration of CITIC (Curso de Imagen, Tecnologia e Intervencion Cardiovascular) and Sociedad de Cardiologia Intervencionista de Mexico (SOCIME)

Anchorperson: A. Ricalde
Spokesperson: E. Guering (Pending confirmation)

Join us if you want:

- To learn tips and tricks of how to tackle interventional complications at the cathlab
 - To learn to avoid complications during conventional procedures
 - To learn different approaches to deal with difficult circumstances such as complications
- Welcome and session objectives
A. Ricalde
 - Case 1 - Unexpected complication during PCI
M. Kuri (Pending confirmation)
 - Topic review of case 1
P. Aubanel (Pending confirmation)
 - Discussion and audience interaction
 - Case 2 - TAVI complication
 - Topic review of case 2
 - Discussion and audience interaction
 - Case 3 - Complication during a CTO
M. A. Alcantara Melendez (Pending confirmation)
 - Topic review of case 3
 - Discussion and audience interaction
 - Session evaluation and key learnings
E. Guering (Pending confirmation)

11:15 - 12:15

ROOM 253

International
Collaboration

How Should I
Treat?

How complex left main intervention can be?

With the collaboration of the GACI (French Group of Atheroma and Interventional Cardiology) and Iranian Society of Interventional Cardiology (ISOIC)

Anchorpersons: B. Aminian, E. van belle

Join us if you want:

- To be updated on state of left main stenting in 2025, latest guidelines and trials
 - To see the complex left main intervention, its preparation, performance and delicate techniques
 - To see the adverse effects and complications of complex left main stenting
- Welcome and session objectives
E. van belle
 - Case 1 - France
 - How would I treat case 1?
 - Discussion and audience interaction
 - Case 1 treatment
 - Key learnings Case 1
E. van belle
 - Case 2 - When simple is impossible
 - How would I treat case 2?
 - Discussion and audience interaction
 - Case 2 treatment
 - Key learnings Case 2
B. Aminian
 - Session evaluation and key learnings
B. Aminian

11:15 - 12:15

ROOM 341

Abstracts

Updates in transcatheter MVR

Facilitator: S. Baldus

- Long-term results of transcatheter mitral valve-in-valve implantation over ten years
E. Zancanaro (Pending confirmation)
- Discussion and audience interaction
- Outcomes of next-generation transcatheter heart valve in mitral valve-in-ring implantation
A. Mussayev (Pending confirmation)
- Discussion and audience interaction
- One-year results of the Innovalve TMVR in the TWIST-EFS and OUS studies
F. Zahr
- Discussion and audience interaction
- Positive left ventricular myocardial remodelling following TMVR
J. Webb (Pending confirmation)
- Discussion and audience interaction
- Short-term feasibility of transseptal MVR in China
M. Chen (Pending confirmation)
- Discussion and audience interaction

11:15 - 12:15

ROOM 342A

Nurses and Allied Professionals

Case-based Discussion

Cathlab harmony: building high-performance teams

Join us if you want:

- To discover strategies to create a supportive, collaborative team culture where all roles are valued
- To learn how to identify and address toxic behaviours to promote healthier working relationships in the cathlab
- To gain tools to train and integrate team members effectively, ensuring high-performance outcomes

11:15 - 12:15

ROOM 342B

Abstracts

DES and bioadaptor technologies in contemporary practice

Facilitator: J. Mehilli (Pending confirmation)

- Real-world outcomes of complex PCI: insights from a multicenter international study of 2001 patients
M. Mamas
- Discussion and audience interaction
- PCI of complex lesions with bioadaptor or zotarolimus DES: insights from the BIODAPTOR-RCT
H. Nef (Pending confirmation)
- Discussion and audience interaction
- Ultrathin strut DES in left main stem PCI: observational real-world data
A. Singal (Pending confirmation)
- Discussion and audience interaction
- New-generation DES in high-bleeding-risk patients with ACS: insights from the BIOFLOW-DAPT RCT
N. Mankarious
- Discussion and audience interaction
- Elderly patients treated with two DES in a sub-study of the randomised BIONYX trial
D. Van Vliet
- Discussion and audience interaction

Imaging

NextGen

Learning

Calcium debulking toolbox - Fundamentals

Facilitators: G. Di Gioia, A. Shabbir
Media Driver: O. Weizman

Join us if you want:

- To review the treatment algorithms for calcified lesions
- To explore the toolbox for effective coronary calcium management
- To understand the pros and cons of each calcium debulking strategy

11:15 - 12:15

ROOM 353

International Collaboration

How Should I Treat?

Session with international collaborations: Armenia / Greece

With the collaboration of the Armenian Working Group of Interventional Cardiologists and Interventional Cardiology Working Group of Hellenic Cardiac Society

Anchorpersons: D. Baghdasaryan, I. Tsiafoutis

Discussants: G. Gavrielatos, A. Nazaryan

- › Welcome and session objectives
D. Baghdasaryan
- › Case 1 - Armenia
M. Saghatelian (Pending confirmation)
- › How would I treat case 1?
G. Gavrielatos
- › Discussion and audience interaction
- › Case 1 treatment
M. Saghatelian (Pending confirmation)
- › Key learnings Case 1
D. Baghdasaryan
- › Case 2 - Greece
A. Synetos
- › How would I treat case 2?
A. Nazaryan
- › Discussion and audience interaction
- › Case 2 treatment
A. Synetos
- › Key learnings Case 2
I. Tsiafoutis
- › Session evaluation and key learnings
I. Tsiafoutis

11:15 - 12:15

ROOM ARLEQUIN

Abstracts

New evidence in the PFO closure

Facilitators: E. Donal, M. Garbi

- › Age matters: comparing outcomes of PFO closure in older vs. younger patients
E. Beneki (Pending confirmation)
- › Discussion and audience interaction
- › PFO closure and risk of atrial arrhythmia: role of the RoPE and PASCAL scores in the AFLOAT trial
M. Hauguel-Moreau (Pending confirmation)
- › Discussion and audience interaction
- › Improving patient selection for percutaneous suture-mediated patent foramen ovale closure
I. Campos
- › Discussion and audience interaction
- › Assessment of residual shunt after PFO closure using different ultrasound and technical approaches
L. Barbieri
- › Discussion and audience interaction
- › Comparison of PFO closure guided by TEE, fluoroscopy, or intracardiac echo: a single-centre registry
J. Gollmer (Pending confirmation)
- › Discussion and audience interaction

11:15 - 12:15

ABSTRACT & CASE CORNER A

Abstracts

More on long-term responsiveness and effectiveness of renal denervation

Facilitators: M. Boehm (Pending confirmation), R. Diletti

- › Effects of ultrasound renal denervation in patients with chronic kidney disease
R. Schmieder
- › Discussion and audience interaction
- › Long-term outcomes in ESC guideline-recommended patients from Global SYMPPLICITY Registry DEFINE
F. Mahfoud
- › Discussion and audience interaction
- › Association between arterial stiffness and long-term efficacy of renal sympathetic denervation
K. Saville (Pending confirmation)
- › Discussion and audience interaction
- › Long-term efficacy and safety outcomes of renal denervation: the nine-year Greek experience
S. Soulaodopoulos (Pending confirmation)
- › Discussion and audience interaction
- › Cost-effectiveness of radiofrequency renal denervation in five European countries
A. Sharp (Pending confirmation)
- › Discussion and audience interaction

11:15 - 12:15

ABSTRACT & CASE CORNER B

Abstracts

LAA closure and antithrombotic therapies

- › Antithrombotic de-escalation strategy after LAA closure in patients with contraindications to anticoagulation
E. Valero
- › Discussion and audience interaction
- › Impact of P2Y12 inhibitor loading dose after successful percutaneous left atrial appendage closure
R. Galea (Pending confirmation)
- › Discussion and audience interaction
- › Efficacy and safety of LAA closure in atrial fibrillation patients with anticoagulation limitations
M. Gamardella (Pending confirmation)

ROOM 243

Symposium with
Recorded case

12:30 - 13:30

ROOM 251

Imaging
Symposium with
Recorded case

12:30 - 13:30

ROOM 252A

Symposium

Active posterior leaflet replacement – A novel transcatheter approach for the treatment of primary and secondary mitral regurgitation

See session details in the Sponsored Programme section at the end of this document.

New perspectives in 3D calcium visualisation with CT and angiography for complex PCI

See session details in the Sponsored Programme section at the end of this document.

Pushing boundaries in complex PCIs: unique DES technology for complex lesions and patients

See session details in the Sponsored Programme section at the end of this document.

12:30 - 13:15

ROOM 252B

Symposium

A simple low profile solution to the pulmonary embolism problem: EKOS

See session details in the Sponsored Programme section at the end of this document.

12:30 - 13:30

ROOM 341

Clinical Cases

Management of high-risk left main lesion

Facilitator: N. Schofer (Pending confirmation)

- Culprit left main thrombotic lesion. Should it always be treated?
I. Gallo Fernández
- Discussion and audience interaction
- Orbital atherectomy and IVUS assisted calcified distal left main PCI: Sanding the rocky track
S. K. Vijay (Pending confirmation)
- Discussion and audience interaction
- No Time
A. Saffy (Pending confirmation)
- Discussion and audience interaction
- Acute MI with LMCA Distal Trifurcation Stenosis
M. Sreedharan (Pending confirmation)
- Discussion and audience interaction
- The RCA Curse
G. Shenoda
- Discussion and audience interaction
- Sequential kissing stenting technique for the treatment of non-protected left main
G. Occhipinti
- Discussion and audience interaction

12:30 - 13:30

ROOM 342B

Clinical Cases

Did danger shock change my practice?

Facilitator: G. Leibundgut

- Joining forces to conquer cardiogenic shock
A. Lara García
- Discussion and audience interaction
- A young patient with anterior STEMI, multivessel disease, and cardiogenic shock
M. Iannaccone
- Discussion and audience interaction
- Refractory shock even after primary PCI complete revascularisation on Impella rescue the elderly
D. Kumar
- Discussion and audience interaction
- Spontaneous coronary artery dissection: a challenge for the interventional cardiologist
J. Vila García
- Discussion and audience interaction
- Intracoronary imaging saves the night: but the question remains— to stent or not to stent?
A. Mukherjee
- Discussion and audience interaction

12:30 - 13:30

ROOM 343

Clinical Cases

Strategies in treating double CTO scenarios

- Triple vessel chronic total occlusion and ambiguous proximal cap
C. H. Tseng (Pending confirmation)
- Discussion and audience interaction
- Last remaining vessel and two CTOs : how we got the fish to sea with a propeller boat!
G. Viswanathan
- Discussion and audience interaction
- Good qualification brings great results
K. Sabatowski
- Discussion and audience interaction
- Deflect it, snare it, tip it
A. Dimopoulos (Pending confirmation)
- Discussion and audience interaction
- Luck is when preparation meets opportunity
A. Haroon (Pending confirmation)
- Discussion and audience interaction

12:30 - 13:30

ROOM 353

Clinical Cases

TAVI for aortic regurgitation: off-label use

- A bold mission in a failing heart with severe aortic regurgitation
N. Elamin
- Discussion and audience interaction
- Navigating complications in off-label TAVI implantation
P. Antuña
- Discussion and audience interaction
- Octacor valve in pure aortic regurgitation
S. Moscardelli (Pending confirmation)
- Discussion and audience interaction
- Effective combined management of unexpected TAVI complications
Z. Amanzholova
- Discussion and audience interaction
- TAVI in pure aortic regurgitation: navigating a winding road until reaching home
J. Perea
- Discussion and audience interaction

12:30 - 13:30

ABSTRACT & CASE CORNER B

Clinical Cases

DCB in challenging scenarios - Part 1

Facilitators: A. Neylon, B. Scheller

- Paclitaxel coated balloon angioplasty in ACS – a complication creating dilemma
A. Saboe
- Discussion and audience interaction
- A concept of revascularization in patients with complex coronary artery disease
M. Kunz
- Discussion and audience interaction
- LM bifurcation in-stent restenosis ! How to deal with: two cases
S. K. Sahoo
- Discussion and audience interaction
- A possible neo-indication.
T. Bampali (Pending confirmation)
- Discussion and audience interaction
- Combination of DES & DCB are good treatment option in complex bifurcation/trifurcation cases
K. MD (Pending confirmation)
- Discussion and audience interaction

12:30 - 13:30

ROOM ARLEQUIN

Clinical Cases

Large thrombus burden: contemporary solutions

Facilitator: H. C. Tan

- How to unclog the sink in this STEMI case?
J. Tahon
- Discussion and audience interaction
- Managing massive thrombosis in a young patient with STEMI
M. Sajjadi
- Discussion and audience interaction
- Case of using four effective strategies for STEMI
F. Yoshimachi
- Discussion and audience interaction
- One way primary PCI
M. Leoncini (Pending confirmation)
- Discussion and audience interaction
- Simple modification of manual thrombus aspiration in IVUS guided high thrombus burden rescue PCI
C. Patil
- Discussion and audience interaction

12:30 - 13:30

ABSTRACT & CASE CORNER C

Clinical Cases

Interventional approaches for cardiogenic shock

Facilitators: A. Jeremias (Pending confirmation), J. Silvain (Pending confirmation)

- From bad to worse: non-ischaeic cardiogenic shock
J. Gollmer (Pending confirmation)
- Discussion and audience interaction
- A novel approach for when the pressure gets too high
E. Higginson
- Discussion and audience interaction
- Ventricular vent in extracorporeal membrane oxygenation: an uncommon solution with a common device
J. Zuluaga (Pending confirmation)
- Discussion and audience interaction
- The cardiogenic shock maze: Impella, PCI and MitraClip Interplay
D. Walters
- Discussion and audience interaction
- Left atrial veno-arterial ECMO as a bridge to TAVI in aortic valve disease and biventricular failure
G. Broeze
- Discussion and audience interaction

12:30 - 13:30

ABSTRACT &
CASE CORNER D

Clinical Cases

Paravalvular leak closure: challenges and percutaneous solutions

- › Unexpected pathway: a surprising journey through post-aortic valve replacement
K. Powpuree
- › Discussion and audience interaction
- › Against the odds: successful closure of a rare defect after two failed attempts
A. Momen
- › Discussion and audience interaction
- › Malpositioned Perceval valve: navigating paravalvular leak and coronary intervention strategies
A. Villalobos Ordaz (Pending confirmation)
- › Discussion and audience interaction
- › An aortic paravalvular leak hidden behind severe mitral regurgitation
K. Kalogeras
- › Discussion and audience interaction
- › An unforeseen visitor challenging closure of paravalvular leak
M. Celeski (Pending confirmation)
- › Discussion and audience interaction

12:30 - 13:30

THE EXCHANGE

Clinical Cases

Imaging-guided management of PCI pitfalls in NSTEMI

Facilitator: T. Adriaenssens

- › Unfortunate reperfusion of a missed index PCI
S. Ayed (Pending confirmation)
- › Discussion and audience interaction
- › Crushed stent on the proximal left circumflex artery: always pay attention to the ostium
N. Megherbi
- › Discussion and audience interaction
- › Multiple lumens in coronary artery
J. Heo
- › Discussion and audience interaction
- › A migrating enemy to a neighbouring territory: how to manage?
M. Gergis (Pending confirmation)
- › Discussion and audience interaction
- › The road less travelled: wiring through the wilderness of coronary dissection
M. T. Mohd Noor (Pending confirmation)
- › Discussion and audience interaction

13:45 - 14:45

ROOM MAILLOT

Symposium

Clinical implications of TAVI and cerebral embolic protection - Current challenges and future considerations

See session details in the Sponsored Programme section at the end of this document.

13:45 - 14:45

ROOM 241

Symposium

Innovations in TMVR and Intrepid trial updates

See session details in the Sponsored Programme section at the end of this document.

13:45 - 14:30

ROOM 243

Symposium

With coronary sinus therapy emerging, should my lab start focusing on coronary microvascular dysfunction?

See session details in the Sponsored Programme section at the end of this document.

13:45 - 14:30

ROOM 251

Imaging
Symposium

Revolutionising cardiac imaging: evolution of 4D intracardiac echocardiography and integration of artificial intelligence in atrioventricular valve interventions

See session details in the Sponsored Programme section at the end of this document.

13:45 - 14:45

ROOM 252A

Symposium

Redefining complex PCI: impact of real-world data and novel evidence on IV antithrombotic strategies

See session details in the Sponsored Programme section at the end of this document.

13:45 - 14:30

ROOM 252B

Symposium

Innovative approaches to thrombus removal: redefining acute thromboembolic management in ACS

See session details in the Sponsored Programme section at the end of this document.

13:45 - 14:45

ROOM 341

Abstracts

Metalfree PCI

Facilitator: T. Engstrom

- Angiographic outcomes after scoring-balloon and DEB angioplasty for diffuse, small vessel CAD
D. Vassilev
- Discussion and audience interaction
- A paclitaxel-coated balloon compared with contemporary drug-coated balloons for bifurcation lesions
S. von Koch
- Discussion and audience interaction
- A pooled analysis from all Cohorts of the FANTOM II study, evaluating a Bioresorbable Scaffold
M. Lutz
- Discussion and audience interaction
- Drug-Coated Balloon-Based Intervention for De Novo Acute Myocardial Infarction
A. Y. Her
- Discussion and audience interaction
- Angiographic patterns and management of restenosis following DCB angioplasty in de novo lesions
M. Gitto
- Discussion and audience interaction

13:45 - 14:45

ROOM 342B

Clinical Cases

Overcoming resistant lesions in NSTEMI

Facilitators: J. Sanz Sanchez, T. Schmitz

- Overcoming thrombus challenges: Penumbra system meets Guideliner
F. Barbas De Albuquerque (Pending confirmation)
- Discussion and audience interaction
- The lost battle against calcium
A. A. Alanon Hernandez
- Discussion and audience interaction
- Calcium almost everywhere
K. Kákonyi
- Discussion and audience interaction
- Hard Nut to Crack
A. Awal
- Discussion and audience interaction
- When one tool does not work, try another and then another
A. Hussain
- Discussion and audience interaction

13:45 - 14:45

ROOM 343

Clinical Cases

Best companion's case on rotational atherectomy

Facilitators: F. Alfonso, B. Marie-Jeanne

- IVUS and rotational atherectomy guided PCI in severely calcified left anterior descending artery
B. Yuldashov
- Discussion and audience interaction
- MLD MAXD
S. Somendra
- Discussion and audience interaction
- A case of high-risk LAD tandem calcified lesions overcome by MAXROTA (Multi-AXis ROTAblation)
N. Matsuna
- Discussion and audience interaction
- Long, Hard and Tough Journey Ends in a Simple way
A. K. Khan (Pending confirmation)
- Discussion and audience interaction
- Ostial calcification - a case for Rotablation
R. Umalkar
- Discussion and audience interaction

13:45 - 14:45

ROOM 353

Clinical Cases

TAV in TAV in SAV 3 valves procedures

Facilitators: C. Fraccaro (Pending confirmation), K. Hayashida

- Massive aortic regurgitation in degenerated TAVI valve implanted for degenerated surgical prosthesis
J. Molina-Martin De Nicolas (Pending confirmation)
- Discussion and audience interaction
- Lifetime-management in aortic valve disease - are we there yet? Third valve brings the trouble
A. Springer
- Discussion and audience interaction
- Valve-in-valve-in-valve and ascending aorta pseudoaneurysm treatment
M. Bunc
- Discussion and audience interaction
- TAVR as bridge to left-ventricular assist device (LVAD) - A tale of three valves
D. U. Chung (Pending confirmation)
- Discussion and audience interaction
- Valve in Valve in Valve: Same Problems Again and Again
S. Agarwal
- Discussion and audience interaction

13:45 - 14:45

ROOM
ARLEQUIN

Clinical Cases

Coils and plugs for coronary intervention

Facilitator: W. Alkashkari

- Diagnosis and management of an unusual giant mass in the interventricular septum
A. Kivrak (Pending confirmation)
- Discussion and audience interaction
- Angina at rest improving with exertion
A. Arampatzis (Pending confirmation)
- Discussion and audience interaction
- A rare cause of angina after CABG: expect the unexpected!
M. Meletidou (Pending confirmation)
- Discussion and audience interaction
- Symptomatic recurrent coronary fistula after surgical closure
F. Giangiacomi (Pending confirmation)
- Discussion and audience interaction
- A very special heart
J. Diaz Marin (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ABSTRACT &
CASE CORNER B

Abstracts

High risk plaque assessment with intracoronary imaging

- Thin-cap fibroatheroma association with local inflammatory activity in coronary disease
S. Garzon
- Discussion and audience interaction
- Interaction between risk factors, high-risk plaques and adverse outcome: value of intracoronary OCT
R. Volleberg
- Discussion and audience interaction
- Prognostic implications of coronary radial wall strain in diabetic patients with preserved FFR
Z. Wang
- Discussion and audience interaction
- Predictive potential of novel biomarkers in invasive management of coronary artery disease
N. Chandra Mohan
- Discussion and audience interaction
- Artificial Intelligence-led intracoronary OCT analysis for drug efficacy and patient events
M. Bennett (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ABSTRACT &
CASE CORNER C

Clinical Cases

The many faces of TTVR

- An Unexpected Case of Acute Right Ventricle Afterload Mismatch Following TTVR
M. Mazzola (Pending confirmation)
- Discussion and audience interaction
- One-stop transcatheter pulmonary and tricuspid valve interventions for carcinoid heart disease treat
N. Veas
- Discussion and audience interaction
- A long-standing history of hospital admissions
C. Rossignoli
- Discussion and audience interaction
- Rheumatic heart disease and tricuspid regurgitation: a new challenger enters the arena
A. Calonaci (Pending confirmation)
- Discussion and audience interaction
- Heterotypic transcatheter tricuspid valve replacement: is it feasible in dilated cava?
I. Belluschi (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ABSTRACT &
CASE CORNER D

Clinical Cases

Impact of imaging in treatment of bifurcation lesions part 2

- IVUS to help RDA ostium treatment jailed balloon use to avoid side branch compromise
L. Kis (Pending confirmation)
- Discussion and audience interaction
- Severely symptomatic octogenarian: how should I treat?
N. Alam
- Discussion and audience interaction
- Nuances of Szabo technique in a Medina 010 lesion unravelled by optical coherence tomography
L. Velasco
- Discussion and audience interaction
- Doubtful angiographic image in restenosis of the circumflex ostium: does the OCT gives us the key?
J. Perea
- Discussion and audience interaction

13:45 - 14:45

THE EXCHANGE

Clinical Cases

Paravalvular and defects percutaneous closure

- Mitral paravalvular leak closure in a patient with double mechanical prosthesis: close me if you can!
A. Safak Arslanhan (Pending confirmation)
- Discussion and audience interaction
- Prior Surgical Left Ventricular PSA Coiling and Mitral PVL Plugging: It Takes Two to Tango
M. Sturla (Pending confirmation)
- Discussion and audience interaction
- Transcatheter closure of ascending aortic pseudoaneurysm with an ASD occluder
- Discussion and audience interaction
- Transcatheter closure of left ventricular pseudoaneurysm
B. Shah (Pending confirmation)
- Discussion and audience interaction
- Sealing the leak: A complex challenge post redo-sternotomy for AVR and MVR
D. Walters
- Discussion and audience interaction

15:00 - 16:30

MAIN ARENA

LIVE Educational Case

Complex multivessel disease: LIVE Educational Case from Hospital Clínico San Carlos - Madrid, Spain

Anchorperson: A. Baumbach
Spokesperson: S. Brugaletta
Procedural Analyst: F. Bardooli
Operators: J. Escaned (Pending confirmation), N. Gonzalo
Discussants: M. Al-Hijji, R. Al-Lamee, F. J. Neumann, M. Noc

- Welcome and session objectives
A. Baumbach
- Patient presentation
S. Brugaletta
- Discussion and audience interaction
- Operator strategy
A. Baumbach
- LIVE Case procedure
- Debriefing and audience interaction
- Session evaluation and key learnings
A. Baumbach

15:00 - 16:00

THEATRE BLEU

Case-based Discussion

Which valve is best for my patient?

Anchorperson: O. De Backer
Spokesperson: M. Urena (Pending confirmation)
Discussants: M. Erlebach (Pending confirmation), L. Testa, M. Vanhaverbeke, J. Wykrzykowska

Join us if you want:

- To learn how to select the appropriate transcatheter aortic valve for a given patient
- To learn about the decision-making process for transcatheter aortic valve selection
- To learn how to plan for complex TAVI in particular anatomies
- Welcome and session objectives
O. De Backer
- A patient with coronary artery disease and a long-life expectancy
L. Testa
- Discussion and audience interaction
- A patient with a surgical aortic bioprosthesis
D. Dvir (Pending confirmation)
- Discussion and audience interaction
- A patient with a small anatomy
M. Erlebach (Pending confirmation)
- Discussion and audience interaction
- Session evaluation and key learnings
M. Urena (Pending confirmation)

15:00 - 16:00

THEATRE BORDEAUX

Case-based Discussion

Current DCB practice: from lesion preparation to follow-up

Anchorperson: R. Byrne
Spokesperson: B. Scheller
Discussants: M. Wainstein, R. W. Yeh (Pending confirmation)

Join us if you want:

- To discuss indications for DCB angioplasty in common practice
- To learn how to manage dissections and complications with DCB angioplasty
- To hear about tips and tricks for DCB use
- Welcome and session objectives
R. Byrne
- Top five recent studies in DCB
D. O'callaghan (Pending confirmation)
- Case 1 - DCB for de novo: challenging cases from my practice
- Discussion and audience interaction
- Case 2 - DCB for de novo: challenging cases from my practice
M. Wainstein
- Discussion and audience interaction
- DCB in in-stent restenosis: case examples in 2025
R. W. Yeh (Pending confirmation)
- Discussion and audience interaction
- Session evaluation and key learnings
B. Scheller

15:00 - 16:00

THEATRE
HAVANE

Translate the TOP
trials into practice

Translate the TOP trials into practice - TAVI for asymptomatic aortic stenosis after EARLY TAVI - TAVI and coronary artery disease after NOTION-3

Facilitators: D. Capodanno, D. Mylotte
(Pending confirmation)

15:00 - 16:00

ROOM MAILLOT

Case-based
Discussion

How are we going to treat these sick patients presenting with pulmonary embolism?

Anchorperson: I. Lang
Spokesperson: F. Mahfoud
Discussants: M. Brodmann (Pending confirmation), L. Hobohm, G. Leibundgut, N. Meneveau (Pending confirmation)

Join us if you want:

- To learn how to treat patients with pulmonary embolism at different risk
 - To discuss indications for interventional treatment options for pulmonary embolism
- Welcome and session objectives
I. Lang
 - How to stratify risk and what treatment options do we have?
S. Bangalore (Pending confirmation)
 - Discussion and audience interaction
 - Case 1 - Intermediate high-risk patient - How would you treat this patient?
M. Iannaccone
 - Discussion and audience interaction
 - Case 2 - High-risk patient - How would you treat this patient?
J. Boeddinghaus (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
I. Lang

15:00 - 16:00

ROOM
LEARNING

Learning

Rotablator: technical tips and tricks, and complication troubleshooting

Facilitators: A. N. Calik, T. Cuisset

Join us if you want:

- To understand how to identify the most suitable lesions for rotablation
- To learn how to perform rotablation safely and effectively
- To know how to prevent and manage burr entrapment

15:00 - 16:00

IMAGING SKILLS
LAB 1 (352A)

Imaging

Hands on

Simulation-based
Learning

Hands-on OCT - Stent failure

This session has been made possible thanks to the in-kind support of Abbott

Facilitators: G. Guagliumi, H. Hashim (Pending confirmation), L. Räber
Media Driver: K. Kyhl
Physician Trainers: J. Barraclough, N. Chandra Mohan, M. Lombardi, D. Tiong

Join us if you want:

- To understand different mechanisms of stent failure
- To learn an algorithmic approach to stent failure management

15:00 - 16:00

IMAGING SKILLS
LAB 2 (352B)

Imaging

Hands on

Simulation-based
Learning

Hands-on IVUS - PCI guidance and optimisation

This session has been made possible thanks to the in-kind support of Boston Scientific

Facilitators: J. Daemen, M. Mcentegart (Pending confirmation), V. Paradies
Media Driver: S. I. Sandoval Hernandez
Physician Trainers: A. Mukherjee, G. Nardi, S. Paetzold (Pending confirmation)

Join us if you want:

- To understand the importance of a detailed planning guided with IVUS imaging
- To learn the different tools that AVVIGO viewer offers for PCI planning and optimisation
- To understand the importance of assessing post-PCI result

15:00 - 16:00

SIMULATION
LEARNING
ROOM (STUDIO
A)

Simulation-based
Learning

Transseptal puncture

Facilitators: P. Denti (Pending confirmation), P. Gatto (Pending confirmation), F. Maisano (Pending confirmation), N. Wunderlich (Pending confirmation)
Media Driver: M. Saccocci (Pending confirmation)

Join us if you want:

- To understand how to perform a safe and efficient puncture
- To understand device specific and disease specific puncture
- To understand left atrium navigation and tools to perform left side procedures

15:00 - 16:30

HANDS ON LAB

Hands on
Simulation-based
Learning

Bailout options and techniques during PCI: mid vessel perforation

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: A. Gagnor, B. LATTUCA (Pending confirmation), K. Mahadevan, J. Monsegu, O. Muller, S. Sumitsuji

Join us if you want:

- To explore bailout options using existing devices
- To determine the different solutions to successfully treating mid vessel perforation using simulation
- To consider causes and avoidance strategies for mid vessel perforation

15:00 - 16:00

ROOM 241

Abstracts

TAVI in challenging anatomical situations

Facilitators: T. Pilgrim (Pending confirmation), R. Puri

- The NORTHOSTAVI registry
J. Kefer
- Discussion and audience interaction
- Iberian Insights on Transcaval Transcatheter Aortic Valve Implantation for Severe Aortic Stenosis
V. A. Jimenez Diaz (Pending confirmation)
- Discussion and audience interaction
- Next-day and 48-hour discharge following alternative access transcatheter aortic valve implantation
M. Abbadi
- Discussion and audience interaction
- Intravascular lithotripsy allows a safe and effective transfemoral aortic valve replacement
J. Rillinger
- Discussion and audience interaction
- Outcomes of TAVI with self-expanding valves for pure native aortic valve regurgitation
L. Tao (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ROOM 242AB

Abstracts

Personalised Vascular Care Award - Competition

- Impact of incremental information on coronary revascularization decision
D. Ding
- Predictors of side branch compromise during stepwise provisional stenting: the OCT-Bifurcation score
R. Vergallo
- Prevalence and characteristics of INOCA in patients with and without coronary atherosclerosis
A. Jerónimo
- Early hospital discharge following ST-elevation myocardial infarction
R. Bagur
- The Role of Endothelial Shear Stress Metrics in Development and Disruption of Calcified Nodules
D. Hakim (Pending confirmation)
- Influence of CT-defined High-Risk Plaque on Cardiac Events in Patients with a Negative Invasive FFR
Y. Ozaki

15:00 - 16:00

ROOM 243

Case-based
Discussion

Critical limb ischaemia below the knee treatment

Spokesperson: A. Sauguet
Discussants: Y. August, R. Nerla, P. Sbarzaglia

Join us if you want:

- To comprehend how to select wires for antegrade below-the-knee recanalisation
 - To understand when and how to use retrograde access to facilitate below-the-knee revascularisation
 - To discuss the possible role of DCB in below-the-knee angioplasty
- Welcome and session objectives
 - How will this impact my practice?
 - Case 1 - How do I select the best wire for antegrade recanalisation?
P. Sbarzaglia
 - Discussion and audience interaction
 - Case 1 - Resolution
P. Sbarzaglia
 - Case 2 - When is the right time to move to retrograde approach?
R. Nerla
 - Discussion and audience interaction
 - Case 2 - Resolution
R. Nerla
 - Case 3 - When to use DCB in below-the-knee vessels?
 - Discussion and audience interaction
 - Case 3 - Resolution
 - Session evaluation and key learnings
A. Sauguet

15:00 - 16:00

ROOM 251

Abstracts

Transcatheter tricuspid valve replacement in the real world: current data and outcomes

Facilitators: R. Makkar, A. Sannino

- Evaluating the safety and efficacy of Transcatheter Tricuspid Valve Replacement: A UK single-centre
B. McDonaugh (Pending confirmation)
- Discussion and audience interaction
- Real World Experience in Transcatheter Tricuspid Valve Replacement: the TRISPA Replace Registry
J. C. Echarte Morales
- Discussion and audience interaction
- Long-term impact of orthotopic tricuspid valve replacement on right ventricular reverse remodeling
L. Weckbach (Pending confirmation)
- Discussion and audience interaction
- Efficacy and Safety of TricValve Bicaval Implantation in patients with Pacemakers
L. M. Domínguez Rodríguez (Pending confirmation)
- Discussion and audience interaction
- Artificial intelligence-based CT screening for transcatheter tricuspid valve replacement
D. Angellotti
- Discussion and audience interaction

15:00 - 16:00

ROOM 252A

Abstracts

Enhancing knowledge in diagnosis ANOCA

Facilitators: L. Ortega-Paz (Pending confirmation), A. Tommasino (Pending confirmation)

- First-in-man experience assessing coronary endothelial function using continuous thermodilution
A. Ibrahim
- Discussion and audience interaction
- Exercise stress testing for diagnosing coronary microvascular dysfunction in ANOCA patients
A. Aldujeli (Pending confirmation)
- Discussion and audience interaction
- Altered coronary responses to acetylcholine administration in patients with INOCA
L. Paolucci (Pending confirmation)
- Discussion and audience interaction
- Clinical impact of myocardial bridge in invasive intracoronary acetylcholine provocative test
D. DAmario
- Discussion and audience interaction
- Coronary epicardial spasm in patients with myocardial bridges
P. V. Bartos (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ROOM 252B

International Collaboration

Case-based Discussion

15:00 - 16:30

ROOM 253

International Collaboration

How Should I Treat?

Session in collaboration with India Live

With the collaboration of India Live

How to deal with left main culprit in NSTEMI

With the collaboration of the Ukrainian Association of Interventional Cardiology and Working Group on Interventional Cardiology of the Hungarian Society of Cardiology

Anchorpersons: D. Aradi (Pending confirmation), M. Sokolov (Pending confirmation)

Discussant: S. Chaichuk

Join us if you want:

- To learn and understand different approaches and techniques through a "cross-geographic" exchange in NSTEMI patients
- To understand the prompt recognition and evaluate possible risks of potential periprocedural complications during PCI in NSTEMI patients
- To discuss various management strategies for PCI on left main in NSTEMI patients

- Welcome and session objectives
D. Aradi (Pending confirmation)
- Case 1 - Hungary
- How would I treat case 1?
S. Chaichuk
- Discussion and audience interaction
- Case 1 treatment
- Key learnings Case 1
D. Aradi (Pending confirmation)
- Case 2 - Ukraine
- How would I treat case 2?
A. Gavrylyshyn (Pending confirmation)
- Discussion and audience interaction
- Case 2 treatment
A. Gavrylyshyn (Pending confirmation)
- Key learnings Case 2
M. Sokolov (Pending confirmation)
- Session evaluation and key learnings
M. Sokolov (Pending confirmation)

15:00 - 16:00

ROOM 341

Clinical Cases

How imaging can improve efficiency in CTO PCI

- RCA CTO PCI using IVUS guided Tip detection ADR and STRAW technique
S. Takeshi
- Discussion and audience interaction
- Angio-CT guided retrograde recanalization of proximal LAD with LM trifurcation angioplasty
J. Roczniak (Pending confirmation)
- Discussion and audience interaction
- LAD Osteal CTO young patient IVUS Guided Retrograde puncture
N. Kalay (Pending confirmation)
- Discussion and audience interaction
- A long right coronary artery CTO with anomalous origin, involving multiple bifurcations
C. Y. Ko
- Discussion and audience interaction

15:00 - 16:00

ROOM 342A

Nurses and Allied Professionals

Case-based Discussion

Calcified lesions: preparing for the battlefield

Join us if you want:

- To gain knowledge in interpreting imaging techniques like IVUS and OCT to anticipate the next steps during procedures
- To understand how to prepare and assist with calcification modification tools, ensuring readiness for complex cases
- To develop the knowledge and practical skills to optimise your contribution to the team for better communication

15:00 - 16:00

ROOM 342B

Abstracts

Bifurcation stenting techniques outcomes

Facilitators: C. Fraccaro (Pending confirmation), R. Mathew

- BV-RESOLVE score guidance is superior to angiography guidance in coronary bifurcation intervention
K. Dou
- Discussion and audience interaction
- Double kissing culotte or nano-crush techniques for bifurcation lesions: the COLLECT-BIF-II registry
E. Gültekin Güner (Pending confirmation)
- Discussion and audience interaction
- Two-year outcomes of double-kissing culotte versus culotte techniques in acute coronary syndrome.
M. Barycki
- Discussion and audience interaction
- Clinical outcomes after POKI technique for the treatment of coronary bifurcations
D. Vassilev
- Discussion and audience interaction
- Clinical outcomes of DK crush or DK culotte in non-left main bifurcation lesions: the ROUTE trial
S. Kahraman
- Discussion and audience interaction

15:00 - 16:30

ROOM 343

International
Collaboration

How Should I
Treat?

Session with international collaborations: Algeria / Morocco / Tunisia

With the collaboration of the Algerian Group of Interventional Cardiology and Moroccan Society of Cardiology and Tunisian Society of Cardiology and CardioVascular Surgery (STCCCV)

Anchorpersons: M. Alami (Pending confirmation), S. Boudiche (Pending confirmation), M. A. Bouraghda
Discussant: A. Bahloul (Pending confirmation)

Join us if you want:

- To know when to suspect, how to diagnose and how to manage spontaneous coronary artery dissection in ACS setting
- Welcome and session objectives
M. A. Bouraghda
- Case 1 - Algeria
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
- Key learnings Case 1
M. A. Bouraghda
- Case 2 - Morocco
- How would I treat case 2?
- A. Bahloul (Pending confirmation)
- Discussion and audience interaction
- Case 2 treatment
- Key learnings Case 2
M. Alami (Pending confirmation)
- Case 3 - Primary watch and wait
- H. Ellini (Pending confirmation)
- How would I treat case 3?
- Discussion and audience interaction
- Case 3 treatment
- H. Ellini (Pending confirmation)
- Key learnings Case 3
S. Boudiche (Pending confirmation)
- Session evaluation and key learnings
M. Alami (Pending confirmation)
- Closing remarks
S. Boudiche (Pending confirmation)

15:00 - 16:30

ROOM 353

International
Collaboration

How Should I
Treat?

How to treat - DCB

With the collaboration of the Interventional Cardiology Society of Malaysia and Pakistan Society of Interventional Cardiology and Vietnam National Heart Association (VNHA) - Vietnam Interventional Cardiology Society (VICS)

Anchorpersons: H. M. Pham (Pending confirmation), K. Selvaraj (Pending confirmation)

- Welcome and session objectives
K. Selvaraj (Pending confirmation)
- Case 1 - DCB in calcified vessel
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
- Key learnings Case 1
K. Selvaraj (Pending confirmation)
- Case 2 - DCB in small diffuse vessel disease
- S. Aziz
- How would I treat case 2?
- Discussion and audience interaction
- Case 2 treatment
- S. Aziz
- Key learnings Case 2
- Case 3 - DCB in de novo ostial lesion
- How would I treat case 3?
- Discussion and audience interaction
- Case 3 treatment
- Key learnings Case 3
H. M. Pham (Pending confirmation)
- Session evaluation and key learnings
- Closing remarks
H. M. Pham (Pending confirmation)

15:00 - 16:00

ROOM NEXTGEN
(351)

NextGen
Learning

CTO - Fundamentals

Facilitators: G. Di Gioia, S. Pyxaras
Media Driver: M. Schincariol

Join us if you want:

- To learn how to select the right patient for CTO PCI
- To understand the principles of a safe CTO PCI
- To share ideas about a must-have toolbox for CTO PCI

15:00 - 16:00

ROOM
ARLEQUIN

Abstracts

Improving outcomes of NSTEMI patients

Facilitator: D. Trabattoni

- Effect of evolocumab on endothelial coverage of stent struts in NSTEMI-ACS patients post-PCI
Z. Li
- Discussion and audience interaction
- Impact of Left Ventricular Ejection Fraction on Outcomes in NSTEMI Patients With and Without CKD
Y. H. Kim
- Discussion and audience interaction
- Outcomes in Patients with NSTEMI Based on the GRACE Score and Left Ventricular Ejection Fraction
Y. H. Kim
- Discussion and audience interaction
- Does the PCI timing affect in-hospital mortality in over one million patients with NSTEMI in the US?
J. A. Borovac
- Discussion and audience interaction
- Early initiation of Tafolecimab in NSTEMI-ACS patients post PCI: a multicentre, open-label RCT
Z. Yin
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER A

Abstracts

Right heart catheterisation and CT scan for the assessment of A-V valve treated percutaneously

Facilitators: J. Cavalcante, L. Stolz

- Clinical Outcomes of Mitral TEER in Patients with Functional Mitral Regurgitation and PH
L. Raone
- Discussion and audience interaction
- Characterising invasive physiology and responders after transcatheter mitral repair: STRESS-MR
O. Chehab
- Discussion and audience interaction
- Mitral annular remodeling after HighLife TMVR: a single-center experience
L. Schneider (Pending confirmation)
- Discussion and audience interaction
- Prognostic significance of MAC assessed by CT for TEER
V. Patel (Pending confirmation)
- Discussion and audience interaction
- Evaluation of cardiac CT in Patients with Tricuspid Regurgitation and Pulmonary Hypertension
J. Kirchner (Pending confirmation)
- Discussion and audience interaction
- Impact of pulmonary disease on mid-term clinical outcomes in patients who underwent MitraClip
J. Iwata
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER B

Clinical Cases

Challenging clinical scenarios in CAD

Facilitator: B. Faurie (Pending confirmation)

- How much can an artery take? 4 stent-layer restenosis in a lesion and how we attempted to manage it
L. Pyka
- Discussion and audience interaction
- Late mediastinal hematoma compressing left atrium after circumflex artery perforation
V. O. Baris (Pending confirmation)
- Discussion and audience interaction
- How physiology and imaging helped in optimizing PCI in a case of chronic stable angina
S. Ahmed (Pending confirmation)
- Discussion and audience interaction
- Treatment of refractory angina pectoris associated with coronary microcirculation dysfunction
S. Włodarczyk
- Discussion and audience interaction
- Acute tamponade after Coronary Sinus Reducer implantation
H. Rajabali (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER C

Clinical Cases

Therapeutic choices for TTVIV-TTVIR interventions

Facilitators: M. Lunardi, R. S. Von Bardeleben (Pending confirmation)

- Degenerated Flexible Duran Ancore Annular Ring in Tricuspid position: How much could it be expanded?
S. Asil
- Discussion and audience interaction
- A Lifetime of Pacing, Infection and Intervention
R. Sethi (Pending confirmation)
- Discussion and audience interaction
- Tricuspid ViV Replacement with Myval Octapro from Jugular Vein in degenerated Aspire Bioprosthesis.
A. Mangiameli (Pending confirmation)
- Discussion and audience interaction
- Transcatheter tricuspid valve-in-valve replacement in a patient with Ebstein anomaly
M. Cimci (Pending confirmation)
- Discussion and audience interaction
- Transcatheter Double Valve-in-Valve Replacement in Right Heart Disease
L. Avendaño-Perez (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER D

Clinical Cases

M-TEER in challenging scenarios - Part 3

Facilitators: A. Alenezi, C. Saint Etienne (Pending confirmation)

- TEER for papillary muscle rupture caused by acute myocardial infarction
H. Zhou
- Discussion and audience interaction
- "A powerful duet" to treat advanced heart failure
G. Koutsopoulos (Pending confirmation)
- Discussion and audience interaction
- Novel therapies to treat mitral regurgitation, time to show up!
B. Caneiro-Queija (Pending confirmation)
- Discussion and audience interaction
- The lord of the rings in percutaneous mitral valve repair
M. Pellicano
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER E

Complexity

Clinical Cases

Complications in STEMI : dissections and more

Facilitator: S. Schupke (Pending confirmation)

- Perfect is the enemy of good
R. Faraj
- Discussion and audience interaction
- An early morning nightmare ends with catastrophe
P. mukherjee
- Discussion and audience interaction
- A run for cover
T. Dewan (Pending confirmation)
- Discussion and audience interaction
- Delayed coronary perforation with psuedoaneurysm formation
H. L. Li
- Discussion and audience interaction
- Perfectionism can be counter-productive
E. Guerra (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT & CASE CORNER F

Complexity
Clinical Cases

OHCM, ablation complications: interventional solutions

Facilitator: V. Ninios

- Hypertrophic cardiomyopathy in patient with Ebstein's anomaly and single coronary artery
M. Todurov
- Discussion and audience interaction
- Novel Treatment for Obstructive Hypertrophic Cardiomyopathy: No Drug, No Knife, No X-Ray
X. Pan (Pending confirmation)
- Discussion and audience interaction
- Dual pulmonary vein stenosis after atrial fibrillation ablation: an increasing challenge for the int
R. Hameau Davanzo (Pending confirmation)
- Discussion and audience interaction
- Iatrogenic aorto-right atrial fistula post pulmonary vein isolation
F. Giangiacomi (Pending confirmation)
- Discussion and audience interaction
- A "hole" in the heart following catheter ablation for Wolff-Parkinson-White syndrome
Y. Feng (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT AND CASE CORNER G

Clinical Cases

Venous system under the spotlight: challenging clinical cases

Facilitators: A. Cremonesi (Pending confirmation), A. Duncan

- Fishing in the pulmonary artery
D. Ribeiro
- Discussion and audience interaction
- Goalie who saved the day
G. Joshi
- Discussion and audience interaction
- Paget-Schroetter Syndrome: A rare case of Upper Extremity Deep Vein Thrombosis
P. Gupta (Pending confirmation)
- Discussion and audience interaction
- Central vein stent dislodged into right ventricle: how to treat ?
L. CHIEN-HSIEN
- Discussion and audience interaction
- Hurry makes worry. A story of temporary pacing lead
A. Fawad
- Discussion and audience interaction

15:00 - 16:00

THE EXCHANGE

Moderated E-Poster

Differential strategies to prevent and treat heart failure patients

Facilitator: A. Mebazaa

- Eligibility for tricuspid edge-to-edge repair in severe tricuspid regurgitation: prospective study
M. Tomaniak
- Discussion and audience interaction
- A novel in vitro model for mechanical unloading
L. Kitasato (Pending confirmation)
- Discussion and audience interaction
- Cardiac dysfunction from aortic dissection with coronary involvement: four case reports
A. Dotto
- Discussion and audience interaction
- Peripheral artery disease: a hidden threat to heart function
O. Taie
- Discussion and audience interaction

16:30 - 18:00

THEATRE BLEU

Symposium with LIVE case

Myval THV series - Optimise patient outcomes with novel design, data and daily clinical practice

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:15

THEATRE HAVANE

Symposium

How do I confidently expand my drug-coated balloon practice?

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:30

ROOM MAILLOT

Symposium

How to handle the most clinically relevant challenges in TAVI

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:30

SIMULATION
LEARNING
ROOM (STUDIO
A)

Nurses and Allied
Professionals

Simulation-based
Learning

Live heart dissection: exploring anatomy in 3D

Join us if you want:

- To deepen your understanding of heart anatomy and function with a live 3D dissection tailored to pathophysiology treated in TAVI and coronary interventions
- To connect anatomical structures to their roles in coronary and valvular interventions, enhancing your clinical knowledge
- To enhance your anatomy and physiology knowledge required to improve patient safety during cathlab interventions

16:30 - 17:15

ROOM 241

Imaging
Symposium

Why should laser atherectomy be part of your complex PCI algorithm?

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:15

ROOM 242AB

Symposium with
Recorded case

Key principles of successful large bore vascular access and closure: TAVI and beyond

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:30

ROOM 251

Symposium

Advancing the standard of care in PCI with Bioadaptor: from simple to complex

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:30

ROOM 252B

Symposium

The role of large-bore thrombectomy in my approach to pulmonary embolism management

See session details in the Sponsored Programme section at the end of this document.

16:30 - 17:30

ROOM 342B

Clinical Cases

Managing challenging vasculature to successfully deliver TAVI

Facilitator: R. Wolny

- The challenging aorta issue: how two perform TAVI after coarctation surgery? I. Belluschi (Pending confirmation)
- Discussion and audience interaction
- Pull it up! – Valve-in-Valve TAVI S. Elvinger
- Discussion and audience interaction
- The Rocky Road to Triumph F. A. Aris (Pending confirmation)
- Discussion and audience interaction
- The Tips to perform TAVI in a Patient with Aortic Arch Aneurysm Post Hybrid Total Arch Replacement. W. C. Huang (Pending confirmation)
- Discussion and audience interaction
- The three musketeers in bicuspid aortic valve and TAVI: large annulus, horizontal and tortuous aorta H. Colmenarez (Pending confirmation)
- Discussion and audience interaction

16:30 - 17:30

ROOM 343

Clinical Cases

High-risk left main PCI

Facilitator: A. Alenezi

- Spontaneous coronary artery dissection: an interventional dilemma
E. Nel
- Discussion and audience interaction
- Inevitable Left Main PCI on New Year's Eve Night
C. Wongsinkongman (Pending confirmation)
- Discussion and audience interaction
- Always have plan B and C
A. Maaroufi
- Discussion and audience interaction
- Importance of procedural planning in Complex High-risk Indicated PCI
G. Giacchi (Pending confirmation)
- Discussion and audience interaction
- Left main artery dissection in a young woman: a nightmare in the Cathlab
F. Rubino (Pending confirmation)
- Discussion and audience interaction

16:30 - 17:30

ROOM
ARLEQUIN

Clinical Cases

Tips for challenging TAVI scenarios

Facilitator: H. Möllmann

- "Stent Caged: The Stent Saga Between the Stent, the Aorta and the TAVI"
F. Damas De Los Santos
- Discussion and audience interaction
- Narrow escape from death.
F. Malik
- Discussion and audience interaction
- Transcatheter aortic valve implantation in a patient with extremely large annulus
N. Bonilla (Pending confirmation)
- Discussion and audience interaction
- TAVI in Klippel Feil syndrome
P. Singh (Pending confirmation)
- Discussion and audience interaction
- TAVI with an intraannular self-expanding valve prosthesis in a patient with a single coronary ostium
S. Voss
- Discussion and audience interaction

16:30 - 17:30

ROOM 353

Clinical Cases

Management of heavy calcified bifurcation lesions

- IVUS guided guidewire recrossing on left main bifurcation PCI
L. Sinnott Silva (Pending confirmation)
- Discussion and audience interaction
- To Believe or NOT to Believe !
F. Alqahtani
- Discussion and audience interaction
- Complex PCI to calcific bifurcation lesion
H. Refaat
- Discussion and audience interaction
- Hard rock coronary bifurcation: step by step IVUS guided PCI
S. Massaro (Pending confirmation)
- Discussion and audience interaction
- Breaking the rock! A case of orbital-cut
S. K. Sahoo
- Discussion and audience interaction

16:30 - 17:30

ABSTRACT &
CASE CORNER B

Clinical Cases

CCS with low ejection fraction and LV support

Facilitators: M. Ayoub, V. Panoulas

- High-risk PCI facilitated with levosimendan and mechanical left ventricular support
S. Włodarczyk
- Discussion and audience interaction
- Can intracoronary imaging be harmful? Risks and Challenges in Complex PCI
M. Kaluzna Oleksy
- Discussion and audience interaction
- Mechanically supported PCI in a last remaining vessel
P. Dardas
- Discussion and audience interaction
- Bringing up the big guns: high-risk PCI with circulatory support in severe aortic stenosis
R. Fernandes
- Discussion and audience interaction
- LAVA-ECMO as an alternative to Impella
M. Hosny (Pending confirmation)
- Discussion and audience interaction

16:30 - 17:30

ABSTRACT & CASE CORNER C

Abstracts

Right ventricle and tricuspid regurgitation: a linked faith

- Predictors of Clinical Outcomes in Transcatheter Tricuspid Valve Repair: A Systematic Review
W. Gibson (Pending confirmation)
- Discussion and audience interaction
- Impact of disproportionate secondary tricuspid regurgitation in patients undergoing TEER
J. C. Echarte Morales
- Discussion and audience interaction
- Right ventricle to pulmonary artery coupling as a prognostic factor in tricuspid regurgitation
A. Piasecki
- Discussion and audience interaction
- Impact of transcatheter tricuspid edge-to-edge repair on right ventricular contraction pattern
L. Weckbach (Pending confirmation)
- Discussion and audience interaction
- Three-dimensional echocardiographic analysis of tricuspid valve geometry after transcatheter repair
U. Di Vita (Pending confirmation)
- Discussion and audience interaction

16:30 - 17:30

ABSTRACT & CASE CORNER D

Clinical Cases

Coronary dissection : when imaging makes the difference

- Misfortunes never come single. Bailouts of coronary hematoma, dissection and perforation in one case
Y. Abe
- Discussion and audience interaction
- The Butterfly Effect : A STEMI journey takes an unexpected turn
A. Boubeker (Pending confirmation)
- Discussion and audience interaction
- Dangerous biopsy
K. Kákonyi
- Discussion and audience interaction
- How did this chaos happen ?
S. Tehrani (Pending confirmation)
- Discussion and audience interaction
- The domino effect of 'bad' decisions during PCI in acute myocardial infarction
P. Radowski (Pending confirmation)
- Discussion and audience interaction
- Spontaneous coronary artery dissection: a case report
R. Esparza Corona
- Discussion and audience interaction

16:30 - 17:30

THE EXCHANGE

Clinical Cases

Challenging scenarios in the pulmonary system - Part 1

- High-risk pulmonary embolism with resistant shock and disseminated intravascular coagulation
S. Slawek-Szmyt (Pending confirmation)
- Discussion and audience interaction
- Acute on Chronic intermediate-high risk pulmonary embolism
M. Iannaccone
- Discussion and audience interaction
- When the uncommon becomes critical: a unique case in congenital heart disease
P. Gagliardi (Pending confirmation)
- Discussion and audience interaction
- acute Pulmonary embolism with acute stroke
F. Alzahrani
- Discussion and audience interaction
- A rare cardiac mystery with a challenging management
M. Elsharabassy
- Discussion and audience interaction

08:30 - 10:00

MAIN ARENA

LIVE Educational Case

TAVI for bioprosthetic valve failure: LIVE Educational Case from Institut Cardiovasculaire Paris Sud - Massy, France

Anchorperson: B. Prendergast
Spokesperson: A. Latib
Procedural Analyst: S. Dawkins
Operators: P. Garot, T. Hovasse
Discussants: D. Blackman, M. Chen, L. Conradi, A. Petronio
Cathlab Medical Coordinator: M. Akodad

- Welcome and session objectives
B. Prendergast
- Patient presentation
A. Latib
- Imaging analysis
S. Dawkins
- Discussion and audience interaction
- Operator strategy
B. Prendergast
- LIVE Case procedure
- Debriefing and audience interaction
- Session evaluation and key learnings
B. Prendergast

08:30 - 09:30

THEATRE BLEU

How Should I Treat?

Two-stent techniques for non-left main true bifurcation lesions

Anchorperson: M. Lesiak
Spokesperson: J. Siller-Matula
Discussants: F. Della Rosa, D. Dudek, H. Khamis, H. C. Tan

Join us if you want:

- To learn how to choose the right stenting strategy in complex coronary anatomy
 - To improve your expertise in two-stent techniques
 - To know how to recognise pitfalls and avoid complications
- Welcome and session objectives
M. Lesiak
 - Case 1 – Patient and lesion presentation
D. Milasinovic
 - Discussion and audience interaction
 - Case 1 – PCI procedure
D. Milasinovic
 - Discussion and audience interaction
 - Case 2 – Patient and lesion presentation
S. Iwanczyk
 - Discussion and audience interaction
 - Case 2 – PCI procedure
S. Iwanczyk
 - Discussion and audience interaction
 - Session evaluation and key learnings
J. Siller-Matula

08:30 - 09:30

THEATRE BORDEAUX

Hot line / Late-Breaking Trials

Tricuspid hotline: new devices

Anchorperson: S. Baldus
Spokesperson: T. Patterson (Pending confirmation)
Discussants: R. Hahn (Pending confirmation), R. Sharma, M. Taramasso, R. S. Von Bardeleben (Pending confirmation)

- TRiCares Topaz Transfemoral TRICUspid Heart Valve REplacement System First-In-Human Trial
E. Teiger (Pending confirmation)
- Discussion and audience interaction
- 30-day Outcomes of LuX-Valve Plus Transjugular Tricuspid Valve Replacement System in TRINITY Trial
T. Modine
- Discussion and audience interaction
- Innovative design for tricuspid regurgitation: early experience with a new TTVR
J. Van Der Heyden
- Discussion and audience interaction
- The Trisol TTVR system Technology and EFS Update
I. George (Pending confirmation)
- Discussion and audience interaction
- Early US feasibility experience with the DUO™ tricuspid coaptation valve: TANDEM II study
V. Thourani (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

THEATRE
HAVANEHot line / Late-
Breaking Trials**Wireless physiology assessment**

Anchorperson: R. Scarsini
Spokesperson: B. K. Koo
Discussants: B. De Bruyne, N. Holm, A. Jeremias (*Pending confirmation*), F. Zimmermann

- A Randomized Study Comparing Angiography- Guidance with Physiology- Guidance After PCI
O. Bertrand (Pending confirmation)
- Discussion and audience interaction
- Clinical and angiographic features of patients likely to have MACE despite online QFR-guided PCI
H. Wang
- Discussion and audience interaction
- Prospective Randomized Trial Evaluating Clinical Outcomes of FFRangio Guidance Versus FFR Guidance
T. Tanigaki (Pending confirmation)
- Discussion and audience interaction
- Prognostic performance of CCTA derived physiology and plaque characterization in the CAREER study
S. Tu
- Discussion and audience interaction
- QFR-PPG for the prognosis of non-culprit vessels in older MI patients with multivessel disease
S. Clo (Pending confirmation)
- Discussion and audience interaction
- Outcomes of FFR- vs. angiography-guided PCI in patients with CCS or NSTEMI-ACS
F. Mangiacapra
- Discussion and audience interaction

08:30 - 09:30

ROOM MAILLOT

Imaging
Case-based
Discussion**Beyond angiography: imaging-guided solutions for stent failure**

Anchorperson: T. Johnson
Spokesperson: N. Amabile
Discussants: T. Adriaenssens, L. Räber

Join us if you want:

- to consider the common causes of stent failure
 - to understand the role of intracoronary imaging in prevention and treatment of stent failure
 - to develop a tailored-approach to the treatment of stent failure using intracoronary imaging
- Welcome and session objectives
T. Johnson
 - Case 1
 - Discussion and audience interaction
 - Treatment approach
 - Case 2
 - Discussion and audience interaction
 - Treatment approach
 - Learning from the RESTO registry
N. Amabile
 - Discussion and audience interaction
 - Session evaluation and key learnings
N. Amabile

08:30 - 09:30

ROOM
LEARNING

Learning

**How to implement the diagnosis of INOCA in everyday practice**

Facilitators: R. Al-Lamee, J. Escaned
(Pending confirmation)

Join us if you want:

- To understand the scale and significance of the diagnosis of INOCA
- To learn how to undertake comprehensive invasive testing to diagnose INOCA
- To consider treatment options tailored to the invasive test results

08:30 - 09:30

**IMAGING SKILLS
LAB 1 (352A)**Imaging
Hands on
Simulation-based
Learning**Hands-on OCT - PCI guidance and optimisation***This session has been made possible thanks to the in-kind support of Abbott***Facilitators:** B. Honton, L. Koltowski (Pending confirmation), A. Mcinerney
Media Driver: D. Tiong
Physician Trainers: J. Barraclough, N. Chandra Mohan, M. Lombardi**Join us if you want:**

- To understand the importance of a detailed planning guided with OCT imaging
- To learn the different tools that OCT offers for PCI planning and optimisation
- To understand the importance of assessing post-PCI result

08:30 - 10:00

HANDS ON LABHands on
Simulation-based
Learning**Bailout options and techniques during PCI: stent dislodgement***This session has been made possible thanks to the kind support of Terumo Learning EDGE***Facilitators:** M. Ando, M. Haude (Pending confirmation), J. Kefer, J. Nolan, M. Oberhoff, H. Routledge (Pending confirmation)**Join us if you want:**

- To explore bailout options using existing devices
- To determine the steps to successful retrieval in a case of simulated stent loss
- To consider causes and avoidance strategies for stent dislodgement

08:30 - 09:30

**IMAGING SKILLS
LAB 2 (352B)**Imaging
Hands on
Simulation-based
Learning**Hands-on IVUS-guided treatment of calcified lesions***This session has been made possible thanks to the in-kind support of Philips***Facilitators:** K. Al-Azizi, G. Guagliumi, A. Jerónimo
Media Driver: A. Mukherjee
Physician Trainers: M. Jawanjal, G. Nardi, G. Occhipinti, S. I. Sandoval Hernandez**Join us if you want:**

- To learn how to recognise the different morphologies of calcified plaque by IVUS
- To plan the best calcium modification strategy depending on the type and degree of calcification
- To consider the role of IVUS in optimising stent results

08:30 - 09:30

ROOM 241

Abstracts

Calcium modification: contemporary comparisons of atherectomy and IVL**Facilitator:** S. Al Shaikh (Pending confirmation)

- Lithotripsy or atherectomy debulking for coronary calcifications in Acute Coronary Syndrome
M. Pavani
- Discussion and audience interaction
- Atherectomy followed by coronary intravascular lithotripsy on severely calcified coronary lesions
Y. Sotomi
- Discussion and audience interaction
- Atherectomy and IVL for Complex Coronary Lesions: A Subgroup Analysis from FRANCE-LILI
C. Saint Etienne (Pending confirmation)
- Discussion and audience interaction
- Safety and efficacy of coronary intravascular lithotripsy with OCT guidance: insights from Shock Ind
S. Kasturi
- Discussion and audience interaction
- Current use and two-year outcomes of coronary lithotripsy: updates from the BENELUX-IVL registry
M. Van Oort (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

**SIMULATION
LEARNING
ROOM (STUDIO
A)**Simulation-based
Learning**IVUS CTO****Facilitators:** S. G. Carlier, R. Garbo, K. Mashayekhi**Join us if you want:**

- To learn to understand the importance of IVUS for antegrade cap visualisation
- To see an IVUS guided live puncture in stimulation model
- To understand the impact of IVUS in revers CART
- To get an idea about the potential of IVUS guided re-entry

08:30 - 09:30

ROOM 243

Case-based
Discussion**Hypertension interventions in specific scenarios****Anchorperson:** F. Mahfoud
Discussants: M. Azizi (Pending confirmation), R. M. Bruno, A. Kirtane**Join us if you want:**

- To learn how to treat patients with renal artery stenoses
 - To discuss potential indications of renal denervation with a multidisciplinary hypertension team (panel)
 - To review the current evidence on renal denervation in special patient populations with hypertension
- Welcome and session objectives
F. Mahfoud
 - Renal denervation in advanced chronic kidney disease
F. L. Ribichini
 - Discussion and audience interaction
 - Renal denervation in patients with heart failure with preserved ejection fraction
L. Lauder
 - Discussion and audience interaction
 - Renal denervation as a first line therapy in young patients
P. Gosse (Pending confirmation)
 - Discussion and audience interaction
 - Stenting the renal artery - How to perform it step-by-step?
T. Zeller (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
F. Mahfoud

08:30 - 09:30

ROOM 251

Abstracts

Unraveling the full potential of completed tomography**Facilitator:** W. Kehasukcharoen (Pending confirmation)

- High-risk coronary plaque morphology on computed tomography coronary angiogram
M. K. Hu (Pending confirmation)
- Discussion and audience interaction
- Association of FFRCT with invasive physiology and placebo-controlled outcome in PCI in stable angina
D. Wang
- Discussion and audience interaction
- Pathophysiological coronary artery disease patterns and coronary perivascular adipose tissue density
C. C. Y. Koo
- Discussion and audience interaction
- Artificial intelligence-powered automatic CT angiography plaque quantification: comparison with OCT
G. Li
- Discussion and audience interaction
- Advanced analyses of coronary computed tomography to predict cardiac events: a meta-Analysis
E. Bianchini (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ROOM 252A

Abstracts

PCR's Got Talent - Round 3 - Final**Jury members:** N. Ajmone Marsan (Pending confirmation), J. Bartunek, R. De Silva
Facilitators: G. Richardt, W. Wijns (Pending confirmation)

08:30 - 09:30

ROOM 252B

ROOM 342A

Nurses and Allied
Professionals

Imaging

Case-based
Discussion

From probe to patient: understanding echocardiography in structural heart disease

Join us if you want:

- To understand the basic principles of echocardiography
- To build foundational knowledge of echocardiography relevant to structural heart disease
- To understand the role of echocardiography in post-procedural assessment and the relevance for nurse and physiology-led follow up

08:30 - 09:30

ROOM 342B

Abstracts

TAVI - Head-to-head comparative studies

Facilitator: H. Herrmann

- Discussion and audience interaction
- TAVI outcomes using different self expandable valves – real world data from a multicentre registry
G. Witberg
- Discussion and audience interaction
- TAVI with intra-annular self-expanding or balloon-expandable valves: the NAVULTRA registry
S. Cannata (Pending confirmation)
- Discussion and audience interaction
- Outcomes of patients undergoing aortic valve intervention: a network meta-analysis
R. Bagur
- Discussion and audience interaction

08:30 - 09:30

ROOM 341

Abstracts

DCB and latest DES technology for coronary interventions

Facilitators: P. Agostoni (Pending confirmation), L. Buchanan (Pending confirmation)

- Predictors of optimal angiographic outcomes in drug-coated balloon treatment for de novo CAD
D. O. Kang
- Discussion and audience interaction
- REVERSE trial: DCB vs. DES in large coronary artery disease—patient selection and lesion prep matter
E. S. Shin
- Discussion and audience interaction
- Dynamic Change of Coronary Artery Geometry after Bioadaptor Implantation
C. H. Tsai
- Discussion and audience interaction
- Newer generation DES in high bleeding risk patients with calcified lesions - insights BIOFLOW-DAPT
R. Hemetsberger (Pending confirmation)
- Discussion and audience interaction
- Coronary bifurcation lesion treatment with a dedicated sirolimus eluting side branch stent
G. Monizzi (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ROOM 343

International
CollaborationHow Should I
Treat?**Pulmonary embolism - What should we do in the cathlab?**

With the collaboration of the Czech Interventional Cardiology Association and Working Group on Invasive and Interventional Cardiology, Croatian Cardiac Society

Anchorpersons: V. Kocka, E. Margetic
Discussants: H. Jurin, P. Kala

Join us if you want:

- To learn when pharmacotherapy might not be enough for pulmonary embolism patients
 - To discuss the interventional options in 2025
 - To see interesting pulmonary embolism cases and lively discussion
- Welcome and session objectives
E. Margetic
 - Case 1 - Polytrauma and acute respiratory failure
M. Pavlov (Pending confirmation)
 - How would I treat case 1?
P. Kala
 - Discussion and audience interaction
 - Case 1 treatment
M. Pavlov (Pending confirmation)
 - Key learnings Case 1
E. Margetic
 - Case 2 - Shortness of breath, pre-syncope and scoliosis
M. Plíva
 - How would I treat case 2?
H. Jurin
 - Discussion and audience interaction
 - Case 2 treatment
M. Plíva
 - Key learnings Case 2
V. Kocka
 - Session evaluation and key learnings
V. Kocka

08:30 - 09:30

ROOM NEXTGEN
(351)Imaging
NextGen
Learning**3D cardiac anatomy: a must-see**

Facilitators: G. G Toth, N. Piazza

Join us if you want:

- To better visualise the 3D anatomy of the coronary arteries
- To recognise the limitations of fluoroscopic imaging of coronary arteries
- To appreciate optimal fluoroscopic viewing angles for PCI of ostial and bifurcation lesions

08:30 - 09:30

ROOM 353

Clinical Cases

Best companion's cases on orbital atherectomy

- Sand and knock the calcium away
S. Narasimhan (Pending confirmation)
- Discussion and audience interaction
- An orbital flight to the cardiovascular system
D. Tornyos
- Discussion and audience interaction
- Between a rock and a hard place - Calcific RCA terrain
V. Nanjappa
- Discussion and audience interaction
- Dealing with an eccentric calcified lesion in a small vessel
F. S. Hasibuan
- Discussion and audience interaction
- Optical coherence tomography to guide percutaneous treatment of calcified intracoronary nodule
I. Gallo Fernández
- Discussion and audience interaction

08:30 - 09:30

ROOM
ARLEQUIN

Abstracts

Mitral abstracts session

Facilitator: I. Cruz-Gonzalez

- Impact of mitral valve complexity on outcomes following Mitral TEER
L. Stolz
- Discussion and audience interaction
- Prognostic role of right atrial pressure in patient undergoing Mitral TEER
F. Arturi (Pending confirmation)
- Discussion and audience interaction
- MitraClip® G4 TEER: A propensity-matched analysis of degenerative vs. functional mitral regurgitation
G. Papadopoulos
- Discussion and audience interaction
- One-year outcomes stratified by gradient and residual mitral regurgitation after Mitral TEER in Degenerative mitral regurgitation
J. Hausleiter (Pending confirmation)
- Discussion and audience interaction
- External Validation of COAPT Risk Score in Patients Who Underwent Transcatheter Edge-To-Edge Repair
A. Gasecka
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER A

Abstracts

Novelty in ACS diagnosis and treatment**Facilitators:** M. Belmonte, M. Grygier

- Role of simple paclitaxel-coated balloon angioplasty in STEMI. Safety and efficacy
J. A. Del Valle Montero (Pending confirmation)
- Discussion and audience interaction
- The impact of carbon monoxide to determine the prognosis of myocardial infarction
A. Léquipar
- Discussion and audience interaction
- AI ECG Prediction of Infarct-Related Artery in STEMI Independent of ST-Segment Elevation Criteria
R. Herman
- Discussion and audience interaction
- Non-hyperemic angiography-derived index of microcirculatory resistance in MINOCA patients
V. Galli (Pending confirmation)
- Discussion and audience interaction
- Real-world use of optical coherence tomography to assess underlying coronary lesion morphology in pa
K. Nishimiya (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER C

Clinical Cases

CTO PCI evolution: unlocking new approaches**Facilitators:** H. J. Buettner, J. L. Gutiérrez-Chico

- When the microcatheter will not pass. Tip-in techniques can save the day
A. Achim (Pending confirmation)
- Discussion and audience interaction
- How to maximise your much needed support when every other option is exhausted
A. Hashemi
- Discussion and audience interaction
- Heaven or hell in the CTO procedure: Which way leads to heaven, clockwise rotation or counterclock?
T. Suzuki (Pending confirmation)
- Discussion and audience interaction
- Thinking outside the box during CTO procedure
M. Benamer
- Discussion and audience interaction
- Outcomes of patients with ACS and non-infarct related CTO treated with early or late PCI
L. Paolucci (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER B

Abstracts

360 management of cardiogenic shock**Facilitators:** A. Azzano, M. Pellicano

- Ninety-day follow-up of a low-profile ventricular assist device in high-risk coronary interventions
A. Abizaid (Pending confirmation)
- Discussion and audience interaction
- Implementation of emergency ECMO in a PCI center without on-site cardiothoracic surgery
T. Rissanen
- Discussion and audience interaction
- Cangrelor in patients with myocardial infarction complicated by cardiogenic shock or cardiac arrest
W. Bennar
- Discussion and audience interaction
- Efficacy and Safety of Ticagrelor versus Clopidogrel in AMICS: A Propensity Score-Matched Analysis
M. Presume (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER D

Clinical Cases

TAVI new devices

- Coronary protection and beyond
A. Abdelhafez (Pending confirmation)
- Discussion and audience interaction
- Combination of VitaFlow TAVI and FLOWER Cerebral Embolic Protection to Treat Bicuspid Aortic Valve
D. Grassini
- Discussion and audience interaction
- Management of ventricular migration of a novel self-expanding TAVI platform
K. Triantafyllou
- Discussion and audience interaction
- Overcoming TAVI valve sizing challenges in bicuspid anatomy with a novel device
Z. Zhao (Pending confirmation)
- Discussion and audience interaction
- TAVI in rheumatic aortic valve disease with a novel device
Y. Feng (Pending confirmation)
- Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER EComplexity
Clinical Cases**Best companion's case on coronary complications****Facilitators:** *H. Amin (Pending confirmation), O. Muller*

- › Novel approach to optimising coronary angioplasty in complicated cases
R. Celinski (Pending confirmation)
- › Discussion and audience interaction
- › Precision under pressure: managing coronary intervention challenges
A. Lauretti
- › Discussion and audience interaction
- › Swinging between Scylla and Charybdis after PCI
E. Mantzouranis (Pending confirmation)
- › Discussion and audience interaction
- › An unconventional staged PCI
G. Quadri
- › Discussion and audience interaction
- › Do or do not do, No Try
A. Haroon (Pending confirmation)
- › Discussion and audience interaction

08:30 - 09:30

ABSTRACT &
CASE CORNER FComplexity
Clinical Cases**Best companions's case on complications in calcified lesions****Facilitators:** *R. Schwartz, A. Øksnes*

- › A unique way to use Rotablation
K. Manousopoulos
- › Discussion and audience interaction
- › When calcium is too hard: Dealing with a stucked burr
V. Cesario
- › Discussion and audience interaction
- › Calcium and tortuosity: a double trouble combo
A. R. Pereira
- › Discussion and audience interaction
- › When better is the enemy of good: Stent optimisation leading to coronary artery perforation
L. Van Nunen
- › Discussion and audience interaction
- › STUCK IN THE MIDDLE: Perforation due to the retrieval of an entrapped burr in a highly calcified LAD
G. Calamita
- › Discussion and audience interaction

08:30 - 09:30

ABSTRACT AND
CASE CORNER G

Clinical Cases

Peripheral expertise to the rescue

- › TAVI Turbulence: Approaching Femoral Access Complications with different techniques
V. Bernardini
- › Discussion and audience interaction
- › Iatrogenic hepatic artery rupture. Endovascular solution
S. Furkalo
- › Discussion and audience interaction
- › From coronary gains to vascular pains: the price of closure
M. T. Mohd Noor (Pending confirmation)
- › Discussion and audience interaction
- › Iatrogenic right subclavian artery pseudoaneurysm treated with balloon assisted percutaneous thrombi
S. Erdal Sayin (Pending confirmation)
- › Discussion and audience interaction
- › Unconventional treatment of superficial femoral artery occlusion caused by a covered stent
G. Latsios
- › Discussion and audience interaction

08:30 - 09:30

THE EXCHANGE

Moderated E-
Poster**Advanced transcatheter valve interventions****Facilitators:** *M. Guerrero, G. Tarantini (Pending confirmation)*

- › Accurate Neo prosthetic valve for percutaneous treatment of pure aortic regurgitation
L. M. Domínguez Rodríguez (Pending confirmation)
- › Discussion and audience interaction
- › Balloon versus self-expanding valves for TAVI in bicuspid aortic stenosis with horizontal aorta
M. Morosato
- › Discussion and audience interaction
- › A counter-assembled Evolut strategy for coronary alignment in Type 0 BAV patients undergoing TAVI
H. Ma (Pending confirmation)
- › Discussion and audience interaction
- › One-year outcomes of transcatheter mitral valve-in-valve procedure with next-generation TAVI valve
A. M. Sankardas
- › Discussion and audience interaction
- › One-year outcomes with next-generation TAVI valve for pulmonary valve replacement
S. K. Kothandam (Pending confirmation)
- › Discussion and audience interaction

09:45 - 10:45

THEATRE BLEU

How Should I
Treat?**Though decisions in complex left main PCI – Left main trifurcation****Anchorperson:** F. Burzotta
Discussants: A. Al Nooryani, O. Al Shammeri, F. Malik, M. Pan**Join us if you want:**

- To understand how to evaluate and approach left main trifurcations using imaging, physiology and proper technique
 - To discuss how to handle left main trifurcations (complexity, calcification, CABG/PCI lesion preparation)
 - To learn how to treat left main trifurcations and understand the techniques (stepwise provisional, upfront two stents, DCB)
- Welcome and session objectives
F. Burzotta
 - Case 1 - Introduction
M. Pan
 - Short overview, details will be covered in discussion with the audience
F. Burzotta
 - Discussion and audience interaction
 - Case 1 - Treatment
M. Pan
 - Presentation
 - Discussion and audience interaction
 - Case 2 - Introduction
 - Discussion and audience interaction
 - Case 2 - Treatment
 - Discussion and audience interaction
 - Session evaluation and key learnings

09:45 - 10:45

THEATRE
BORDEAUXCase-based
Discussion**Extensive anterior STEMI - Treatment strategies from SCAI A to E****Anchorperson:** M. Noc
Spokesperson: G. G Toth
Discussants: C. Hassager (Pending confirmation), T. Keeble, H. Thiele**Join us if you want:**

- To discuss how to risk-stratify ACS patients with hemodynamic instability
 - To learn how to adapt mechanical circulatory support to the level of hemodynamic deterioration
 - To get familiar with the principles of mechanical circulatory support selection and utilisation
- Welcome and session objectives
M. Noc
 - What do I do with SCAI A-B?
C. Hassager (Pending confirmation)
 - Discussion and audience interaction
 - SCAI C-D-Impella for every patient?
H. Thiele
 - Discussion and audience interaction
 - Crushing patient at arrival to the cathlab (SCAI E)
J. Belohlavek
 - Discussion and audience interaction
 - Session evaluation and key learnings
G. G Toth

09:45 - 10:45

THEATRE
HAVANEHot line / Late-
Breaking Trials**Intracoronary imaging guidance for PCI****Anchorperson:** C. Bourantas
Spokesperson: G. Guagliumi
Discussants: D. Erlinge, H. Garcia, L. Räber, R. Shlofmitz

- Optical coherence tomography-guided PCI in acute coronary syndrome patients with complex lesions
B. K. Kim
- Association between AI-enhanced quantification and target vessel failure after IVUS-guided PCI
S. Tu
- Long-term outcomes after imaging and physiology-guided PCI: Extended follow-up of the FLAVOUR trial
B. K. Koo
- One-year clinical outcomes of optical coherence tomography-guided percutaneous coronary intervention
T. Yonetsu
- Optical coherence tomography-based post-PCI physiology assessment: An ILUMIEN-IV substudy
T. Johnson

09:45 - 10:45

ROOM MAILLOT

Case-based
Discussion

Multivalvular disease

Anchorperson: V. Delgado
Spokesperson: M. Sitges
Discussants: K. H. Kuck (Pending confirmation), J. Lanz (Pending confirmation), P. Sorajja (Pending confirmation)

Join us if you want:

- To how to get the diagnosis right understanding the challenges and pitfalls of imaging modalities to diagnose multivalvular heart disease
- To learn the indications for intervention : when and how ?
- To understand other pathophysiological factors that may need attention/treatment

- Welcome and session objectives
V. Delgado
- Case presentation 1 - Paradoxical low flow low gradient severe aortic stenosis and severe secondary mitral regurgitation and tricuspid regurgitation
A. Sannino
- Diagnosing multivalvular heart disease: how to get it right
P. Unger (Pending confirmation)
- Discussion and audience interaction
- Case 1 resolution - What did we do?
A. Sannino
- Case 2 - Combined atrial mitral regurgitation and tricuspid regurgitation
M. Adamo
- Discussion and audience interaction
- The guidelines are limited: what do we do?
A. Berrebi
- Case 2 resolution - What did we do?
M. Adamo
- Discussion and audience interaction
- Session evaluation and key learnings
M. Sitges

09:45 - 10:45

ROOM
LEARNING

Learning

Complex femoral access for TAVI

Facilitators: M. Abdel-Wahab, A. Neylon
Media Driver: G. Russo

09:45 - 10:45

IMAGING SKILLS
LAB 1 (352A)

Imaging

Hands on

Simulation-based
Learning

Hands-on OCT-guided treatment of calcified lesions

This session has been made possible thanks to the in-kind support of Abbott

Facilitators: Z. Ali, F. Bardooli, N. Pinilla
Media Driver: M. Lombardi
Physician Trainers: J. Barraclough, N. Chandra Mohan, K. Kyhl, D. Tiong

Join us if you want:

- To learn how to recognise the different morphologies of calcified plaque by OCT
- To plan the best calcium modification strategy depending on the type and degree of calcification
- To understand the importance of calcified plaque modification before stent implantation

09:45 - 10:45

IMAGING SKILLS
LAB 2 (352B)

Imaging

Hands on

Simulation-based
Learning

Hands-on IVUS-guided treatment of left main and bifurcation

This session has been made possible thanks to the in-kind support of Philips

Facilitators: H. Abdel-Hadi, R. Al-Lamee, J. M. De La Torre Hernandez
Media Driver: G. Nardi
Physician Trainers: M. Jawanjal, A. Mukherjee, G. Occhipinti (Pending confirmation), S. I. Sandoval Hernandez

Join us if you want:

- To discuss benefits of IVUS guidance for left main and bifurcation PCI
- To understand the importance of plaque morphology assessment, landing zones and predictors of side branch occlusion
- To decide provisional vs. 2-stent technique ad-hoc and plan step-by-step
- To assess the need for optimisation in left main PCI

09:45 - 10:45

SIMULATION
LEARNING
ROOM (STUDIO
A)Simulation-based
Learning

Learning echo-guided transfemoral puncture and large bore access closure

Facilitators: V. Floré (Pending confirmation), B. Marie-Jeanne, F. Picard

Join us if you want:

- To learn how to master echo-guided transfemoral puncture
- To learn tips and tricks on transfemoral puncture
- To learn how to perform preclosing with suture-based device
- To learn how to perform large-bore closure with plug-based device

09:45 - 10:45

ROOM 241

Abstracts

Role of coronary physiology in acute coronary syndrome patients

Facilitator: P. Canova

- Plaque characteristics and risk of acute coronary syndrome by physiological disease pattern
S. Yang
- Discussion and audience interaction
- Prognostic value of AngioIMR in ST-segment elevation myocardial infarction
B. Caullery
- Discussion and audience interaction
- Prognostic implications of lumen and plaque characteristics according to functional significance
S. Yang
- Discussion and audience interaction
- Diagnostic accuracy of quantitative flow ratio in non-culprit lesions of patients with STEMI
E. Alfonso (Pending confirmation)
- Discussion and audience interaction
- Intravenous adenosine, not intracoronary adenosine, overestimates non-culprit FFR during Acute Coronary Syndrome
J. Los
- Discussion and audience interaction

09:45 - 10:45

ROOM 242AB

Innovation
Case-based
Discussion

Innovation to address unmet clinical needs in transcatheter valve therapies

Anchorperson: N. Van Mieghem

Spokesperson: R. Parma

Discussant: G. Tarantini (Pending confirmation)

Join us if you want:

- To learn updates on innovations in transcatheter valve therapies
 - To share practical experience in challenging clinical scenarios
 - To understand current technology limitations and promising solutions for heart valve therapies
- Welcome and session objectives
N. Van Mieghem
 - Case 1 - Young patient with aortic stenosis
 - Present and future TAVI innovations
H. Treede
 - Discussion and audience interaction
 - Case 2 - Severe mitral regurgitation with mitral annular calcification
N. Karam
 - Innovation in TMVR
W. Wojakowski
 - Discussion and audience interaction
 - Case 3 - Severe tricuspid regurgitation with large gaps and right ventricle dysfunction
P. P. Leone
 - Innovation in tricuspid intervention
 - Discussion and audience interaction
 - Session evaluation and key learnings
R. Parma

09:45 - 10:45

ROOM 243

Complexity
How Should I
Treat?**What an interventional cardiologist should know about anti-thrombotics****Anchorperson: G. Cayla****Spokesperson: A. Greco****Discussants: P. Capranzano (Pending confirmation), G. Montalescot (Pending confirmation), J. Siller-Matula****Join us if you want:**

- To learn how to achieve effective anti-thrombotic inhibition in the acute phase of STEMI
 - To implement the latest clinical evidence in patients at high bleeding risk
 - To customise DAPT in patients at high thrombotic risk and low bleeding risk
- Welcome and learning objectives
G. Cayla
 - Case 1 - A patient with STEMI and primary PCI
G. Montalescot (Pending confirmation)
 - Discussion and audience interaction
 - Evidence and recommendations
D. Capodanno
 - Case 2 - A patient with atrial fibrillation on chronic anticoagulation
P. Capranzano (Pending confirmation)
 - Discussion and audience interaction
 - Evidence and recommendations
D. Capodanno
 - Case 3 - A young patient with prior myocardial infarctions and multiple PCI
J. Siller-Matula
 - Discussion and audience interaction
 - Evidence and recommendations
D. Capodanno
 - Session evaluation and key learnings
A. Greco

09:45 - 10:45

ROOM 251

Abstracts

Procedural planning and risk stratification in multivessel PCI**Facilitators: M. Belmonte (Pending confirmation), B. Hennessey (Pending confirmation)**

- Short- and Long-term prediction of clinical events in the randomized Multivessel TALENT Trial
P. Serruys
- Discussion and audience interaction
- Complete vs culprit-only revascularization in older women and men: insights from the FIRE trial
M. Bernardi (Pending confirmation)
- Discussion and audience interaction
- Prognostic value of post-PCI FFR and quantitative flow ratio in predicting target vessel failure
B. Csanadi (Pending confirmation)
- Discussion and audience interaction
- Illuminate study: comparing large language models in complex interventional cardiology cases
A. Lauretti
- Discussion and audience interaction

09:45 - 10:45

ROOM 252B

International
CollaborationCase-based
Discussion**Session in collaboration with SOLACI***With the collaboration of Sociedad Latinoamericana de Cardiología Intervencionista (SOLACI)*

09:45 - 10:45

ROOM 253

International
CollaborationHow Should I
Treat?**Optimising TEER in challenging anatomies***With the collaboration of the Belgian Working Group of Interventional Cardiology and Saudi Arabian Cardiac Intervention Society (SACIS)***Anchorpersons: W. Alkashkari, C. Dubois**
Discussant: M. Vanhaverbeke**Join us if you want:**

- To optimise your strategies for tricuspid TEER
- Welcome and session objectives
C. Dubois
- Case 1 - Tricuspid TEER: when the coaptation gap is at the edge of feasibility
S. Lochy (Pending confirmation)
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
S. Lochy (Pending confirmation)
- Key learnings Case 1
C. Dubois
- Case 2 -
- How would I treat case 2?
M. Vanhaverbeke
- Discussion and audience interaction
- Case 2 treatment
- Key learnings Case 2
W. Alkashkari
- Session evaluation and key learnings
W. Alkashkari

09:45 - 10:45

ROOM 342A

Nurses and Allied
ProfessionalsCase-based
Discussion**Building bridges, not barriers: transforming communication with patients****Join us if you want:**

- To develop verbal and non-verbal communication techniques to ensure patients feel informed and supported before, during, and after procedures
- To learn how to explain complex procedures clearly, enhancing patient understanding and reducing anxiety
- To strengthen your role as the primary connection between patients, clinicians, and procedures to improve care outcomes

09:45 - 10:45

ROOM 342B

Abstracts

Outcome prediction using artificial intelligence and meta-analysis**Facilitator: D. Kettles**

- AI-guided aortic stenosis risk stratification using a guideline-integrated large language model
D. Garin
- Discussion and audience interaction
- Prediction of aortic stenosis progression using artificial intelligence: a machine learning model
I. Edward (Pending confirmation)
- Discussion and audience interaction
- Predictors of periprocedural stroke after TAVI: a systematic review and meta-analysis
T. Theodoropoulou
- Discussion and audience interaction
- Prospective patient specific computer simulation in bicuspid TAVI, a single centre experience
J. Dargan
- Discussion and audience interaction
- Improving large language models accuracy via Heart Team simulation: a prompt design analysis
D. Garin
- Discussion and audience interaction

09:45 - 10:45

ROOM 341

Clinical Cases

Atherectomy for CTO-PCI**Facilitators: A. Erglis, F. Woitek (Pending confirmation)**

- Reverse cart and debulking with orbital atherectomy of a very calcified RCA occlusion
D. Benedetto
- Discussion and audience interaction
- Sailing around the rocks
M. Leoncini (Pending confirmation)
- Discussion and audience interaction
- How to orbit a CTO?
K. Manousopoulos
- Discussion and audience interaction
- Calcified balloon uncrossable chronic total occlusion, How did i manage?
G. NAMBIJARAN
- Discussion and audience interaction
- Orbital Atherectomy Induced Coronary Dissection How I Managed
K. Vasudevan (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

ROOM 343

International
CollaborationHow Should I
Treat?**Imaging makes it clear!**

With the collaboration of the Norwegian Society Invasive Working Group and Working Group for Interventional Cardiology, Austrian Society of Cardiology

Anchorpersons: M. Frick, O. Meyerdierks
(Pending confirmation)
Discussant: A. Niessner

Join us if you want:

- To learn about the value of intravascular ultrasound in avoiding stenting in a "STEMI" patient
 - To learn about the value of OCT in complex situations
- Welcome and session objectives
M. Frick
 - Case 1 - Bridge to disaster
M. Brandt (Pending confirmation)
 - How would I treat case 1?
 - Discussion and audience interaction
 - Case 1 treatment
M. Brandt (Pending confirmation)
 - Key learnings Case 1
M. Frick
 - Case 2 - Norway
S. Calic (Pending confirmation)
 - How would I treat case 2?
A. Niessner
 - Discussion and audience interaction
 - Case 2 treatment
S. Calic (Pending confirmation)
 - Key learnings Case 2
O. Meyerdierks (Pending confirmation)
 - Session evaluation and key learnings
O. Meyerdierks (Pending confirmation)

09:45 - 10:45

ROOM NEXTGEN
(351)NextGen
Learning**Transseptal puncture -
Fundamentals**

Facilitators: A. Beneduce, G. Bonnet

Join us if you want:

- To establish intracardiac anatomical orientation under fluoroscopy and echocardiography
- To get familiar with the toolbox for transseptal puncture
- To learn how to perform a correct and safe transseptal puncture procedure

09:45 - 10:45

ROOM 353

International
CollaborationHow Should I
Treat?**Patients with degenerated aortic
bioprosthesis - Every case is
different**

With the collaboration of the Polish Association of Cardiovascular Interventions and Working group of Interventional Cardiology of the Slovak Society of Cardiology (PSIIK)

Anchorpersons: M. Hawranek, M. Hudec
(Pending confirmation)
Discussants: A. Farkas (Pending confirmation), Z. Huczek

Join us if you want:

- To gain insights into the diverse clinical presentations and treatment strategies for patients with degenerated aortic bioprostheses - Why two cases are not the same
 - To learn how to select the best approach for valve-in-valve TAVI based on anatomy, imaging, and patient-specific factors to maximize outcomes
 - To discover expert solutions to challenging scenarios, from coronary access issues to high-risk procedural complications in redo TAVI cases
- Welcome and session objectives
M. Hawranek
 - Case 1 - Crossing the valve is not easy
B. Rymuza (Pending confirmation)
 - How would I treat case 1?
A. Farkas (Pending confirmation)
 - Discussion and audience interaction
 - Case 1 treatment
B. Rymuza (Pending confirmation)
 - Key learnings Case 1
M. Hawranek
 - Case 2 - Balloon valve fracture
M. Gocar (Pending confirmation)
 - How would I treat case 2?
Z. Huczek
 - Discussion and audience interaction
 - Case 2 treatment
M. Gocar (Pending confirmation)
 - Key learnings Case 2
M. Hudec (Pending confirmation)
 - Session evaluation and key learnings
M. Hudec (Pending confirmation)

09:45 - 10:45

ROOM
ARLEQUIN

Abstracts

New frontier in renal denervation: data, devices and developments

Facilitators: M. Azizi (Pending confirmation), K. Tsioufis

- 12-month results of the REDUCED 1 trial assessing the TIVUS system in renal denervation
A. Kirtane
- Discussion and audience interaction
- Safety and efficacy of renal stimulation with direct wire pacing technique during renal denervation
F. Mahfoud
- Discussion and audience interaction
- Independent, single-center RDN registry: results in CKD patients
F. L. Ribichini
- Discussion and audience interaction
- Long-term effect of renal denervation on blood pressure and all-cause mortality
M. Heradien
- Discussion and audience interaction

09:45 - 10:45

ABSTRACT &
CASE CORNER A

Abstracts

Innovations in peripheral interventions

Facilitator: K. Deloose (Pending confirmation)

- Safety and performance of Promesa DES in superficial femoral artery and iliac artery lesions
A. Kabra (Pending confirmation)
- Discussion and audience interaction
- Leave the right thing behind: pre-clinical results of novel Hybrid DES for below-the-knee arteries
T. Hasebe (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

ABSTRACT &
CASE CORNER B

Clinical Cases

LAA closure in challenging scenarios

Facilitators: L. Rosseel, S. Verheye (Pending confirmation)

- Percutaneous Closure for Incomplete Surgical Ligation of the LAA: A Case of the Snowball Effect
B. Duran Karaduman (Pending confirmation)
- Discussion and audience interaction
- Closure of a large and complex LAA peridevice leak
F. Hernandez
- Discussion and audience interaction
- We are still in time to prevent stroke
S. Tarbine (Pending confirmation)
- Discussion and audience interaction
- Go big or get creative: Navigating complex left atrial appendage anatomy
G. Offiah
- Discussion and audience interaction
- Navigating complex anatomies: successful LAA Closure in a nonagenarian
L. Salido (Pending confirmation)
- Discussion and audience interaction

09:45 - 10:45

ABSTRACT &
CASE CORNER C

Abstracts

Anatomy, physiology and clinical judgment: insights from contemporary strategies to guide PCI

Facilitators: T. Adriaenssens, M. Asami

- Impact of Coronary PCI guided by Stress Cardiovascular Magnetic Resonance in primary prevention
A. Léquibar
- Discussion and audience interaction
- Impact of cardiovascular magnetic resonance guided PCI in patients undergoing viability evaluation
A. Léquibar
- Discussion and audience interaction
- Rationales behind physiology-guided PCI: diagnostic and prognostic impact of QFR in FAVOR III China
K. Dou
- Discussion and audience interaction
- Clinical and procedural features of patients likely to have MACE despite online QFR-guided PCI
H. Wang
- Discussion and audience interaction
- The value of hybrid functional and anatomical imaging for guiding revascularization decision-making
R. Hoek
- Discussion and audience interaction

09:45 - 10:45

ABSTRACT & CASE CORNER D

Clinical Cases

DCB in STEMI : why, when and how ?

- Lion's heart, eagle's eye and lady's hand
A. Jaspattananon (Pending confirmation)
- Discussion and audience interaction
- DEB in primary PCI
A. Wadkar

MAIN ARENA

LIVE Educational Case

PCI for complex calcific coronary artery disease: LIVE Educational Case from Sant'Andrea University Hospital - Rome, Italy

Anchorperson: N. Gonzalo
Spokesperson: M. Göteborg
Procedural Analyst: D. Milasinovic
Operators: E. Barbato, E. Gallinoro
Discussants: H. Amin, S. Gunasekaran, F. L. Ribichini, N. Ryan
Cathlab Medical Coordinator: M. Casenghi

- Welcome and session objectives
N. Gonzalo
- Patient presentation
M. Göteborg
- Discussion and audience interaction
- Operator strategy
N. Gonzalo
- LIVE Case procedure
- Debriefing and audience interaction
- Session evaluation and key learnings
N. Gonzalo

10:45 - 12:15

HANDS ON LAB

Hands on
Simulation-based Learning

Bailout options and techniques during PCI: distal perforation

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: P. Calvert, A. Endo, M. Heigert (Pending confirmation), O. Muller, J. Nolan, M. Oberhoff

Join us if you want:

- To explore bailout options using existing devices
- To determine the different solutions to successfully treating distal perforation using simulation
- To consider causes and avoidance strategies for distal perforation

11:15 - 12:15

THEATRE BLEU

All You Need to Know

TAVI in bicuspid: all you need to know

Anchorperson: D. Tchetché
Spokesperson: K. Hayashida
Discussants: M. Borger (Pending confirmation), C. De Biase, A. Mcinerney

Join us if you want:

- To understand the anatomical features of bicuspid aortic valves
- To capture the challenges of TAVI for bicuspid aortic valves
- To acquire the fundamentals of sizing and transcatheter valve deployment for bicuspid aortic valves
- Welcome and session objectives
D. Tchetché
- Epidemiology and anatomical features of bicuspid aortic valve
C. De Biase
- Discussion and audience interaction
- Indications for surgery
M. Borger (Pending confirmation)
- Indications for TAVI
A. Mcinerney
- Discussion and audience interaction
- Challenges of TAVI in bicuspid aortic valve
- Discussion and audience interaction
- Session evaluation and key learnings
K. Hayashida

11:15 - 12:15

THEATRE

Imaging
Case-based
Discussion

The role of DCB in non-left main true bifurcations

Anchorperson: V. Paradies
Spokesperson: H. Noor (Pending confirmation)
Discussants: R. Byrne (Pending confirmation), A. Marchese, A. Ochala, P. C. Smits (Pending confirmation)

Join us if you want:

- To define lesion characteristics suitable for a provisional stenting approach and the use of DCB in bifurcation lesions
 - To understand the procedural steps of stepwise provisional strategy for bifurcation stenting, focusing on minimising material left behind, in non-left main bifurcation lesions
 - To clarify the role of imaging when treating bifurcation lesions with a provisional stenting technique and assessing the suitability of DCBs application
- Welcome and session objectives
V. Paradies
 - Case 1 - Introduction
K. Teeuwen (Pending confirmation)
 - Presentation 1
P. C. Smits (Pending confirmation)
 - Discussion and audience interaction
 - Case 1 - Treatment
K. Teeuwen (Pending confirmation)
 - Presentation 2
P. C. Smits (Pending confirmation), K. Teeuwen (Pending confirmation)

THEATRE
HAVANE

Hot line / Late-
Breaking Trials

Pharmacotherapy coronary interventions: new insights

Anchorperson: D. Capodanno
Spokesperson: F. Malik
Discussants: H. Krumholz, P. Steg (Pending confirmation), M. Valgimigli

- Ticagrelor monotherapy in chronic coronary syndrome patients post percutaneous coronary intervention
J. Kojuri
- Discussion and audience interaction
- Multiple events after PCI in patients at high bleeding risk: a MASTER DAPT trial sub-analysis
M. Valgimigli
- Discussion and audience interaction
- Effect of BB interruption on blood pressure in MI patients: secondary results of the ABYSS trial
N. Procopi (Pending confirmation)
- Discussion and audience interaction
- Long-term outcomes of 3-to 6-month versus 12-month DAPT after PCI with contemporary stents
H. S. Kim
- Discussion and audience interaction

11:15 - 12:15

ROOM MAILLOT

Case-based
Discussion**Optimal use of cardiac imaging to plan and guide transcatheter LAA closure****Anchorperson:** N. Wunderlich**Spokesperson:** F. Hellig**Discussants:** S. Berti (Pending confirmation), X. Freixa Rofastes, X. Iriart (Pending confirmation)**Join us if you want:**

- To understand the role of cardiac imaging in planning LAA closure
- To learn how different imaging modalities can be used during the LAA closure procedure
- To gain insights into post-procedural imaging and potential clinical implication

- Welcome and session objectives
N. Wunderlich
- Part 1 - Role of imaging in pre-procedural planning
- What are the general requirements for imaging in patient selection and procedural planning for LAA closure?
N. Wunderlich
- How do I use TEE for pre-procedural planning?
X. Freixa Rofastes, L. Sanchis
- Discussion and audience interaction
- How do I use CT for pre-procedural planning?
F. Hellig
- Discussion and audience interaction
- Part 2 - Real-time imaging for procedural guidance of LAA closure
- What are the general requirements for imaging in intraprocedural guidance?
F. Hellig, X. Iriart (Pending confirmation)
- How do I use TEE/mini-TEE for intraprocedural guidance?
L. Sanchis
- Discussion and audience interaction
- How do I use 2D/3D ICE for intraprocedural guidance?
S. Berti (Pending confirmation)
- Discussion and audience interaction
- What to look for and how to react on post-procedure imaging?
- Discussion and audience interaction
- Session evaluation and key learnings
F. Hellig

Clinical Cases

Challenging session in calcified lesions

- Double trouble: triple burr solution
K. Powpuree
- Discussion and audience interaction
- Uncovering the hidden challenges: OCT insights into lesion resistance
Z. H. Teoh
- Discussion and audience interaction
- Going the extra mile with less mL
N. Virginia (Pending confirmation)
- Discussion and audience interaction
- Eccentric calcium - How I managed!
R. Umalkar
- Discussion and audience interaction
- Nightmare on the rough road
A. Marsukjai
- Discussion and audience interaction

12:30 - 13:30**ROOM 342B**

Clinical Cases

Leaflet modification to prevent coronary obstruction during TAVI

- Valve-in-valve-TAVI in a patient with high risk for coronary obstruction and patient prosthesis mismatch
H. Dreger
- Discussion and audience interaction
- How I prepare to treat TAV-in-SAV with leaflet modification prior to TAVI
D. Tchetché
- Discussion and audience interaction
- Treating a failed stentless valve with leaflet modification prior to valve-in-valve
P. Genereux
- Discussion and audience interaction
- Aortic valve-in-valve and advanced leaflet management in a patient with degenerated homograft
N. Azzola Guicciardi (Pending confirmation)
- Discussion and audience interaction

12:30 - 13:30**ROOM 343**

Clinical Cases

Shock and PCI: due to ECMO I survived**Facilitators: R. Garbo, G. K. Olivecrona (Pending confirmation)**

- Very young cardiac arrest during off-hours; do I have to introduce ECMO for resuscitation?
S. Shimizu
- Discussion and audience interaction
- Double culprit STEMI with CS/VF arrest during hajj mass gathering
S. Assiri (Pending confirmation)
- Discussion and audience interaction
- Leaving no stone unturned: a game-changing approach to STEMI treatment
D. Deeb (Pending confirmation)
- Discussion and audience interaction
- STEMI complicated by cardiogenic shock in a young woman
L. Favero
- Discussion and audience interaction
- Running away from the Grim Reaper
D. David (Pending confirmation)
- Discussion and audience interaction

12:30 - 13:30**ROOM 353**

Clinical Cases

Management of complex left main trifurcation lesion**Facilitators: H. Gamra, H. Möllmann**

- A muddy main
P. Pengchata (Pending confirmation)
- Discussion and audience interaction
- Hybrid approach to left main trifurcation lesions
I. C. Tsang
- Discussion and audience interaction
- Double TAP technique for left main trifurcation
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction
- A distal left main trifurcation lesion treated by PCI with long-term follow-up angiographic results
S. H. Chan (Pending confirmation)
- Discussion and audience interaction
- Inverted double TAP technique for complex left main trifurcation
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction

12:30 - 13:30

ROOM
ARLEQUIN

Clinical Cases

Challenging tricuspid TEER cases**Facilitators:** M. I. Koerber, M. Swaans

- Triple triumph: the synergy of LAA occlusion, mitral and tricuspid edge-to-edge leaflet repair
A. G. Florescu
- Discussion and audience interaction
- If you cannot replace it, transform it
M. Celaschi (Pending confirmation)
- Discussion and audience interaction
- Can we finish what the surgeons started?
H. M. H. Mohammed
- Discussion and audience interaction
- TEER for a challenging tricuspid valve anatomy
A. S. Amjad (Pending confirmation)
- Discussion and audience interaction
- TEER - Perfection is the greatest enemy of good?
M. Sustersic
- Discussion and audience interaction

12:30 - 13:30

ABSTRACT &
CASE CORNER B

Clinical Cases

Troubleshooting and management communication in LAA closure**Facilitators:** S. Berti (Pending confirmation), C. Hammerstingl

- LAA closure device migration and management
A. H. Ates (Pending confirmation)
- Discussion and audience interaction
- Radiofrequency wire-assisted transeptal puncture in high bleeding risk patient with atrial fibrillation and prostatectomy
F. Scudiero
- Discussion and audience interaction
- LAA closure despite severe scoliosis: the steerable sheath makes it possible
M. Lange (Pending confirmation)
- Discussion and audience interaction
- Buddy pigtail and pigtail-assisted-tracking for LAA closure
M. Bollati
- Discussion and audience interaction
- Managing complication in LAA occlusion: a hole in the plot
D. D Andrea (Pending confirmation)
- Discussion and audience interaction

12:30 - 13:30

ABSTRACT &
CASE CORNER C

Abstracts

Clinical impact of mechanical circulatory support

- Impact of protocols and training on outcomes in left-sided micro-axial flow-supported shock patients
K. Konstantinou (Pending confirmation)
- Discussion and audience interaction
- Practice variations in AMI complicated by cardiogenic shock or cardiac arrest in Sweden and the U.S.
R. Sampath-Kumar
- Discussion and audience interaction
- Six-month outcomes of coronary intervention with low ejection fraction supported by VA-ECMO
B. Qi (Pending confirmation)
- Discussion and audience interaction
- MIRACLE2 score: risk stratifier for poor neurological outcome in extracorporeal cardiopulmonary resuscitation cardiac arrest
M. Noc
- Discussion and audience interaction
- LVEF improvement in complex high-risk PCI supported with micro-axial flow pump: a meta-analysis
M. Lombardi
- Discussion and audience interaction

12:30 - 13:30

ABSTRACT &
CASE CORNER D

Clinical Cases

ACS management: when imaging matters

- Spontaneous coronary artery dissection; a story of desperation
S. Güney (Pending confirmation)
- Discussion and audience interaction
- Bringing the hidden to light: the role of intracoronary imaging in STEMI
L. Canales
- Discussion and audience interaction
- OCT-based diagnosis and management of STEMI associated with plaque erosion
A. Amadio
- Discussion and audience interaction
- Emergent PCI in SCAD with cardiogenic shock: a case highlighting the role of IVUS and cardiac CT
N. WAKANA
- Discussion and audience interaction
- OCT to assess the non-culprits; to treat or not to treat
A. Ntalianis
- Discussion and audience interaction

12:30 - 13:30

THE EXCHANGE

Abstracts

Antiplatelet strategies for clinical dilemmas

Facilitators: C. Gao, S. Schupke (*Pending confirmation*)

- Antiplatelet therapy in myocardial bridge
D. DAmario
- Discussion and audience interaction
- Ticagrelor removal to reduce bleeding after urgent CABG: comparative analysis of real-world data
R. Storey
- Discussion and audience interaction
- Peri-procedural management of patients on oral anticoagulants undergoing PCI: the PERSEO registry
S. De Rosa (Pending confirmation)
- Discussion and audience interaction
- Cangrelor in out-of-hospital cardiac arrest patients undergoing PCI
M. Singh
- Discussion and audience interaction
- Comparative assessment of ICARUS score in predicting bleeding complications
A. Krokos (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:30

Novel tools and techniques to manage complex PCI scenarios

Facilitators: J. Daemen, M. Echavarría Pinto (Pending confirmation)

- FRANCE-LILI registry: advancing intravascular lithotripsy in in-stent restenosis treatment
G. Cayla
- Discussion and audience interaction
- Balloon-assisted fenestration of covered stents: a novel technique to salvage occluded side branches
T. Yndgeign (Pending confirmation)
- Discussion and audience interaction
- Long-term outcomes of DEB after directional coronary atherectomy for bifurcations
S. Kitani
- Discussion and audience interaction
- Safety and efficacy of a novel high-pressure cutting balloon for PCI: a multicentre randomised trial
R. Wang
- Discussion and audience interaction
- Acute mechanical performance of dynamx bioadaptor in real-world setting
N. Abdelrahman
- Discussion and audience interaction

13:45 - 14:45

ROOM 342B

Clinical Cases

Coronary protection during native and valve-in-valve TAVI

Facilitators: T. Ochiai (Pending confirmation), G. Pompei

- Valve-in-valve TAVI: the paramount role of procedural planning
A. Azzano
- Discussion and audience interaction
- Upfront coronary protection saved the day
U. Ulukoksai (Pending confirmation)
- Discussion and audience interaction
- When coronary obstruction secondary to transcatheter aortic valve replacement is not entirely clear
J. F. Chavez Solsol (Pending confirmation)
- Discussion and audience interaction
- Guide catheter extension for coronary protection in TAVI: a help or a need?
D. Gomez Martin
- Discussion and audience interaction
- From vision to victory
F. A. Aris (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ROOM 343

Clinical Cases

Management of bifurcations with complex anatomy: part 1

- Flying under the radar - An unusual case of traumatic coronary artery dissection
A. Oancea
- Discussion and audience interaction
- A rare journey: managing an anomalous right coronary artery from the left main in complex PCI
N. Thaiyanurak
- Discussion and audience interaction
- Circumflex and obtuse marginal CTO complicated by proximal dissection
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction
- Complete revascularisation with double CTO PCI LAD and D (DK crush)
D. Nikolic
- Discussion and audience interaction
- A challenging calcified left circumflex PCI
M. Öz (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ROOM 353

Clinical Cases

How to address the problem of calcified left main lesions

Facilitator: L. Abudaqa

- Complex high-risk PCI in ACS patient with reduced LVEF and heavily calcified left main lesion
R. Soccol
- Discussion and audience interaction
- ACS midnight nightmare: severe calcified stenosis of left main bifurcation
A. Krokos (Pending confirmation)
- Discussion and audience interaction
- Complex left main bifurcation PCI in a octogenarian post CABG with rotablation under Impella support
K. Vasudevan (Pending confirmation)
- Discussion and audience interaction
- Hard rock
U. Khanolkar (Pending confirmation)
- Discussion and audience interaction
- A case of IVUS-guided left main calcified lesion treatment
C. Yundai (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ABSTRACT & CASE CORNER B

Abstracts

A central role for cardiac imaging in transcatheter LAA closure

Facilitator: L. Sanchis

- The ABC of sealing following LAA closure
A. Hamadanchi (Pending confirmation)
- Discussion and audience interaction
- Exploring new dimensions: cardiac tomography advances in LAA wall thickness assess
L. L. Gheorghe
- Discussion and audience interaction
- LAA closure guided by fusion of 3D computational modelling on fluoroscopy
E. Gall
- Discussion and audience interaction
- Device healing assessed by early serial imaging follow-up after LAA closure
J. E. Nielsen-Kudsk
- Discussion and audience interaction
- Percutaneous LAA closure with concomitant implantation of two devices
A. Gasys (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ROOM ARLEQUIN

Clinical Cases

Management of challenging TAVI device delivery

Facilitators: A. Linke (Pending confirmation), L. Nombela-Franco

- From advantage to obstacle: navigating challenges with a kinked Navitor valve
A. Helal (Pending confirmation)
- Discussion and audience interaction
- Lassoing precision: a snare device success story
S. Soulaïdopoulos (Pending confirmation)
- Discussion and audience interaction
- Balloon-expandable TAVI in severe bicuspid aortic stenosis
G. Musumeci
- Discussion and audience interaction
- Navitor stuck at the STJ
J. Shome (Pending confirmation)
- Discussion and audience interaction
- Transaortic access as an alternative for a previously failed transfemoral valve-in-valve TAVI
S. Tarbine (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ABSTRACT & CASE CORNER C

Abstracts

Optimal acute heart failure care: must have, must do

Facilitator: C. Leclercq (Pending confirmation)

- Establishing a new extracorporeal cardiopulmonary resuscitation referral centre - First-year periprocedural results and patient outcomes
K. Gladys (Pending confirmation)
- Discussion and audience interaction
- Percutaneous device closure in ventricular septal rupture: a tertiary care centre experience
I. Saadia (Pending confirmation)
- Discussion and audience interaction
- Efficacy of modified manual compression haemostasis for large-bore sheaths
M. Higuchi
- Discussion and audience interaction
- Anti-thrombotic therapy for AMI-CS on mechanical circulatory support: do we need DAPT?
R. Almeida Carvalho (Pending confirmation)
- Discussion and audience interaction
- Basic tools and big impact - A tele-assisted home-based cardiac rehabilitation model for LMIC's
A. Mukherjee (Pending confirmation)
- Discussion and audience interaction

13:45 - 14:45

ABSTRACT & CASE CORNER D

Clinical Cases

Optimal SCAD treatment

Facilitator: A. Gasecka

- Unmasking the culprit
S. Khattak (Pending confirmation)
- Discussion and audience interaction
- A seven-year cycle: the clinical challenge of a young patient with recurrent ACS
V. Weerts
- Discussion and audience interaction
- The dilemma of spontaneous coronary artery dissection treatment: conservative management or PCI?
C. Terrone (Pending confirmation)
- Discussion and audience interaction
- Young woman and young man presenting with ACS in my weekend call
S. Sabek
- Discussion and audience interaction
- To do or not to do: an ACS spontaneous coronary artery dissection saga
A. Cader
- Discussion and audience interaction

13:45 - 14:45

THE EXCHANGE

Clinical Cases

PCI in a challenging coronary anatomy

Facilitators: A. Al Nooryani, R. Kornowski

- A long and winding road
G. Rizzo (Pending confirmation)
- Discussion and audience interaction
- Challenging PCI of two anomalous coronary arteries arising from opposing sinuses
C. Patil
- Discussion and audience interaction
- Reaching the problem
M. Beltrán
- Discussion and audience interaction
- All roads lead to the left anterior descending artery: mastering the hidden pathways of coronary arteries
Z. Laraichi
- Discussion and audience interaction
- From stealing to healing; using a modified chimney stent technique
M. McGarvey
- Discussion and audience interaction

14:30 - 16:00

HANDS ON LAB

Hands on
Simulation-based Learning

Bailout options and techniques during PCI: distal perforation

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: T. Cuisset (Pending confirmation), A. Endo, T. Johnson, H. Routledge (Pending confirmation), S. Sumitsuji

Join us if you want:

- To explore bailout options using existing devices
- To determine the different solutions to successfully treating distal perforation using simulation
- To consider causes and avoidance strategies for distal perforation

15:00 - 16:30

MAIN ARENA

LIVE Educational Case

Combined LAA closure and transcatheter mitral valve repair: LIVE Educational Case from University Medical Centre - Mainz, Germany

Anchorperson: P. Garot
Spokesperson: N. Wunderlich
Procedural Analyst: O. De Backer
Operators: P. Lurz, T. Ruf
Discussants: A. Aminian, I. Cruz-Gonzalez, G. Ducrocq, J. Hausleiter (Pending confirmation)
Cathlab Medical Coordinator: E. Zancanaro

- Welcome and session objectives
P. Garot
- Patient presentation
N. Wunderlich
- Imaging analysis
O. De Backer
- Discussion and audience interaction
- Operator strategy
P. Garot
- LIVE Case procedure
- Debriefing and audience interaction
- Session evaluation and key learnings
P. Garot

15:00 - 16:00

THEATRE BLEU

All You Need to Know

Redo TAVI - How to treat different TAVI platforms when they fail

Anchorperson: M. Abdel-Wahab
Spokesperson: T. Rudolph
Discussants: D. Blackman, M. Fukui (Pending confirmation), R. Parma

Join us if you want:

- To understand how to plan a redo TAVI procedure
 - To learn the key characteristics of different transcatheter aortic valves that guide the redo TAVI procedure
 - To appreciate the optimal procedural strategies for specific individual transcatheter aortic valve types
- Welcome and session objectives
M. Abdel-Wahab
 - Planning a redo TAVI: basic principles and nomenclature
M. Barbanti (Pending confirmation)
 - Discussion and audience interaction
 - A case of redo TAVI for a failed short-frame valve
 - Discussion and audience interaction
 - A case of redo TAVI for a failed tall-frame valve - part 1
M. Adamo (Pending confirmation)
 - Discussion and audience interaction
 - A case of redo TAVI for a failed tall-frame valve - part 2
A. Khokhar
 - Discussion and audience interaction
 - What is the missing evidence?
D. Blackman
 - Session evaluation and key learnings
T. Rudolph

15:00 - 16:00

THEATRE BORDEAUX

Case-based Discussion

High thrombus burden in STEMI

Anchorperson: N. Ryan
Spokesperson: F. Burzotta
Discussants: B. Honton (Pending confirmation), S. Iwanczyk, M. Noc, N. Salvatella

Join us if you want:

- To understand how to manage high thrombus burden in STEMI
 - To familiarise yourself with the toolkit available for thrombus management
 - To understand the most effective use of adjunctive pharmacological therapy
- Welcome and session objectives
N. Ryan
 - Case 1 - How would I treat?
N. Salvatella
 - Discussion and audience interaction
 - Case 1 - How did I treat?
N. Salvatella
 - Discussion and audience interaction
 - Case 2 - How would I treat?
B. Honton (Pending confirmation)
 - Discussion and audience interaction
 - Case 2 - How did I treat?
B. Honton (Pending confirmation)
 - Discussion and audience interaction
 - Case 3 - How would I treat?
S. Iwanczyk
 - Discussion and audience interaction
 - Case 3 - How did I treat?
S. Iwanczyk
 - Discussion and audience interaction
 - What is the role of thrombus aspiration in 2025
M. Noc
 - Session evaluation and key learnings
F. Burzotta

THEATRE
HAVANE

Innovation / CV
Pipeline

Artificial intelligence in the cath lab

Anchorperson: C. Collet
Discussants: N. Bruining (*Pending confirmation*), S. Fournier, L. Koltowski (*Pending confirmation*), Y. Onuma

- AI-generated spread-out plots for vulnerable plaque identification in intracoronary OCT
J. Thannhauser (Pending confirmation)
- Discussion and audience interaction
- Automated Analysis of Coronary Angiograms using Artificial intelligence
F. Sadri (Pending confirmation)
- Discussion and audience interaction
- AutoOCT: A rapid artificial intelligence system for automated analysis of intracoronary OCT
M. Bennett (Pending confirmation)
- Discussion and audience interaction
- AI-enhanced decision making and PCI optimization in the cath lab
S. Tu (Pending confirmation)
- Discussion and audience interaction
- Noninvasive Index of Microvascular Resistance by Artificial intelligence
F. Sadri (Pending confirmation)

15:00 - 16:00

ROOM MAILLOT

Case-based
Discussion

Deep dive on pulmonary embolism catheter technologies - Clinical trial data and how to use

Anchorperson: L. Hobohm
Discussants: A. Araszkievich, I. Lang, N. Meneveau (*Pending confirmation*), S. Stortecky (*Pending confirmation*)

Join us if you want:

- To learn on case-based presentation about established and new devices to treat acute pulmonary embolism
 - To learn about indications of different devices to treat acute pulmonary embolism
 - To learn about management of complications while manage acute pulmonary embolism
- Welcome and session objectives
L. Hobohm
 - Catheter-directed thrombolysis - How to use and landmark trial on the horizon?
I. Lang
 - Discussion and audience interaction
 - Catheter-based thrombectomy - Indications and what do we learn from peerless
C. Toma
 - Discussion and audience interaction
 - New kids on the block - Computer-assisted aspiration and large volume thrombus removal
A. Araszkievich
 - Discussion and audience interaction
 - Complications management after device-based treatment
J. Giri (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings
L. Hobohm

15:00 - 16:00

ROOM
LEARNING

Learning

Learning from best companions' cases - Coronary interventions

Facilitators: F. Bardooli, D. Milasinovic

15:00 - 16:00

**IMAGING SKILLS
LAB 1 (352A)**

Imaging
Simulation-based
Learning

**Multimodality imaging for
transcatheter tricuspid valve
interventions**

*This session has been made possible thanks to the
in-kind support of Medical Simulation
Technologies*

**Facilitators: N. Piazza, M. Swaans
Discussant: A. Gackowski**

Join us if you want:

- To identify the specific advantages and limitations of transesophageal echocardiography (TEE), intracardiac echocardiography (ICE), and fluoroscopy in guiding transcatheter tricuspid valve interventions, ensuring accurate imaging and decision-making
- To understand how pre-procedural CT scans can predict anatomical variability and procedural challenges, enabling better procedural planning and improved outcomes
- To develop expertise in catheter manipulation across multiple imaging modalities, including TEE, ICE, and fluoroscopy, to ensure precise navigation, positioning, and valve deployment during transcatheter tricuspid valve interventions

15:00 - 16:00

ROOM 241

Abstracts

**Risk stratification of NSTEMI
patients**

**Facilitators: J. GRAPSA (Pending
confirmation), A. Jeremias (Pending
confirmation)**

- › Comparison of GRACE, HEART and TIMI risk scores to predict the severity of CAD among the NSTEMI
M. S. CHOWDHURY
- › Discussion and audience interaction
- › Outcomes in NSTEMI patients based on diabetes status and left ventricular ejection fraction
Y. H. Kim
- › Discussion and audience interaction
- › Prospective validation of the ARC-HBR, PRECISE-DAPT, and PARIS risk prediction models in PIONEER IV
T. Y. Tsai (Pending confirmation)
- › Discussion and audience interaction
- › Association of HEART score with angiographic severity of coronary artery disease in NST-ACS patients
A. A. Anwar
- › Discussion and audience interaction
- › Prognostic value of BCIS CHIP-PCI score in NSTE-ACS patients
V. Kalogera (Pending confirmation)
- › Discussion and audience interaction

ROOM 341

Abstracts

Should STEMI treatment be related to specific clinical patient characteristics

Facilitator: T. Adriaenssens

- STEMI in very young patients: timing the response for a healthier future
P. Juan-Salvadores (Pending confirmation)
- Discussion and audience interaction
- Outcomes and benefit of revascularisation of LAD non-culprit lesions in older patients with AMI
S. Caglioni (Pending confirmation)
- Discussion and audience interaction
- Clinical outcomes of very young (aged ?35 years) STEMI patients: insights from the NAMI registry
K. MD (Pending confirmation)
- Discussion and audience interaction
- Disparities in STEMI diagnosis and management among patients with mental health conditions
D. Garin
- Discussion and audience interaction

15:00 - 16:00

ROOM 342A

Nurses and Allied Professionals
Case-based Discussion

Research fundamentals: patient-focused insights from groundbreaking studies

Join us if you want:

- To understand core principles of research and be aware of the latest research on PCI vs. CABG and TAVI vs. AVR and its relevance to your role
- To develop skills to apply research into practice and improve communication with patients and colleagues
- To use research insights to support evidence-based care and enhance patient outcomes

15:00 - 16:00

ROOM 342B

Abstracts

High-risk PCI in acute coronary syndrome

Facilitator: A. Zaman

- High-risk PCI in patients presenting with ACS turned down for surgical revascularisation
A. Hartley (Pending confirmation)
- Discussion and audience interaction
- Killip class and revascularisation strategy in older patients: insights from the FIRE trial
L. Spadafora
- Discussion and audience interaction
- Haemodynamic support with micro-axial flow pump in severe coronary disease: tertiary centre experience
J. A. Borovac
- Discussion and audience interaction
- Patterns of disease progression and outcomes of inferior STEMI complicated by cardiogenic shock
G. Botti
- Discussion and audience interaction
- The prognostic impact of QFR-guided functional SYNTAX score in patients with ACS
D. Terentes-Printzios
- Discussion and audience interaction

15:00 - 16:00

ROOM 343

International Collaboration
How Should I Treat?

Session with international collaborations: Bulgaria / Türkiye

With the collaboration of the Bulgarian Society of Interventional Cardiology and Turkish Working Group of Interventional Cardiology

Anchorpersons: T. Kilic (Pending confirmation), D. Vassilev

- Welcome and session objectives
D. Vassilev
- Case 1 - Bulgaria
- How would I treat case 1?
- Discussion and audience interaction
- Case 1 treatment
- Key learnings Case 1

TAVI - Fundamentals of CT analysis

Facilitators: G. Bonnet, A. Wolf
Media Driver: V. Cesario

Join us if you want:

- To understand the essential role of CT in pre-TAVI assessment
- To learn how to translate CT findings in individual case strategy
- To better define the most common pitfalls for complex cases

15:00 - 16:00

ROOM 353

International
Collaboration
How Should I
Treat?

TAVI coronary access

With the collaboration of the Slovenian Working Group for Interventional Cardiology and Working Group on Interventional Cardiology, Macedonian Society of Cardiology

Anchorpersons: M. Bunc, S. Kedev
Discussants: M. Sustersic, B. Zafirovska
Taleska

Join us if you want:

- To know how and when to treat coronary lesions in TAVI candidates
 - To understand how to facilitate coronary approach after TAVI
 - To discuss long-term results and tips and tricks for coronary re-intervention
- Welcome and session objectives
S. Kedev
 - Case 1 - STEMI early after Corvalve implantation
I. Vasilev (Pending confirmation)
 - How would I treat case 1?
M. Sustersic
 - Discussion and audience interaction
 - Case 1 treatment
I. Vasilev (Pending confirmation)
 - Key learnings Case 1
S. Kedev
 - Case 2 - Acute occlusion of left main after valve-in-valve TAVI

When angina cannot be cured with stents: what are the remaining options

Facilitators: C. Briguori, D. DASH

- Efficacy of CS reducer in refractory angina pectoris associated with microvascular dysfunction
S. Wlodarczak
- Discussion and audience interaction
- Effectiveness of coronary sinus reducer implantation in routine clinical practice. 12-month outcomes
S. Wlodarczak
- Discussion and audience interaction
- Factors influencing successful coronary sinus reducer implantation for refractory angina
H. Rajabali (Pending confirmation)
- Discussion and audience interaction
- Preclinical and first-in-man experience of a next-generation coronary sinus reducer
F. Giannini
- Discussion and audience interaction
- Efficacy of aspirin in patients with angina without obstructive coronary disease
E. Gutierrez
- Discussion and audience interaction

15:00 - 16:00

ABSTRACT &
CASE CORNER A

Abstracts

Advancing knowledge in peripheral artery disease

Facilitators: R. Corti (Pending confirmation), A. Cremonesi (Pending confirmation)

- Beta-blocker therapy on the remnant false lumen after surgery with the frozen elephant trunk
W. Kim (Pending confirmation)
- Discussion and audience interaction
- Safety and efficacy of presto dual guidewire angioplasty in critical limb ischaemia patients: CLI PRAESTO 36 months follow-up
C. Del Giudice
- Discussion and audience interaction
- Impact of proteinuria on prognosis in LEAD patients with chronic kidney disease: a five-year analysis
T. Kato
- Discussion and audience interaction

15:00 - 16:00

TAVI - Outcomes predictors

Facilitator: W. Wojakowski

ABSTRACT &
CASE CORNER B

Abstracts

- Novel nutritional risk index compared to traditional risk scores for early post – TAVI mortality
J. Boehm
- Discussion and audience interaction
- Impact of frailty on clinical outcome and symptom improvement post-TAVI
S. Fawaz (Pending confirmation)
- Discussion and audience interaction
- Uric acid as a predictor of aortic valve calcification and mortality in TAVI patients
J. Chen
- Discussion and audience interaction
- Clinical outcomes of TAVI in patients with severe aortic stenosis and low calcium score
Y. Talmor-Barkan (Pending confirmation)
- Discussion and audience interaction
- Clinical outcomes of TAVI in patients with active cancer – A bridge to success?
R. Almeida Carvalho (Pending confirmation)
- Discussion and audience interaction

Retrograde removal of the broken sheath

ABSTRACT &
CASE CORNER C

Clinical Cases

- Retrograde removal of the broken sheath
V. O. Baris (Pending confirmation)
- Discussion and audience interaction
- When you know what to look for
M. Leoncini (Pending confirmation)
- Discussion and audience interaction
- Out of the frying pan into the fire
J. Ali (Pending confirmation)
- Discussion and audience interaction
- Broken guidewire in the radial artery – What next?
K. Wilczek (Pending confirmation)
- Discussion and audience interaction
- Off-label, on-target: rare solution for rare complication
I. Skolidis (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

TAVI for aortic regurgitation off label

ABSTRACT &
CASE CORNER D

Clinical Cases

- TAV-in-SAV with the Trilogy valve for severe regurgitation of a freestyle bioprosthetic aortic root
M. Vanhaverbeke
- Discussion and audience interaction
- "The restless valve": problems of transcatheter prosthesis implantation in pure aortic regurgitation
M. Luna-Morales (Pending confirmation)
- Discussion and audience interaction
- Percutaneous management of severe aortic regurgitation due to surgical perforation of non-coronary valve sinus
L. Avendaño-Perez (Pending confirmation)
- Discussion and audience interaction
- Tackling aortic regurgitation in a challenging post-surgical anatomy
M. Morosato
- Discussion and audience interaction
- TAVI in a patient with a severely degenerative homograft and large type B aortic dissection
H. Sharma (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

Acute complications during distal left main PCI - Part 3

ABSTRACT &
CASE CORNER E

Complexity

Clinical Cases

Facilitators: O. Al Shammeri, L. Testa

- Left main stenting: how not to be done
H. Sholy
- Discussion and audience interaction
- Left main V stenting ending in catastrophe
R. Sharma (Pending confirmation)
- Discussion and audience interaction
- "Un"protected left main thrombosis
E. Toscano (Pending confirmation)
- Discussion and audience interaction
- Surviving an unthinkable complication when the new technology goes awry
A. Mechery (Pending confirmation)
- Discussion and audience interaction

**ABSTRACT &
CASE CORNER F**

Complexity
Clinical Cases

**Peripheral interventions: the
hidden key for complications**

Facilitator: P. Sbarzaglia

- The story of a lost stent
E. Dri
- Discussion and audience interaction
- A shocking access in TAVI
D. Astrid (Pending confirmation)
- Discussion and audience interaction
- Vascath's misplacement: percutaneous removal from the left subclavian artery
K. Konstantinou (Pending confirmation)
- Discussion and audience interaction
- Revascularisation of iatrogenic tibio-peroneal trunk pseudoaneurysm
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction
- When three closure devices were not enough
G. Shenoda
- Discussion and audience interaction

15:00 - 16:00

**ABSTRACT AND
CASE CORNER G**

Clinical Cases

**Electrosurgical techniques in
transcatheter mitral valve
replacement**

Facilitator: F. Praz

- Tip to base lampoon technique and transapical wire externalisation in transcatheter mitral valve in-ring replacement
A. Mangiameli (Pending confirmation)
- Discussion and audience interaction
- Electrosurgical laceration and stabilisation of failed PASCAL before Tendyne
F. Tartaglia
- Discussion and audience interaction
- Percutaneous aortic and mitral valve implantation: LVOT obstruction management
M. Raposo
- Discussion and audience interaction
- Bioprosthetic valve failure: combined septal ablation, leaflet laceration, and dual valve-in-valve
X. Wu (Pending confirmation)
- Discussion and audience interaction
- Severe aortic regurgitation after LAMPOON for mitral valve-in-valve
A. Cervone (Pending confirmation)
- Discussion and audience interaction

15:00 - 16:00

THE EXCHANGE

Moderated E-
Poster

**Bridging preclinical research and
clinical care in peripheral artery
disease**

**Facilitator: P. Sadeghipour (Pending
confirmation)**

- Resorbable fibrillated scaffolds: preclinical assessment
K. Miyashita (Pending confirmation)
- Discussion and audience interaction
- Stenosis limited release from DEB and local delivery to peripheral porcine arteries
R. Tzafirri
- Discussion and audience interaction
- In-situ fenestration technique for aortic arch aneurysms and dissections
I. Petrov (Pending confirmation)
- Discussion and audience interaction
- The simplicity and usefulness of geriatric nutritional risk index to assess outcomes in LEAD
A. Satake (Pending confirmation)
- Discussion and audience interaction
- Underuse of guideline-directed medical therapies in patients undergoing PVI
J. Rymer
- Discussion and audience interaction

Calcified un-dilatable lesions in ACS: what should I do?

Anchorperson: B. Vaquerizo
Spokesperson: D. Milasinovic
Discussants: P. Deharo, A. Mcinerney, R. Shlofmitz, A. Øksnes

Join us if you want:

- To understand the impact of coronary calcification on PCI strategy during ACS
 - To appreciate pitfalls in lesion preparation during primary PCI
 - To learn proper selection of treatment strategies in the setting of calcified culprit ACS lesions
-
- Welcome and session objectives
B. Vaquerizo
 - Invite to interaction
 - What is the evidence on primary PCI in severely calcified lesions?
D. Milasinovic
 - Summary and transition to the first case
 - Case 1 - Presentation
P. Deharo
 - Discussion and audience interaction
 - Case 1- How I treated?
P. Deharo
 - Discussion and audience interaction
 - Case 2 - Presentation
A. Øksnes
 - Discussion and audience interaction
 - Case 2 - How I treated?
A. Øksnes
 - Discussion and audience interaction
 - Session evaluation and key learnings
B. Vaquerizo

16:15 - 17:15

THEATRE
BORDEAUX

Case-based
Discussion

Which device for which patient: DES, BRS or DCB?

Anchorperson: M. Haude (*Pending confirmation*)
Spokesperson: M. A. Rosli
Discussants: B. Cortese, H. Garcia, M. Gilard, M. Lee

Join us if you want:

- To learn patient / lesion characteristics for DES, BRS or DCB-PCI
 - To understand the strengths and weaknesses of DES, BRS or DCB-PCI
 - To reflect on regional selection of DES, BRS or DCB-PCI
-
- Welcome and session objectives
M. Haude (Pending confirmation)
 - Presentation of strengths and weaknesses of DES, BRS, or DCB-PCI
 - Case 1 - Presentation: DES
V. Kunadian
 - Discussion and audience interaction
 - Case 1 - Resolution
V. Kunadian
 - Case 2 - Presentation: DCB
B. Scheller
 - Discussion and audience interaction
 - Case 2 - Resolution
B. Scheller
 - Case 3 - Presentation: BRS
M. Sabate (Pending confirmation)
 - Discussion and audience interaction
 - Case 3 - Resolution
M. Sabate (Pending confirmation)
 - Session evaluation and key learnings
M. A. Rosli

16:15 - 17:15

THEATRE
HAVANE

Hot line / Late-
Breaking Trials

Innovative strategies for coronary interventions

Anchorperson: M. Noc
Spokesperson: R. Al-Bawardy
Discussants: R. De Silva, R. Mehran, V. Panoulas, S. Verheye (Pending confirmation)

- VELAZQUEZ-EPIC26 study: results of a new hydrodynamic ultrathin strut sirolimus eluting-stent
J. Linares
- Use of CorVad percutaneous ventricular assist system in complex high-risk and indicated patients
K. Dou
- SCORE - First report on a multicenter, prospective, all-comers study with the SeQuent SCB
S. Otto (Pending confirmation)
- DCB versus DES for ostial left circumflex lesions
F. Tartaglia
- Site-specific antithrombotic therapy: DESyne BDS Plus Trial 24-month outcomes
A. Abizaid (Pending confirmation)

16:15 - 17:15

ROOM MAILLOT

How Should I
Treat?

Emerging indications for TAVI in 2025

Anchorperson: M. Joner (Pending confirmation)
Spokesperson: J. Mascherbauer
Discussants: F. Baslaib (Pending confirmation), R. Costa (Pending confirmation), V. Veulemans

Join us if you want:

- To learn about emerging TAVI indications
 - To get updated on latest clinical trial outcomes for these indications
 - To get exposed to new technologies aimed at emerging TAVI indications
- Welcome and session objectives
M. Joner (Pending confirmation)
 - Case 1 - An asymptomatic patient with severe degenerative aortic valve stenosis to be treated by TAVI
T. A. Rheude
 - Discussion and audience interaction
 - Evidence supporting the treatment of asymptomatic patients with severe aortic valve stenosis by TAVI
P. Genereux
 - How did I treat ?
T. A. Rheude
 - Case 2 - Moderate aortic stenosis with heart failure
P. Gatto (Pending confirmation)
 - Discussion and audience interaction
 - Moderate aortic stenosis - Current evidence and ongoing trials
N. Van Mieghem
 - How did I treat?
P. Gatto (Pending confirmation)
 - Case 3 - A patient with severe aortic regurgitation to be treated by TAVI
 - Discussion and audience interaction
 - Aortic regurgitation - Indications for intervention and emerging transcatheter technologies
H. Treede
 - How did I treat?
 - Session evaluation and key learnings
J. Mascherbauer

16:15 - 17:15

ROOM
LEARNING

Learning

How to perform edge-to-edge mitral valve repair

Facilitators: J. Byrne, D. Tchetché
Media Driver: O. A. Oliva

Join us if you want:

- To review the step-by-step Mitral TEER procedure
- To discuss device selection
- To learn how to deal with challenging anatomies

16:15 - 17:15

**IMAGING SKILLS

Imaging
Simulation-based
Learning

TAVI - All the answers are on the S-curve!

This session has been made possible thanks to the in-kind support of Medical Simulation Technologies

Facilitators: V. Esteves, A. Latib
Discussant: A. Gackowski

Join us if you want:

- To recognise the variability of the aortic valve annulus S-curve and understand its implications for planning and executing TAVI procedures
- To understand the anatomical relationship between the aortic cusps, coronary arteries, and the aortic annulus S-curve to enhance procedural accuracy and safety
- To master the use of the S-curve as a guide for both straightforward and complex TAVI procedures, including optimal valve deployment and complication management

16:15 - 17:15

**SIMULATION
LEARNING
ROOM (STUDIO
A)**

Simulation-based
Learning

Retrograde CTO

Facilitators: G. Leibundgut, K. Mashayekhi
Physician Trainers: M. Ayoub, C. Ungureanu

Join us if you want:

- To get an overview of retrograde CTO with step-by-step demonstration within a newly created simulation model.
- To understand the basics of collateral passage in septal and epicardial channels within a demonstration in a simulation model
- To dive into the principles of reverse CART and externalization maneuver

16:15 - 17:15

**IMAGING SKILLS
LAB 2 (352B)**

Optimising fluoroscopic angles for ostial and bifurcation lesions during PCI: insights from CT

Facilitators: N. Piazza, P. Theriault-Lauzier

Join us if you want:

- To understand the concept and application of CT-derived tools to determine optimal fluoroscopic viewing angles for percutaneous coronary interventions (PCI), enhancing procedural accuracy and visualisation
- To determine the optimal fluoroscopic viewing angles and account for potential anatomical variability in ostial and bifurcation lesions to improve procedural accuracy, evaluation, and intervention during PCI
- To learn to apply CT-based guidance to customise procedural strategies during PCI in patients with a transcatheter aortic valve

16:15 - 17:15

ROOM 241

Abstracts

TAVI in women

Facilitator: M. Coylewright (Pending confirmation)

- › Timely management of severe aortic stenosis: delayed TAVI referrals and gender disparities
F. J. Federico (Pending confirmation)
- › Discussion and audience interaction
- › Early outcomes with latest generation TAVI valves in women population – Insights from LANDMARK trial
I. J. Amat-Santos
- › Discussion and audience interaction
- › TAVI with intra-annular self-expanding or balloon-expandable valves in women: insight from NAVULTRA
S. Cannata (Pending confirmation)
- › Discussion and audience interaction
- › Predicted vs. actual prosthesis-patient mismatch after TAVI: a single-centre registry
F. Pensotti
- › Discussion and audience interaction
- › Gender differences in right ventricular to pulmonary artery coupling in patients undergoing TAVI
C. Vitale (Pending confirmation)
- › Discussion and audience interaction

16:15 - 17:15

ROOM 242AB

Innovation / CV
Pipeline

Innovations in transcatheter aortic valve devices and techniques

Anchorperson: A. Baumbach
Spokesperson: M. Chen (*Pending confirmation*)
Discussants: J. Kahn (*Pending confirmation*), G. Tarantini (*Pending confirmation*)

- A new self-expandable trans-catheter aortic valve. Initial clinical experience in small annuli
F. L. Ribichini
- Discussion and audience interaction
- Safety and performance of Hydra self-expanding THV: Six months outcomes from the GENESIS-II study
A. Sonawane (*Pending confirmation*)
- Discussion and audience interaction
- Up to 12-month safety and performance results of the 100 patients treated over the Valvsoft prospective, multi-centre, single-arm first-in-human and pivotal studies
H. Eltchaninoff (*Pending confirmation*)
- Discussion and audience interaction
- Aortic valvuloplasty: double-balloon technique through bilateral radial access
G. Samaja (*Pending confirmation*)
- Discussion and audience interaction
- S-Valve: the silver nanoparticle-coated aortic valve. A novel anti infectious approach.
C. Maués
- Discussion and audience interaction
- From align aortic regurgitation to alter aortic regurgitation: one-year follow-up of TaurusTrio heart valve for severe aortic regurgitation
G. Song (*Pending confirmation*)
- Discussion and audience interaction

ROOM 243

Imaging
All You Need to
Know

Integrating CT coronary angiography into your PCI practice

Anchorperson: F. Bouisset
Spokesperson: N. Pinilla
Discussants: A. Bagnall (*Pending confirmation*), C. Collet, D. Jones

Join us if you want:

- To learn how to use CT coronary angiography to select your PCI strategy effectively
 - To learn how to use CT coronary angiography to anticipate the need for plaque preparation in calcified lesions
 - To learn how to use CT coronary angiography to optimise catheterisation in post-CABG patients
- Welcome and session objectives
F. Bouisset
 - A practical CT-based approach to PCI: guiding catheters, lesion analysis, and stent selection
N. Pinilla
 - Discussion and audience interaction
 - From CCTA to plaque preparation: mastering calcified lesion analysis
C. Collet
 - Discussion and audience interaction
 - Strategic planning for post-CABG angiograms
D. Jones
 - Discussion and audience interaction
 - CT-guided PCI: a real-world case study from A to Z
N. Støttrup
 - Discussion and audience interaction

16:30 - 18:00

HANDS ON LAB

Hands on
Simulation-based
Learning

Bailout options and techniques during PCI: mid vessel perforation

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: P. Calvert, A. Gagnor, B. LATTUCA (Pending confirmation), J. Monsegu, P. O'kane, S. Sumitsuji

Join us if you want:

- To explore bailout options using existing devices
- To determine the different solutions to successfully treating mid vessel perforation using simulation
- To consider causes and avoidance strategies for mid vessel perforation

16:30 - 18:00

MAIN ARENA

LIVE Educational Case

Learning live DK crush stenting - In-vitro PCI procedure in a beating heart: LIVE Educational Case from Visible Heart Lab - Minneapolis, United States of America

Anchorperson: G. Stankovic

Spokesperson: M. Lesiak

Procedural Analyst: F. Burzotta

Operators: E. Brilakis, R. E. Davies (Pending confirmation)

Imaging analysts: N. Gonzalo, T. Johnson

Media Driver: G. G Toth

Programme producer: W. Wijns

Cathlab Medical Coordinator: P. Iaizzo

Join us if you want:

- To learn how to optimally perform DK crush stenting
- To understand stent behavior during DK crush bifurcation stenting, using direct intracoronary visualization with angioscopy and OCT
- To understand specific technical pitfalls and how to prevent them

09:00 - 10:30

MAIN ARENA

LIVE Educational Case

PCI for complex bifurcation disease: LIVE Educational Case from King Fahd Armed Forces Hospital - Jeddah, Saudi Arabia

Anchorperson: M. Abdel-Wahab
Spokesperson: F. Hellig
Procedural Analyst: F. Burzotta
Operators: K. Al-Shaibi, M. Alasnag
Discussants: F. Baslaib (Pending confirmation), R. Didier, V. Kunadian, H. C. Tan
Cathlab Medical Coordinator: S. Alotaibi

- Welcome and session objectives
M. Abdel-Wahab
- Patient presentation
F. Hellig
- Discussion and audience interaction
- Operator strategy
M. Abdel-Wahab
- LIVE Case procedure
- Debriefing and audience interaction
- Session evaluation and key learnings
M. Abdel-Wahab

09:00 - 10:00

ROOM MAILLOT

How Should I Treat?

Though decisions in complex left main PCI - Left main restenosis

Anchorperson: N. Amabile
Spokesperson: G. Stefanini
Discussants: M. Al Otaiby (Pending confirmation), R. Gil (Pending confirmation), A. Neylon

Join us if you want:

- To understand the mechanisms leading to left main restenosis
 - To know how to evaluate left main restenosis by modern imaging tools
 - To decipher the different options for left main restenosis treatment
- Welcome and session objectives
N. Amabile
 - Part 1 - Case presentation - Baseline characteristics and angio
P. Canova (Pending confirmation)
 - Mechanisms leading to left main restenosis
 - Discussion and audience interaction
 - Part 2 - Case presentation - With intracoronary imaging
P. Canova (Pending confirmation)
 - Role of intracoronary imaging in the management: diagnosis and options
 - Discussion and audience interaction
 - Part 3 - Case presentation - Treatment
P. Canova (Pending confirmation)
 - Therapeutic options for left main in-stent restenosis: stent, DEB, CABG?
A. Neylon
 - Discussion and audience interaction
 - Session evaluation and key learnings
G. Stefanini

09:00 - 10:00

ROOM LEARNING

09:00 - 10:30

HANDS ON LAB

Hands on
Simulation-based Learning

Learning from best companions' cases - Interventions for valvular disease

Facilitator: L. Biasco

Bailout options and techniques during PCI: stent dislodgement

This session has been made possible thanks to the kind support of Terumo Learning EDGE

Facilitators: M. Ando, H. Benamer, A. Endo, M. Hawranek

Join us if you want:

- To explore bailout options using existing devices
- To determine the steps to successful retrieval in a case of simulated stent loss
- To consider causes and avoidance strategies for stent dislodgement

09:00 - 10:00

ROOM 241

Clinical Cases

CTO after CABG: complex but feasible

- Rescue of a failed right coronary artery-CTO recanalisation retrograde via a left internal mammary artery bypass
M. Gerçek
- Discussion and audience interaction
- A stent that I regret in one year.
M. Gergis (Pending confirmation)
- Discussion and audience interaction
- Road is always filled with ups and downs ... and other things (Post CABG intervention)
M. Reda (Pending confirmation)
- Discussion and audience interaction
- A 'two?in?one' CTO PCI
R. J. B. Low
- Discussion and audience interaction
- Retrograde Plaque/Flap Lift-and-Shift Technique for RCA CTO
A. Ali (Pending confirmation)
- Discussion and audience interaction

09:00 - 10:00

ROOM 242AB

Clinical Cases

Challenging anatomies in stable CAD**Facilitator: H. Khamis**

- Pressure wire guided treatment of coronary fistula
L. Lee (Pending confirmation)
- Discussion and audience interaction
- Complementary Evaluation of Eruptive Calcified Nodules Using Coronary CT and IVUS
A. Tajima (Pending confirmation)
- Discussion and audience interaction
- Expecting the unexpected
G. Rizzo (Pending confirmation)
- Discussion and audience interaction
- Cutting away the easy option leaves no other choice
M. Vo
- Discussion and audience interaction
- Use of peripheral stent in the ostial coronary restenosis
S. Furkalo
- Discussion and audience interaction

09:00 - 10:00

ROOM 243

Clinical Cases

Overcoming complex anatomy in NSTEMI

- Kissing on the other side
P. Santos
- Discussion and audience interaction
- An unusual case of STEMI with cardiogenic shock in takayasu arteritis
F. Malik
- Discussion and audience interaction
- When Progress Meets Peril
L. H. Mughal (Pending confirmation)
- Discussion and audience interaction
- NSTEMI-ACS with subtotal aorto-ostial lesions in 40 y/o male: arteriosclerosis or something else?
Z. Hudcovska (Pending confirmation)

- Management of Giant Coronary Artery Aneurysm
M. Abdelmaaboud (Pending confirmation)
- Discussion and audience interaction

09:00 - 10:00

ROOM 251

Abstracts

Treatment of special anatomical scenarios in STEMI patients**Facilitators: L. Koltowski (Pending confirmation), M. Sabate (Pending confirmation)**

- Impact of bifurcation angles on long-term outcomes of T stenting and protrusion technique
M. Gökalp (Pending confirmation)
- Discussion and audience interaction
- Calcium burden and clinical outcomes in patients with all-comer STEMI
T. Mizukami
- Discussion and audience interaction
- Active side branch protection for bifurcation lesion-related STEMI: multicentre STEMI-BIF registry
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction
- Comparison of POT-side-POT and POT-kissing-POT techniques for bifurcation lesion-related STEMI
K. Ciloglu (Pending confirmation)
- Discussion and audience interaction
- Effectiveness of DCB vs. DES in ST-elevation ACS
M. C. Pobre-Madriaga
- Discussion and audience interaction

09:00 - 10:00

ROOM 252A

Abstracts

TAVI and the left ventricular myocardium**Facilitator: P. Genereux**

- Stages of cardiac damage in aortic stenosis patients undergoing TAVR
J. Steffen
- Discussion and audience interaction
- Failure to Wait for Transcatheter Aortic Valve implantation: Correlation with Cardiac Damage Stage
I. Loewenstein
- Discussion and audience interaction
- Impact of TAVR on cardiac function and left ventricular remodeling in pure aortic regurgitation
L. Tao (Pending confirmation)
- Discussion and audience interaction
- Renin-angiotensin system inhibitors following TAVR: an updated meta-analysis of 34,987 patients
L. P. Tartuce (Pending confirmation)
- Discussion and audience interaction
- Prophylactic ECMO support in high-risk TAVI in patients with severe left ventricular dysfunction
G. Versteeg
- Discussion and audience interaction

09:00 - 10:00

ROOM 252B

Clinical Cases

When stent failure meets calcified lesions**Facilitator: G. Souteyrand**

- Complex PCI with intrastent rotational atherectomy and IABP with previous CABG, PCI and TAVI
L. A. Vazquez-Diaz (Pending confirmation)
- Discussion and audience interaction
- Simple solution for underexpansion stent due to very calcified lesion: a clinical case
M. Q. Nguyen
- Discussion and audience interaction
- Trapped between Calcium and Metal: A challenge in treating in-stent restenosis
S. Jourani (Pending confirmation)
- Discussion and audience interaction
- Two hard nuts to crack
G. Gavrielatos
- Discussion and audience interaction
- "Pushing boundaries: Off-Label Use of Shock Wave Lithotripsy in Stented Calcified Lesions"
A. Mirza
- Discussion and audience interaction

A. Trevisanella
- Discussion and audience interaction

09:00 - 10:00

ROOM 253

Clinical Cases

How to manage iatrogenic dissection of the left main trunk**Facilitators: M. Sobhy, A. Witkowski**

- Beware of the mesh
J. Appiah (Pending confirmation)
- Discussion and audience interaction
- A Broken Path
P. Pheerawong (Pending confirmation)
- Discussion and audience interaction
- Iatrogenic aortic dissection and left main coronary artery stent migration: Double nightmare
C. Bora (Pending confirmation)
- Discussion and audience interaction
- Bailout two-stent strategy for iatrogenic left main dissection with longitudinal stent deformation
I. Ghanem
- Discussion and audience interaction

09:00 - 10:00

**ABSTRACT & CASE CORNER B**

Clinical Cases

TMVIV - TMVIR and its challenges**Facilitators: C. Fraccaro (Pending confirmation), M. Grygier**

- Alternative route for transseptal, mitral valve-in-valve
D. Siqueira (Pending confirmation)
- Discussion and audience interaction
- "Unseating Success: Paraannular Compromise in Valve-in-Ring Intervention"
I. Kachrimanidis (Pending confirmation)
- Discussion and audience interaction
- Successful treatment of bioprosthetic MiV fusion in a patient on venoarterial ECMO with balloon valv
R. Casazza
- Discussion and audience interaction
- Balloon-expandable TAVI in degenerated transapical TMVI for severe prosthetic mitral regurgitation
H. Hinkov
- Discussion and audience interaction
- Mitral valve in valve TMVR with unexpected outcome
F. Sawaya (Pending confirmation)
- Discussion and audience interaction

09:00 - 10:00

ABSTRACT &
CASE CORNER EComplexity
Clinical Cases**When strange things happen,
CTO and complications****Facilitators:** G. Leibundgut, M. Pan

- Retrieval of stuck coronary wire
A. Kalnins
- Discussion and audience interaction
- Losing "hope" in the catheterization lab
P. Varelas
- Discussion and audience interaction
- Have you noticed anything? Be ware of what you dare
A. Abozeid (Pending confirmation)
- Discussion and audience interaction
- Double trouble
J. Kroupa, M. Schincariol (Pending confirmation),
A. Ayuna, R. Campbell (Pending confirmation), A.
El Amrawy
- Discussion and audience interaction
- The ingenious treatment of coronary artery
perforation in CTO lesion.
Y. Kinoshita
- Discussion and audience interaction

ROOM
LEARNING

Learning

**Calcified left main: do it well, do
it safely****Facilitators:** F. L. Ribichini, N. Ryan**Join us if you want:**

- To understand how to plan PCI of calcified left main (mechanical circulatory support, intravascular imaging, bifurcation strategy)
- To learn how to do it safely: use of different tools
- To anticipate possible complications, and learn how to manage them

10:15 - 11:15

ROOM 241

Clinical Cases

Essential role of imaging in left main PCI**Facilitators: R. Gil (Pending confirmation), T. Santoso**

- Real-time IVUS guidance in ostial left anterior descending artery PCI
C. Jensen
- Discussion and audience interaction
- CHIP - IVUS guided Medina 1,1,1 LM bifurcation plus mid LAD & LCX angioplasty in stage 5 CKD
B. John
- Discussion and audience interaction
- Case of challenges in management of isolated midline 001 left main bifurcation.
P. Singh (Pending confirmation)
- Discussion and audience interaction
- Importance of coronary imaging during left main intervention
K. W. Koay
- Discussion and audience interaction
- IVUS-guided PCI for stent failure in left main Circumflex artery
M. Lombardi
- Discussion and audience interaction

10:15 - 11:15

ROOM 242AB

Innovation

Case-based
Discussion**Innovative approaches to refractory heart failure: devices and therapies to the rescue***With the collaboration of iHF initiative (improving Heart Function)***Anchorperson: P. Lurz****Discussants: B. Assmus (Pending confirmation), J. Biegus (Pending confirmation), F. Mahfoud, K. P. Rommel****Join us if you want:**

- To recognise heart failure refractory to medical therapy that requires treatment escalation
 - To appraise innovative future options of cardiovascular interventions
 - To understand how optimal synergy between oral therapy and interventions can be further improved
- Welcome and session objectives
P. Lurz
 - Stimulate interaction
 - Unmasking residual risk and unmet pathophysiology - The gap for device therapy
K. P. Rommel
 - Discussion and audience interaction
 - Case 1 - Patient with advanced heart failure undergoing device based neuromodulation
F. Koppe-Schmeisser
 - Addressing sympathetic tone with devices and medical therapy in heart failure
 - Discussion and audience interaction
 - Case 2 - Heart failure patients with repeated hospitalization for congestion, chronic kidney disease/ cardio-renal syndrome
H. Arfsten
 - Targeting preload - Decongestive strategies with drugs and devices in and beyond the hospital
J. Biegus (Pending confirmation)
 - Discussion and audience interaction
 - Session evaluation and key learnings

10:15 - 11:15

ROOM 243

Clinical Cases

Management of bifurcations with complex anatomy: part 2

- Novel technique for guidewire penetration in ostial occlusion of left anterior descending artery
Y. Murasato
- Discussion and audience interaction
- The final cut
M. Schincariol (Pending confirmation)
- Discussion and audience interaction
- Two calcium nodules, one solution: "Rotatripsy" in left main bifurcation
M. Basile
- Discussion and audience interaction
- Complex left anterior descending artery bifurcation: Tackling a severe mid left anterior descending artery acute curve with precision wiring
D. Banik (Pending confirmation)

ROOM 252A

Abstracts

Permanent pacing after TAVI**Facilitators: R. Campante Teles, J. Lanz (Pending confirmation)**

- Prospective study to evaluate predictors of permanent pacemaker implantation at one year after TAVI
K. Rao (Pending confirmation)
- Discussion and audience interaction
- The predictive value of the his-to-ventricle electrogram interval for permanent pacemaker implant
A. Reyes Mitre (Pending confirmation)
- Discussion and audience interaction
- Right atrial pacing as a predictor of permanent pacemaker implantation post TAVI
E. De Cock
- Discussion and audience interaction
- Anatomical predictors of pacemaker implantation after TAVI with new generation valves
E. Bianchini (Pending confirmation)
- Discussion and audience interaction
- Predictors of permanent pacemaker implantation after TAVI with Navitor transcatheter heart valve
S. Corradetti
- Discussion and audience interaction

10:15 - 11:15

ROOM 252B

Clinical Cases

Best companion's case on intravascular lithotripsy**Facilitators: M. Pan, V. Paradies**

- When everything goes bad... you shouldn't make it worst!
G. Colletti (Pending confirmation)
- Discussion and audience interaction
- Reforming the rocks: devices and drugs
H. Kassem
- Discussion and audience interaction
- For good measure: IVUS guidance of ostial left anterior descending artery stenting in a CKD patient
R. Sava
- Discussion and audience interaction
- Tougher than expected
M. Leoncini (Pending confirmation)
- Discussion and audience interaction

10:15 - 11:15

ROOM 253

Clinical Cases

High-risk PCI in TAVI procedures**Facilitators:** A. Beneduce, W. K. Kim

- Concomitant high-risk protected PCI and TAVI in a shocked patient
A. Alsuyri (Pending confirmation)
- Discussion and audience interaction
- One stop: hybrid procedure for aortic stenosis and concurrent coronary artery disease
M. Griné
- Discussion and audience interaction
- Valve-in-valve TAVI and severe left main stem disease: between a rock and a hard place
A. Chapman
- Discussion and audience interaction
- PCI and TAVR in a patient with total situs inversus
S. Agarwal
- Discussion and audience interaction

10:15 - 11:15

ABSTRACT &
CASE CORNER A

Clinical Cases

Out of the box: tackling complex peripheral intervention**Facilitator:** A. Azzano

- Between death and the devil
L. Chandwani (Pending confirmation)
- Discussion and audience interaction
- Pulmonary arteriovenous malformation: masquerading the great masquerader
P. Gupta (Pending confirmation)
- Discussion and audience interaction
- Splenic aneurysm: when coronary approach is needed
O. A. Oliva (Pending confirmation)
- Discussion and audience interaction
- Unusual post maxillofacial surgery vascular complication
A. Hashemi
- Discussion and audience interaction
- Unmasking cyanosis: a tale of colour and resilience in the normal heart
A. Basha M (Pending confirmation)
- Discussion and audience interaction

10:15 - 11:15

ABSTRACT &
CASE CORNER B

Clinical Cases

Paravalvular leak closure in TMVR**Facilitator:** X. Freixa Rofastes (*Pending confirmation*)

- Rocking valve zipping with multiple plugs
V. Ninios
- Discussion and audience interaction
- Complex paravalvular leak in mitral valve prosthesis: a case study
B. E. Bayir
- Discussion and audience interaction
- Paravalvular leak after TMVR in mitral annular calcification: which approach?
H. Colmenarez (Pending confirmation)
- Discussion and audience interaction
- When mitral valve-in-valve is not enough for severe mitral regurgitation
Y. Jenab (Pending confirmation)
- Discussion and audience interaction
- Combined antegrade and retrograde approaches to mechanical mitral paravalvular leak in a patient with giant left a
S. Ahmed (Pending confirmation)
- Discussion and audience interaction

10:15 - 11:15

ABSTRACT &
CASE CORNER EComplexity
Clinical Cases**Life threatening complications in CTO PCI****Facilitators:** R. Garbo, F. J. Neumann

- Navigating challenges in rotational atherectomy: Thinking beyond established management algorithms
H. Feller (Pending confirmation)
- Discussion and audience interaction
- A drop in the ocean
E. Chourdakis
- Discussion and audience interaction
- Challenging management of CTO with torpid evolution
V. Alcalde Martinez
- Discussion and audience interaction
- Surgical retrieval of the guidewire that spontaneously fractured in right coronary artery and penetrated the vessel
X. Li
- Discussion and audience interaction

Complex calcified lesions: combination of intravascular imaging and orbital atherectomy for optimal outcomes

Sponsored by Abbott

Join us if you want:

- To understand how to manage severely calcified lesions
- To receive a step-by-step guidance to master the use of orbital atherectomy
- To understand how intravascular imaging (optical coherence tomography) supports effective use of orbital atherectomy

13:15 - 14:15

ROOM 243

Symposium

RevoEdge high pressure cutting balloon in PCI: innovate, cut, and conquer

Sponsored by BrosMed Medical

Join us if you want:

- To explore the innovative design of RevoEdge: the next-generation high pressure cutting balloon
- To review clinical outcomes of RevoEdge high pressure cutting balloon in China
- To learn about the clinical benefits and tips and tricks of using RevoEdge high pressure cutting balloon in different types of complex lesions through case-based discussion

13:15 - 14:45

ROOM 251

Symposium with
Recorded case

Supraflex for high-risk patients and lesions: from practice to evidence-based medicine proven through FIRE and COMPARE

Sponsored by Sahajanand Medical Technologies (SMT)

Join us if you want:

- To understand the coverage of thin strut sirolimus DES in small vs. large vessel, in diabetes, and in STEMI with OCT analysis
- To understand the performance of the Supraflex stent for high-risk patients such as high bleeding risk or the elderly
- To preview the anticipated outcomes of two major randomised trials in patients with triple vessel disease, with or without diabetes

16:30 - 18:00

THEATRE BLEU

Symposium with
LIVE case

Align for the future with the Myval transcatheter heart valve series

Sponsored by Meril Life

Operators: N. Dumonteil (Pending confirmation), D. Tchetché
Cathlab Medical Coordinator: B. Farah

16:30 - 18:00

THEATRE BORDEAUX

Symposium with
LIVE case

Pioneering innovation in the treatment of mitral and tricuspid regurgitation

Sponsored by Edwards Lifesciences

Operators: J. Byrne, S. Dawkins
Cathlab Medical Coordinator: V. Androshchuk (Pending confirmation)

Join us if you want:

- To understand the decision-making process for transcatheter valve repair vs. replacement
- To appreciate the key features of the PASCAL Precision system that help you navigate even challenging mitral or tricuspid anatomies
- To learn from an educational LIVE case featuring the EVOQUE system to achieve tricuspid regurgitation resolution
- To raise awareness of the latest innovation in mitral transcatheter approaches: the transeptal mitral valve replacement with SAPIEN M3 system

13:15 - 14:15

ROOM 252A

Symposium

Advancing renal denervation in China: from guidelines to practice

Join us if you want:

- To learn how renal denervation developed in China in previous decade and after approval
- To learn how to select right patient for your renal denervation cases based on China RDN practice
- To learn how to manage your renal denervation procedure based on China RDN practice

13:15 - 14:00

ROOM 252B

Symposium

Key procedural factors in pulmonary embolism treatment with computer-assisted vacuum thrombectomy

Sponsored by Penumbra

Join us if you want:

- To understand main procedural factors in pulmonary embolism treatment
- To learn latest published data on Penumbra technology
- To discuss how technological innovation can improve the procedure

16:30 - 17:30

THEATRE HAVANE

Imaging
Symposium with
Recorded case

From imaging to intervention: cutting-edge solutions for calcified coronary stenoses management

Sponsored by Boston Scientific

Join us if you want:

- To learn how to improve procedural success in heavily calcified lesions with the use of several calcium modification tools
- To learn how to leverage IVUS findings to assess calcified coronary lesions and tailor treatment strategies for optimal outcomes
- To learn about the applications of drug-eluting therapies in complex calcified lesions

16:30 - 17:15

ROOM MAILLOT

Symposium

Evolving bifurcation treatment practices: drug-coated balloons, angio-based FFR, and side branch optimisation

Sponsored by Medtronic

Join us if you want:

- To explore the current and potential use of drug-coated balloons in bifurcation treatment, with case illustrations and insights from the latest data
- To understand the importance of CathWorks physiology-guided treatment strategies in avoiding unnecessary side branch interventions in provisional bifurcation stenting
- To examine side branch optimisation techniques following main vessel stent implantation in large bifurcations

16:30 - 17:30

ROOM 251

Symposium with Recorded case

Broadening OPTIONS for LAA closure: innovations and outcomes

Sponsored by Boston Scientific

Join us if you want:

- To discuss the clinical data from the OPTION trial and its implications for practice
- To understand how OPTION trial findings could influence clinical decision-making
- To discover upcoming innovations in the WATCHMAN FLX product pipeline

16:30 - 17:30

ROOM 242AB

Symposium

Full physiology: why and how to assess beyond coronary epicardial disease

Sponsored by Abbott

Join us if you want:

- To understand the concept of full physiology and why it should be considered
- To learn how full physiology can be easily implemented in everyday clinical settings
- To understand the implementation of the latest ESC guidelines for managing patients with ANOCA

16:30 - 17:15

ROOM 252A

Imaging
Symposium

The future is now: QFR and RMS to optimise coronary artery disease patient management

Sponsored by BIOTRONIK and Medis Medical Imaging

Join us if you want:

- To learn the latest updates on QFR from a clinical perspective
- To learn out the RMS technology and potential benefits over drug-eluting stent
- To learn the role of angio and CT-based analyses in PCI planning and guidance

16:30 - 17:30

ROOM 243

Symposium

Ultrasound renal denervation is now guideline-recommended: how do I get started?

Sponsored by Recor Medical

Join us if you want:

- To learn about the latest clinical data on renal denervation and how to apply it in clinical practice
- To understand the new clinical guidelines in clinical practice with patient cases
- To learn how to set up a renal denervation programme in your clinic
- To get an outlook on the next steps and future for renal denervation

16:30 - 17:30

ROOM 252B

Symposium

From theory to practice: the versatility of drug-coated balloons around the world

Sponsored by B. Braun Melsungen

Join us if you want:

- To learn more about the safety and effectiveness of the best-investigated coronary drug-coated balloons
- To learn how drug-coated balloons are used in a variety of settings around the world
- To gain confidence in using drug-coated balloon with a data-driven treatment choice
- To gain an understanding how drug-coated balloon can reduce complexity in today's PCI
- To gain an understanding of the active drug-coated balloon coatings paclitaxel and sirolimus and their strength in various indications
- To receive the latest clinical insights into the available data for drug-coated balloon usage in de-novo lesions
- To learn about practical experiences on drug-coated balloon in large vessels, bifurcations, multivessel disease and CTO
- To get an understanding how to use the hybrid approach especially for challenging lesions to improve clinical outcome

12:30 - 14:00

THEATRE BLEU

Imaging
Symposium with
LIVE case

Optimal management of high bleeding risk patient with multivessel disease

Sponsored by Terumo

Join us if you want:

- To discuss about optimal management of high bleeding risk patient with multivessel disease
- To reflect about optimal PCI strategy for high bleeding risk patient with multivessel disease
- To analyse how intracoronary imaging and physiology can optimise procedural outcomes of high bleeding risk patients with multivessel disease

12:30 - 13:30

ROOM MAILLOT

Symposium

Sponsored session

Sponsored by Medtronic

Join us if you want:

- To discuss how to future prove your TAVI programme - Doing more with less: possible impacts of changing guidelines and overcoming resource scarcity
- To stay informed on the latest TAVI valve performance and durability evidence, empowering you to confidently guide your patients through the shared decision-making process for their treatment
- To gain practical insights for effective post-TAVI strategies and explore how advancements in valve design and procedural refinements simplify post-TAVI PCI procedures

12:30 - 14:00

THEATRE
BORDEAUX

Symposium

The Landmark RCT deep-dive - 1-year clinical update

Sponsored by Meril Life

12:30 - 13:30

ROOM 241

Symposium

Symlicity Spyral renal denervation: more insights from clinical practice

Sponsored by Medtronic

Join us if you want:

- To understand the safe and effective use of renal denervation based on latest European guidelines
- To learn tips and tricks on the radio frequency renal denervation procedure
- To hear about future directions in renal denervation, including product developments and use in high risk patient groups

12:30 - 14:00

THEATRE
HAVANE

Symposium with
Recorded case

Enhancing clipping solutions for durable long-term patient outcomes

Sponsored by Abbott

Join us if you want:

- To review the clinical outcomes and patient benefits observed in recent mitral and tricuspid TEER studies
- To debate how real-world experience fits in randomised clinical trials performed on SMR and STR patients
- To discuss contemporary clinical practice for durable and successful TEER patient management

12:30 - 14:00

ROOM 242AB

Symposium with
Recorded case

Treat calcium right the first time: new considerations for PCI planning and device selection to optimise outcomes

Sponsored by Shockwave Medical

Join us if you want:

- To learn with a real-world clinical case how to optimise treatment pathways for CAC, supported by new clinical data
- To discuss the framework for selecting the most appropriate device for vessel prep, based on calcium burden, anatomical considerations and patient gender
- To explore the role of IVL as a first-line treatment strategy for managing coronary artery calcification and its impact on procedural outcomes

12:30 - 13:30

ROOM 243

Symposium with
Recorded case

Active posterior leaflet replacement – A novel transcatheter approach for the treatment of primary and secondary mitral regurgitation

Sponsored by Polares Medical

Join us if you want:

- To learn more about a novel emerging approach for the transcatheter treatment of primary and secondary mitral regurgitation
 - To understand the device concept and its early clinical application in recent recorded cases
 - To hear the latest data concerning clinical and echocardiographic outcomes
- Welcome and session objectives
 - The need for new transcatheter approaches in primary and secondary mitral regurgitation
 - Active posterior leaflet replacement with the Polares MRace device – Design and concept
 - Discussion and audience interaction
 - Recorded Case 1
 - Recorded Case 2
 - Clinical and echocardiographic outcomes – Latest data
 - Discussion and audience interaction
 - Session evaluation and key learnings

12:30 - 13:30

ROOM 251

Imaging
Symposium with
Recorded case

New perspectives in 3D calcium visualisation with CT and angiography for complex PCI

Sponsored by GE HealthCare

Join us if you want:

- To understand how X-Ray can help to predict calcium and landing zone
- To discover the new possibilities of X-Ray in planning, guiding and assessing complex PCI
- To see 3D angiography tool 3DStent used during a PCI

12:30 - 13:30

ROOM 252A

Symposium

Pushing boundaries in complex PCIs: unique DES technology for complex lesions and patients

Sponsored by CID

Join us if you want:

- To evaluate today's complex PCIs and briefly highlight which are the key elements that identify the patients who need particular care to maximise overall outcomes
- To find out - through educational clinical cases - how to leverage on accurate evaluation of the patient profile, imaging/functional modalities, strategic interventional approaches and proper device selection to maximise patient clinical outcome at short, medium and long term
- To understand how Cre8 EVO unique technologies and its specific stent design contribute to improve the procedural success and clinical outcome of complex PCIs in complex patients

12:30 - 13:15

ROOM 252B

Symposium

A simple low profile solution to the pulmonary embolism problem: EKOS

Sponsored by Boston Scientific

Join us if you want:

- To learn on the effect of ultrasound on clot and clot structure
- To understand the value of a rigorous science and set protocols
- To implement by seeing cases your own strategy and take home examples

13:45 - 14:45

ROOM MAILLOT

Symposium

Clinical implications of TAVI and cerebral embolic protection - Current challenges and future considerations

Sponsored by Boston Scientific

Join us if you want:

- To discuss the latest clinical evidence related to cerebral embolic protection in TAVI
- To review the most recent long term data on the ACURATE self-expanding valve platform
- To understand the future treatment options for TAVI patients based on simulation

13:45 - 14:30

ROOM 251

Imaging
Symposium

Revolutionising cardiac imaging: evolution of 4D intracardiac echocardiography and integration of artificial intelligence in atrioventricular valve interventions

Sponsored by Siemens Healthineers

Join us if you want:

- To gain an overview of the latest imaging technologies to support atrioventricular valve interventions
- To learn how 4D intracardiac echocardiography and integration of artificial intelligence can improve procedural safety and efficiency
- To gain insights from experienced operators on how these technologies are being implemented in daily clinical practice

13:45 - 14:45

ROOM 241

Symposium

Innovations in TMVR and Intrepid trial updates

Sponsored by Medtronic

Join us if you want:

- To gain insights on the APOLLO TMVR trial
- To better understand the treatment goals of mitral regurgitation elimination
- To learn about early APOLLO EU trial experience and the Intrepid 29Fr TMVR system

13:45 - 14:45

ROOM 252A

Symposium

Redefining complex PCI: impact of real-world data and novel evidence on IV antithrombotic strategies

Sponsored by Chiesi Farmaceutici

Join us if you want:

- To evaluate real-world evidence on antithrombotic strategies in clinical practice across Europe and USA
- To analyse outcomes associated with the transition from cangrelor to oral P2Y12 inhibitors
- To discuss implications of the findings on real-world evidence on state-of-the-art IV therapies in 2025

13:45 - 14:30

ROOM 243

Symposium

With coronary sinus therapy emerging, should my lab start focusing on coronary microvascular dysfunction?

Sponsored by Vahaticor

Join us if you want:

- To start assessing coronary microvascular function in your lab
- To understand the mechanism of action of coronary sinus reducer therapy
- To learn about the clinical evidence being built by Vahaticor for treating coronary microvascular dysfunction

13:45 - 14:30

ROOM 252B

Symposium

Innovative approaches to thrombus removal: redefining acute thromboembolic management in ACS

Sponsored by Penumbra

Join us if you want:

- To understand the possible options of treating ACS thrombus burden
- To discuss published data on coronary aspiration and future evolutions
- To review clinical application of vacuum aspiration thrombectomy through case presentations

16:30 - 18:00

THEATRE BLEU

Symposium with
LIVE case

Myval THV series - Optimise patient outcomes with novel design, data and daily clinical practice

Sponsored by Meril Life

Operators: P. Jimenez Quevedo (Pending confirmation), L. Nombela-Franco

16:30 - 17:15

ROOM 242AB

Symposium with
Recorded case

Key principles of successful large bore vascular access and closure: TAVI and beyond

Sponsored by Abbott

Join us if you want:

- To learn the key steps of echo-guided puncture and pre-closure
- To understand the mechanisms of suture-mediated vascular closure
- To discuss tips and tricks for successful vascular closure in different clinical scenarios

16:30 - 17:15

THEATRE
HAVANE

Symposium

How do I confidently expand my drug-coated balloon practice?

Sponsored by Medtronic

Join us if you want:

- To reflect on when to use drug-coated balloons and stents
- To analyse clinical data and use case of drug-coated balloons in bifurcation PCI
- To evaluate which dissection to leave and which to stent

16:30 - 17:30

ROOM 251

Symposium

Advancing the standard of care in PCI with Bioadaptor: from simple to complex

Sponsored by Elixir Medical

Join us if you want:

- To learn the unique design characteristics of Bioadaptor and how that could improve PCI clinical outcomes
- To learn about the existing level of clinical evidence and experience around the world and how clinical decisions are made
- To better understand the patients and lesions that can be safely and effectively treated with Bioadaptor

16:30 - 17:30

ROOM MAILLOT

Symposium

How to handle the most clinically relevant challenges in TAVI

Sponsored by Medtronic

Join us if you want:

- To learn what to consider when determining valve selection for TAVI
- To appreciate the impact of device choice and implantation technique on coronary access and REDO TAVI
- To learn how to tailor your TAVI technique to complex clinical scenarios

16:30 - 17:30

ROOM 252B

Symposium

The role of large-bore thrombectomy in my approach to pulmonary embolism management

Sponsored by Inari Medical

Join us if you want:

- To gain an overview of the latest clinical insights in pulmonary embolism
- To learn from European experts about patient selection for interventional pulmonary embolism treatment
- To understand the benefits of large-bore thrombectomy through case-based discussions

16:30 - 17:15

ROOM 241

Imaging
Symposium

Why should laser atherectomy be part of your complex PCI algorithm?

Sponsored by Philips

Join us if you want:

- To learn about the role of laser in your complex PCI algorithm (MOA, evidence, decision tree)
- To learn tips and tricks to ensure procedural safety and efficacy for laser atherectomy

12:30 - 14:00

THEATRE BLEU

Symposium with
LIVE case

Left main and complex bifurcation stenting

Sponsored by Terumo

Join us if you want:

- To understand the best treatment options for patients presenting with left main and complex bifurcations lesions
- To learn how to optimise both strategy and technique using intra-coronary imaging and physiology
- To understand the mechanical properties of Ultimaster Nagomi sirolimus eluting coronary stent system and share the latest clinical results

12:30 - 14:00

THEATRE
BORDEAUX

Symposium with
LIVE case

The impact of paravalvular leak and permanent pacemaker implantation on lifetime management in TAVI patients

Sponsored by Edwards Lifesciences

Operators: M. Geyer, P. Lurz
Cathlab Medical Coordinator: E. Zancanaro
(Pending confirmation)

Join us if you want:

- To understand the impact of paravalvular leak on lifetime management
- To understand the links between paravalvular leak, durability, and survival - Through scientific data and a LIVE case
- To explore the optimal strategy to prevent or minimise the risk of paravalvular leak and permanent pacemaker implantation

12:30 - 13:30

THEATRE
HAVANE

Imaging
Symposium with
Recorded case

Integration of CT and IVUS for treatment of coronary artery disease in daily practice: from planning to drug-eluting therapy

Sponsored by Boston Scientific and Siemens Healthineers

Join us if you want:

- To understand the role of CT scan and intravascular imaging in guiding clinical decision-making for the treatment of coronary artery disease
- To learn a step-by-step approach to select appropriate tools and techniques for optimal patients' outcomes
- To learn how to optimise use of drug-eluting therapies in the treatment of coronary artery disease

12:30 - 13:30

ROOM MAILLOT

Symposium with
Recorded case

Optimising self-expandable TAVI clinical outcomes without compromise

Sponsored by Abbott

Join us if you want:

- To optimise TAVI patient outcomes from initial access, optimal implantation and access closure
- To learn about valve selection algorithm for the index procedure
- To learn how to optimise TAVI procedural workflow

12:30 - 13:15

ROOM 241

Symposium

The new global era of patient care with CathWorks FFRangio

Sponsored by CathWorks and Medtronic

Join us if you want:

- To explore the practical application of FFRangio in routine practice
- To learn from centers with short- and long-term experience
- To be updated on diagnostic and clinical outcome evidence

12:30 - 13:30

ROOM 242AB

Symposium

Simplify PCI! Know where and how to win with drug-coated balloon

Sponsored by B. Braun Melsungen

Join us if you want:

- To learn more about the safety and effectiveness of the best-investigated coronary drug-coated balloons
- To learn about the strengths of drug-coated balloons in different indications, including de-novo, multivessel disease, bifurcations, CTO and diabetic patients
- To gain an understanding on how drug-coated balloon can reduce complexity in today's PCI
- To gain confidence in using drug-coated balloon with a data-driven treatment choice
- To get an understanding how to use the hybrid approach especially for challenging lesions to improve clinical outcome
- To get the latest clinical data on the best-investigated coronary sirolimus drug-coated balloon in a real-world setting

12:30 - 13:30

ROOM 243

Symposium

If I can't stent it, should I care? Unmasking hidden atherosclerosis through novel imaging techniques

Sponsored by Novo Nordisk

Join us if you want:

- To highlight the importance of identifying inflammation earlier in plaque development and in patients with no visible plaque by traditional assessment
- To explore the role of perivascular adipose tissue in the inflammatory processes that lead to plaque development and instability
- To examine the clinical applicability of managing patients with silent athero-inflammation

12:30 - 13:30

ROOM 251

Symposium

Road to relief: effective treatment of refractory angina patients with Shockwave Reducer

Sponsored by Shockwave Medical

Join us if you want:

- To understand the true impact and occurrence of refractory angina
- To learn about the mechanism of action and implanting procedure of the Shockwave Reducer
- To learn about both the clinical data and real-life examples supporting the efficacy of the Shockwave Reducer

12:30 - 13:30

ROOM 252B

Symposium

Novel Hertz Contact Intravascular Lithotripsy: could we achieve more in calcium modification?

Sponsored by Elixir Medical

Join us if you want:

- To learn about the novel Hertz Contact Intravascular Lithotripsy system, clinical evidence and experience
- To understand types of moderate to severe calcified lesions that can be successfully treated with Hertz Contact Intravascular Lithotripsy
- To learn tips and tricks of the Hertz Contact Intravascular Lithotripsy procedure

13:45 - 14:30

THEATRE
HAVANE

Symposium with
Recorded case

13:45 - 14:30

ROOM MAILLOT

Symposium

Shaping the future of cardiology - A journey of meaningful innovation in structural heart and vascular solutions

Sponsored by Meril Life

Transforming PCI: mastering the implementation of drug-eluting balloons

Sponsored by Cordis

Join us if you want:

- To understand the evidence and rationale behind drug-eluting balloons (DEBs)
- To explore the clinical data supporting the use of DEBs in modern PCI
- To discover how DEBs minimise metal implantation and effectively manage both standard and complex lesions
- To learn more about the mechanistic rationale and merits of drug choice

13:45 - 14:45

ROOM 241

Imaging

Symposium with
Recorded case

13:45 - 14:45

ROOM 242AB

Symposium with
Recorded case

A mindset shift in the cathlab: leveraging contemporary technologies for planning and guiding PCI in complex patients

Sponsored by Philips

Join us if you want:

- To discover features you might not yet know about cathlab's systems and learn how to integrate them to make your interventions easier and more effective
- To understand how intracoronary imaging, physiology and angiography contribute to a better and a more efficient planning and performance of complex PCI procedures
- To understand how the seamless use of in-cathlab systems can enhance procedural workflow, safety and quality
- To get a first clinical experience on a next gen image-processing technology in interventional cardiology

Valve choice - Shaping index procedures and lifetime patient management

Sponsored by Boston Scientific

Join us if you want:

- To understand how index procedure optimisation will define long-term clinical outcomes
- To review latest clinical data on a novel self-expanding device and how it can guide index procedure decision making
- To learn how to plan for lifetime patient management including coronary access and redo TAVI supported by simulation

13:45 - 14:30

ROOM 243

Symposium

Successful finale - Latest best practices and technologies for large hole arterial and venous closure

Sponsored by Vivasure Medical

Anchorperson: D. Mylotte (Pending confirmation)

Spokesperson: N. Van Mieghem

Discussants: M. Abdel-Wahab (Pending confirmation), C. Frerker, T. Patterson (Pending confirmation)

Join us if you want:

- To understand current landscape of large hole arterial and venous closure techniques
- To gain tips and tricks to minimise vascular complications
- To learn about the novel patch-based closure approach

13:45 - 14:45

ROOM 252B

Symposium

Sponsored session

Sponsored by Concept Medical

13:45 - 14:45

ROOM 251

Symposium

How to optimise TAVI outcomes in the Asian-Pacific population?

Sponsored by Abbott

Join us if you want:

- To understand how to optimise clinical outcomes for TAVI patients with small annuli
- To learn how to mitigate the risk of conduction disturbances after TAVI
- To discuss how to manage optimal TAVI outcomes in patients with large annuli

13:45 - 14:30

ROOM 252A

Symposium

China experience in TAVI evolution

Sponsored by Medtronic

Join us if you want:

- To understand how commissural alignment can help reduce the risk of coronary artery obstruction in patients with bicuspid or small sinuses of valsalva in China
- To understand the long-term outcome of left bundle branch area pacing in TAVI patients
