**A course for Aesthetic Physicians, offering in-depth knowledge
in applied facial anatomy and injection techniques on
neuromodulators and soft-tissue fillers.**

Educational Objectives:

1. Participants will be taken through a holistic & extensive insight into the essential anatomy of the human face.
2. Participants will receive comprehensive understanding of facial layers and aging anatomy and how to best apply lifting and volumizing techniques.
3. Participants will be provided with hands-on experience and in-depth understanding of surface landmarks with an emphasis on patient safety and identifying structures of critical danger zones of the upper, middle and lower face.
