

Registration

Registration includes morning tea, lunch and afternoon tea with an optional cocktail function.

Full registration	\$300
Nurse/registrar/allied health/trainee	\$200

To register, visit:
<https://www.ivvy.com/event/PCNL17/>

All fees include GST and a tax invoice will be available to download after registration.

For further information contact:
Amanda Christie
Clinical Institute Coordinator
Epworth HealthCare
Mailbox 4, 89 Bridge Road
Richmond VIC 3121

Phone: +61 3 9426 6952
Fax: +61 3 9914 8760
Email: amanda.christie@epworth.org.au

Parking

Ample parking is available at:
Wilson Parking St Andrews Place East Melbourne VIC 3002
Phone: +61 3 9224 0301

Proudly sponsored by:

First Epworth Masterclass in
Supine, Prone and mini PCNL

UroRenal and Vascular Clinical Institute

Saturday 24 June 2017
The Ballroom, Park Hyatt, Melbourne

Program

0800–0900 Registration

0900–0915 Symposium introduction and overview
Speaker: A/Prof Laurence Harewood

0915–1030 Session one

Session Chair: A/Prof Laurence Harewood

1987 to 2017 - What is the role for PCNL in the era of advanced endoscopy?
Speaker: A/Prof David Webb

How to Improve PCNL –
New techniques in Practice
Speaker: Mr Dan Lenaghan

Choose your weapon: Ultrasound,
Ballistic or Laser lithotripsy
Speaker: Dr Simon Bariol

1030–1100 *Morning tea and trade display*

1100–1230 Session two

Session Chair: Mr Jamie Kearsley

As-Live Surgery - Supine PCNL
Speaker: Mr Denby Steele

1230–1330 *Lunch and trade display*

1330–1530 Session three

Session Chair: TBA

ECIRS (endoscopic combined
intra-renal surgery)

Speaker: Mr Denby Steele

As-Live Surgery – Ultrasound guided
puncture/mini-Supine PCNL

Speaker: Mr Dan Lenaghan

1500–1530 *Afternoon tea and trade display*

1530–1650 Session four

Session Chair: TBA

PCNL in challenging cases –
Renal Anomalies, Spinal Disease

Speaker: A/Prof David Webb

As-Live Surgery – Prone mini-PCNL
Speaker: A/Prof David Webb

1650–1700 Symposium Close

1700–1800 **Meet the faculty cocktail party**

Symposium faculty

About the symposium

Percutaneous stone surgery can be difficult. However, in many cases it offers the best approach for our stone patients.

New techniques of access and stone clearance, aided by new technologies, are reducing the morbidity of PCNL. Minaturisation has opened a new frontier for PCNL in cases where stone burden is not massive but retrograde pyeloscopy alone cannot secure stone clearance.

Once we may have thought advances in endoscopy would relegate PCNL to a few subspecialist urologists tackling extreme cases. Yet now, more than ever, PCNL is a valuable technique to have in the stone management arsenal.

Epworth Freemasons pioneered the teaching of PCNL in Australia. This workshop coincides with the 30th anniversary of the first PCNL course in Australia, held at the Freemasons Hospital in 1987. Epworth Freemasons has continued to keep pace with the evolution of PCNL, and was the first private hospital to introduce the mini-nephroscope. In this workshop, we will aim to cover all aspects of PCNL from access to exit. Topics will include:

- Mini-PCNL
- Supine PCNL
- Ultrasound guided puncture
- Combination ureteroscopy and PCNL
- Ultrasonic vs ballistic vs laser stone destruction
- Tubeless and totally tubeless PCNL
- Complications - recognition and management

Narrated, As-Live video surgeries will give practical illustration of the surgical challenges and solutions of different PCNL approaches. There will plenty of opportunity to discuss tips and tricks with the faculty of experienced PCNL urologists, and see first-hand the range of the latest mini-nephroscopes, ultrasound guidance and lithotripsy technologies.

Guest speakers

Mr Denby Steele
Urologist

Dr Simon Bariol
Urologist

Symposium convenors

Mr Dan Lenaghan
Urologist

Associate Professor David Webb
Urologist

Associate Professor Laurence Harewood
Urologist
Director, UroRenal and Vascular
Clinical Institute

Session chairs

Mr Jamie Kearsley
Urologist
