

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
 Friday, October 18 – Sunday, October 20, 2024

FULL CONFERENCE PROGRAM – TENTATIVE - REVISED
 (All times in JST/GMT+9)

Day 1: FRIDAY, October 18, 2024 Nara Kasugano International Forum IRAKA		
8:30 am	Breakfast, Registration & Welcome (Reception Hall 1)	
9:00	Opening Remarks	Susan Duncan
9:15 am	Platform 1: Symposium on Orthographic processing and disorders in Asian orthographies (Moderated by Brenda Rapp)	
	Orthographic characteristics of Japanese, Chinese and Korean: Similarities and differences	Ami Sambai
	Acquired dyslexia in Japanese orthography: Symptoms and assessment	Kosei Hashimoto
	Characteristics and recovery of acquired dyslexia and dysgraphia in the Korean orthography	Sung-Bom Pyun
	The impact of script in Chinese-speaking primary progressive aphasia	Boon Lead Tee
	Spatiotemporal neural network of sublexical reading in Chinese: An intracranial SEEG study	Zaizhu Han
11:05 am	Break with Refreshments (25 minutes)	
11:30 am	Poster Session 1 IN-PERSON (Conference Rooms 3 & 4)	
1:00 pm	Lunch (provided by the Academy) (Conference Rooms 3 & 4)	
2:00 pm	Keynote Address (Moderated by Adrià Rofes) (Reception Hall 1) Functions of language and consciousness: An underlying principle of human evolution	Atsushi Iriki
3:00 pm	Break (10 minutes)	
3:10 pm	Platform 2: Theory-based language treatment (Moderated by Anthony Pak-Hin Kong) (Reception Hall 1)	
3:10	A hierarchical ensemble approach to predicting response to phonological versus semantic naming intervention in aphasia using multimodal data	Dirk Den Ouden
3:30	Beyond naming: assessing near and far transfer effects in bilingual aphasia following semantic feature-based treatment	Marissa Russell-Meill
3:50	Using structural priming as an aphasia treatment: The role of lexical-syntactic interactions	Jiyeon Lee

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
 Friday, October 18 – Sunday, October 20, 2024

4:10	Stability and validity of visual world paradigm measures of lexical access in aphasia	Michael Walsh Dickey
4:30 pm	Break with Refreshments (15 minutes)	
4:45 pm	Interactive panel: Equity in Science (Moderated by Swathi Kiran) (Reception Hall 1)	

6:00 pm	Opening Night Social Event (Light refreshments will be offered) Nara Kasugano International Forum IRAKA – 2nd Floor	
----------------	---	--

Day 2: SATURDAY, October 19, 2024		
Nara Kasugano International Forum IRAKA		
8:30 am	Breakfast & Membership Meeting (hybrid: in person and via Zoom) (Reception Hall 1)	
9:30 am	Platform 3: Symposium on Language testing during awake brain surgery: defeating the gold standard? (Moderated by Adrià Rofes)	
	Object and action naming	Adrià Rofes
	Reading and writing	Kazuya Motomura
	Proper names and non-verbal semantics	Guillaume Herbet
	Sentence processing	Ryuta Kinno
10:50 am	Refreshments & Poster Session 2 IN-PERSON (Conference Rooms 3 & 4)	
12:20 pm	Lunch (provided by the Academy (Conference Rooms 3 & 4); lunch session for NIDCD mentors and mentees in Conference Room 2)	
1:20 pm	Platform 4: Discourse errors and natural language processing (Moderated by Silvia Martínez-Ferreiro) (Reception Hall 1)	
1:20	Discourse planning and production in aphasia: evidence from pauses, clauses, and executive function measures	Arpita Bose
1:40	Naturalistic language production is associated with distinct word production errors in acute post-stroke aphasia	Marianne Casilio
2:00	Towards automated detection of fluent aphasia: A classification and interpretable natural language processing study	Frank Tsiwah
2:20 pm	Platform 5: Updates on primary progressive aphasia (Moderated by Adrià Rofes) (Reception Hall 1)	

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
 Friday, October 18 – Sunday, October 20, 2024

2:20	Dysgraphia in Japanese patients with primary progressive aphasia: Differences between nonfluent/agrammatic and semantic variants	Shoko Ota
2:40	Understanding the relationship between naming and verbal learning in the three primary progressive aphasia variants	Michele Masson-Trottier
3:00	Semantic blurring and atrophy progression in individuals with primary progressive aphasia due to FTLD-TDP-C	Elena Barbieri
3:20	The contribution of the temporo-frontal extreme capsule fasciculus and the uncinate fasciculus in semantic processing in primary progressive aphasia	Kyriaki Neophytou
3:40 pm	Break with refreshments (20 minutes)	
4:00 pm	Keynote Address (Moderated by Swathi Kiran) (Reception Hall 1) Neural dynamics and the structure of language <i>Sponsored by NIH/NIDCD</i>	Andrea E. Martin
5:00 pm	DINNER ON YOUR OWN	
6:30 pm	Special Event: Noh Performance Nara Kasugano International Forum IRAKA	

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
 Friday, October 18 – Sunday, October 20, 2024

Day 3: SUNDAY, October 20, 2024		
Nara Kasugano International Forum IRAKA		
8:30 am	Breakfast	
8:50 am	Platform Session 6: Symposium on Breaking language barriers: Lessons from advancements in rehabilitation of Chinese aphasia and related neurogenic populations (Reception Hall 1) (Moderated by Anthony Pak-Hin Kong)	
	Intensive and Comprehensive Aphasia Program (ICAP) and Gesture-Verbal Therapy (GVT) for Cantonese speakers	Cherie Wong
	Individualized neuromodulation using tACS to promote network changes with language facilitation in Chinese aphasia	Chester Cheung
	TMS in native Mandarin speakers with sub-acute post-stroke aphasia	Haozheng Li
	Cognitive Stimulation Therapy (CST) for Chinese individuals with dementia and aphasia	Winsy Wong
10:10 am	Break with Refreshments (20 minutes)	
10:30 am	Poster Session 3 IN-PERSON (Conference Rooms 3 & 4)	
12:00 pm	Lunch (provided by the Academy) (Conference Rooms 3 & 4)	
1:00 pm	Platform Session 7 Language treatment in practice (Moderated by Elena Barbieri) (Reception Hall 1)	
1:00	Effects of repeated application of Intensive Language Action Therapy (ILAT) in patients with chronic aphasia	Milena Osterloh
1:20	Implementation of the Comprehensive, High-dose Aphasia Treatment (CHAT)	David Copland
1:40	Combining smartphone-delivered and clinician-delivered intervention: A plausible model for service delivery?	Rajath Shenoy
2:00	Telepractice assessments for individuals with aphasia: A systematic review	Selina Teti
2:20 pm	Break with Refreshments (20 minutes)	
2:40 pm	Poster Session 4 ON-LINE	
3:40 pm	Platform session 8: Processing hubs and brain networks (Moderated by Elena Barbieri) (Reception Hall 1)	
3:40	Revisiting the neural substrates of language processing: insights from glioma lesion symptom mapping	Effy Ntemou

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

4:00	The essential language network	Cornelius Weiller
4:20	Investigating the relationship between white matter integrity and linguistic and non-linguistic cognition in individuals with chronic aphasia	Kateri Killelea
4:40	Recovery of verbal working memory depends on left hemisphere white matter tracts	Junhua Ding
5:00 pm	Announcements and Closing Remarks (Reception Hall 1)	Susan Duncan

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

POSTER PRESENTATION SESSIONS – **TENTATIVE - REVISED**

Date and time of all poster presentation sessions are listed below. In addition, all conference participants can access materials associated with all posters throughout the conference period via the Poster Hall tab on the interactive hybrid conference platform. In the Poster Hall, next to each poster, conference participants may also leave written comments and questions for the authors, asynchronously.

Poster Session 1 - in person; Fri. 11:30am-1:00pm

01	An adult case of developmental dyslexia due to poor visual cognition	Mika Konishi
02	Cognitive control involved in resolving semantic interference across individuals with and without left hemisphere stroke-induced aphasia	Preeti Rishi
03	Communication between the hemispheres in PPA: The relationship between functional and structural homotopic connectivity	Yuan Tao
04	Characterizing the effects of video implemented script training for aphasia in bilingual speakers with primary progressive aphasia	Stephanie Grasso
05	Phenotyping expressive syntactic deficits	Jeremy Yeaton
06	Semantic fluency task as sensitive tool for detecting clinical stages in three FTD genetic mutations	Lucca Montero
07	Language-specific impairments in Parkinson's disease: A cross-linguistic study	Dominique Louer

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

08	Story telling and event segmentation in aphasia	Katsiaryna Kazhuro
09	Anatomical properties of the right pars triangularis that contribute to TMS efficacy as a treatment for chronic aphasia	Harrison Stoll
10	Advanced disconnectomic analyses reveal repetition pathways in a case of mixed transcortical aphasia	Irene Bellin
11	Longitudinal brain volume changes in chronic post-stroke aphasia	Lauren Hammond
12	Garden path resolution skills in all variants of primary progressive aphasia: Evidence from a case-series study in Greek	Eleni Peristeri
13	Psycholinguistic effects on silent reading comprehension accuracy in aphasia-based alexia	Candace van der Stelt
14	Differential prefrontal cortex activation during semantic, phonemic and action verbal fluency tasks: A preliminary fNIRS study	Yearee Kim
15	White matter differences in two individuals with developmental dysgraphia	Sagi Romi
16	Investigating language differences across contexts and communication partners in individuals with aphasia	Louisa Suting
17	Early primary progressive aphasia atrophy asymmetry as a predictor of neuropathological diagnosis	Sarah Simon

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

18	Articulatory-based phonemic paraphasia in conduction aphasia: An impairment in phoneme-to-articulation conversion uncovered through crossed aphasia	Hiroaki Kawashima
19	A case of left temporal lobar atrophy in characteristic clinical course	Mariko Sakai
20	Verbal initiation, selection, strategy, and inhibition in stroke: A brief, novel screening tool	Gail Robinson
21	Spontaneous speech before, during and after awake brain surgery in glioma patients	Djaina Satoer
22	Validity of the videoconference administration of the Comprehensive Aphasia Test-Hungarian	Lilla Zakarias
23	Arabic adult language standardized tests for aphasia: A systematic review	Mohammed AlHarbi
24	Lexical retrieval delays in brain tumour patients: nouns and finite verbs in the past and present tense	Rhiannon Mackenzie- Phelan
25	Cued and memory-based language switching in bilingual patients with PPA	Marco Calabria
26	Discourse comprehension deficits in non-fluent variant primary progressive aphasia and autism spectrum disorder: Evidence for a continuum of language traits beyond diagnostic boundaries	Eleni Peristeri
27	Does therapy on verb inflection improve verb tense accuracy in narrative discourse by people with aphasia?	Celia Ericson

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

28	Assessing mild word-finding difficulties in naming: introducing the picture naming cards	Rosemarije Weterings
29	Discourse production in people with aphasia: an fNIRS pilot study	Jing Gao
30	Differential clustering strategies in a verbal fluency task between English- and Korean-speaking individuals with aphasia	Junyoung Shin
31	Understanding the experience of returning to driving or not for people with aphasia post-stroke: A qualitative study using patient journey mapping	Helen Wallace
32	Theory of mind deficits in people with aphasia following left-hemisphere stroke: Prevalence and relationship with aphasia severity	Jadelyn Kurtz
33	Co-development of quality indicators and implementation priorities for post-stroke aphasia services	Sarah Wallace
34	Lexical vs. grammatical aspect markers in Chinese aphasia	Silvia Martinez-Ferreiro
35	A preliminary investigation of phonological neighborhood density effect on semantic activation in people with aphasia	Yuan-Chi Feng
36	How do single-handed gestures differ from two-handed gestures? Implications for multimodal treatment for people with aphasia	Kazuki Sekine
37	The boundary between language and non-language: A case of pure Kanji (Chinese character) agraphia due to left-dominant posterior cortical atrophy	Chiyoko Nagai

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

38	The characteristics and the longitudinal changes of language dysfunction in Alzheimer	Chunchen Xiang
39	Subject-verb agreement in Italian non-fluent aphasia	Pamela Goryczka
40	Development of self-made gestures as an adaptive strategy for communication in an individual with childhood apraxia of speech	Michitaka Funayama
41	Measuring stroke care in Australia: Differences in quality and outcomes for people with and without aphasia in acute and rehabilitation hospitals	Marissa Stone
42	Measuring the health impacts of aphasia treatments: Does the EQ-5D-3L measure up?	Sally Zingelman
43	The distinction between aphasia and motor speech disorders in primary progressive aphasia	Angela Xu

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

Poster Session 2 - in person, Sat., 10:50am-12:20pm

01	Feasibility and compliance of ecological momentary assessments to measure stress in people with aphasia: Preliminary analyses	Courtney Jewell
02	Human judgments of AI images generated using patient-specific text prompts	Ran Li
03	The Sant Pau sentence elicitation task: A new tool to assess sentence production deficits in Spanish-Speaking patients with primary progressive aphasia	Maria Varkanitsa
04	Verbal domain in Malay speakers with aphasia: Sentence reductions in different language varieties	Mohd Azmarul A Aziz
05	Priming adjuncts: Improving content informativeness in aphasia	Peng Zhang
06	Fluency improvement in aphasia through sentence-level training	Sein (Sally) Min
07	Reduced long-range temporal correlations in BOLD time-series reflect language and mood improvements following intensive language action therapy (ILAT) in chronic post-stroke aphasia patients	Anna-Thekla Jaeger
08	Correlations between verbal short-term memory and comprehension of syntactically complex sentences. Evidence from people with aphasia.	Hellmuth Obrig
09	Disconnection in the ventral language system in pure alexia: Follow-up longitudinal diffusion tensor imaging S=study	Yoonhye Na

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

10	The production of clitics in Serbian speakers with acquired aphasia	Sladjana Lukic
11	Connection with the language network affects object representation in the ventral visual pathway: Evidence from functional and diffusion imaging with patients	Bo Liu
12	Domain-general serial order working memory impairment in non-fluent primary progressive aphasia: a multiple case study	Steve Majerus
13	Differences in drawing quantity, essential element occurrence, and its appropriateness between people with aphasia and healthy controls	Noriyo Komori
14	Characteristics of Japanese agrammatic speech in terms of case particles and predicates	Michiko Kanno
15	A scoping review of phonological treatments for anomia	Nichol Castro
16	Assessing mild aphasia: Developing and validating high-ceiling serial picture description tasks	Qiyu Sun
17	Language functions in glioma patients with repeated awake brain surgery	Barbara Vogrincic
18	Cross-linguistic treatment effects in bilingual agrammatic aphasia: A systematic review	Ashlynn Everett
19	Syntax-related regions in native signers activated commonly during comprehension of sentences and of non-verbal Inputs	Rimi Hino

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

20	Comparing semantic network differences in the animal fluency task between normal aging and Alzheimer's dementia	Jiseong Kim
21	Modelling lexical networks in discourse production by Mandarin aphasia patients	Juqiang Chen
22	Exploring the impact of aphasia severity on employment, social participation and quality of life	Mika Konishi
23	Retention of item and serial order information during verbal short-term memory tests in patients with Broca	Takuya Nakayama
24	Effect of lexical, syntactic, and executive function on the conveying narrative meaning in people with aphasia	Erika Sakuraoka
25	Preserved Katakana and impaired Hiragana writing in posterior cortical atrophy: a case study - Dissociated dysgraphia in two types of phonograms in Japanese -	Nanayo Ogawa
26	Investigating treatment efficacy, generalization patterns and cross-linguistic validity of the Italian adaptation of the Treatment Underlying Forms for agrammatic aphasia.	Elena Barbieri
27	Longitudinal investigation of naming accuracy in a case of bilingual logopenic primary progressive aphasia: Contribution of psycholinguistic properties	Fatima Jebahi
28	Extension of the Dutch Linguistic Intraoperative Protocol (DuLIP-Extended): New standardized items and tasks for intraoperative language monitoring for mild, moderate and severe aphasia	Marieke Donders-Kamphuis
29	Exploring dyslexia subtypes through computational modeling	Selcuk Guven

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

30	A historic trend analysis of research pertaining to language and pragmatics after right hemisphere damage: Are we moving in the “right” direction?	Laura Murray
31	Aphasia friendly communities	Julia Borsatto
32	A Japanese patient with progressive word deafness and logoclonia	Atsuko Hayashi
33	The rationality of mismatch between clinical classification and statistical cluster analysis conclusions: A discussion on the validation of aphasia classification criteria	Xinjia Qi
34	Understanding the mechanisms of nonword reading impairment of Kana and Kanji in Japanese acquired phonological dyslexia	Shinji Uema
35	Quantifying the relationship between noun and verb naming tests: A structural equation modeling approach	Gerasimos Fergadiotis
36	Predicting aphasia severity using multi-modal data	Xinyi Hu
37	Recursive self-feedback enabled self-repaired spontaneous speech in chronic aphasia within real-world settings	Gerald Imaezue
38	Basque-Spanish bilingual aphasia: a case-study to inform bilingual language organization	Esti Blanco-Elorrieta
39	Microstructure features as a compensatory mechanism for word-finding deficits in people with aphasia.	Michaela Nerantzini

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

40	Listening effort and prefrontal cortex activation during discourse comprehension: A preliminary fNIRS study	SoEun Kim
41	The effect of semantic and phonological naming treatment for people with aphasia in the early stage after stroke	Yuki Ishii
42	A case of apraxia of speech with whispering voice	Kana Matsuda
43	Transition from deep dysphasia to phonological dysphasia: An analysis of dyslexia symptoms	Tomohiro Omori
44	Treatment of Error Awareness in Motor Speech (TEAMS): A pilot study	Daniel Salomon
45	Prognostic factors for long-term improvement from stroke-related aphasia with adequate linguistic rehabilitation	Yoshitaka Nakagawa
46	Potential neural mechanisms in aphasia recovery	Masaru Mimura
47	Using the computerized Token Test to assess sentence comprehension skills in Greek aphasia: The role of executive functions	Michaele Nerantzini
48	Linguistics and non-linguistics cognitive performance of Cantonese-speaking people with aphasia: An investigation using the listening comprehension version and speed of processing battery of the Cantonese version of Computerized Revised Token Test	Min Ney Wong

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

Poster Session 3 - in person, Sun., 10:30am-12:00pm

01	Sentential context induces preplanning of spoken words: Acquiring fundamental knowledge for aphasia assessment and therapy	Irina Chupina
02	Prosody of speech production in latent aphasia	Cong Zhang
03	Developing the AphasiaFit app	Sarah Wallace
04	Semantic cognition in aphasia and healthy population: Consideration in terms of semantic knowledge type and relatedness strength	Hitomi Sato
05	Language-specific dual-task effects in typical aging: A systematic review	Christos Salis
06	Structural priming yields cross-modality treatment gains in aphasia: evidence from webcam-based eye-tracking	Willem van Boxtel
07	Measuring successful conversations for couples affected by aphasia: Development and cognitive validation of a Patient Reported Outcome Measure (PROM)	Annette Rotherham
08	Standardization of the digital version of the Diagnostic Instrument for Mild Aphasia (DIMA-app)	Djaina Satoer
09	Improving expressive language fluency in Cantonese-speaking individuals with nonfluent/agrammatic primary progressive aphasia through script intervention using aphasia-friendly text and usage-based scripts	Lorinda Kwan-Chen

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

10	The neuropsychological characteristics of verbal and non-verbal cognitive function in post stroke aphasia patients	Yumei Zhang
11	Fluent speech but inability to repeat: A case report on deep dysphasia	Miho Suganami
12	Dual route account of writing-to-dictation in Chinese	Dustin Lau
13	Once upon a time... Tense production in the narratives of French speakers with fluent and non-fluent aphasia	Natacha Cordonier
14	Prefrontal cortical activation and hemispheric lateralization during cognitive processing in aphasia: An exploratory fNIRS investigation	Bijoyaa Mohapatra
15	Cross-linguistic differences in the semantic networks of an animal fluency task between English and Korean speakers with aphasia	Jee Eun Sung
16	Social participation in aphasia: Insights across WHO-ICF domains	Bijoyaa Mohapatra
17	Aphasia-related functioning assessment: ICF-based item response modeling	Li-Juan Zhong
18	Aphasics' errors in simple multiplication	Elena Salillas
19	Neurocognitive patterns of verb production deficit therapy: A single case with logopenic variant Primary Progressive Aphasia	Sladjana Lukic

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

20	Role of multiple white matter tracts on severity of poststroke aphasia	Yoonhye Na
21	Enhancing cross-language generalization from cross-modal discourse-based treatment in English-Chinese bilingual Broca's aphasia	Lilong Xu
22	The effects of music training on rehabilitation of speech categorical perception in Chinese people with post-stroke aphasia	Wei Zhang
23	A comparison of grammatical deficits between bilingual and monolingual aphasia: A systematic review	Sarah Conkle
24	Analyzing the linguistic characteristics of the Cantonese Aphasia Battery (CAB) naming test items	Jason Kan
25	Preliminary results of a usability study on a web laboratory with language exercises in aphasic patients	Axel Fernandez Zaionz
26	Examination on the use of the Cantonese version of Communication Outcome after Stroke (Can-COAST) scale and the Cantonese version of Carer Communication Outcome after Stroke (Can-Ca COAST) on people with dementia and visual impairment and their caregivers	Hin Yui Ho
27	Co-design of a unified international aphasia awareness campaign	Claire Bennington
28	Differential patterns of semantic clustering in the verbal learning process in individuals with Alzheimer's dementia	Sujin Kim
29	Aging-related differences in serial position effects and serial clustering strategies in a verbal learning task	Hana Jang

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

30	Assessing dyslexia in Slovenian-speaking children, adolescents and adults	Christina Manouilidou
31	The development of a prototype Japanese Sign Language naming test	Sayuri Ito
32	The establishment of Mandarin Chinese core-lexicon checklists during picture-sequence description and storytelling tasks	Yu-Chun Chih
33	From theory to practice: Implementing aphasia-friendly communication in healthcare	Ajay Mal
34	Agrammaticality in post-stroke aphasia: Verb retrieval and verb conjugation	Silvia De Marchi
35	Psycholinguistic norms and face naming times for photographs of celebrities in Cantonese	Wing Yin Lee
36	Mixed fluent variant progressive aphasia with altered eating habits: a new phenotype of primary tauopathy?	Akihiro Takasaki
37	Lexical retrieval therapy for native Cantonese speakers with semantic-variant primary progressive aphasia	Lorinda Kwan-Chen
38	Scalar implicatures in Italian-speaking Individuals affected by frontotemporal dementia: Preliminary results	Silvia De Marchi
39	Psycholinguistic norms of action and object pictures in Hong Kong Cantonese - A preliminary report	Kaman Pang

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

40	Acoustic analysis as phonetic basis for phonological paraphasia in persons with aphasia: A preliminary study	Niranjana J
41	Language alignment in older adults with socially assistive robots: Implications for aphasia rehabilitation	Shifa Somji
42	Effects of noun- and verb-based semantic feature analysis treatment on real-time semantic processing in Korean-speaking individuals with aphasia	Sujin Choi
43	Alexia with Agraphia (AWA) following focal brain lesions in Arabic speakers: A case-series analysis	Venu Balasubrama nian
44	Cortical pathways toward spoken word production: An electrocorticography study using picture naming and word read-aloud tasks	Hiromu Sakai
45	Exploring the efficacy and accessibility of online speech therapy for stroke survivors – in the Indian context	Ayana Das Ramdasan
46	The Queensland Aphasia Research Centre TechHUB	David Copland
47	CHAT maintain feasibility and efficacy	Kirstine Shrubsole
48	The Florence project	Tony Angwin

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

Poster Session 4 - ON-LINE, Sun., 2:40-3:40pm

01	Cognitive control modulates sentence comprehension differently in individuals with moderate aphasia: Preliminary evidence from a conflict adaptation paradigm	Anna Krason
02	Validity and reliability of the Fatigue Severity Scale for Aphasia (FSS-A)	Ellyn Riley
03	The role of blood-based biomarkers in post-stroke cognitive impairment	Nerea Gorostiola Oyarzabal
04	Predicting written language performance in primary progressive aphasia: The role of central language processes and psychometric word properties	Katlyn Nickels
05	An investigation of domain-general vs. domain-language-specific attention treatments in aphasia	Yael Neumann
06	Characterizing verb argument structure production in discourse in chronic aphasia	Laura Giglio
07	Investigating language recovery after rehabilitation: A retrospective study with the Aachen Aphasia Test on 218 Italian people with aphasia.	Mauro Vigano
08	Production and comprehension of sentence negation in Spanish-speaking people with aphasia	Maria Elina Sanchez

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

09	Intensive language action therapy (ILAT) vs. intensive naming therapy (INT): A randomized controlled trial in chronic post-stroke aphasia	Johanna Knechtges
10	Drivers of depression in post-stroke aphasia	Devna Mathur
11	Formulaic language in spontaneous speech as a marker of fluency in post-stroke aphasia	Cathy Torrington Eaton
12	Exploring generalization of cerebellar tDCS gains to discourse skills in chronic aphasia	Jacqueline Melton
13	Investigating the cognitive and perceptual effects of healthy aging on semantic memory: an fNIRS pilot study	Shelby Kayga
14	Distinct neural pathways associated with conceptual and lexical verb retrieval priming in aphasia	Hayley Olson
15	Comparative analysis of predicate types on young and older adults in a predicate-final language	Jimin Park
16	Comparing idiomatic and compositional compound verb dissociation in the speech of Persian-speaking people with aphasia	Fariba Yadegari
17	Clown therapy: language and quality of life improvements	Isadora da Silva
18	STAR- Sentence Treatment for Aphasia Recovery: Personalized virtual implicit training	Katelin Rainey

Academy of Aphasia 62nd Annual Meeting
Nara, Japan and Virtual (Hybrid)
Friday, October 18 – Sunday, October 20, 2024

19	How many patients profit from intensive post-stroke aphasia therapy? A possible role of communicative action embedding	Kubra Fatullayeva
20	Multiple paths to sentence interpretation in older adults and persons with aphasia	Malathi Thothathiri
21	Preliminary analysis: The role of music listening and baseline alertness on higher-order attentional deficits in aphasia	Emily Sebranek
22	Syntactic structure, syntactic frequency, and event typicality: The integrated effect on sentence comprehension	Ayako Oishi
23	Treatment selection for word retrieval difficulty: Evidence from error types	Yingxue Tian
24	Exploring prefrontal hemodynamic changes associated with verbal memory encoding and recall process: A preliminary fNIRS study	Chaewon Lim
25	The incidence of dysphagia in aphasic patients in stroke unit in Albania	Antigoni Bullari
26	The adaptation procedure of the Comprehensive Aphasia Test into Moroccan Arabic	Loubna El Ouardi
27	Dementia resilience and coping during natural disasters and humanitarian crisis: Lessons from Japan	Mohamed Taiebine
