About The Meeting

This symposium is structured to provide a clinical overview of PET, and PET-CT imaging. The focus of the program is how to effectively use these imaging modalities to aid in the detection, assessment and management of many different cancers. The latest applications, protocols, therapies and follow up will be presented throughout the program.

Target Audience

This CME activity should benefit practicing radiologists and oncologists interested in the evolving techniques and applications of PET-CT imaging. The course should also prove valuable for physicians who order PET-CT studies.

Scientific Sponsor

Educational Symposia

Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 12.0 AMA PRA Category 1 Credit(s)TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Educational Objectives

Attendees should, at the completion of this course, be able to:

- Describe the use of PET-CT in the assessment and follow up of neurological disorders and head and neck cancer.
- Evaluate the role of PET-CT in the detection and management of breast and gynecologic cancers.
- Discuss the expanding role of PET-CT in the detection and management of lymphoma and melanoma.
- Describe the use of PET-CT in the management of lung and gastrointestinal cancers.
- Analyze the latest clinical indications and advanced applications in PET-CT and PET-MR.

No special educational preparation is required for this CME activity.
