

BSO BALANCE COURSE – Wednesday the 31st January 2018

DRAFT PROGRAMME

John Lister Postgraduate Centre, Wexham Park Hospital, Slough

Within ENT balance has become a niche specialty understood by few.

This course aims to address this issue by providing ENT surgeons of all grades with the necessary tools to diagnose and treat patients in a routine ENT clinic.

The emphasis of the BSO course is on clinical techniques and management strategies which work for the general ENT surgeon rather than the neuro-otologist.

The course will also give an insight into which investigations are likely to influence management.

A morning session of lectures is followed in the afternoon by practical worked examples of common balance disorders.

08.30 – 09.15	REGISTRATION & COFFEE
09.15 – 09.45	History taking <i>Joel Goebel, St Louis, USA</i>
09.45 – 10.15	Clinical examination <i>Joel Goebel, St Louis, USA</i>
