

DAY 1, THURSDAY, 15 FEBRUARY 2018

07:30-09:00 Registration & Welcome Coffee

09:00 - 10:15 The Latest and the Future of Cardiovascular Medicine

09:00 - 09:05 Welcome to 4TS

09:05 - 09:15 Remote Support: Training, Clinical Trials and can Cases be Performed Remotely?

09:15 - 09:25 Diabetic Medication for Non Diabetic Heart Patients?

09:25 - 09:35 How Cardiovascular Mortality has Changed in the Age of Percutaneous Interventions

09:35 - 09:45 Anti Inflammation medication for Atherosclerosis

09:45 - 09:55 Management of Complications in Structural Heart Disease Interventions

09:55 - 10:05 Rationale, Evolution and Results of Fast Track Endovascular Interventions: A New Standard of Care

10:05 - 10:15 TBA

10:15 - 10:30 Coffee Break

10:30 - 11:15 Opening Ceremony

10:30 - 10:40 Welcome from 4TS President

10:40 - 10:50 Guest of Honor: Dubai Authorities

10:50 - 10:55 Welcome from ISEVS President

10:55 - 11:00 Welcome from ECS President

11:00 - 11:05 Welcome from EGIC President

11:05 - 11:15 TBA

11:15 - 11:40 Exhibition Opening

11:40 - 12:40 Metabolic Syndrome (Lunch Symposium)

11:40 - 11:50 Statins and Dyslipidemia What is New?

11:50 - 12:00 PCSK9 Inhibitors Update

12:00 - 12:10 Diabetic Medication to Prevent Heart Disease

12:10 - 12:20 What is New Obesity Management

12:20 - 12:30 Latest on Hypertension Treatment

12:30 - 12:40 Sleep Apnea Underdiagnosed Reason for HTN

12:40 - 13:40 Heart Failure (Lunch Symposium)

12:40 - 12:50 Update on Medical Treatment Of HF

12:50 - 13:00 Atrial Fibrillation and HF

13:00 - 13:10 Case of Sever HF

13:10 - 13:20 Coronary Artery Disease and Viability Testing in HF

13:20 - 13:30 Cardiac Markers in HF

13:30 - 13:40 Discussion

**11:40 - 13:40 Critical Leg Ischemia (Lunch Symposium)
CLI Society**

11:40 - 11:50 The Tool Box for CLI Treatment from Access to Closure

11:50 - 12:00 Challenging Case #1

12:00 - 12:10 Critical Leg Ischemia Case 2

12:10 - 12:20 Hybrid Venous Arterialization

12:20 - 12:30 Does DCB Therapy in Tibial Disease Stand a Chance Against the Newest Tibial Therapies?

12:30 - 12:40 Challenging Case #4

12:40 - 12:50 Complex CLI CTO Analysis and Best Approach for Successful Complex CTO Crossing

12:50 - 13:00 Challenging Case of CLI

13:00 - 13:10 No Country For Closure Devices

13:10 - 13:20 Where Are We Now With Catheter Robotics

13:20 - 13:40 Discussion

13:40 - 13:50 TBA

13:50 - 14:10 Coffee Break

14:10 - 15:10 Challenging Case #1

14:10 - 14:20 Coronary Fistula Intervention

14:20 - 14:30 CABG in Patients with Poor LV: to STICH or Not to Stitch

14:30 - 14:40 Case PCI VS CABG

14:40 - 14:50 Medical Treatment of SCAD

14:50 - 15:00 Occluded Distal Aorta

15:00 - 15:10 VA ECMO

15:10 - 15:20 Coronary Bifurcation Case

15:20 - 15:40 Coffee Break and Exhibition

15:40 - 17:30 Challenging Case#2 / Cath Lab Complications

15:40 - 15:50 Cath Lab Catastrophic Case

15:50 - 16:00 Elective PCI without Backup Surgery, a year in Review

16:00 - 16:10 Utilization and Outcomes Impella Device

16:10 - 16:20 Challenging Case #2

16:20 - 16:30 Challenging Case #3

16:30 - 16:40 LM PCI, Challenging Case #4

16:40 - 16:50 Challenging Case #5

16:50 - 17:00 Hemodynamically Unstable Patient, Challenging Case #6

17:00 - 17:10 LM Dissection

17:10 - 17:20 Unusual MI Intervention

17:20 - 17:30 Discussion

07:30 - 08:00 Registration & Welcome Coffee

08:00 - 09:30 Aorta Interventions ISEVS Session

08:00 - 08:10 TBA

08:10 - 08:20 Acute Type B dissection with 'Radiologic Malperfusion' Where is the Evidence to Justify TEVAR Intervention?

08:20 - 08:30 Update: Current Indications for Endografts for Descending Aortic Dissections

08:30 - 08:40 Renal Artery Stenting and its Disappointments

08:40 - 08:50 Renal Denervation – Current Status An Future Prospective

08:50 - 09:00 Carotid Angioplasty Stenting. State of the Art

09:00 - 09:10 Subtotal Carotid Stenosis: Why, When and How to Treat it?

09:10 - 09:20 Trans Carotid Artery Revascularization: Why Go Trans Femoral Ever Again

09:20 - 09:30 CST VS Endorectomy TBA

09:30 - 09:40 Neuroprotection During Carotid Interventions. The Best Techniques to make CAS safer

09:40 - 09:50 TBA

09:50 - 10:10 Coffee Break and Exhibition

10:10 - 12:20 Complex Coronary Interventions

10:10 - 10:20 Cardiac Marker in ACS

10:20 - 10:30 LM intervention

10:30 - 10:40 Coronary Intervention In Women, How It Differ From Men

10:40 - 10:50 Complex Coronary Case, Rotaplayer Case

10:50 - 11:00 CTO Case

11:00 - 11:10 Challenging Case

11:10 - 11:20 SVG Case

11:20 - 11:40 Challenging Coronary Case

11:40 - 11:50 Bifurcation Case

11:50 - 12:00 Challenging Case

12:00 - 12:10 3VD Case

12:10 - 12:20 CTO Case

12:20 - 13:20 Friday Prayer

13:20 - 15:00 New Oral Anticoagulation (Lunch Symposium)

13:20 - 13:30	Similarities and Differences among NOACs
13:30 - 13:40	NOACS in Afib
13:40 - 13:50	NOACs in DVT/PE
13:50 - 14:00	NOACs in ACS Stenting (Triple Therapy)
14:00 - 14:10	NOACs Precutions (CRI, Medications/Food, Age)
14:10 - 14:20	Bleeding Management with PT on NOACs
14:20 - 14:30	NOACs and Surgery (Planed/Urgent)
14:30 - 14:40	LAA Closer
14:40 - 14:50	NOACs in Hyper-Coagibility State
14:50 - 15:00	Use of Triple Therapy Post-Stenting: Between Devil And Deep Sea ?

13:20 - 15:00 ISEVS Session 1 Update on EVAR and TEVAR

13:20 - 13:30	When Chimney and Periscope Grafts for Left SCA Revascularization May be a Better Option Than a Cervical Bypass
13:30 - 13:40	Perclose vs. Surgical Closure Outcomes for Large Bore Access: Real World Evidence
13:40 - 13:50	Integrating 3D Planning for Complex Aortic Procedures
13:50 - 14:00	Innovations in EVAR Polymer Technology
14:00 - 14:10	A Novel Approach to Treat Type II Endoleak
14:10 - 14:20	The Multilayer Flow Modulator Stent (MFM) for the Treatment of Type B Aortic Dissections: Indications, Contraindications and the Results
14:20 - 14:30	Challenging EVAR Case Presentation
14:30 - 14:40	Challenging Thoracic Case Presentation
14:40 - 14:50	Challenging TEVAR Case Presentation
14:50 - 15:00	Acute type B Aortic Dissection- Rule Of Endovascular Therapy TEVAR- When And How?

15:00 - 15:30 Coffee Break and Exhibition

15:30 - 17:00 Iliac/SFA Interventions Asian Pacific Session

15:30 - 15:40	What is New on SFA Intervention
15:40 - 15:50	Case # 1 SFA Case
15:50 - 16:00	Untouchable No More: No-Stent Zones in Lower Extremity Intervention will Cease to Exist in the Face of Advanced Endovascular Technologies
16:00 - 16:10	Role of Atherectomy in Endovascular Treatment of Peripheral Artery Disease
16:10 - 16:20	Mid –Term Results With Drug Eluting Balloons For SFA Lesions In Patients With CLI: Comparison With Results Of Conventional Bypass Surgery
16:20 - 16:30	Case # 3
16:30 - 16:40	How to Treat the Most Effectively Femoro-Popliteal CTO Lesions?
16:40 - 16:50	Long SFA CTO Case
16:50 - 17:00	Discussion

07:00 - 08:00 Registration

08:00 - 09:00 Venous Interventions

08:00 - 08:10 How Venous Intervention Differ from Arterial Intervention

08:10 - 08:20 Varicous Veins Intervention

08:20 - 08:30 TBA

08:30 - 08:40 DVT Intervention

08:40 - 08:50 Venous Intervention Case

08:50 - 09:00 IVC Compression

09:00 - 10:00 Valvular Interventions

09:00 - 09:10 Latest on TAVI

09:10 - 09:20 Case # 1 Para-Valvular Leak Closure For Failed Surgical Aortic Valves

09:20 - 09:30 Case # 2 Mitral Valvoplasty

09:30 - 09:40 Case # 3 Mitral Clip

09:40 - 09:50 Minimally Invasive Concomitant Aortic and Mitral Valve Surgery

09:50 - 10:00 Case # 4 TAVI Case

10:00 - 10:30 Coffee Break and Exhibition

10:30 - 12:10 Interventional Electrophysiology

10:30 - 10:40 WPW in An Athlete: To Ablate Or Not To Ablate?

10:40 - 10:50 Supra-ventricular Tachycardia: A Challenging Case

10:50 - 11:00 His Pacing: Advantages Over Right Ventricular Pacing

11:00 - 11:10 Appendage Occlusion Devices In Preventing Cardio-embolic Events.

11:10 - 11:20 Ventricular Tachycardia: An Interesting Case

11:20 - 11:30 Subcutaneous Defibrillators: Advantages And Disadvantages

11:30 - 11:40 Leadless Pacemakers: Patient Selection And Benefits

11:40 - 11:50 Atrial Fibrillation Ablation: Mortality Benefit?

11:50 - 12:00 Intra-cardiac Defibrillators: Reducing Rate Of Inappropriate Shocks

12:00 - 12:10 Injectable Event Recorder

12:10 - 13:40	SCALE / STEMI	12:00 - 13:30	ISEVS Session 2 The Latest Advances in Treatment of Aortic Aneurysms
12:10 - 12:20	Latest Guidelines on STEMI	12:00 - 12:10	Fast Track EVAR: The Results of the LIFE Trial
12:20 - 12:30	Pharmaco-Invasive Strategies for STEMI	12:10 - 12:20	A New Device for Endovascular Treatment of TAAAs: The Colt Device
12:30 - 12:40	Case # 2 STEMI TBC	12:20 - 12:30	Benefits of Low Profile EVAR in Women: The LUCY Study
12:40 - 12:50	Non-Culprit Intervention During STEMI	12:30 - 12:40	Stroke and Thoracic Aortic Interventions
12:50 - 13:00	Case # 3 No Reflow TBC	12:40 - 12:50	Centralization of Flow Concept is Safe and Efficient in Type A and B Aortic Dissections: The Results of the Streamliner and Dragon Trials
13:00 - 13:10	Use Of Triple Therapy Post-Stenting: Between Devil And Deep Sea?	12:50 - 13:00	New Developments in Endovascular Repair of TAAs
13:10 - 13:20	Case # 4 Stent Thrombosis,	13:00 - 13:10	Frozen Elephant Trunk and Thoraflex Graft for Treatment of Thoracic Aortic Disease
13:20 - 13:30	Case # 5 STEMI in CABG	13:10 - 13:20	Strategies and Patient Safety and Resource Utilization in EVAR: The LIFE Study
13:30 - 13:40	Q&A	13:20 - 13:30	Challenging Case Presentation
