FOR EDUCATION AND RESEARCH

Swedish Medical Center, *Cherry Hill Campus, Conference Center Auditorium*, Seattle, Washington
500 17th Avenue, Seattle, WA 98122 - (206) 320-2000)-East Tower Auditorium
June 28-30, 2018 ♦ Up to 20 CECH (10 Radiology Credits 🦿)

GOALS & OBJECTIVES:

The attending practitioner should be able to have a better understanding of multiple topics and subjects discussed during up to 20 hours of continuing medical education classes with improvement in current knowledge and applications of treatment techniques for conditions involving the lower extremities.

- To better understand current treatment options for the management of lower extremity dermatology and gain a better appreciation for the wide array of diseases that can present in the skin and that cutaneous biopsy techniques are simple and well-reimbursed procedures that may be used in the practice of podiatric medicine. Biopsy techniques and dermoscopy will be reviewed, making notes of their indications, coding, and pearls to their application.
- To improve the recognition of failed hammertoe and bunion surgeries and to review the current recommendations for treatments of these conditions.
- To review current trends and biomechanical concepts for lesser metatarsal osteotomies and painful Triplanar bunion correction.
- To learn specific techniques for recognition, evaluation and management, including current medical and surgical treatment of tendon injuries and foot sprains in athletes.
- To provide additional understanding of limb salvage versus gait preservation in vascular disease and the options for the treatment of these problems.
- To better understand current treatment options for the management of calcaneal fractures and Achilles tendinosis.
- To review current medical and surgical benefits and consequences of ankle sprains and ankle joint biomechanics.
- To understand the use of medical marijuana in current practice and patient care technologies.
- To review the indications and techniques for 1st ray lengthening and distal tibial lengthening procedures.
- To learn updated information regarding biomechanical evaluations of the foot and total contact orthotic devices and the conditions that are treated with this modality.
- To explore diverse topics presented by medical professionals in specialized areas of podiatric medicine and surgery, dermatology and diagnostic imaging.
- To discuss the alternatives and options for the 1st tarsometatarsal arthrodesis procedure.
