

NOVEMBER 8-9, 2021

Pre-Intermediate Course in
Robotic Gynaecological
Oncology Surgery

GHENT, BELGIUM

Scientific programme

Chair: Prof Jordi Ponce

Faculty: Salvatore Gueli Alletti, Marc Barahona, Vanna Zanagnolo

NOVEMBER 8, 2021 (ORSI)

10:30	Welcome / Students Introduction / Course Objectives
11:00	Patient selection and port placement in advanced robotic surgery
	Patient selection
	Running an efficient
	Port placement and patient positioning for Si (X) an Xi
	Port placement and patient positioning and new instruments for Xi
	Discussion
12:00	Specific conditions in advanced robotic surgery
	Obesity
	Previous surgery
13:00	Lunch
14:00	Step by step:
	Simple Hysterectomy
	Pelvic spaces and Radical Hysterectomy
	Pelvic LND
	Aortic LND
	ICG guided LDN
	Nerve-sparing techniques
	Discussion
16:00	Coffee break
16:15	Dry Lab
	Docking and Port Placement for Si and Xi
	Standard exercises
	Personal improvement and competition between students
18:00	Adjourn
20:00	Working Dinner (ALL FACULTY and attendees)

NOVEMBER 9, 2021

(ORSI)

08:30	Wet Lab (Animal Model) - Part I
	Animal (Pig) Anatomy - either as a presentation (need a meeting room) or at the wet lab
	Port Placement
	Docking
	3rd Arm Utilization
	Advanced Energy Use
	Pelvic Lymph Node Dissection
	Complications & Management (bleeding, suturing)
	Troubleshooting
12:30	Lunch
13:15	Wet Lab (Animal Model) - Part II
15:00	Tips, Tricks, and Pearls
	Uterine Manipulators
	Use and injection of ICG
	Managing obstructing bowels. Adherence syndrome
16:00	Coffee break
16:15	Management of intraoperative complications
	Venous and arterial haemorrhage
	Ureter, bladder, bowel and nerve injuries
	Experts Video : disaster management
17:30	Adjourn

NOVEMBER 12, 2021

(Online)

15:00	Introduction
15.30	Video session
	Discussion - Interaction
