

2024 Comprehensive Obesity Management Symposium

Please join us for a two part free CME symposium addressing obesity and its common comorbidities of type 2 diabetes, metabolic associated steatotic liver disease and obstructive sleep apnea. The medical and surgical management of obesity as a chronic disease will be discussed in depth along with case study presentations.

Session 1 of 2: Saturday, February 3, 2024

8:30am Registration with brunch service

9:00am "Obesity as a Treatment Target in Type 2 Diabetes"

An overview of the connection between T2D and obesity. Discussion of the role of bariatric surgery and bariatric range weight reduction for treatment of diabetes. Review of emerging T2D and anti-obesity medications resulting in significant weight reduction.

Speaker: Jaime Almandoz, M.D.

UTSW Associate Professor of Endocrinology

UTSW Weight Wellness Medical Director

10:00am "Navigating the Transition from NAFLD to MASLD - A Call to Action for Non-GI Physicians"

Explaining the new nomenclature of Metabolic Dysfunction Associated Steatotic Liver Disease with an overview of the connection between MASLD, obesity and T2D. Discussion of AASLD guidelines and algorithms for identifying, risk stratifying and managing low risk MASLD patients in the community.

Speaker: Amin Amin, MD

UTSW Assistant Professor of Hepatology

11:00am Concluding remarks and networking

All sessions to be held at The Marriott Quorum in Addison
In person and virtual hybrid options available
