Dear colleagues,

We are excited to officially welcome you to Toledo, Spain and the XVII International Congress of Pediatric Pulmonology (CIPP XVII). CIPP remains the only international meeting devoted exclusively to pediatric respiratory medicine. Over the period of more than two decades, CIPP has acquired excellent reputation among practicing pediatricians and clinical academics as the premiere forum for sharing the new information in all areas of pediatric pulmonology, and as a unique place for interactions between the clinical and academic communities.

The CIPP faculty comprises leading specialists and researchers from all parts of the world, bound by the common purpose of improving the management of our young patients. Uniquely, the faculty includes strong participation from the developing countries, offering a rare window of opportunity for the developed and developing world to learn from each other. In addition to the plenary sessions and topic symposia, CIPP offers a number of interactive sessions, including research presentations, clinical case discussions, chest imaging quiz, and a series of hands-on courses in areas of great interest to our public.

Another unique aspect of the congress is a strong focus on the next generation of leaders, with a forum for Young Investigators to present their exciting work in unopposed sessions, and an Award program to promote attendance and active participation of junior researchers. The meeting has been organized in such a way that it minimizes time away from the office or university while allowing you to earn continuing medical education (CME) credits. By attending three consecutive days you can earn up to 24 CME credits.

For the Toledo Congress, we have continued our long-established and successful practice of having clinical and translational science session tracks covering all aspects of respiratory diseases in childhood - look for the labels and key for various tracks inside the program. The program has been expertly finalized by Drs. Sejal Saglani and Giovanni Rossi (Scientific Program Committee Co-Chairs), with the invaluable input from the Central Organizing Committee and our International Advisory Board. The areas which will be covered include the broad range of pediatric respiratory disorders, such as asthma and respiratory allergies, respiratory infections and their complications, neonatal lung diseases and their outcomes, cystic fibrosis, sleep disorders, critical care, rare lung diseases etc. This year, we have included exciting post-graduate courses on pediatric sleep disorders, new techniques for lung function testing in children, and statistics for the respiratory pediatrician.

We hope you will enjoy your time in beautiful Toledo

**Renato
T.MD PhD**

President, CIPP XVII

A handwritten signature in black ink, appearing to read 'R. T. MD PhD'.

LOCAL COMMITTEE PRESIDENT'S WELCOMING ADDRESS

Dear colleagues and friends,

It is our great pleasure to welcome you to Toledo and to the XVII International Congress of Pediatric Pulmonology (CIPP).

The "Imperial City" of Toledo is a unique historic city, perfectly suited to hold our unique CIPP, the only international congress fully devoted to pediatric respiratory medicine. Less than 100 km from Madrid-Barajas International Airport, Toledo has easy and convenient access by high speed train from Madrid. Visited by thousands of tourists each day, Toledo has a large and exquisite tourist industry offering a variety of hotels, restaurants, bares and mesones appropriate for every budget where your visit will be more than a pleasure.

The El Greco Congress Palace is located in the very heart of the Historic City of Toledo, a world heritage site since 1986, only a few steps from Arabic horseshoe-arched mosques, Sephardic synagogues and one of Spain's finest Gothic cathedrals. In the middle ages, Toledo was known as the 'City of the Three Cultures', a place where – legend has it – Christian, Muslim and Jewish communities peacefully coexisted. There are even deeper layers: Toledo was the capital of the Visigothic kingdom and even before, an important Roman city built upon the previous Celtic tribe's town. All those remains are crammed into its dense historical core and easily accessible from the Congress venue.

Impressive during the day, its beauty can be fully admired at sunset at Hermita del Valle, where you will enjoy a full view of the historic city. At night, Toledo reaches its highest value, taking you back to older times. Walking through its ancient streets, listening to your own steps, is a wonderful feeling not to be missed.

If you love art, the haunting canvases of El Greco, the influential, impossible-to-classify painter with whom the city is synonymous, are waiting for you at Santo Tome's Church, The Cathedral and several other places.

**Professor Antonio
Martinez-Gimeno**

President,
CIPP XVII
Local Committee

History and art are not the only qualities that flourish in Toledo. Our National Spanish Health System, a universal tax-supported health system run by seventeen different regional authorities, provides health indicators which rank in the world's top five with lower health expenditure than most industrialized countries, especially in pediatrics. Just ask, if you are interested.

As you can see, an outstanding scientific program mixed with a marvelous historic city is waiting for you in Toledo. We are looking forward to meeting you here in June 2018.

Thank you very much for coming.

A handwritten signature in black ink, consisting of stylized, flowing letters, likely 'AMG', written over a horizontal line.

POST-GRADUATE COURSE ON BRONCHOSCOPY: DIAGNOSTIC & INTERVENTIONAL

- 8:30: Presentation and welcome of the participants.**
Petr Pohunek Prague, Czech Republic
- 9:00: Introduction to the CIPP Pediatric Bronchoscopy Course.**
Petr Pohunek Prague, Czech Republic
- 9:10: History of Bronchoscopy and Pediatric Bronchoscopy in Particular.**
Juan Anton-Pacheco Madrid, Spain
- 9:30: Principles of Bronchoscopy - Equipment, Setting of the Bronchoscopy Room.**
Mikhail Kazachkov New York, USA
- 9:50: Indication of Bronchoscopy in Children.**
Mikhail Kazachkov New York, USA
- 10:15: Anesthesia and Sedation for Bronchoscopy in Children Including Tolerance and Complications.**
Petr Pohunek Prague, Czech Republic
- 10:40 - 11:00: Coffee Break**
- 11:00: Normal Anatomy of Upper and Lower Airways.**
Petr Pohunek Prague, Czech Republic
- 11:15: Special Diagnostic Procedures (Sampling of Material, BAL, Biopsy)**
Mikhail Kazachkov New York, USA
- 11:45: Interventional Techniques (FB, Stents, Dilatation, Coagulation, Laser...)**
Juan Anton-Pacheco Madrid, Spain
- 12:15 - 13:15: Lunch Break**
- 13:15: Videosession**
Petr Pohunek Prague, Czech Republic
Mikhail Kazachkov New York, USA
- 14:15: Practical Training at Three Stations**
Petr Pohunek Prague, Czech Republic
Mikhail Kazachkov New York, USA
Juan Anton-Pacheco Madrid, Spain
1. Insertion of Different Types of Bronchoscopes and Different Entries (Nasal, Oral, ETT, LMA)
 2. Handling and Driving from Various Positions / Differences of View in FBS and VBS
 3. Using Accessories (Brush, Forceps, Balloon)
 4. Bronchoscopic Intubation
 5. Examples of Intervention
- 16:45: Concluding Remarks and Closing of the Course**

► 09:00 - 12:00

| ROOM B

POST-GRADUATE COURSE ON CLINICAL RADIOLOGY

- 8:30 - 9:00:** Introduction and Short Interactive Quiz
(Using the Conference App.)
Paul Guillerman Houston, USA & **Thomas Semple** London, UK
- 9:00 - 10:00:** Foundations - Back to Basis
Thomas Semple London, UK & **Paul Guillerman** Houston, USA
1. Basics of Imaging Modalities (Mainly Chest Radiographs and CT)
2. Imaging Anatomy (CXR and CT)
 Airways, Lungs and Cardiovascular
3. Technical Aspects
 (Motion Reduction, Use of Sedation and GA etc...)
- 10:00 - 10:30:** Coffee Break
- 10:30 - 11:30:** Prematurity and Neonatal Lung Disease
Amir Kugelman Haifa, Israel & **Thomas Semple** London, UK
1. NICU Imaging (Including Tubes and Lines)
2. Complications (Pneumothorax, PIE etc...)
3. TTN, Meconium Aspiration, Old and New BPD
 (Appearance on CXR and CT)
- 11:30 - 12:30:** Infection
Heather Zar Cape Town, South Africa
Andrew Colin Miami, USA & **Paul Guillerman** Houston, USA
1. Typical and Atypical Pathogens and Hosts.
2. Consolidations, Nodules, Cavitation, Effusions and Empyema. Particulars of MTB.
3. Atypical Hosts – Immunodeficiency
 (Congenital and Acquired), Cystic Fibrosis...
- 12:30 - 14:00:** Lunch Break
- 14:00 - 15:00:** Congenital Thoracic Malformations
Andrew Bush London, UK & **Paul Guillerman** Houston, USA
1. Sequestrations, CPAMs, Bronchial Atresia.
2. Role and Timing of Imaging
3. Ultrasound, Radiographic, CT and MRI Appearances.
- 15:00 - 16:00:** Childhood ILD
Andrew Bush London, UK & **Paul Guillerman** Houston, USA
1. Revision of Secondary Pulmonary Lobular Anatomy and Application When Interpreting CTs of the ChILD Entities.
2. Radiographic and CT Appearances.
3. Role of Imaging within a Multidisciplinary Team
 Current Research (ChILDREN and ChILD-EU Initiatives)

16:00 - 16:30: Thoracic Applications of Ultrasound**Thomas Semple** London, UK**1. Pleural Disease, Extra-Pulmonary Assessment (Thyroid, Larynx, Thymus, Lymph Nodes, Diaphragm, Abdominal Features of Thoracic Disease).****2. Guidance of Interventional Procedures.****3.
