

Anaesthesia as a cancer outcome modifier

Thursday 02 November 2017

Organiser: Dr Max Allen, Middlesbrough

Programme

09:20	Registration & coffee
09:50	Introduction
10:00	Where is our change bar? 1H02, 1I05 TBC
10:30	Molecules: what is the basis of anaesthesia and cancer spread? 1A01 Prof Daquin Ma, London
11:10	Coffee
11:40	TIVA vs volatile 2A07, 3A03 Dr Tim Wigmore, London
12:20	Novel analgesic strategies 1D02, 1A02, 2E01, 3E00 Dr Irwin Foo, Edinburgh
13:00	Lunch
14:00	Regional anaesthesia 2G02, 2G03, 1A02, 3A09 TBC
14:40	Do what I do best vs standardised care 1I02, 3J02 Dr William Harrop-Griffiths, London
15:20	Have we reached the bar? 1H02, 1I05 TBC
15:50	Reflections on the day Dr Max Allen, Middlesbrough
16:10	Depart

Learning objectives:

1. Outline the increasing burden of cancer treatment on the NHS and reflect on how this will impact on their institution.
2. Plan anaesthetic techniques in line with current published evidence to optimise cancer survival
3. Outline novel opiate sparing analgesic regimes
4. Outline the challenges of individualised anaesthetic practitioner care vs standardised care
