Dear Colleagues,

It is my honor to welcome you to the Second International Multidisciplinary Breast Conference co-sponsored by the UAE Chapter of the American College of Surgeons and the American Society of Breast Surgeons. The conference will reveal up-to-date management of breast cancer from screening to diagnosis to treatment. It will highlight the importance of multidisciplinary care in managing breast diseases. The meeting will also promote breast subspecialization among different medical specialties that deal with breast diseases. The participation of world-renowned speakers as well as authoritative national experts in the field will ensure a fruitful and productive meeting.

In addition to the one and a half day of comprehensive general sessions, there will be pre-conference workshops and breakfast sessions. These workshops and breakfast sessions are for those of you who seek more in-depth understanding and knowledge of hot topics in breast cancer management.

I look forward to seeing you soon in Dubai...

13:00 CLOSING REMARKS

ACS Chapter | United Arab Emirates

The chapters of the American College of Surgeons (ACS) provide members with an opportunity to improve the quality of surgical care through engagement at the local level. With over 100 chapters around the world, there are several ways that ACS members can get involved.

Local chapters work in conjunction with the College to provide outstanding networking and educational opportunities, along with professional development resources through chapter meetings, conferences, and community outreach. ACS chapters share and support the mission of the College to be "dedicated to improving the care of the surgical patient and to safeguarding standards of care in an optimal and ethical practice environment."

ACS chapters also offer a forum for all of our members—from every surgical specialty—to communicate. Through the ACS chapters, members can become actively engaged in legislative advocacy efforts that directly affect the socioeconomic aspects of health care. Chapter membership is open to all members of the College.

The American Society of Breast Surgeons, the primary leadership organization for general surgeons who treat patients with breast disease, is committed to continually improving the practice of breast surgery by serving as an advocate for surgeons who seek excellence in the care of breast patients. This mission is accomplished by providing a forum for the exchange of ideas and by promoting education, research, and the development of advanced surgical techniques.
