**American Academy of Forensic Sciences • Pre-Registration Form**  
**72<sup>nd</sup> Annual Scientific Meeting • February 17-22, 2020 • Anaheim, California**  
**Pre-Registration Deadline – January 20, 2020**

**Three Ways to Register:**

**Register online** at [www.aafs.org](http://www.aafs.org)

**Scan & email** your registration form (three pages) to [registration@aafs.org](mailto:registration@aafs.org)

**Mail your form** with check, money order, or purchase order to: **AAFS, 410 N 21<sup>st</sup> Street, Colorado Springs, CO 80904**

Registration forms must be received by **Monday, January 20**, to be eligible to register for the 2020 Special Functions and to qualify for the discounted registration rate.

**Faxed registration forms are not accepted.**

**BADGE INFORMATION**

Salutation (*Dr/Mr/Ms*): \_\_\_\_\_ Badge First/Given Name: \_\_\_\_\_

Badge Last/Given Name: \_\_\_\_\_ Highest Degree Attained (one degree only): \_\_\_\_\_

Badge Agency/School Name: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

Badge City: \_\_\_\_\_ Badge State/Province: \_\_\_\_\_ ZIP/Postal Code: \_\_\_\_\_

Badge Country: \_\_\_\_\_

☐ **Registrant Minimum Age:** I acknowledge that all persons attending the meeting associated with this registration will be at least 18 years of age at the time of the meeting in February.

**“Accompanying spouse” registration** is only available to AAFS members paying the full meeting registration fee (Excludes: Non-Member, Student, Daily, and Workshop Only registrants).

☐ Yes (\$50) Name: \_\_\_\_\_

♦ **This reduced fee is intended for spouses, family members, or other traveling companions who are not members of the forensic science or legal community and may not be used for colleagues, students, or interns.**

**REGISTRATION INFORMATION**

Email: \_\_\_\_\_ Cell Phone: \_\_\_\_\_

Hotel: \_\_\_\_\_ First AAFS Meeting? ☐ Yes ☐ No

Vocational Status: ☐ Professional ☐ Student ☐ Academic ☐ Decision Maker ☐ Purchasing Agent ☐ Other

Gender: ☐ Male ☐ Female

Would you like to receive pre-meeting exhibitor mailings? ☐ Yes ☐ No

Emergency Contact Name: \_\_\_\_\_

Emergency Contact Phone: \_\_\_\_\_

**ADA ACCOMMODATIONS**

Please list any special dietary requirements: \_\_\_\_\_

Please list ADA accommodation requests: \_\_\_\_\_

**Please note:** This ADA Accommodations request refers to meeting/session accommodations (e.g., wheelchair access, assisted listening devices, etc.) and should specify what event(s) you are attending. ADA accommodations related to hotel room reservations should be directed to the hotel when making reservations. ADA Accommodations are required by the pre-registration deadline (January 20, 2020). Requests received after this date may not be processed or fulfilled in time. Venues may not be able to fulfill every special dietary request. Please be specific and use standard accommodation language to detail your dietary needs.

## SPECIAL FUNCTIONS

The following sessions are priced separately and are not included in the Registration Fees. Special Functions fill quickly due to limited seating. Registration for all Special Functions officially closes as of the **January 20, 2020**, pre-registration deadline. **AAFS has a firm policy that non-registered attendance or auditing is not permitted in these sessions.** (*AAFS Policy and Procedure Manual 3.1.3.3.*)

# REGISTRATION INFORMATION

---

The pre-registration deadline is **January 20, 2020**. Forms must be received by this date to qualify for the pre-registration rate and to register for Special Functions. Registration forms received after January 20, 2020, will be processed as on-site registrations.

## **THREE WAYS TO REGISTER**

- Register online at [www.aafs.org](http://www.aafs.org) through the AAFS Account Portal (<https://webdata.aafs.org/aafsweb/Security/SignIn.aspx>).
- Scan & email your registration form (three pages) to: [registration@aafs.org](mailto:registration@aafs.org).
- Mail your registration form, along with a check, money order, or purchase order to:  
AAFS  
410 North 21st Street  
Colorado Springs, CO 80904  
(Checks must be drawn on a U.S. bank in U.S. funds, made payable to AAFS.)
- Faxed registration forms are not accepted.

## **ONLINE REGISTRATION INFORMATION**

- Online registrants are required to have an AAFS Web Account to register for the meeting.
- If you are currently a member or applicant of the AAFS, you will need to login to your AAFS Web Account to start your registration.
- If you are not a member of the AAFS, but you are or have been an Author or Co-Author on a presentation (oral or poster) at an AAFS Annual Scientific Meeting, you will have an AAFS Web Account. Use the “Forgot User Name or Password” button found on the AAFS Web Login page to retrieve a forgotten password.
- If this is your first contact with the AAFS, you will need to create a new AAFS Web Account. Click the “Create Account” button on the Login Page.

## **REGISTRATION CONFIRMATION**

- When you register online, you will receive an email confirmation immediately.
- When you email or mail your registration form to AAFS, a confirmation email will be sent once your registration form is processed.
- Bring a copy of your confirmation letter to the on-site pre-registration desk for meeting check-in.

## **NEW THIS YEAR—LOST BADGE POLICY**

- Lost, misplaced, stolen, or forgotten badges will incur a replacement fee equal to the original purchase amount of your registration. If your badge was complimentary, the fee will be the current, on-site rate.

## **QUESTIONS**

- If you have any questions or need assistance with registration, contact the AAFS Office at (719) 636-1100, ext. 111, or by email at: [registration@aafs.org](mailto:registration@aafs.org).

# REGISTRATION INFORMATION

## PRE-REGISTRATION SAVINGS

The benefits of pre-registration cannot be emphasized enough!

Over 35% savings for AAFS members!

***This is the only chance to register for Special Functions (breakfasts, luncheons, workshops, and special sessions)!***

Your pre-registration form must be received by Monday, January 20, 2020.

| REGISTRATION FEES*                                                                   | Pre-Registration<br>Discount Rate | On-Site<br>Registration |

| 6. Non-Member Students                                                               | \$225                             | \$275                   |
| 7. AFTE Members**, IAAI Members**, IAI Members**                                     | \$375                             | \$500                   |
| 8. Daily Registrants                                                                 | \$225/day                         | \$275/day               |
| (Wednesday, Thursday, Friday, and/or Saturday admission to scientific sessions only) |                                   |                         |

\*Includes admittance into AAFS sessions starting with the Tuesday evening Welcoming Reception through the Saturday morning Scientific Sessions (excludes all sessions found in section "SPECIAL FUNCTIONS" of the registration form).

### \*\*Registration Requirement:

**AAFS Applicants** must have a completed application on file by the application deadline.

**Non-Member Trainees** must submit a letter from employer verifying trainee status to [registration@aafs.org](mailto:registration@aafs.org).

**Non-Member Students** must submit an official Verification of Enrollment confirming enrollment during February 2020 to [registration@aafs.org](mailto:registration@aafs.org). Not available to those in postgraduate internships, residencies, or fellowships.

**AFTE, IAAI, and IAI Members** must provide proof of current membership to [registration@aafs.org](mailto:registration@aafs.org).

## PRE-REGISTRATION DEADLINE

The **deadline for pre-registration** is January 20, 2020. Registration forms must be **received by** this date. Pre-registration forms received at the AAFS office after January 20, 2020, will be processed as on-site registrations and will cancel all Special Function selections (e.g., breakfast and luncheon seminars, workshops, and special sessions). Don't delay; register today via online, mail, or scan and email your pre-registration form as soon as possible to ensure your full participation and reduced registration fees. ***Faxed registration forms are not accepted.***

## REFUNDS

All requests for refunds must be made in writing via email ([hjefferson@aafs.org](mailto:hjefferson@aafs.org)) or mail to the AAFS headquarters. Canceled registration fees will be refunded as follows:

|                                    |                              |
|------------------------------------|------------------------------|
| Prior to December 1                | Full refund less \$25 charge |
| December 1-31                      | 75% refund                   |
| January 1-31                       | 60% refund                   |
| February 1-7                       | 50% refund                   |
| No refunds after February 7, 2020. |                              |

## ACCOMPANYING SPOUSE REGISTRATION

This reduced fee is intended for spouses, family members, or other traveling companions who are not members of the forensic science or legal community and should not be used for colleagues, interns, or students.

Accompanying Spouse registration includes a name badge only and is not eligible for Continuing Education credit, workshops, special session registration, or certificates of attendance. However, breakfast seminar and luncheon seminar tickets may be purchased by the pre-registration deadline. Accompanying Spouse registration is only available to AAFS members paying the full meeting registration fee (excludes Non-Member registrants, Student registrants, Daily registrants, and Workshop Only registrants). An Accompanying Spouse registration is available for an additional fee (\$50).

# ABOUT THE AAFS

---

For 72 years, the American Academy of Forensic Sciences (AAFS) has served a distinguished and diverse membership. Its 6,600+ members are divided into 11 sections spanning the forensic enterprise. Included among the Academy's members are physicians, attorneys, dentists, toxicologists, anthropologists, document examiners, digital evidence experts, psychiatrists, engineers, physicists, chemists, criminalists, educators, and others. Representing all 50 United States, Canada, and 60 other countries worldwide, they actively practice forensic science and, in many cases, teach and conduct research in the field as well. Each section provides opportunities for professional development, personal contacts, awards, and recognition. Many sections publish AAFS *Newsfeed* articles that keep their members abreast of activities and developments in their fields.

As a professional society dedicated to the application of science to the law, the AAFS is committed to the promotion of education and the elevation of accuracy, precision, and specificity in the forensic sciences. It does so via the *Journal of Forensic Sciences* (its internationally recognized scientific journal), the AAFS *Newsfeed*, its annual scientific meeting, the conduct of seminars and meetings, and the initiation of actions and reactions to various issues of concern. For its members and affiliates, AAFS provides expert witness referrals, job opportunity listings, as well as scientific reference studies. As the world's most prestigious forensic science organization, the AAFS represents its membership to the public and serves as the focal point for public information concerning the forensic science profession. Founded in 1948, the AAFS is headquartered in Colorado Springs, CO.

## AAFS Annual Scientific Meeting

---

Each February, the AAFS scientific meeting gathers together approximately 5,000 world-renowned professionals to present the most current information, research, and updates in their fields. More than 1,000 scientific papers, seminars, workshops, and other special sessions are presented. In addition, approximately 150 exhibitors showcase the cutting-edge technology and services of this ever-changing profession.

## Future AAFS Annual Meetings

---

### 2021 AAFS Annual Meeting

February 15-20, 2021  
George R. Brown Convention Center  
Houston, TX

### 2022 AAFS Annual Meeting

February 21-26, 2022  
Washington State Convention Center  
Seattle, WA

### 2023 AAFS Annual Meeting

February 13-18, 2023  
Rosen Shingle Creek  
Orlando, FL

### 2024 AAFS Annual Meeting

February 19-24, 2024  
Denver Convention Center  
Denver, CO

| Friday         | February 21     | 8:00 a.m.  | - | 12:00 p.m. |

## Lost Badge Policy

Lost, misplaced, stolen, or forgotten badges will incur a replacement fee equal to the original purchase amount of your registration. If your badge was complimentary, the fee will be the current, on-site rate.

## Attention Meeting Presenters

The *Journal of Forensic Sciences* encourages authors to submit previously unpublished reports and papers presented at the AAFS annual meeting.

For full instructions on manuscript preparation, consult the Information for Authors available at:  
<https://www.aafs.org/resources/journal-of-forensic-sciences/information-for-authors/>.

**Manuscripts must be submitted electronically via the *Journal of Forensic Sciences* Manuscript Central site:**  
<http://mc.manuscriptcentral.com/jofs>. For questions, please contact: [jfs.editor@att.net](mailto:jfs.editor@att.net).

Video and/or audio recording of any session(s) or parts thereof is not permitted without prior approval from the American Academy of Forensic Sciences.

English is the official language of the AAFS and its meetings; neither oral nor written translations will be provided.

Although precautions are taken to prevent schedule changes, speakers and program schedules may change due to unforeseen circumstances.

*As a courtesy to others, please silence your cell phone when attending the sessions.*

# AWARDS

---

The **Distinguished Fellow Award** and the **Outstanding Early Career Achievement in Forensic Science Award** will be presented on Wednesday, February 19, during the AAFS Annual Business Meeting. Please join us in acknowledging your most distinguished colleagues as they are presented with these prestigious awards.

---

## Distinguished Fellow

---

*Betty Layne DesPortes, JD, MS*

*Iain A. Pretty, BDS, PhD*

---

## Outstanding Early Career Achievement in Forensic Science Award

---

*Audrey M. Williams, PhD*

---

## 2020 Section Award Honorees

---

Section Awards will be presented during Section Business Meetings, also on Wednesday, February 19 (see Section Business Meeting start times on page 12). The Section Award recipients will be acknowledged again before the entire membership during the AAFS Annual Business Meeting.

### Anthropology Section's

T. Dale Stewart Award  
J. Lawrence Angel Award  
Ellis R. Kerley Research Award

H. Gill-King, PhD  
Saskia Ammer, MSc  
Gregory E. Berg, PhD

### Criminalistics Section's

Paul L. Kirk Award  
Mary E. Cowan Outstanding Service Award  
Meritorious Service Award

Jose R. Almirall, PhD  
Matthew R. Wood, PhD  
Jennifer S. Mihalovich, MPH

### Digital & Multimedia Sciences Section's

Outstanding Case Study Award

Outstanding Research Award

Brandon Epstein, BS  
Marla E. Carroll, BS  
Nicole R. Odom, MSFS  
Jesse M. Lindmar  
Josh Brunty, MS  
Catherine G. Rushton, EdD

### Engineering Sciences Section's

Founders Award

Michelle R. Hoffman, MS

### General Section's

John R. Hunt Award  
Paul W. Kehres Meritorious Service Award

Paul E. Kish, MS  
Joanna L. Collins, MFS

### Odontology Section's

Lester Luntz Award  
Reidar F. Sognnaes Award of Excellence in Forensic Odontology

Richard A. Weems, DMD  
Patrick W. Thevissen, PhD

### Pathology/Biology Section's

Milton Helpert Award  
Award for Achievement in the Forensic Life Sciences

Duarte Nuno Vieira, PhD, MD  
John R. Wallace, PhD

# AWARDS

---

## **Psychiatry & Behavioral Science Section**

Rosner Best Paper Award

Cristina Secarea, MD

## **Questioned Documents Section's**

Maureen Casey-Owens Award for Best Paper or Poster

Ordway Hilton Award

Nina Harnarine, BSc

Linda L. Mitchell, BS

## **Toxicology Section's**

Irving Sunshine Award

Ray Abernethy Award

Rolla N. Harger Award

June K. Jones Scholarship

Nathalie A. Desrosiers, PhD

Eric S. Lavins, BS

Christine Moore, PhD, DSc

Haley Mulder, BS

The FSF Jan S. Bashinski Criminalistics Graduate Thesis Assistance Grant will be presented on Wednesday, February 19, during the Criminalistics Section Business Meeting.

---

### **FSF Jan S. Bashinski Criminalistics Graduate Thesis Assistance Grant Recipient**

*Cameron M. Longo, BS*

The following awards will be presented on Wednesday, February 19, during the AAFS Annual Business Meeting. You'll want to be present to congratulate the recipients!

---

### **Humanitarian and Human Rights Resource Center's Clyde Snow Award Recipient**

*Duarte Nuno Vieira, PhD, MD*

---

### **Ambassador of Forensic Science Award Recipient**

*The New York County District Attorney's Office*

---

### **FSF Emerging Forensic Scientist Award Recipients**

*Helen M. Brandt, MS*

*Carrie Polston, BA*

*Ellyn A. Zeidman, MS*

---

### **FSF Warren-Young Scholarship Recipient**

*Pamela Carman, BA*

---

### **FSF Henry C. Lee Scholarship Recipient**

*Giacomo Musile, PhD*

## SECTION BUSINESS MEETINGS

---

### The Sections

The Sections of the American Academy of Forensic Sciences will hold their annual business meetings on Wednesday, February 19, 2020. Some of the sections will hold a luncheon prior to the start of the business meeting. **All Section Luncheons require pre-registration.** This is your opportunity to participate! Please attend and contribute to your section's future plans. Specific times are noted below:

| Section                           | Luncheon               | Business Meeting      |
|-----------------------------------|------------------------|-----------------------|
| Anthropology                      |                        | 2:00 p.m. - 3:45 p.m. |
| Criminalistics*                   | 12:00 p.m. - 1:00 p.m. | 1:00 p.m. - 3:45 p.m. |
| Digital & Multimedia Sciences**   | 12:30 p.m. - 1:45 p.m. | 2:00 p.m. - 3:45 p.m. |
| Engineering & Applied Sciences    |                        | 2:00 p.m. - 3:45 p.m. |
| General**                         | 12:00 p.m. - 1:30 p.m. | 1:45 p.m. - 3:45 p.m. |
| Jurisprudence**                   | 12:00 p.m. - 1:45 p.m. | 2:00 p.m. - 3:45 p.m. |
| Odontology                        |                        | 2:00 p.m. - 3:45 p.m. |
| Pathology/Biology**               | 12:00 p.m. - 1:15 p.m. | 1:30 p.m. - 3:45 p.m. |
| Psychiatry & Behavioral Science** | <b>CANCELED</b>        | 2:00 p.m. - 3:45 p.m. |
| Questioned Documents              |                        | 2:00 p.m. - 3:45 p.m. |
| Toxicology**                      | 12:00 p.m. - 1:45 p.m. | 2:00 p.m. - 3:45 p.m. |

\*This luncheon requires pre-registration and is open only to members of the Criminalistics Section.  
\*\* These luncheons require pre-registration.

## RECEPTIONS

---

### Welcoming Reception — Tuesday, February 18 — 6:00 p.m. - 8:00 p.m.

---

This opening event is your opportunity to meet old friends and to make new acquaintances. Snacks and cash bars will be available.

### AAFS 72<sup>nd</sup> Annual Wine & Cheese Reception — Thursday, February 20 — 6:00 p.m. - 8:00 p.m.

---

The AAFS Wine & Cheese Reception will be held to celebrate what promises to be an excellent 2020 program and to toast your return to the Academy's 73<sup>rd</sup> Annual Scientific Meeting in 2021 (Houston, TX)!

# LOCAL INFORMATION

## WELCOME TO ANAHEIM!

A city built on imagination, Anaheim is where you will find plenty of things to see and do. Visitors can enjoy the inviting beaches, unparalleled shopping, entertainment, trendy restaurants, lively art districts, beautiful historic landmarks, and legendary, yet always new and changing, internationally famed family attractions.

## CLIMATE

The average temperature is 70 degrees and you can find bright and sunny skies about 70% of the time.

## ANAHEIM CONVENTION CENTER

800 W Katella Avenue, Anaheim, CA 92802

The Anaheim Convention Center (ACC) first became a meetings and conventions destination in 1967, and the original construction consisted of the domed Arena. Since those early days, the ACC has completed a total of seven expansions plus several cosmetic renovations and updates.

Attendees will approach the ACC from Convention Way. They will drive along a corridor of palm trees and convention hotels toward the glass-walled towers that form the dramatic rotunda lobby of the main entrance. Taxis, buses, and cars move efficiently around a traffic circle, dropping off attendees, then moving back along Convention Way.

## TRANSPORTATION

Traveling to Anaheim is easy. With four major airports, there are several options for reaching your destination, including rental cars, shuttles, taxis, limousines, and ride apps (Uber/Lyft/Wings) companies.

### John Wayne Airport (SNA)

SNA is located 13 miles/21 km from Anaheim. It is approximately a 20-minute drive.

(<https://www.ocair.com/groundtransportation/>)

### Los Angeles International Airport (LAX)

LAX is located 35 miles/56 km from Anaheim. It is approximately a 50-minute drive.

(<https://www.flylax.com/en/lax-traffic-and-ground-transportation>)

### Ontario International Airport (ONT)

ONT is located 36 miles/58 km from Anaheim. It is approximately a 45-minute drive.

(<https://www.flyontario.com/parking-transports>)

### Long Beach Airport (LGB)

LGB is located 18 miles/29 km from Anaheim. It is approximately a 30-minute drive.

(<http://www.lgb.org/travelers/transit.asp>)

## ATTRACTIONS

### Disneyland® Park

Welcome to the place where imagination is the destination. For young and old, big and small—it's the happiest place on earth! Come build memories with your family that last a lifetime as you discover the wonder of this magical, fantastical world. When you enter one of the Lands that comprise Disneyland® Park, stories come to life around you, immersing you in tales from some of your favorite Disney films.

([disneyland.disney.go.com](http://disneyland.disney.go.com))

## LOCAL INFORMATION

### Knott's Berry Farm

This world-renowned theme park was built from the humblest of beginnings nearly 100 years ago. Starting with a simple roadside berry stand, then a restaurant serving mouthwatering chicken dinners, Walter and Cordelia Knott attracted long lines of customers to their Buena Park farm. To keep crowds entertained, the Knott family built an entire western-themed town that remains the heart of Knott's Berry Farm today. Anchored in its rich California history and charm, Knott's Berry Farm now bursts with attractions and entertainment for all ages.

(<https://www.knotts.com/>)

### Universal Studios Hollywood – Universal City

This film studio and theme park is located in the San Fernando Valley. It is one of the oldest and most famous Hollywood film studios still in use. It was initially created to offer tours of the real Universal Studios sets and is the first of many full-fledged parks located across the world.

(<https://www.universalstudioshollywood.com/>)

### Anaheim Garden Walk

An “eatertainment” destination that blends dining, nightlife, family-friendly fun, outdoor art, and unique shops in a single amazing location. Garden Walk is home to a distinctive collection of popular restaurants, a vibrant nightlife with two rocking dance clubs, retail stores, and a renowned live concert venue. Anaheim GardenWalk provides a one-of-a-kind guest experience and a world-class gathering place for locals and visitors.

(<https://anaheimgardenwalk.com/>)

### Center Street Promenade

Visit the rebirth of historic downtown Anaheim on Center Street Promenade, between Harbor Boulevard and Anaheim Boulevard to enjoy outdoor cafes, unique eateries, boutiques, the local farmers market, seasonal art shows, and street fairs.

(<https://www.centerstreetanaheim.com/>)

### Aquarium of the Pacific

This aquarium celebrates the planet's largest and most diverse body of water: the Pacific Ocean. Home to more than 11,000 animals, the Aquarium explores the waters of Southern California and Baja and the Northern and Tropical Pacific. A world of discovery awaits people of all ages, backgrounds, and interests.

(<http://www.aquariumofpacific.org/>)

### MUZEO Museum and Cultural Center

Come explore the various exhibits that engage the community in exploring and celebrating diverse heritage, culture, and arts through creative programming.

(<http://muzeo.org/>)

# LOCAL INFORMATION

---

## RESTAURANTS

### **Agio Ristorante**

*2085 S Harbor Boulevard*

Italian/California-inspired cuisine that incorporates the freshest ingredients and a celebration of flavors into distinctive seasonal fare.

### **Bubba Gump Shrimp**

*Anaheim Garden Walk, 321 W Katella Avenue*

Bubba's is a choice with a "down south" vibe, serving up delicious seafood dishes to amazing slow-roasted ribs and salads—all served up in a casual and fun atmosphere. Try the Shrimper's Heaven with a variety of shrimp dishes and sauces.

### **Buca di Beppo**

*11757 Harbor Boulevard*

Buca di Beppo gets to the heart of fresh Italian cooking with favorites like Chicken Carbonara, Baked Rigatoni, or Spaghetti with famous half-pound meatballs! Buca serves family-style food in two portion sizes.

### **Decades Bar & Grill**

*195 W Center Street Promenade*

Are you dreaming of high-top sneakers, big shoulder pads, fanny packs, or big hair? Serving deep fried lasagna, fried chicken sandwiches, grilled cheese, cheeseburgers, and more, this 80s- and 90s-themed restaurant and bar will transport you back in time.

### **House of Blues® Anaheim**

*400 W Disney Way Suite 337*

Featuring Southern-inspired dishes like the Voodoo Shrimp, the House of Blues® Restaurant & Bar brings a little rock to your walk as you seek a restaurant near the Convention Center. The energetic atmosphere and soulful food make it a fun stop for Happy Hour or dinnertime.

### **Jazz Kitchen**

*1590 South Disneyland Drive*

Jazz on over to the Jazz Kitchen, a savvy representation of New Orleans' dual legacies—food and music—served up in a whimsical setting depicting the charm, ambience, and hospitality of historic and contemporary New Orleans.

### **JT Schmid's Brewhouse & Eatery**

*Anaheim Garden Walk, 2610 E Katella Avenue*

JT Schmid's takes great pride in offering a delicious selection of handcrafted microbrews, steaks, pasta, pizza, and salads. They offer a California casual environment, but are committed to providing quality food and outstanding service that is world class.

### **McCormick & Schmick's Grille**

*Anaheim Garden Walk, 321 W Katella Avenue*

McCormick & Schmick's Grille specializes in aged steaks, poultry, and seafood, offering dozens of rotating preparations daily for both lunch and dinner.

### **Mix Restaurant & Lounge**

*Hilton Anaheim, 777 Convention Way*

Located in the Hilton Anaheim on Convention Way, the Mix Restaurant & Lounge serves a variety of imaginative dishes that tout organic and regional ingredients. For quick bites or a signature cocktail, head to the hip Mix Lounge.

### **Morton's The Steakhouse**

*1895 S Harbor Boulevard*

A sophisticated steakhouse welcomes diners looking for a decadent evening meal. Specially priced bar bites are offered Monday through Friday during the Power Hour.

### **nFUSE Bar and Kitchen**

*Anaheim Marriott, 700 Convention Way*

The nFuse Bar And Kitchen at the Anaheim Marriott serves California cuisine influenced by cultures around the globe. Head to the bar to enjoy an impressive selection of craft beer, 65+ varieties of whiskey, premier wines, and handcrafted cocktails.

### **Roy's Restaurant**

*Anaheim Garden Walk, 321 W Katella Avenue*

Roy's Restaurant is one of the finest seafood restaurants in the area. The lounge offers two lovely Aloha Hours, one in the early evening and one after dinner. You will want to try the Hawaiian Martini and their famous Roasted Macadamia Nut Crusted Mahi Mahi.

### **Ruth's Chris Steakhouse**

*2041 South Harbor Boulevard*

Stop into the dinner-only restaurant for a signature sizzling steak served on a 500-degree plate with a selection of entrée accompaniments like lobster tail and shrimp. The steak dinner, done right, is paired with a world-class wine list. Visit during Sizzle, Swizzle, Swirl Happy Hour for \$9 drink specials, full-sized appetizers like the spicy shrimp, and other delicious menu items.

### **Tony Roma's Steak House Restaurant**

*1640 South Harbor Boulevard*

Tony Roma's is legendary for ribs. You can also enjoy steaks, the Kickin' Shrimp, or Onion Loaf in the casual atmosphere. Enjoy the appetizer samplers and mini desserts.

## ACCOMMODATIONS

---

The AAFS has selected the Hilton Anaheim as its host hotel during the 72<sup>nd</sup> Annual Scientific Meeting in Anaheim, CA. Located directly across from the Anaheim Convention Center, it is a short walk to attend meeting events. Enjoy your stay in a room designed with comfort and convenience in mind, providing a place to unwind or to catch up on work. Sleep soundly in the Hilton Serenity bed. Enjoy 32-inch flat panel HDTVs with HBO®, CNN®, and ESPN®. Work productively at the work desk featuring an ergonomic chair. Rejuvenate in the morning with the convenient coffee maker and complimentary coffee and tea. Additional amenities include five on-site dining venues, lounge, food court, on-site convenience store, fitness room, pool, and much, much more!

Early reservations are recommended to take advantage of the group-contracted rates. Please be sure to cancel your reservation if you are unable to attend or you cannot use the reservation. This will make the rooms available for other attendees and will help AAFS avoid the financial penalties associated with cancellations made after the room block closes.

Please have the following information handy when you go to make your reservations:

**Meeting Dates:** Monday, February 17, through Saturday, February 22, 2020

**Group Name:** AAFS Annual Meeting

**Group Code:** FOR

**Call-in #:** 877-776-4932

**Web-link:** <https://book.passkey.com/go/AAFS>

**Room Rate:** \$199

Hilton Anaheim  
777 Convention Way  
Anaheim, CA 92802

### **Attend the Annual Business Meeting of Fellows and Members to Win a Complimentary Meeting Registration!**

The Annual Business Meeting of the Fellows and Members of the AAFS will be held Wednesday, February 19, 2020, at 4:15 p.m., at the Anaheim Convention Center in Anaheim, CA. It is essential that all Fellows and Members attend this very important meeting in order to reach a quorum for the voting process. Agenda items include the election of 2020-21 Officers, consideration of bylaw amendments, presentation of the Gradwohl Medallion, Distinguished Fellow, and Outstanding Early Career Achievement in Forensic Science Awards, and recognition of all Members being promoted to Fellow status. You also will be briefed on AAFS activities during the past year and plans for the future.

As an incentive to attend, all Fellows and Members present will automatically be entered in a drawing for a complimentary meeting registration to attend the 2021 AAFS Annual Scientific Meeting in Houston, TX.

# CONTINUING EDUCATION

---

## General Information

---

All meeting sessions are lectures with one or more speakers. Continuing professional education credits will be offered for physicians, dentists, and attorneys. Continuing education credit applications have been submitted for physicians, nurses, and dentists. Attorneys may request CLE credit; please see the “Legal” section on page 19.

To register for continuing education credit, please complete the appropriate section on the meeting Registration Form. An individual must be a registrant to obtain continuing education credit. Fees charged for continuing education credits are based on projected costs of providing the various types of continuing education credit. The AAFS has adopted a user-pay approach so that those individuals who benefit from the specific continuing education program are responsible for the costs incurred.

In order to be in compliance with accrediting organizations, introductions, breaks, and lunches have been deducted from the total hours. Please note that continuing education credit is not available for all sessions. All continuing education credit recipients will receive documentation regarding the number of continuing education hours awarded. Attendance reports are filed with the appropriate state or national agency, as required.

## Learning Objectives of the AAFS Continuing Education Program

---

- Recognize the perspectives and roles of the various forensic science disciplines
- Assess current concepts and practices
- Discuss relevant forensic science issues related to science, evidence and the law
- Identify strategies for researching descriptive studies, technology and methods, diagnostics, interpretation and testimony
- Review administrative functions performed by forensic scientists

## Faculty Disclosure Policy

---

As a sponsor of continuing education, the American Academy of Forensic Sciences must insure balance, independence, objectivity, and scientific rigor in all its educational activities. All faculty participating in a sponsoring activity are expected to disclose any significant financial interest or other relationship: (1) with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services discussed in an educational presentation; and, (2) with any commercial supporters of the activity. (Significant financial interest or other relationship can include such things as grants or research support, employee, consultant, major stockholder, member of speaker’s bureaus, etc.) AAFS has an established policy regarding conflicts of interest that includes decisions the Program Committee members may make in selecting content for the Annual Scientific Meeting Program. By serving on the committee, regardless of role, each member has agreed to comply with Section 1.4.7. of the *AAFS Policy and Procedure Manual*.

To serve on the 2019-20 Program Committees, it is required that AAFS staff members, program committee members, and reviewers complete a Conflict of Interest form before they are provided access to review submissions for the program. For continuing education accreditation purposes, the disclosed relationships are published below so that learners are aware of the nature of any relationships that may impact the selection of presentations for the program. If a committee member failed to provide complete disclosure of a relevant financial interest or relationship, the committee member or reviewer was not allowed to serve. The executed Faculty Conflict of Interest forms are on file in the AAFS Office.

## American Board of Criminalists Approval

---

The American Academy of Forensic Sciences (AAFS) is approved by the American Board of Criminalistics (ABC) to offer continuing education points for approved workshops for criminalists and forensic scientists. The ABC maintains responsibility for the program, and credit may be awarded to ABC Fellows, Diplomates, and Affiliates.

# CONTINUING EDUCATION

---

## Overall Purpose and Objective Statements for Major Aspects of AAFS Programs

---

### *Workshops and Special Sessions*

**Purpose:** To provide an opportunity for experts to present material and to lead discussion and practical exercises related to forensic science methods, procedures, diagnosis, investigation, professional relations and practices, communication, administration, and professional development.

**Educational Objectives:** Detailed individually in each workshop and special session announcement and description.

**CE Credit:** Varies from 1.5 credit hours to 16 credit hours.

### *Breakfast/Luncheon Seminars*

**Purpose:** To provide an opportunity for presentation and discussion of relevant historical and current topics of forensic science interest related to specific case investigations, or general or specific investigative needs and procedures, methodologies, and testimony.

**Educational Objectives:** Detailed individually in each breakfast/luncheon seminar announcement and description.

**CE Credit:** Designated for a maximum of .75 credit hour for Breakfast Seminars and 1.0 credit hour for Luncheon Seminars.

### *Plenary Session*

**Purpose:** To provide a multidisciplinary presentation and discussion of issues related to the forensic science profession.

**Educational Objectives:** Attendees will be able to: a) identify the challenges the forensic science profession has faced and will continue to face in terms of ensuring quality; b) identify ways to deal with the variances each challenge presents; and, c) identify the entities which have influence over setting the quality standards in the field of forensic science.

**CE Credit:** Designated for a maximum of 2.25 credit hours.

### *Oral and Poster Section Scientific Sessions*

**Purpose:** To provide an opportunity for presentation and discussion of case reports, descriptive studies, review presentations, research, administrative issues, and investigative/diagnostic methods regarding topics and issues of importance to a primary discipline among the forensic sciences.

**Educational Objectives:** To meet the educational objectives stated by each presenter for his/her presentation.

**CE Credit:** Varies according to the individual's session attendance. Designated for a maximum of 25.0 credit hours.

### *Last Word Society*

**Purpose:** To provide a retrospective forensic analysis of historical events and to provide education about the history and evolution of forensic sciences as well as the modern methods and technologies used to re-examine past events of forensic science interest. Emphasis is placed on the evaluation of the original opinions and case outcome and on the development of newer hypotheses based on the re-analysis.

**Educational Objectives:** To meet the educational objectives stated by each presenter for his/her presentation.

**CE Credit:** Designated for a maximum of 2.0 credit hours.

# CONTINUING EDUCATION

---

---

## Guidelines For Claiming Credit

---

As the sponsor of Continuing Education Credit, the AAFS recognizes that the forensic science disciplines are inextricably linked and that interdisciplinary knowledge is critical to promote competence in forensic practice. As a result, the claiming of credit for various continuing education activities related to medicine, dentistry, law, and other forensic disciplines need not be limited to one's primary professional specialty. For example, a forensic pathologist from the Pathology/Biology Section may gain very useful and relevant information by attending a presentation in the Anthropology Section scientific session. It is appropriate to claim continuing medical education credit for that session. Many other examples exist where the claiming of continuing education credit is appropriate for attending sessions that cover material related to, but which lay outside of, one's primary professional area of expertise.

It is the conference attendee's responsibility to document which program sessions were attended and to determine those sessions for which continuing education credit may be claimed. The AAFS operates under the assumption that meeting attendees will, in general, be unlikely to attend sessions that will not be beneficial to their professional practice and that the claim for continuing education credit is justified if a session contains scientific or practice-related information that may bring new knowledge, may affirm current knowledge, or may provide information that could possibly modify one's professional practices.

Those who wish to receive continuing education credit must register and pay the Continuing Education Credit fee on the meeting Registration Form. CE Credit Request Forms will be available at the registration desk. The completed forms must be returned to AAFS by the designated deadline.

---

## Categories of Continuing Education Credit Offered

---

---

### Dental

---

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint providership efforts between Postgraduate Institute for Medicine and the American Academy of Forensic Sciences.

Postgraduate Institute for Medicine is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of the credit hours by boards of dentistry. Concerns or complaints about a CE Provider may be directed to the provider or to ADA CERP at [www.ada.org/cerp](http://www.ada.org/cerp).

---

### Legal

---

Continuing legal education credit will be awarded on an hour-for-hour basis. Attorneys may file the AAFS-issued CLE certificate with their respective state bars. Please contact Continuing Education Coordinator Kimberly Wrasse, [kwrasse@aafs.org](mailto:kwrasse@aafs.org), no later than the January 20, 2020, pre-registration deadline if your state bar will not allow you to self-report. AAFS will apply for accreditation/approval from your state in this circumstance.

---

### Medical

---

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Postgraduate Institute for Medicine and the American Academy of Forensic Sciences. The Postgraduate Institute for Medicine is accredited by the ACCME to provide continuing medical education for physicians.

---

### Non Physician

---

A general non physician certificate of attendance will be available.

---

### General

---

General continuing education credit is offered for those practicing the various forensic science disciplines not represented in the aforementioned list.

---

| 1:45 p.m. | - | 4:50 p.m. | Criminalistics Session II                                              |

# CALENDAR OF EVENTS

---

3:00 p.m. - 5:00 p.m. AAFS 2020-21 Board of Directors Meeting  
7:00 p.m. - 9:00 p.m. Criminalistics Evening Session: *Criminalistics Believe It or Not!*

## Saturday, February 22, 2020

7:30 a.m. - 12:00 p.m. AAFS REGISTRATION OPEN

### Scientific Sessions — Morning

8:30 a.m. - 10:45 a.m. Psychiatry & Behavioral Science  
8:30 a.m. - 11:35 a.m. Criminalistics Session II  
8:30 a.m. - 11:45 a.m. Criminalistics Session I

# STUDENT ACADEMY

---

*Pre-Registration Required — \$15*

**Tuesday**

**February 18, 2020**

**9:00 a.m. - 2:00 p.m.**

---

The purpose of the Student Academy of Forensic Sciences is to bring to the attention of local area high school and college students the vital importance of the application of scientific principles to the administration of justice. It acquaints the participants with the role of the forensic science disciplines in the legal system as well as the education and training required for the career in each discipline. All high school and college-age students are welcome to attend.

*Chair:*

**Marilyn T. Miller, EdD**

Virginia Commonwealth University  
Richmond, VA

*Co-Chair:*

**Lynn A. Schneeweis, MS**

Massachusetts State Police Crime Laboratory  
Maynard, MA

**Sheila Willis, PhD**  
National Institute of Standards and Technology  
Gaithersburg, MD

**Learning Overview:** Attendees will have an appreciation of the impact the 2009 Report by the NAS, *Strengthening Forensic Science in the United States: A Path Forward*, has had on several forensic disciplines.

**Impact on the Forensic Science Community:** Forensic sciences have been under the shadow of the NAS Report for the past ten years. This symposium will impact the forensic science community by providing an update on the state of many disciplines with respect to method reliability and testimonial boundaries, both of which were called into question by the NAS Report.

**Program Description:** The Interdisciplinary Symposium will bring together speakers from a wide range of disciplines who will discuss their responses to the recommendations listed in the 2009 NAS Report, *Strengthening Forensic Science in the United States: A Path Forward*.

# INTERDISCIPLINARY SYMPOSIUM

---

*Pre-Registration Required — \$75*

## **S1      Progress in the Forensic Sciences Since the 2009 National Academy of Sciences (NAS) Report**

---

### **Program Description cont.:**

The NAS Report, *Strengthening Forensic Science in the United States: A Path Forward*, commonly referred to as the NAS Report by the forensic community, was released in February 2009 during the Annual Scientific Meeting in Denver, CO. This Report was unprecedented because it brought to light many issues that had been hampering the evolution of forensic science. It provided 13 comprehensive recommendations, starting with the establishment of a National Institute of Forensic Sciences (NIFS). This was described as an independent federal entity designated with the responsibility of supporting and overseeing forensic science across the country. The authors advocated that law enforcement agencies should no longer be the primary administrators of their crime laboratories and that medical examiner systems should replace coroner's offices. Laboratory accreditation, individual examiner certification, and standardization of procedures were additional recommendations proposed in the NAS Report. Two significant recommendations to the forensic sciences, more specifically to the pattern-based evidence disciplines, revolved around: (1) improving their scientific foundations and reliability through research and validation, and (2) ensuring the accuracy of testimony offered by experts in court. Many of the NAS recommendations have not come to fruition, including the creation of NIFS. However, changes have occurred in response to some of the recommendations. Various questions can be posed to assess the impact of those changes. Has the community devoted time and resources to validating current techniques and methods? Are new disciplines embracing the scientific method? What does a "match" or an "identification" mean today? How conclusively are examiners allowed to state their results? What does the future hold for forensic expert testimony? Have court systems outside of the United States taken any notice of the changes occurring here?

This year's symposium will feature 13 speakers across both scientific and national borders who will provide their perspectives on how the NAS Report has changed (or not) their business practices over the past decade. Many of the forensic disciplines discussed in the report will be addressed, including DNA, friction ridge, firearms, documents, odontology, and digital/multimedia evidence examination. Responses in crime scene analysis and medicolegal investigations will be presented as well. Members of the legal community will also share their thoughts on how they interpret the conclusions made by forensic experts in written reports and in trial. In addition, the efforts of the National Institute of Justice (NIJ) to fund research in these areas will be discussed. This symposium intends to be a valuable session to forensic science practitioners, managers, and legal representatives.

# YOUNG FORENSIC SCIENTISTS FORUM

---

*Pre-Registration Required — \$0*

## S2 25 Years of Crossing Borders: Young Forensic Scientists and Their Collaborations

**Tuesday**

**February 18, 2020**

**8:30 a.m. – 5:00 p.m.**

**6.0 CE Hours**

---

*YFSF Chair:*

**Zain Bhaloo, MSc**

Canada Border Services Agency  
Ottawa, ON, CANADA

*Ex-Officio:*

**Alex J. Krotulski, MS**

Center for Forensic Science Research & Education  
Willow Grove, PA

*YFSF Committee Members:*

**Brittany N. Beyer, MS**

Houston Forensic Science Center  
Houston, TX

*Program Chair:*

**Catherine O. Brown, MSFS**

Center for Forensic Science Research & Education  
Willow Grove, PA

**Amber J. Smith, MSFS**

Houston Forensic Science Center  
Houston, TX

*Program Co-Chair:*

**Hannah N. Simmons, BS**

Raleigh, NC

**Learning Overview:** After attending this presentation, attendees will better understand forensic science and how everyone's work can impact and enhance other scientists, and vice versa, regardless of the discipline. In addition, attendees will learn about the advantages and importance of proper resume writing and interviewing skills.

**Impact on the Forensic Science Community:** The Young Forensic Scientists Forum (YFSF) has historically provided a venue for those forensic scientists with less than five years of professional experience to interact with, and further integrate into, their prospective fields as well as to learn about all the other disciplines. The YFSF should provide the space and opportunity for attendees/speakers to grow, develop, network, and learn from one another. This will allow young scientists the confidence to progress in their fields and one day hopefully provide the same opportunity to another young scientist.

**Program Description:** This special session provides necessary information to young forensic scientists regarding the various disciplines within the AAFS and will serve as a forum to exchange, discuss, and cultivate new ideas. This full-day program has been put together to cover a wide range of topics and inform attendees as to how these topics relate to other, sometimes unrelated, disciplines, techniques, and individuals. The YFSF aims to show all young forensic scientists that what makes us special isn't just who we are alone, but also who we are together.

Every year the American Academy of Forensic Sciences draws in thousands of globally recognized experts and professionals to present research, hold workshops, and showcase the various disciplines represented within the Academy. Further, the YFSF offers two opportunities for young forensic scientists to present their own work or research: the Bring Your Own Posters (BYOP) Session and the Bring Your Own Slides (BYOS) Session.

The session will feature speakers from many of the AAFS sections who will discuss their work and how they crossed borders, figuratively and literally, to collaborate with other disciplines. Through these presentations, attendees will learn how experienced practitioners and professionals have contributed to forensic science as a whole and how their work has benefitted from and was helped by interdisciplinary combining of knowledge bases. With a rapid push for specialization within a given discipline, it has remained vital for leaders in forensic science to remember the importance of cross-discipline collaboration and partnership. Through this Special Session, forensic experts will provide mentorship to young forensic scientists by inspiring interdisciplinary cooperation in casework, research, and community engagement.

## **S2      25 Years of Crossing Borders: Young Forensic Scientists and Their Collaborations**

---

Finally, in the spirit of interdisciplinary collaboration and to honor our commitment to improving and advancing communication, for the first time the YFSF is seeking to provide the opportunity to attendees to network with AAFS members and many others to encourage the sharing of information and experiences. This year's Special Session has been re-designed to incorporate a networking morning coffee break where all YFSF attendees and distinguished members from the AAFS sections can meet, mingle, and have discussions. Further, the discussion and resume review panel has been lengthened and will be enhanced by the addition of a speaker specifically addressing resumes and interview preparation, so don't forget to update and bring several copies of your resume with you!

### *Speakers:*

---

**Steven C. Batterman, PhD**

Cherry Hill, NJ

**Brittany N. Beyer, MS**

Houston Forensic Science Center

Houston, TX

# FORENSIC SCIENCE EDUCATION PROGRAMS ACCREDITATION COMMISSION (FEPAC)

---

*Pre-Registration Not Required — Open to All Meeting Attendees*

## Accreditation of Forensic Science Academic Programs Through the FEPAC

**Tuesday**

February 18, 2020

8:30 a.m. – 12:45 p.m.

---

*Chair:*

**Dwight E. Adams, PhD**  
University of Central Oklahoma  
Forensic Science Institute  
Edmond, OK

*Commissioner:*

**Sarah J. Seashols Williams, PhD**  
Virginia Commonwealth University  
Richmond, VA

*Commissioner:*

**Jason L. Schroeder, MS**  
Harris County Institute of Forensic Science  
Houston, TX

*Accreditation & Outreach Coordinator:*

**Nancy J. Jackson**  
American Academy of Forensic Sciences  
Colorado Springs, CO

*Commissioner:*

**Patrick A. Eller, MS**  
Metadata Forensics LLC  
Richmond, VA

**Learning Overview:** Upon completion of this session, the participant should be able to understand the process of accreditation through the AAFS FEPAC mechanism and be able to participate in the process as a reviewer of academic programs. Attendees from academic programs will also learn about the process of accreditation from different perspectives.

**Program Description:** This session has been developed to assist academic institutions offering undergraduate and graduate degree programs in forensic science and forensic digital evidence to prepare for the accreditation process through the FEPAC. This session will also assist future on-site evaluators (academic and practitioners) to prepare for on-site evaluations of academic programs. Successful completion of this one-day session will qualify participants for consideration to serve as on-site evaluators for FEPAC in the future (please note that participants must still meet other FEPAC requirements, such as membership in the AAFS and designation as either a practitioner or academician).

This training session will highlight updates to the FEPAC Standards for Accreditation and provide valuable information for both program directors and on-site evaluators.

The FEPAC is a standing committee of the AAFS with a membership that includes five educators, five forensic science practitioners, and a public member as voting members. The mission of the FEPAC is to maintain and enhance the quality of forensic science education through a formal evaluation and recognition of college-level academic programs. The primary function of the committee is to develop and maintain standards and to administer an accreditation program that recognizes and distinguishes high-quality undergraduate and graduate forensic science programs. Forty academic programs have successfully completed the accreditation process since 2003. Additional information on FEPAC can be found on the FEPAC website: <http://fepac-edu.org>.

# EVENING SESSION

*Pre-Registration Not Required — Open to All Meeting Attendees*

## ES1 Dracula, Twilight, and Blood Cults: Why Is It That Vampires Never Die?

Tuesday

February 18, 2020

8:00 p.m. – 10:00 p.m.

Corina Freitas, MD\*  
Syracuse, NY

George D. Annas, MD\*  
State University of New York  
Upstate Medical University  
Syracuse, NY

Jarrold A. Marks, MD\*  
Tufts Medical Center  
Boston, MA

**Learning Overview:** After attending this presentations, attendees will: (1) gain knowledge in the historical, medical, and psychoanalytic theories behind vampire beliefs; (2) advance skills regarding the manner in which “vampirism,” “vampire cults,” and “vampire communities” may present clinically and forensically; and (3) improve knowledge in historical reports of sadistic mass murder that may have contributed to vampire lore.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by increasing the existing knowledge of the fundamentals of the current field and thus improve forensic competence and performance.

From the ancient world to the present, vampires have held a tight grip on our fascination and fear and this has yet to be released. Traces of the legend are found in some of the oldest surviving mythologies and have spilled over into history and lore. Such mythology associated vampires with female figures representing potential destruction and with children in a state of dependency and helplessness. Similar beliefs are traced to ancient cultures across the globe, often depicting demonic female figures who fused relationships between the living and the dead, expressed through blood rituals as well as sexualized and aggressive exchanges.<sup>1</sup>

However, it was Bram Stoker who introduced us to the great Dracula in the late 19th century, and it was this quintessential Byronic hero who fathered countless other characters. From the monstrous presentations of Nosferatu, and Underworld’s Markus, to the charming Lestat and adorable sparkly Edward, and everything in between, our fascination with Dracula and his ever-evolving progeny shows no signs of decay.

In the modern era, some vampires have been transformed from evil beasts to misunderstood, and ostracized, supernatural heroes.<sup>2</sup> With this change, some of their ideologies went from that of those cursed with tormented “un-deadness” to those having (and sometimes offering) immortality; from forced isolation to offering a new community; from subhuman viciousness to displaying animal traits that convey energy and natural instincts. Flaunting the appeal of the aristocrat or outlaw, and inciting adventure at once terrifying and safe, the vampires in these stories have “evolved” into uncannily irresistible figures.<sup>3</sup> What is it that so intrigues us about them? Our speakers will lead us on a journey where we can explore this fascination via culture and psychoanalytic theory, as well as historical figures purported to have inspired the legend—tales of which include sadism and mass murder eclipsing any terror found in fiction.

Also discussed will be cases from the early 1800s where misperception of infectious illness caused mass hysteria, leading to the belief that the dead were rising from their graves and literally sucking vitality out of the living. This hysteria ultimately culminated in the cannibalistic rituals of the recently deceased to stop the dead from harming the living. However, such a ritual has been documented as recently as 2003, proving that these seemingly old beliefs from a forgotten time of darkness and irrational superstition for some reason draw appeal to this day.

Indeed, we are far from immune to such seeming madness. Modern vampire “cults” tragically show us how an obsession with these creatures can go too far. What drives such people into these alternate realities? Mental illness? Sadism? Or is there more complexity to these stories? Perhaps we will never know, but one thing is certain: while legends postulate many ways that vampires may be killed, time has proven that they will, indeed, live forever.

# ACADEMY CUP

*Pre-Registration Not Required — Open to All Meeting Attendees*

## Wednesday

February 19, 2020

8:00 a.m. – 8:45 a.m.

The AAFS 2020 Academy Cup will take place on Wednesday, February 19, 2020, before the Plenary Session. Section teams meet at 8:00 a.m., an hour before the Plenary Session, for instruction and team strategy. The game will start at 8:10 a.m. and consist of multiple-choice and true-or-false questions projected onto a screen to test each section's knowledge.

Each section's team is comprised of members, Past President(s), Past Vice President(s), Board Member(s) and/or Section Officer(s), Chair, Secretary, Young Forensic Scientist Forum (YFSF) volunteers, and anyone who wants to play. The YFSF volunteers will be assigned to sections on Tuesday at the YFSF Special Session. The game will be 30 minutes long, then all answer sheets need to be turned in.

The winning team will be announced and the Academy Cup trophy presented at the AAFS Annual Business Meeting (ABM) at 4:15 p.m. that same day. Teams should be present at the ABM to find out who won, and the winning team should be available at the conclusion of the ABM to have a group photo taken.

Doisy College of Health Sciences  
St. Louis, MO

## ***Speakers***

**Thomas F. Callaghan, PhD**

Federal Bureau of Investigations  
Quantico, VA

**John Fudenberg, MBA**

Office of the Coroner/Medical Examiner  
Las Vegas, NV

**David Reichert**

Gordon Thomas Honeywell  
Auburn, WA

**Overview:** Advances in technology have played a tremendous role in making many daily routines and extraordinary tasks seem ordinary. Individuals may live in one area but work in a different city, state, or even country. While **crossing borders**, individuals may use personal electronic devices to listen to a book, catch up on the latest news, or participate in conference calls. If using mass transit to make the commute, individuals may even prepare lectures, write publications, or simply crush candy to pass the time. Travel innovations have also made it considerably easier for individuals to attend meetings within their respective countries or at the **international** level.

Technological advances can be worthwhile. However, the innovations are often used for nefarious acts as well. Individuals share information across borders to support criminal enterprises; drugs are grown or manufactured in one country and transported to another; firearms purchased in one jurisdiction may be used to commit crimes in another; individuals, often exploited through the hope of a better life across international borders, lose their **independence** as they become victims of human trafficking; putative suspects may use available technological advances to avoid apprehension; and these are but a few of the many ways in which **integrity** is compromised for personal benefit or gain.

The American Academy of Forensic Sciences is a multidisciplinary organization, representing 11 sections across the forensic sciences with both American and International members. The Annual Scientific Meeting of the AAFS fosters **inclusiveness** across all sections, disciplines, and nationalities through collaboration, networking, and the cross-pollination of knowledge across the forensic community. It is beneficial for members of the community to convene to share in successes, to learn from failures, and to acknowledge advances in the field.

# PLENARY SESSION

---

*Pre-Registration Not Required — Open to All Meeting Attendees*

## *Crossing Borders*

---

### Overview cont.:

This program is designed to allow members of the forensic community to share in the knowledge gained through experience and to learn of advances on the horizon. John Fudenburg will discuss the strengths and weaknesses of the Clark County Coroner/Medical Examiner's Office during the handling of the worst mass shooting in modern United States history. An emphasis will be placed on the **interdisciplinary** efforts of the different agencies involved and the various deployment areas necessary during a mass fatality incident. Specific attention will be given to the Family Assistance Center and the on-going mental health/wellness of responders.

Thomas Callaghan will provide an overview of the Federal Bureau of Investigation's (FBI's) Next Generation Identification and Facial Recognition Programs, along with the FBI's Rapid DNA expansion of the Combined DNA Index System (CODIS) into the booking station. Similarities, differences, and privacy concerns with finger, face, and DNA biometric modalities will be discussed. This presentation will also reveal how DNA databases, like CODIS and Facial Recognition queries of government datasets and online photo galleries, use the Automated Fingerprint Identification System (AFIS) model daily to identify potential perpetrators.

Dave Reichert will share his observations on human trafficking from the perspective of a 34-year career officer who gathered **intelligence** as the lead investigator in the Green River Serial Killer case, ultimately bringing justice to the families of the 49 confirmed victims. This presentation will also detail the journey of an investigator to his 14 years as a United States Congressman and, finally, to his present role as an advocate for impactful global forensic policy.

The program will conclude with a shared learning opportunity for the attendees and speakers.

## **BS1 Ethno-Cultural and Religious Considerations in the Management of the Dead**

**Monday, February 17, 2020**

**7:00 a.m. – 8:30 a.m.**

**.75 CE Hour**

**Amber D. Riley, MS\***  
Deco Education & Consulting  
San Diego, CA

**Sakher J. AlQahtani, PhD\***  
King Saud University, College of Dentistry  
Riyadh, SAUDI ARABIA

**James F. Goodrich, FFOMP\***  
Cambridge, Waikato, NEW ZEALAND

**Learning Overview:** After attending this presentation, attendees will have a greater knowledge of the ethics, customs, norms, and taboos surrounding death and the dead for many minority cultures and religions within their professional and personal communities. This presentation will describe several cultures and religions that forensic professionals may encounter in their jurisdictions, both in the United States and worldwide, along with each respective approach to the management of their dead, based upon this better understanding.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by serving to assist the forensic professional in overcoming some of the obstacles that are present when identifying, investigating, and examining a decedent that is a member of these ethno-cultural communities.

Culture and religion profoundly influence many aspects of modern life. These factors also carry forward after death and may affect our management of the deceased. We recognize that increasing human migration across global geographical borders results in decedents sometimes being managed within a culture and community that is foreign to them. Loved ones, family, and members of the integrated community of the deceased also bring expectations, norms, and taboos to a forensic setting, and these influences may at times increase the complexity of and even hinder the process of examination, identification, and release of the dead. Although it is impossible to be intimately familiar with all religions and cultures, we as forensic professionals should be educated and sensitive to the roles each may play in our respective areas of expertise while avoiding the risk of stereotyping the deceased.

It is important to the process and to the outcome that the forensic professional understands not only the ethno-cultural and religious considerations associated with the deceased and other members of the affected community, but also their own and how these may relate to the context and perhaps to any biases that may be subsequently introduced. So, the complexity of the juxtaposition of different cultures and expectations may be multiplied in a situation where the forensic practitioner is anything other than the ideal of absolute neutrality.

The interplay of the deceased's culture and the forensic professional's legal and ethical responsibilities can pose significant challenges when experienced against a backdrop of factors, including gender and acculturation, notably in cases in which there are multiple and/or commingled fatalities being examined at one time in one spatial setting. Varied cultural and religious mores for managing the dead also dictate appropriate disclosures, privacy, and communication with the relatives of the deceased. Some difficulties can at least be partially overcome with an understanding of these sensitivities.

This presentation hopes to highlight many of the unique aspects of the belief systems and social constructs that may be encountered during the career of a forensic professional in the context of the management of the dead, and to provide tools and a framework for increased sensitivity and understanding. This, in turn, will provide an opportunity to allow the dignity and basic human rights of the deceased to perhaps be respected more fully.

Examples will be drawn from many cultural and religious backgrounds, including Islam, Judaism, Christianity, Hinduism, Buddhism, Native American, Maori, and Pasifika peoples.

*Pre-Registration Required — \$52*

### **BS2      The Working Stiffs: Writing and Publishing the Experiences of a Forensic Pathologist in Both Fiction and Non-Fiction**

**Tuesday, February 18, 2020**

**7:00 a.m. – 8:30 a.m.**

**.75 CE Hour**

**Judy Melinek, MD\***  
PathologyExpert, Inc  
San Francisco, CA

**T.J. Mitchell, BA\***  
PathologyExpert, Inc  
San Francisco, CA

**Learning Overview:** The goal of this presentation is to demonstrate how a collaboration between a scientist and a writer can effectuate the communication of complex forensic concepts to a lay audience.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by helping attendees be able to communicate scientific concepts to a lay audience, in writing and in testimony, and by navigating issues pertaining to confidentiality of medical information.

This presentation takes as its thesis the importance of reflecting scientific rigor in writing both non-fiction and fiction for a lay audience. The challenges of writing while continuing to testify as an expert witness in real-life criminal and civil court cases will be explored. In addition, the perpetual tension between fiction and science—maintaining a balance between narrative demands and medical verisimilitude—will be discussed.

Journal writing can be an effective way of documenting what a scientist encounters in clinical detail. Other ways of tracking forensic cases include spreadsheets and medical databases. In some offices, it is not uncommon to collect newspaper clippings of the deaths that are investigated and picked up by the media and place them in the case file. However, newspaper accounts may not be accurate; this presentation will provide examples of how eyewitness statements and assumptions made by the police or death investigators can be found to be in error when the body is taken to autopsy. Writing and documenting what a pathologist sees at the time of autopsy is crucial for clinical decision making and peer review, including review by outside experts. Furthermore, taking written notes about one's daily experiences and what one learns through those experiences can also become a psychological outlet: a way to "decompress" after a long day of working in extreme conditions, or a way to deal with the grief and anger of family members.<sup>1,2</sup> Writing can be a therapeutic exercise that supplements formal training in forensic pathology and should be encouraged in forensic fellowship training.<sup>3</sup>

Working in an understaffed and underfunded environment can also put stress on the forensic team and may incubate intramural tension. Mass fatality response, along with a backlog of routine cases delayed by ancillary lab studies, can add to the pressures pathologists experience. Journaling can help forensic professionals deal with the stresses of the job, but non-disclosure agreements and privacy policies may restrict professional communication and publication in a public forum. In academic writing, de-identification is used when sharing case reports, and this method can be used in writing non-fiction for public consumption. Fictionalizing actual forensic cases can allow scientists a way to explore the work that they do and share their experiences, both with other professionals and with the lay public.

A case report will be presented of a petty thief who stole a laptop and was chased down and shot dead in public by the laptop's owner. This case involved a complex gunshot wound trajectory analysis and the collection of property as evidence. Forensic-noir mystery writers such as Kathy Reichs, Patricia Cornwell, Jon Jefferson, and William Bass, all of whom worked in various capacities in the forensic sciences professional discipline, provided the inspiration to explore ways to educate the public about real-world forensic science through the use of a fictional narrative voice.

## **BS3      The Science Behind Traffic Accident Reconstruction With Real-World Crashes**

**Wednesday, February 19, 2020**

**7:00 a.m. – 8:30 a.m.**

**.75 CE Hour**

---

**Kurt D. Weiss, MS\***

Case Study Collision Science, LLC  
Santa Barbara, CA

**Darren Franck, MSME**

Advanced Engineering Associates, Inc  
Charleston, WV

**Learning Overview:** The goal of this presentation is to share with the forensic science community the data sources and detailed methodology used in traffic collision reconstruction.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by demonstrating through real-world case studies the data used and methodologies applied to the reconstruction of traffic collisions.

An analysis of four real-world crashes will demonstrate the science behind traffic accident reconstruction. Reconstructing a crash is a multidisciplinary process. The reconstructionist gathers objective and subjective information, performs case-specific research, then applies the fundamental principles of physics to determine, for example, impact classifications, vehicle heading, impact configuration, impact (closing) speed, velocity change or Delta-V (DV), rollover distance, roll count, and roll rate. The reconstruction results are important input to the injury analysis and the assessment of injury patterns, risk, and prevention.

The primary information source is the Traffic Collision Report, which may provide: (1) objective party information (e.g., occupant and vehicle year, make, model, Vehicle Identification Number (VIN)); (2) objective site information (location and roadway, intersection, and Global Positioning System (GPS) details), scene diagrams with measurements of physical evidence (tire friction marks, fractured glass, roadway scrapes and gouges, scarred tree bark, fractured signs or light posts, disturbed dirt and/or vegetation), point of impact, and vehicle rest locations; (3) at-scene police photographs of site evidence and vehicle damage; and (4) subjective information (e.g., party statements, vehicle code violations, police collision summary and primary collision factor identifying party and cause).

Case-specific research may include: (1) at-scene witness photographs, which are often taken with cell phone cameras; these photographs are crucial absent police photographic documentation of site and vehicle evidence; (2) security videos that can help refine the analysis by providing objective evidence of vehicle movements prior to and after the crash; (3) aerial photography from online image archives that orient and supplement scene diagrams; (4) drive-through videos that provide a street view of the roadway and/or intersection; (5) site inspections that clarify roadways, controls, and obstacles; (6) subject vehicle inspections with crush profile measurements document property damage and reveal relative impact alignment or vehicle movement; (7) Airbag Control Module (ACM) data that quantifies pre-crash vehicle speeds and accelerations and driver actions (e.g., swerving, braking); (8) subjective information (e.g., witness statements and deposition testimony) that helps qualify collision events and estimates of vehicle speeds, distances, and movements. These sources may also provide prior useful site, vehicle, or occupant history; and (9) exemplar vehicle inspections, scaled vehicle drawings, specifications, and crash test data that may be used to determine the collision severity.

An analysis of four real-world crashes demonstrate the science behind traffic accident reconstruction. Case 1 involved a fatal collision; vehicle crush measurements quantified collision severity. Case 2 was a vehicle-motorcycle crash; a download of ACM yielded pre-crash data. Case 3 describes a wrong-way, intoxicated driver in a high-speed crash; the patrol car's on-board video quantified vehicle impact speeds. Case 4 was a vehicle-motorcycle crash; stationary security videos quantified vehicle impact speeds.

---

*Pre-Registration Required — \$52*

## **BS4      A Tour of a Cannabis Extract Manufacturing Facility in Maine**

**Thursday, February 20, 2020**

**7:00 a.m. – 8:30 a.m.**

**.75 CE Hour**

---

**Jennifer A. Paris, BS\***

New Hampshire State Police Forensic Laboratory  
Concord, NH

**Anna K. Weaver, BS**

New Hampshire Department of Safety  
Concord, NH

**Learning Overview:** After attending this presentation, attendees will have a better understanding of the operation of a small state-licensed and inspected cannabis extract manufacturing facility.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by promoting an understanding of the processes used to concentrate cannabinoids, how products are diluted, prepared, and packaged in order to comply with the relevant laws and regulations, and may be helpful for attendees who are assisting in building a local or state jurisdiction's medical or recreational marijuana program.

The state of Maine enacted a medical marijuana law after a citizen-led ballot initiative passed in November 1999. Since that point in time, multiple amendments have been made to the statute following feedback from patients, caregivers, medical providers, and a specially developed task force. Although a 2016 law was passed to allow for the recreational use of marijuana, and a 2017 law was passed concerning taxation and other regulations surrounding recreational marijuana, the commercial sale of the plant and products made from it have not yet begun.

Today, Maine permits both growing and processing of marijuana by individuals holding a medical card (i.e., “patients”). In addition, patients and caregivers are allowed to use a third-party manufacturing facility to convert their harvested marijuana or hemp into concentrated forms. These facilities are registered, inspected, and licensed by the state of Maine. They are expected to adhere to strict procedures regarding site safety and security, the quantity and type of plants on site, the quantity of harvested product on site, the use of “inherently hazardous substances,” and the disposal of waste materials, among other standards.

This presentation will briefly cover the regulations in place for Maine's program, then focus on the specifics with respect to a small, registered manufacturing facility. Chemists from the New Hampshire State Police Forensic Laboratory were given the opportunity to tour one such facility in the summer of 2019 while extractions were in progress. This cannabis extract manufacturing facility employs supercritical carbon dioxide processing of harvested marijuana and/or flowering hemp grown by patients or their caregivers to produce highly purified concentrates devoid of terpenes. In addition, the facility was equipped with a closed-loop extraction system to produce butane honey oil, shatter, and “diamonds.” Discussions regarding purity, concentration, cannabinoid profiles, and all aspects of the operation, including the evolution of the facility's practices over time, took place with the owner/operator of the facility. Attendees will be informed regarding the outdoor grow area, extraction and purification processes, preparation of food products, and product packaging materials at the visited facility.

Given the increased number of states where cannabis products are legal for medical or recreational use, it is important for those involved in the analysis of seized drugs to have an understanding of the processes used to concentrate cannabinoids from harvested marijuana and flowering hemp.

*Pre-Registration Required — \$52*

## **BS5 Practical Aspects of Developing and Incorporating a Postmortem Computed Tomography (PMCT) Service Into a Medical Examiner's Office**

Friday, February 21, 2020

7:00 a.m. – 8:30 a.m.

.75 CE Hour

**Lauren Edelman, MD\***  
Travis County Medical Examiner  
Austin, TX

**Keith Pinckard, MD, PhD**  
Travis County Medical Examiner  
Austin, TX

**Learning Overview:** After attending this presentation, attendees will understand the concepts and considerations involved in incorporating PMCT into the practice of a medium-sized, regional medical examiner's office, including staffing, scanning protocols, triage of cases, study interpretation, and novel and alternative data storage solutions. Developing and incorporating a PMCT service is a complex project, with broad implications for many aspects of an individual office.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing a framework and blueprint that can be used to incorporate and implement this burgeoning technology within the scope of death investigation for medical examiner's and coroner's offices.

The services of a consultant were engaged as part of the budget request associated with purchasing the Computed Tomography (CT) scanner. The consultant provided guidance for technical and structural considerations critical for drafting the purchasing bid documents and review of the bids for the purchase of the CT scanner and associated equipment. After installation by the vendor, the consultant also provided the basic scanning protocols that are programmed into the scanner for ease of use and include protocols for standard adult, bariatric, pediatric, charred remains, skeletal remains, and decomposed remains. This is a key component, since standard protocols that are provided by CT scanner vendors are designed for clinically based studies on living patients.

As part of the purchasing contract, the forensic autopsy technicians, none of whom have formal radiology technology training, received in-person instruction in the practical aspects of operating the equipment. Performing the scans with the appropriate protocols requires minimal direct management by the forensic autopsy technicians. Once the protocols are in place and validated, scanning proved to be relatively simple and straightforward. Scanning is performed during routine working hours on a rolling basis as decedents are brought into the office; scans are completed prior to the processing and external examination of the body. All decedents that are physically capable of fitting into the CT scanner are imaged. The rationale for this is two-fold. First, scanning every decedent as a matter of routine may guide how the pathologist approaches the case. Second, scanning creates a permanent 3D radiographic record of the body that can be reviewed long after the body has been permanently altered by autopsy.

The scans are reviewed and interpreted by the forensic pathologists as a group during a morning conference prior to performing examinations and again individually when medical examiner reports are written. The medical examiners in the office received training in CT interpretation by two physicians with prior PMCT experience who were already on staff. The learning curve of CT interpretation is very steep; familiarity with visualizing cross-sectional anatomy in three dimensions simultaneously comes surprising quickly. Furthermore, because all decedents are scanned, each pathologist gets immediate feedback by comparing autopsy findings to what was observed on the scans—a practice that builds interpretive skills and confidence rapidly. Once the medical examiner staff is comfortable with reading CT scans, decisions can be made regarding which types of cases might be able to be supplanted by PMCT.

A novel cloud-based storage and image-viewing software solution was purchased rather than a traditional Picture Archiving and Communication System (PACS). It has virtually identical capabilities, including permanent long-term storage with system redundancy, at a fraction of the cost of a standard PACS solution. In the opinion of the regional medical examiner's office, PACS is a vastly more sophisticated and ultimately far more expensive solution than what is actually required for death investigation purposes. For offices affiliated with medical centers, it may be possible and cost-effective to "partner" and obtain a node on a hospital's PACS. However, offices without this benefit have struggled to devise a system tailored to the unique needs of death investigation without the associated burdensome cost of a PACS—a cost factor that may deter an office from obtaining PMCT capability altogether. It is thought that this regional medical examiner's office is the first office to pilot and utilize this type of storage and viewing solution.

As more death investigation offices around the country begin to integrate CT imaging as part of the physician's toolkit, it is critical to share operating procedures and innovative solutions to common problems to assist others in participating in this exciting advancement in the field of forensic pathology.

Quantico, VA

**Learning Overview:** After attending this presentation, attendees will have a better understanding of locating, identifying, and collecting evidence and the documentation of the crime scene associated with a mass casualty investigation. Attendees will also be aware of the policies and procedures for conducting a crime scene investigation (timeliness, thoroughness, and timely reporting) and casualty liaison briefings provided to the primary and secondary next-of-kin. This presentation will also enable attendees to understand how the psychological evaluation of the subject may or may not have affected the outcome of the trial by court-martial and the results of the court-martial.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by demonstrating that a mass casualty investigation must be conducted in a timely and thorough manner in order to provide the court with the best evidence for conviction. The psychological evaluation will assist in determining if the subject was mentally responsible, and, if so, whether he should receive life with or without parole or the death penalty.

SGT John M. Russell had been seen at the Combat Stress Center (CSC), Camp Liberty, Iraq, on three separate occasions and had a noon appointment on May 11, 2009. At approximately 1:41 p.m. on May 11, 2009, the United States Army Criminal Investigation Command (known as CID) was notified of the shooting of several personnel inside the CSC. The investigation revealed that at approximately 12:30 p.m. on May 11, 2009, SGT Russell entered the CSC and methodically shot and killed five United States service members (a Navy Commander and an Army Major, a Sergeant, and two Private First Classes). SGT Russell was also listed for the offense of attempted murder and aggravated assault when he fired at two soldiers and missed. The Navy Commander was the only victim known to SGT Russell. SGT Russell, who did not have a weapon, gained possession of his escort's weapon (an M16 rifle), ordered his escort from the vehicle, then drove back to the CSC where he opened fire on unarmed personnel. Due to the regulatory requirements, all soldiers were required to carry their assigned weapons at all times in the combat environment on most camps; the only exception was a medical facility. Soldiers entering the CSC were required to place their weapons in an arms room while being treated; therefore, all soldiers in the CSC were unarmed and vulnerable. SGT Russell was subsequently disarmed and placed under apprehension.

More than 28 CID special agents in Iraq were involved in processing the crime scene and interviews of the victims, witnesses, and subject. More CID special agents around the world were involved in the autopsies, background investigation of the subject, and developing information for the court-martial. The preliminary crime scene reconstruction took approximately one week (the crime scene was maintained for many years, until it had to be bulldozed). The special agents conducted bloodstain spatter analysis, ballistic reconstruction, and a plethora of other forensic analyses of the five separate areas where the victims were murdered.

SGT Russell was evaluated and it was determined he was not mentally competent to stand trial; SGT Russell was placed in a mental health facility where he was evaluated for approximately four years. During this time, he was seen by several mental health professionals, questioned to determine his mental status, and medicated until he was considered restored to competency and returned to military custody.

*Pre-Registration Required — \$52*

## **BS6      Is a Soldier's Combat Stress a Reason to Commit Five Murders?**

---

On May 15, 2012, prosecutors decided to seek the death penalty and SGT Russell's defense stated he would pursue an insanity defense. On May 18, 2012, I Corps, Joint Base Lewis-McChord (JBLM) released the General Court-Martial Convening Authority (GCMCA) findings. The GCMCA referred court-martial charges against SGT Russell to a General Court-Martial empowered to adjudge a capital sentence.

During the court-martial proceedings, the defense blamed the combat mental health professionals for SGT Russell's actions and indicated that they could have prevented this mass casualty. SGT Russell was subsequently found guilty and on May 16, 2013, an Army judge sentenced SGT Russell to life without the possibility of parole for the shooting death of two care providers, two patients, and an escort. The judge stated, "You are not a monster, but you have knowingly and deliberately done incredibly monstrous things."

## **L1      The Disappearance and Murder of Sierra LaMar: A Multidisciplinary Case Study**

**Thursday**

**February 20, 2020**

**12:00 p.m. – 1:30 p.m.**

**1.0 CE Hour**

---

**Melissa A. Dupée, MSFS\***  
Santa Clara County Crime Laboratory  
San Jose, CA

**Michelle L. Bell, BA\***  
San Jose, CA

**Learning Overview:** The goal of this presentation is to inform attendees of a complex homicide investigation that was heavily fueled by physical evidence examinations, including DNA, trace evidence, digital and video evidence, latent prints, and questioned documents.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by showcasing the ability for multiple forensic disciplines to work together to achieve the maximum potential of the evidence items submitted in a missing person case turned homicide.

Fifteen-year-old Sierra LaMar left her Morgan Hill, CA, home on March 16, 2012, but never made it to school. Her school bag, containing the clothes she'd been wearing the day she disappeared, and her discarded cell phone were found a short time later. Thus began an investigation that utilized multiple crime lab disciplines, culminating in a months-long 2017 trial that found Antolin Garcia Torres guilty of kidnapping and murder, even though Sierra's body has never been found.

DNA was instrumental in identifying a suspect. Biological evidence found on Sierra's clothes matched to Garcia Torres in the Combined DNA Index System (CODIS), and a later search of his vehicle yielded additional evidence. The DNA testing for this case, much of which was developed in the first few days following Sierra's disappearance, utilized a plethora of DNA techniques and resulted in a variety of conclusions, each of which required a different type of statistical analysis, including mixtures, paternity testing, and Y-chromosomal Short Tandem Repeats (Y-STRs).

Trace evidence played a big part in this case. The trace evidence analyses required travel to assorted sites in Morgan Hill to collect comparison samples for testing. Examinations of Sierra's clothing and Garcia Torres' vehicle revealed various types of trace evidence, including hair, fibers, glass beads, soil, botanicals, and insect parts. Extensive examinations were performed on Sierra's cell phone, which had turned on and off several times following her disappearance. This prompted a visit to the Samsung® facility in South Korea by an investigator involved in the case.

Questioned documents examination was performed when a notebook of Sierra's was discovered at school, with notes written in it suggesting she was thinking of running away. Video evidence was paramount in this case. At the beginning of the investigation, video evidence from near the school bus stop and from the school bus itself was reviewed to see if Sierra had made it that far that morning. Later, video from the parking lot of the defendant's home and from his transactions at a bank were converted to a format that could be more easily viewed in court. In addition, video showed the defendant a few nights before Sierra's disappearance purchasing only a gallon of bleach and a turkey baster—a strange purchase for a 21-year-old male to be making by himself at night.

Prior to the abduction of Sierra, there were multiple attempted kidnappings in Morgan Hill. Investigators, interested to see if they could somehow link these attacks to Sierra's disappearance, requested that a Taser®, left at one of the scenes by the perpetrator, be processed for latent prints. A latent fingerprint was developed on the battery of the Taser® and was identified as Antolin Garcia Torres' print. Therefore, these attempted kidnappings became a part of the Sierra LaMar trial, showing that the defendant had a history of attacking women, and he was found guilty of these crimes as well. The work conducted by all these forensic disciplines in conjunction helped find a suspect, connected him to other crimes, and put to rest several defense theories. Antolin Garcia Torres was sentenced to life in prison without the possibility of parole.

#### Bethany Hughes\*

University of California, Davis Medical Center  
Sacramento, CA

**Learning Overview:** After attending this presentation, attendees will better understand the role of brain fingerprinting to detect concealed information in forensic criminal cases.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by informing the competence of attendees through increasing the ability to interpret an emerging scientific method used to detect concealed information stored in the brain via the use of Electroencephalographic (EEG) brain responses/brainwaves.

Between 10% and 70% of criminal defendants claim crime-related amnesia; there is limited published literature on objective assessments of memory loss in a criminal setting. Interview techniques combined with psychological testing have been developed to assess possible malingering of memory loss. Investigators have long sought a reliable means of detecting deception. The Guilty Knowledge Test (GKT) is an early predecessor to brain fingerprinting and measures the individual's autonomic response to information known or not known about a crime.<sup>1</sup>

Recently, brain fingerprinting techniques using brain wave response have emerged as a scientific method to detect potentially concealed information stored in the brain. Brain fingerprinting techniques measure EEG brain responses/brainwaves and compute a determination of "information present" (the subject knows the critical information) or "information absent" (the subject does not).<sup>1</sup> According to this theory, if the individual is familiar with the information presented, a P300 brain wave is emitted and measured by an EEG.<sup>2</sup>

Farwell reports that in more than 200 test cases, brain fingerprinting yielded a 100% accuracy rate with a 0% error rate in distinguishing those who possessed specific target knowledge from those who did not.<sup>1</sup> As an example, in an experiment on 17 Federal Bureau of Investigation (FBI) agents, analysis using this P-300 brain fingerprinting technique yielded a 100% identification rate of FBI agents with FBI-relevant knowledge.<sup>1</sup> Dr. Farwell has coined the term "Farwell Brain Fingerprinting" (FBF) that he proposes has the ability to detect concealed information.<sup>1</sup>

The application of this FBF technique to forensic criminal cases was highlighted in the 2003 case of *Harrington v. State*. Terry Harrington sought to overturn his 1978 murder conviction on several grounds, including new evidence in the form of FBF that was not available at his original trial. Dr. Farwell administered his test to Mr. Harrington and rendered a report to the Iowa District Court analyzing Mr. Harrington's responses to information about the crime. Dr. Farwell asserted that his analyses supported Mr. Harrington's assertion that he was not guilty and, therefore, it should be allowed into evidence to help overturn his conviction. In contrast, the district attorney challenged these results, noting several factors that could have impacted the FBF outcome. The panel will review how the admissibility of this newly emerging FBF technique was addressed by the district and appellate courts and its impact, if any, on the legal outcome of Mr. Harrington.<sup>3</sup> The strengths and limitations of this approach will be discussed and admissibility under the *Daubert* standard will be highlighted.

*Pre-Registration Required — \$100 w/registration; \$125 workshop only*

## **W1      Drug Delivery Homicide: Prosecution, Defense, and Expert Testimony**

### **Monday**

**February 17, 2020**

**8:30 a.m. – 12:00 p.m.**

**3.0 CE Hours**

---

**Learning Overview:** The goals of this presentation are to: (1) discuss the theories of prosecution and defense under “drug-delivery-resulting-in-death” statutes and sentencing; (2) describe and explain the nuances of the Supreme Court of the United States (SCOTUS) decision in *U.S. v. Burrage*; (3) analyze the strengths and weaknesses of fact patterns drug-delivery-resulting-in-death cases; (4) identify and articulate the limitations of toxicological and medical testimony in these cases; and (5) prepare for testimony and direct and cross-examination in drug-delivery-resulting-in-death cases.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing background on the legal challenges for charging, defending, or providing opinions and testimony in cases in which an individual’s death is alleged to have resulted from another individual’s actions in supplying the drugs that caused the death. Prosecutors, defense attorneys, and testifying experts will be better prepared to provide scientifically supported evidence in the appropriate context to triers of fact in these cases.

## W1 Drug Delivery Homicide: Prosecution, Defense, and Expert Testimony

---

**Program Description:** This program will evaluate from the jurisprudence, pathology, and toxicology perspectives the legal theories and testimony required to prosecute or defend cases involving allegations that one individual's actions caused the death of another person by supplying them with a drug, either licit or illicit. There is a growing trend toward prosecution of these cases, and this workshop is intended to prepare all the professionals involved in these cases.

## W2 Statistical Learning Algorithms for Forensic Scientists

**Monday**

February 17, 2020

8:30 a.m. – 12:15 p.m.

3.25 CE Hours

---

**Learning Overview:** The goals of this workshop are to: (1) introduce attendees to the basics of supervised learning algorithms in the context of forensic applications, including firearms and footwear examination and trace evidence, while placing emphasis on classification trees, random forests, and, time permitting, neural networks; (2) introduce the concept of a similarity score to quantify the similarity between two items; (3) show how learning algorithms can be trained to classify objects into pre-determined classes; (4) discuss limitations of Machine Learning (ML) algorithms and introduce methods for assessing their performance; and (5) discuss the concept of a Score-based Likelihood Ratio (SLR): computation, advantages, and limitations.

**Impact on the Forensic Science Community:** The use of learning algorithms will increase as measurement of features in various types of evidence improve. This is particularly true in the case of pattern evidence. Forensic scientists will greatly benefit from understanding the basic ideas that underpin statistical learning since these types of methods have already been proposed for firearms examination, fingerprints, glass comparison, and shoe print evidence. Most quantitative training for forensic scientists emphasize classical statistical ideas, so a workshop in which forensic practitioners are exposed to learning algorithms is novel and timely.

## W3 Recent Advances in Understanding Fire Pattern Production

### Monday

February 17, 2020

8:30 a.m. – 12:15 p.m.

3.5 CE Hours

**Learning Overview:** After attending this workshop, attendees will have an appreciation not only for the difficulty in determining the origin of a fully involved fire, but also some of the solutions to the problem resulting from recent full-scale fire experiments performed at Underwriters Laboratories (UL). The outcome of the research emphasizes the point that “If you don’t understand the ventilation, you won’t understand the fire.”

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by providing investigators with the tools they need to understand and correctly interpret fire patterns and use that interpretation to find the fire’s origin. In the past decade, the validity of fire origin determination has been called into question because sometimes investigators have been misled by ventilation-generated patterns.

*Chair:*

**John J. Lentini, BA**  
Scientific Fire Analysis, LLC  
Islamorada, FL

*Co-Chair:*

**Douglas J. Carpenter, MS**  
Combustion Science & Engineering, Inc

**Targeted Audience:** Criminalistics, Engineering & Applied Sciences, General

**Knowledge Level Required:** Intermediate (some knowledge of subject presented)

**Expected Handout Length:** 400 pages

**Program Description:** Presenters will discuss the results of two years of full-scale fire tests on two full-sized test structures conducted at UL. The results will help investigators avoid mistakes that have been documented in the past decade and arrive at the correct interpretation of post-fire artifacts. Attendees will learn how to access a freely available interactive web portal so as to allow experimental results to be compared with real-world fires.

**Program:**

|            |   |            |                                                                                                           |

*Pre-Registration Required — \$100 w/registration; \$125 workshop only*

## W4 The Impact of the 2018 Farm Bill on the Forensic Analysis of Cannabis

### Monday

February 17, 2020

8:30 a.m. – 12:30 p.m.

3.5 CE Hours

**Learning Overview:** After attending this presentation, attendees will understand the legal and forensic landscape of marihuana/hemp analysis and also understand a validated analytical approach that meets these new requirements.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing a framework for meeting the forensic requirements of the 2018 Farm Bill.

*Chair:*

**Richard P. Meyers, MSFS**  
Drug Enforcement Administration  
Office of Forensic Sciences  
Springfield, VA

*Co-Chair:*

**Sandra E. Rodriguez-Cruz, PhD**  
Drug Enforcement Administration  
Special Testing and Research Laboratory  
Dulles, VA

*Faculty:*

**Linda C. Jackson, MS**

Richmond, VA

**Shawn K. West, MSFS**  
Colorado Bureau of Investigation  
Pueblo, CO

**Targeted Audience:** Criminalistics, General, Jurisprudence

**Knowledge Level Required:** Intermediate (some knowledge of subject presented)

**Expected Handout Length:** 200 pages

**Program Description:** This workshop will provide an overview of changes in the law, describe an analytical approach to providing reliable results that conform to the new legal requirements, and provide an overview of the work done to validate the methods incorporated into the analytical approach. State laboratory managers will describe their varying approaches to meeting these new challenges from a state that had legalized marijuana prior to changes in federal law and a state that had not.

**Program:**

|            |   |            |                                                                                                                                     |

## W5 The Psychopathology of Homicide

### Monday

February 17, 2020

8:30 a.m. – 12:30 p.m.

3.5 CE Hours

---

**Learning Overview:** After attending this presentation, attendees will better understand the relationship between psychopathology and the phenomenon of homicide.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by demonstrating how the identification of the features of psychopathology of homicide can inform treatment planning.

*Chair:*

**Alan R. Felthous, MD**

Saint Louis University School of Medicine  
St. Louis, MO

*Co-Chair:*

**Felice F. Carabellese, MD**

University of Bari, Section of Forensic Psychiatry  
Bari, ITALY

*Faculty:*

**Carlo P. Campobasso, MD, PhD**

University of Campania  
Department of Experimental Medicine  
Napoli, ITALY

**Ilaria Rossetto, PhD**

Residences for Execution Safety Measures  
Castiglione delle Stiviere, ITALY

**Giancarlo Di Vella, MD, PhD**

University of Torino  
Department of Public Health Sciences  
Torino, ITALY

**Silvia Trotta**

Institute of Legal Medicine  
Bari, ITALY

**Gabriele Mandarelli, MD, PhD**

University of Rome “Sapienza”  
Rome, ITALY

**Targeted Audience:** Criminalistics, Pathology/Biology, Psychiatry & Behavioral Science

**Knowledge Level Required:** Intermediate (some knowledge of subject presented)

**Expected Handout Length:** 300 pages

# WORKSHOPS

*Pre-Registration Required — \$175 w/registration; \$200 workshop only*

## W5 The Psychopathology of Homicide

**Program Description:** The workshop speakers will debate from different points of view the psychopathology of men and women who kill; the psychopathology of men and women of criminal organizations, such as the Sicilian mafia; combined homicide suicide; the Not Guilty by Reason of Insanity (NGRI) killers: a national sample; forensic psychiatric evaluations of defendants in homicide cases: literature analysis and forensic cases; and treatment outcomes following a killing conviction. Several general pathologists will speak on topics that pertain to the killer's mental state from the perspective of forensic pathology and the investigation of homicide. The criminological and psychiatric data from a multicenter national Italian sample of forensic psychiatric patients will be also discussed.

### Program:

## W6 High-Impact Practices in Forensic Science Education

### Monday

February 17, 2020

8:30 a.m. – 4:15 p.m.

6.25 CE Hours

---

**Learning Overview:** After attending this presentation, attendees will learn how high-impact practices can be used in forensic science education and discover how to adapt their courses using common programming for students by: (1) identifying and describing a variety of high-impact practices; (2) recognizing useful high-impact practices dependent on the environment; and (3) discovering innovative high-impact practices that could be incorporated into their classroom.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by exploring a variety of high-impact practices and gaining insight into a broader scope of common methods useful in forensic science teaching. By discussing multiple types of high-impact practice techniques and the application of these practices in forensic science education, attendees will be able to incorporate tools into their forensic science classrooms and programs.

**Expected Handout Length:** 100 pages

# WORKSHOPS

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## W6 High-Impact Practices in Forensic Science Education

**Program Description:** A variety of high-impact practice methods currently in use in various forensic science education programs will be shared. These methods will include first-year experiences, living-learning communities, field trips, community-focused projects, casework and scholarly research, project-based learning courses, and the student transformative learning record. Each discussion will include real-life examples of how the high-impact practice method is implemented within the curriculum or program. Due to the requirement of these types of high-impact practices for Forensic Science Education Programs Accreditation Commission (FEPAC) accreditation, there will be a discussion of the importance of these practices within forensic science education and how the standards can be achieved in multiples ways. Attendees will learn how to apply these methods toward any discipline or program.

## W7 New Advances in Forensic Human Identification: Issues and Approaches

### Monday

February 17, 2020

8:30 a.m. – 4:45 p.m.

6.75 CE Hours

---

**Learning Overview:** After attending this presentation, attendees will have a heightened understanding of: (1) the factors affecting human identification; and (2) how the application of new, innovative, and cross-disciplinary techniques have the potential to overcome these issues, which will be detailed through case examples.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community through the presentation of multidisciplinary approaches toward human identification, pointing out the novel techniques suitable for this purpose, encouraging collaboration and innovation among different forensic specialties to document and to integrate several lines of evidence.

*Chair:*

**Sara C. Zapico, PhD**

## **W8      Death Investigations in the Military: Case Studies From Around the World**

### **Monday**

**February 17, 2020**

**8:30 a.m. – 5:00 p.m.**

**6.75 CE Hours**

---

**Learning Overview:** After attending this presentation, attendees will understand: (1) processing a variety of death scenes; (2) forensic capabilities of military investigators; (3) investigative considerations in foreign countries; (4) coordination with international agencies; (5) domestic violence impact on child death; (6) staged suicide; (7) scene reconstruction; and (8) laboratory capabilities.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community through detailed accounts of a variety of death investigations as described by Army Special Agents who participated in the cases. The investigations represent various circumstances and illustrate the worldwide capabilities and responsibilities of military investigative agencies, along with legal and laboratory support.

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## W8      **Death Investigations in the Military: Case Studies From Around the World**

**Program Description:** Investigators from the United States Army Criminal Investigation Division specializing in forensic science will present seven case studies illustrating a wide variety of death investigations spanning the globe. Additionally, a representative from the Army's Judge Advocate General (JAG) Corps will provide an overview of the military criminal justice system. The United States military crime lab representatives will share their expeditionary capabilities in support of Department Of Defense investigations worldwide.

## **W9      Interpersonal Violence and Elder Abuse: Maltreatment That Crosses All Borders**

### **Monday**

**February 17, 2020**

**8:30 a.m. – 5:00 p.m.**

**7.0 CE Hours**

---

**Learning Overview:** After attending this presentation, attendees will be able to identify multiple forms of abuse and mistreatment, recognize the impact of abuse across the lifespan, and specify key points for the prosecution of abusers.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by broadening the education of those working with victims of violence. This presentation will enhance not only the ability to intervene in maltreatment but to prosecute the abuser.

## W9 Interpersonal Violence and Elder Abuse: Maltreatment That Crosses All Borders

**Program Description:** This presentation will provide attendees the tools and information they need to identify and intervene in interpersonal violence and elder abuse in their communities. Maltreatment across the lifespan will be addressed, with clear and concise case studies and examples that attendees will be able to use to broaden their understanding of the impact of violence on all age groups. Topics include forensic markers of abuse, wound identification, documentation of abuse, working with victims of violence, and evidence collection that leads to successful arrest and prosecution of perpetrators of abuse.

## W10 The Investigation and Analysis of Health Care Serial Killers

### Monday

February 17, 2020

8:30 a.m. – 5:00 p.m.

7.0 CE Hours

---

**Learning Overview:** After attending this presentation, attendees will: (1) state the different motivations of health care serial killers; (2) understand some of the challenges associated with analytical testing and result interpretation; (3) list the agents that have been used in medical killings and describe their mechanism of action; and (4) understand how to best prepare for case presentation in a legal proceeding.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing a multidisciplinary approach to understanding, identifying, and investigating health care serial killers.

## W10 The Investigation and Analysis of Health Care Serial Killers

**Program Description:** The health care serial killer is a unique type of criminal offender who is employed as a medical provider and intentionally ends the life of a person under their care. The motivations to kill are varied, but include ending the suffering of a patient who unlikely will recover, minimizing the emotional toll of the relatives, achieving recognition from their colleagues by accomplishing life-saving resuscitation measures, and exerting dominance over a weaker individual.

These cases are challenging to recognize as they typically occur over an extended period of time, involve different care facilities, and include patients who are severely ill and/or have a terminal diagnosis. Toxicology testing may not include the administered substance or interpretation is confounded due to variables such as analyte instability and the poor health status of the patient. Instead, identification and investigations tend to occur when a correlation between a care provider's presence and a cluster of deaths is observed.

# WORKSHOPS

---

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## **W11     The Native American Graves Protection and Repatriation Act (NAGPRA) and the Medicolegal System: Legal, Practical, and Ethical Considerations for Practitioners**

### **Monday**

**February 17, 2020**

**8:30 a.m. – 5:15 p.m.**

**7.25 CE Hours**

---

**Learning Overview:** After attending this presentation, attendees will: (1) better understand NAGPRA and how it applies to Medical Examiner/Coroner (ME/C) offices that come into possession of non-forensic Native American remains; (2) learn the legal responsibilities necessary to become compliant with the federal law and understand when and how NAGPRA-compliant protocols should be followed; (3) learn how to complete each step of the NAGPRA process, including what types of evidence are used to determine cultural affiliation; and (4) learn best practices for communicating with tribes.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing attendees with an understanding of why and how the federal NAGPRA law applies to the medicolegal system when non-forensic Native American remains are submitted to ME/C offices and the possible repercussions for non-compliance. NAGPRA governs the treatment and disposition of Native American remains in any state office that receives federal funding and provides a legal pathway for Native Americans to claim and repatriate the remains of their ancestors. As ME/C offices receive federal funding by the distribution of these funds through the state to local government agencies and are often in the possession of non-forensic Native American remains, they fall within the legal purview of the law.

*Chair:*

**Megan K. Kleeschulte, MA**  
University of Tennessee, Knoxville  
Knoxville, TN

*Co-Chair:*

**Amy Z. Mundorff, PhD**  
University of Tennessee, Knoxville  
Knoxville, TN

*Faculty:*

**Bruce E. Anderson, PhD**  
Pima County Office of the Medical Examiner  
Forensic Science Center  
Tucson, AZ

**Ellen Lofaro, PhD**  
University of Tennessee, Knoxville  
Knoxville, TN

**Targeted Audience:** Anthropology, General, Jurisprudence, Pathology/Biology

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 50 pages

**Program Description:** This workshop provides training on the application and protocols of NAGPRA for the medicolegal system. ME/C offices have been identified as systems that legally fall under the definition of museum as it is employed in NAGPRA and, therefore, are required to comply with the law's mandates. This workshop will cover the history leading to the passage of NAGPRA and will provide an in-depth discussion of the definitions included in the law and how they apply to the medicolegal system. This session will also provide hands-on training on how to determine whether your office is in possession or control of Native American remains, how to initiate consultation with tribes, what evidence should be used for making cultural affiliation determinations, how to fill out notice of inventory completion templates, how notices get published on the federal register, and how to facilitate the final physical transfer of remains when control of claimed remains transfers to claimant tribes. This hands-on training will be accomplished using different scenarios that mimic the various contextual situations practitioners may encounter regarding Native American remains.

## W12 KidStats: Improving the Subadult Biological Profile

### Monday

February 17, 2020

8:30 a.m. – 5:15 p.m.

7.25 CE Hours

---

**Learning Overview:** After attending this workshop, attendees will be trained on the most up-to-date techniques to estimate subadult age and sex and on KidStats, a freely available web-based graphical user interface.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing attendees with applied experience in collecting subadult data from 3D printed remains of individuals between birth and 15 years and the application of these data in a statistical framework.

**Restricted Audience Size:** 30

# WORKSHOPS

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## W12 KidStats: Improving the Subadult Biological Profile

**Program Description:** Forensic anthropological research is generally less focused on the subadult biological profile, mainly because of the difficulty in accessing skeletal samples to develop techniques. Subsequently, methods development to estimate subadult parameters of the biological profile (e.g., age, sex, and stature) is lacking. A large sample of postmortem computed tomography images of children between birth and 20 years (~1,100) allowed for the development and validation of age and sex estimation techniques using a contemporary subadult sample. This workshop will provide information on the statistics that went into the development of these models and hands-on opportunities with 3D printed skeletal elements of individuals from the sample allowing for a direct opportunity to collect age and sex indicators. The workshop participants will also work with KidStats, a freely available graphical user interface allowing practitioners all around the world to estimate the age of children based on the age indicators collected.

## **W13     A Primer on Multidisciplinary Investigations of Pediatric Injuries and Deaths**

### **Monday**

February 17, 2020

8:30 a.m. – 5:30 p.m.

7.25 CE Hours

---

**Learning Overview:** Attendees will be able to demonstrate the ability to analyze and evaluate available data in a pediatric death or injury case to formulate a viable hypothesis regarding the actual mechanism of the pathology in question. After attending this presentation, attendees will be better able to differentiate and implement effective investigative techniques from lesser alternatives.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by exposing practitioners to an effective multidisciplinary team approach to prospectively work through investigations as they progress to a conclusion.

*Chair:*

**J.C.U. Downs, MD**  
forensX, LLC  
Savannah, GA

*Co-Chair:*

**Joanna L. Collins, MFS**  
LINUS Investigations & Consulting  
San Antonio, TX

*Faculty:*

**Bonnie Armstrong, BS**  
The Shaken Baby Alliance  
Boyd, TX

**Robert N. Parrish, JD**  
Salt Lake County District Attorney's Office  
Salt Lake City, UT

**Targeted Audience:** Criminalistics, General, Jurisprudence, Odontology, Pathology/Biology, Toxicology

**Knowledge Level Required:** Intermediate (some knowledge of subject presented)

**Expected Handout Length:** 100 pages

**Program Description:** This workshop will teach investigators, physicians, scientists, attorneys, and others working on child deaths and injuries how to objectively and effectively gather, analyze, and appraise evidence in cases of pediatric injury and/or death

*Proceeds from this workshop will benefit the Forensic Sciences Foundation, Inc.*

## W14 Mass Disasters and Disaster Victim Identification (DVI)

### Monday

February 17, 2020

8:30 a.m. – 5:30 p.m.

7.25 CE Hours

---

**Learning Overview:** After attending this presentation, attendees will be able to: (1) understand the historical background of DVI; (2) recognize the need for standards and best practices; (3) understand the integrated contributions of the various forensic sciences to DVI; and (4) understand the critical relationship of the Victim Information Center to the identification process.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing attendees with an understanding of the current state of mass fatality victim identification as it exists in the United States. Presentations will encompass the breadth of the forensic sciences, including ethical considerations and the role of the Victim Information Center in mass fatality identifications.

*Chair:*

**John A. Williams, PhD**

**Anthony B. Falsetti, PhD**  
College of Science, Forensic Science Program  
Fairfax, VA

**Jason M. Wiersema, PhD**  
Harris County Institute of Forensic Science  
Houston, TX

**Cynthia Gavin, PhD**  
Parkville, MD

**Targeted Audience:** Anthropology, Criminalistics, General, Jurisprudence, Odontology, Pathology/Biology

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 275 pages

**Program Description:** DVI is the comprehensive process of human identification as applied to mass fatality events. Although by definition a mass fatality event is any situation that overwhelms local resources, we generally think of a situation in which identification is hampered by the event and recovery process. Human remains that have been badly traumatized, heavily decomposed, or recovered outside of their normal context are examples that fit this description. In response to the 2009 National Academy of Sciences (NAS) Report, a movement to create standards within the forensic sciences was started. DVI was included and the creation of standards and best practices within the field are ongoing. DVI is the concerted and combined efforts of dedicated scientists, specialists, and governmental and private agencies. It is practiced under far-less-than-perfect conditions under circumstances that are often politically and culturally charged.

## **W15     Dementia Workup for Forensic Pathologists Following a Condensed National Institute on Aging-Alzheimer's Association (NIA-AA) Protocol**

**Tuesday**

**February 18, 2020**

**8:30 a.m. – 12:00 p.m.**

**3.25 CE Hours**

---

**Learning Overview:** After attending this presentations, attendees will: (1) become familiar with the diagnostic workup and grading schemes for common classes of dementia; (2) be able to accurately identify and sample appropriate regions of the brain according to the Condensed Protocol for dementia workup; and (3) understand the benefits and limitations of the Condensed and NIA-AA Protocols for dementia workup.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by presenting a method that reduces the cost of histopathologic dementia workup while maintaining diagnostic performance.

## W16 Forensic Multimedia Authentication: Real-Life Challenges

### Tuesday

February 18, 2020

8:30 a.m. – 12:00 p.m.

3.0 CE Hours

**Learning Overview:** After attending this workshop, attendees will: (1) become familiar with the latest developments in forensic video and audio authentication, enhancement, and restoration; (2) understand criteria used for media authentication; (3) understand how to conduct analysis within a forensic framework; and (4) explore the latest technologies in the generation of synthetic imagery, including deepfakes, face2face, and others.

**Impact on the Forensic Science Community:** This workshop will impact the forensic community by: (1) explaining the scientific approach in forensic media authentication, enhancement, and restoration; (2) demonstrating an authentication investigation framework; and (3) discussing tools used to create and combat multimedia forgery.

## W16 Forensic Multimedia Authentication: Real-Life Challenges

**Program Description:** This workshop on the impact of emerging technologies on multimedia forensics will examine the new and emerging technologies affecting multimedia forensics today and over the coming decades. The information shared during the workshop is from academics, researchers, and practitioners currently working and researching in these new technology areas. Participants will be informed of the latest developments in forensic video and audio authentication, enhancement, and restoration. This includes the latest technologies in the generation of synthetic imagery, including deepfakes, face2face, and others. This workshop assembles an experienced group of people impacting the world of multimedia forensics on a variety of topics.

## **W17      The Murder of Women: A Global Issue That Demands Action**

### **Tuesday**

**February 18, 2020**

**8:30 a.m. – 12:00 p.m.**

**3.0 CE Hours**

---

**Learning Overview:** After attending this presentation, attendees will understand and recognize how discrimination against women prevails throughout the world, and how violence against women, a serious violation of human rights, is the most severe consequence of such discrimination. The Inter-American Court of Human Rights defined femicide as “the murder of women by gender” considering that these deaths result from structural and social attitudes, rooted in a culture of gender-based violence and discrimination. Acts of violence against women based on their status as women demand the serious and specific attention of the international community.

Attendees will become more aware of the various types of violence that are manifested in many ways. Most victims are raped and many are mutilated, tortured, or dismembered. Femicide is a complex phenomenon, ranging from the murder of women by their partners or ex-partners, to their kidnapping followed by rape and subsequent killing committed by unknown perpetrators, to ritual crimes performed by sects or other groups.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by empowering attendees to understand that is an obligation of the United States to prevent and eradicate femicide and to adopt administrative, legislative, and judicial measures to prohibit gender discrimination. States must ensure the exercise of the rights of women and pursue, by all appropriate means and without delay, policies that prevent, punish, and eradicate violence against women. States have the obligation to standardize all their protocols and manuals; to update their research criteria; and to restructure the administration of justice related to investigate disappearances, sexual violence, and murder of women. These measures have implications not only for the United States, but also for other systems of human rights protection, such as the European Court of Human Rights. After implementation of various policies addressing this crucial issue, states should be held responsible for lack of diligence in investigations, lack of access to justice for the families of the victims, and therefore for the impunity of the perpetrators. To sum up, states are responsible for taking the necessary steps to ensure a life free of violence for women.

## W17 The Murder of Women: A Global Issue That Demands Action

**Program Description:** This workshop will show how to monitor the issue of femicide in the future and what types of data and information will be used. Scientists think it reasonable to create scientifically based monitoring with a proper strategy together with all national and international partners. Such a structure must promote the creation of comparable national databases, while also systematically involving existing international systems of data collection and their experience. It became very clear, during research, that the collection of police data alone would not be sufficient for analyzing the cases in the detail needed for prevention and intervention. Therefore, many countries have adopted the strategy of collecting information on all the cases known to the media and collating it with the criminological data and—insofar as is possible—data recorded by health and support systems. This strategy makes it possible to obtain more background information on femicides, which is important for future prevention and early interventions. In order to stabilize the collection of data and information at the European level, it is important to publicly finance work resources at the national level in order to create and continuously update national databases in a way that makes international comparison possible. Furthermore, a scientifically based monitoring body must coordinate data collection and supply it to joint databases. Only in this way will it be possible, in the long-term, to create a bigger pool of data that allows deeper analysis and prevention of the problem at the European, American, and international level.

# WORKSHOPS

---

*Pre-Registration Required — \$175 w/registration; \$200 workshop only*

## **W18 Injury Biomechanics: An Interdisciplinary Approach and Forensic Applications**

**Tuesday**

**February 18, 2020**

**8:30 a.m. – 12:30 p.m.**

**3.5 CE Hours**

**Learning Overview:** After attending this workshop, attendees will comprehend the advantages of using an interdisciplinary team to address questions concerning injury biomechanics and associated trauma analysis. Attendees will be exposed to the applications of injury biomechanics across multiple scientific disciplines through presentations and hands-on experiences. Additionally, attendees will be introduced to the value of experimental testing in developing and validating forensic methods of injury analysis and the importance of scientific validity and error rates.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by providing attendees with an introduction to injury biomechanics and the applications of this research to forensic anthropology, engineering and applied sciences, and forensic pathology.

*Chair:*

**Amanda M. Agnew, PhD**  
The Ohio State University  
Columbus, OH

*Co-Chair:*

**Angela L. Harden, MA**  
The Ohio State University  
Columbus, OH

*Faculty:*

**John H. Bolte, PhD**  
The Ohio State University  
Columbus, OH

**Yun-Seok Kang, PhD**  
The Ohio State University  
Columbus, OH

**Targeted Audience:** Anthropology, Engineering & Applied Sciences, General, Pathology/Biology

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 50 Pages

*Pre-Registration Required — \$175 w/registration; \$200 workshop only*

## W18 Injury Biomechanics: An Interdisciplinary Approach and Forensic Applications

**Program Description:** Injury biomechanics is the science that relates mechanical forces to disruption of anatomical regions of the human body. This multidisciplinary field encompasses engineering, physics, and medicine and can offer improved validity of trauma analyses and interpretation to the field of forensic anthropology. This workshop will provide attendees with an introduction to injury biomechanics, applications, and limitations of forensic injury biomechanics, how to effectively collect and analyze quantitative data used in injury biomechanics, experimental design, in addition to detailed presentations on current experimental research with subsequent trauma evaluation and interpretations. Presentations will demonstrate the importance and value of interdisciplinary experimental research to trauma analyses, re-creating traumatic events, and expert testimonies. An emphasis will be on skeletal trauma. Attendees will have the opportunity to discuss the role of injury biomechanics in forensic fields with the panel of experts. Attendees will leave the workshop with a greater understanding of the contributions of experimental research to forensic applications.

## **W19 Think Tank on the Leading Edge of Forensic Science, Including Robotics, Drug Intelligence, Analytical Chemistry, Technology Rules, Bayesian Approach, Legal Technology Developments, Research and Development (R&D) in a Forensic Lab, Veterinary Forensics, and Aquatic Death Investigation**

### **Tuesday**

**February 18, 2020**

**8:30 a.m. – 12:30 p.m.**

**3.75 CE Hours**

**Learning Overview:** After attending this presentation, attendees will better understand the various new advances in forensic science that promise to have an important impact on their work.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by discussing the absolute latest new developments in robotics, drug intelligence, analytical chemistry technology rules, Bayesian approach, legal technology developments, R&D in a forensic lab, veterinary forensics, and aquatic death investigations. This workshop will help attendees be on the leading edge.

## **W19 Think Tank on the Leading Edge of Forensic Science, Including Robotics, Drug Intelligence, Analytical Chemistry, Technology Rules, Bayesian Approach, Legal Technology Developments, Research and Development (R&D) in a Forensic Lab, Veterinary Forensics, and Aquatic Death Investigation**

**Program Description:** Experts from all over the world will discuss the new developments that are in the process of revolutionizing forensic science. The speakers are the best of the best within each of their areas of expertise. Practical examples will be presented on robotics, drug intelligence, analytical chemistry, technology rules, Bayesian approach, legal technology developments, R&D in a forensic lab, veterinary forensics, and aquatic death investigations. This presentation will provide an overview of exciting new advances and open a forum for the discussion of issues that may arise regarding these new developments that will ultimately impact the forensic science community. A wide variety of new technology that will soon impact forensic scientist has been identified within the AAFS Think Tank Committee.

## W20 Genetic Genealogy: Science, Law, and Ethics

### Tuesday

February 18, 2020

8:30 a.m. – 4:45 p.m.

6.75 CE Hours

---

**Learning Overview:** After attending this workshop, attendees will have a better understanding of how genetic genealogy works, how it is used by law enforcement, its admissibility in court, and the ethics of using personal DNA data of relatives to solve crimes.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by providing a clear understanding of the use of genetic genealogy to solve crimes and to better equip forensic scientists to appreciate the legal and ethical issues that it presents.

*Chair:*

**Donald E. Shelton, JD, PhD**  
University of Michigan-Dearborn  
Criminal Justice Program  
Dearborn, MI

*Co-Chair:*

**Frederick R. Bieber, PhD**  
Brigham & Women's Hospital  
Department of Pathology  
Boston, MA

*Faculty:*

**Russell S. Babcock, JD**  
Law Office of Russell Babcock  
San Diego, CA

**Ted R. Hunt, JD**  
United States Department of Justice  
Washington, DC

**Henry T. Greely, JD**  
Stanford University  
Stanford, CA

**Roderick T. Kennedy, JD**  
Los Ranchos, NM

**Ellen M. Greytak, PhD**  
Parabon NanoLabs, Inc.  
Reston, VA

**CeCe Moore**  
Reston, VA

**Targeted Audience:** Criminalistics, General, Jurisprudence, Pathology/Biology, Psychiatry & Behavioral Science

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 100 Pages

**Program Description:** Since the identification and arrest of the suspect in the “Golden State Killer” investigation in early 2018 using novel DNA and genealogy tools, dozens of law enforcement investigators in North America have effectively used such methods in high-profile cold cases. This workshop includes a description of the DNA technology used, the database search process itself, the methods of genealogy searching, and the legality and ethics of the process, all from expert leaders in those fields. Speakers include CeCe Moore, the genealogist who pioneered the method in the “Golden State Killer” case, biomedical DNA specialists, lawyers, professors, and ethics experts.

*Pre-Registration Required — \$250 w/registration; \$300 workshop only*

## W21 A Decade of Designer Drugs: Lessons Learned and Future Directions

### Tuesday

February 18, 2020

8:30 a.m. – 5:00 p.m.

6.75 CE Hours

**Learning Overview:** After attending this workshop, attendees will be able to: (1) discuss current and past trends in Novel Psychoactive Substances (NPS); (2) describe and explain the means by which new substances are assessed for their potency and toxicity; (3) identify resources and strategies for the investigation of NPS toxicity outbreaks and impacts on user populations; (4) assess the available analytical techniques for resolving the identity of positional isomers of new drugs; and (5) apply best practices in the use of standard reference materials and proficiency testing for forensic NPS casework.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing a ten-year perspective on how forensic and research sciences responded to the phenomenon of designer drugs, later NPS, the tools and workflows that have been developed, current approaches to evaluating drug toxicity, the impact of NPS on drug user behavior, and best practices for the future identification of structural identity and detail of newly emergent substances.

*Chair:*

**Donna M. Papsun, MS**

NMS Labs

Willow Grove, PA

*Co-Chair:*

**Barry K. Logan, PhD**

NMS Labs

Willow Grove, PA

*Faculty:*

**Michael H. Baumann, PhD**

Intramural Research Program, National Institute on  
Drug Abuse, National Institutes of Health  
Baltimore, MD

**Alex J. Krotulski, MS**

Center for Forensic Science Research & Education  
Willow Grove, PA

**Jennifer Bonetti, MS**

Virginia Department of Forensic Science  
Norfolk, VA

**Robert A. Middleberg, PhD**

NMS Labs  
Willow Grove, PA

**Michael B. Gatch, PhD**

University of North Texas Health Science Center  
Fort Worth, TX

**Amanda L.A. Mohr, MSFS**

Center for Forensic Science Research & Education  
Willow Grove, PA

**Marilyn A. Huestis, PhD**

Huestis & Smith Toxicology, LLC  
Severna Park, MD

**Christopher Moraff, MS**

Temple University  
Philadelphia, PA

**Donna M. Iula, PhD**

Cayman Chemical  
Ann Arbor, MI

**Aaron Urbas, PhD**

National Institute of Standards and Technology  
Gaithersburg, MD

**Targeted Audience:** Criminalistics, General, Pathology/Biology, Toxicology

**Knowledge Level Required:** Intermediate (some knowledge of subject presented)

**Expected Handout Length:** 250 Pages

**Sponsored by:** NMS Labs, Inc.

**Program Description:** This workshop will bring together forensic chemists, medical examiners, death investigators, forensic toxicologists, emergency responders, and public health officials to reflect on the past decade of NPS. This workshop will provide a forum in which experts across different disciplines can share their varying perspectives on the NPS epidemic.

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## W22 “All Rise”: Successfully Navigating the Judicial System as an Expert Witness

**Tuesday**

February 18, 2020

8:30 a.m. – 5:00 p.m.

7.0 CE Hours

---

**Learning Overview:** After attending this workshop, attendees will be well-versed in the decorum, procedures, expectations, and environment of a modern United States courtroom through active participation in the process.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by offering real-world experience in expert testimony in an environment conducive to productive learning without the stress of an actual trial.

*Chair:*

**Laura C. Fulginiti, PhD**  
Forensic Science Center  
Phoenix, AZ

*Co-Chair:*

**Daniel G. Martin, JD**  
Superior Court of Arizona  
Phoenix, AZ

*Faculty:*

**Katelyn L. Bolhofner, PhD**  
Arizona State University  
Glendale, AZ

**Kristen Hartnett-McCann, PhD**  
Office of the Chief Medical Examiner  
Farmington, CT

**Betty Layne DesPortes, JD, MS**  
Benjamin & DesPortes, PC  
Richmond, VA

**Andrew C. Seidel, PhD**  
Arizona State University  
Tempe, AZ

**Matthew Greco, JD**  
San Diego District Attorney's Office  
San Diego, CA

**Targeted Audience:** All Disciplines

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 50 Pages

**Restricted Audience Size:** 50

**Program Description:** This workshop is designed to introduce and expand the understanding of expert witnesses who are confronted with the judicial process as part of their work. Using an actual courtroom set-up, the organizers plan to include the attendees in real-life scenarios as expert witnesses on the stand and as jurors evaluating the proffered testimony.

# WORKSHOPS

---

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## **W23     Dispelling the Myths About the Forensic Examination of Handprinting**

**Tuesday**

**February 18, 2020**

**8:30 a.m. – 5:00 p.m.**

**6.75 CE Hours**

---

**Learning Overview:** After attending this workshop, attendees will be informed about the development of manuscript handprinting, motor-control theories regarding how handprinting is learned, examination techniques with handprinting, and will conduct hands-on examinations of genuine and simulated handprinting.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by informing attendees on the history and development of manuscript handprinting, and will enhance their abilities to conduct handprinting examinations. Attendees will also be prepared to defend the reliability of handprinting examinations in court.

*Chair:*

**Linton Mohammed, PhD**

Forensic Science Consultants, Inc  
Burlingame, CA

*Co-Chair:*

**Linda L. Mitchell, BS**

Forensic QDE Lab, LLC  
Escondido, CA

*Faculty:*

**Brett Bishop**

Cheney, WA

**Lloyd Cunningham**

Alamo, CA

**Katelyn E. Bruno, MFS**

Quantico, VA

**Targeted Audience:** Questioned Documents

**Knowledge Level Required:** Intermediate (some knowledge of subject presented)

**Expected Handout Length:** 20 Pages

**Program Description:** This full-day workshop will provide attendees with knowledge of the development of handprinting from the schoolroom and from motor control principles. Recent cases in which the reliability of handprinting evidence was criticized will be discussed. There will be a significant hands-on component in which attendees will be able to learn techniques of examining genuine and simulated handprinting.

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## **W24 Forensic Postmortem Radiology: Crossing the Border Between Radiology and Pathology**

**Tuesday**

**February 18, 2020**

**8:30 a.m. – 5:00 p.m.**

**7.0 CE Hours**

**Learning Overview:** After attending this workshop, attendees will: (1) learn the basics in how to get started in the field of forensic radiology, (2) understand the current state of the art and levels of evidence in forensic radiology, (3) learn about applications to assist forensic pathologists and practitioners in medical death investigations, and (4) finally will be made aware of potential resources available to interested practitioners.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing attendees with expertise from around the world on the use of best practices and the evidence base of forensic postmortem radiology.

**Rick R. Van Rijn, MD, PhD**

Amsterdam United Methodist Church &  
Netherlands Forensic Institute  
Amsterdam, NETHERLANDS

**Targeted Audience:** Pathology/Biology

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 150 Pages

# WORKSHOPS

---

*Pre-Registration Required — \$200 w/registration; \$250 workshop only*

## **W24 Forensic Postmortem Radiology: Crossing the Border Between Radiology and Pathology**

---

**Program Description:** The “Virtual Autopsy” or “Virtopsy” utilizes Multislice Computed Tomography (MSCT) or Postmortem CT (PMCT) and Magnetic Resonance Imaging (MRI) combined with 3D imaging technology to create vivid images of the interior of the human body. This can be accomplished not only in the living but also in the dead. In the past decades, an increasing use of these techniques, in the postmortem setting, has been seen in the field of forensics. However, without the proper knowledge of the potential benefits but also the limitations of forensic postmortem radiology, its implementation in the field of forensics is impossible. The international group of speakers in this workshop have extensive experience in implementing forensic postmortem radiology workflows, interpreting case studies, and/or implementing this in advanced imaging modalities. The international background and diversity of professional backgrounds of the speakers provides the participants an opportunity to gain a broad perspective, crossing the borders between specialties, on this exciting field. Many of the speakers, who all are internationally seen as experts in their fields, have been on the forefront of forensic postmortem radiology or can even be seen as founding fathers in this field.

The goal of this workshop is to share knowledge and experiences with those who are working in the field of forensics and are currently thinking about implementing this new and important modality; they should really attend this course. Those who already are using forensic postmortem radiology are also welcome, not only to learn from this highly experienced faculty, but also to share their experiences in this field. This program offers a broad range of topics from the young child to disaster victim identification and from obtaining data to advanced 3D visualization.

At the end of the sessions, there will be an interactive case session in which the audience is asked to participate. During these sessions, cases will be presented showing the potential and limitations of forensic postmortem radiology.

|           |   |           |                                                                                                                              |
|-----------|---|-----------|------------------------------------------------------------------------------------------------------------------------------|
| 1:30 p.m. | - | 2:00 p.m. | <b>PMCT in Gunshot Wound (GSW) and Fatal Penetrating Trauma</b><br><i>Lars Oesterhelweg</i>                                  |
| 2:00 p.m. | - | 2:30 p.m. | <b>PMCT in Disaster Victim Identification</b><br><i>Frances E. Hollingbury, MBChB</i>                                        |
| 2:30 p.m. | - | 3:05 p.m. | <b>3D Visualization in Forensic Postmortem Radiology: Possibilities and Examples</b><br><i>Summer J. Decker, PhD</i>         |
| 3:05 p.m. | - | 3:20 p.m. | <b>Break</b>                                                                                                                 |
| 3:20 p.m. | - | 3:50 p.m. | <b>Virtual Crime Scenes: Digital Evidence Documentation and Courtroom Use</b><br><i>David Errickson, PhD</i>                 |
| 3:50 p.m. | - | 4:30 p.m. | <b>Emerging Technologies</b><br><i>Lars C. Ebert, PhD; Jonathan M. Ford, PhD</i>                                             |
| 4:30 p.m. | - | 5:00 p.m. | <b>Interactive Cases II</b><br><i>Summer J. Decker, PhD; Lars C. Ebert, PhD; David Errickson, PhD; Jonathan M. Ford, PhD</i> |

# WORKSHOPS

---

*Pre-Registration Required — \$250 w/registration; \$300 workshop only*

## **W25 Working Toward a Wellness Mindset for Forensic and Investigative Personnel: Addressing Stress and Trauma in the Workforce and Taking Steps to Change Agency and Professional Culture**

**Tuesday**

**February 18, 2020**

**8:30 a.m. – 5:00 p.m.**

**6.5 CE Hours**

---

**Learning Overview:** After attending this workshop, attendees will understand and recognize how stress and trauma are tied to the forensic professions, including in the form of vicarious trauma, and how exposure to trauma and stress impacts an employee's personal and professional performance. Attendees will also learn evidence-based strategies to mitigate and reduce the impacts of stress and trauma, as well as learn from the experience of the anthropology program at the University of South Florida and the Maryland State Police's Crime Laboratory efforts to address stress and trauma. Attendees will be more aware of the various types of trauma that investigators and investigative personnel routinely encounter and the potential impacts this may have, not only on the individual, but on the investigation and/or service provision. This workshop builds upon and expands the content of the half-day workshop presented at the American Academy of Forensic Sciences Annual Scientific Meeting in 2019. Paths forward and the implementation and incorporation of Evidence-Based Policy (EBP) will also be addressed so attendees can examine what policies and assistance are available in their own agencies or assist in policy development. This workshop will address concerns related to both line-level and supervisory personnel.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by providing attendees with the understanding that the human experience is variable, and trauma exposure and symptoms even more so, leading to behavior patterns that can be complex and abstract and by recognizing the manifestations of a variety of psychological—both behavioral and cognitive—impacts as a reaction to trauma and stress exposure on the job. This workshop will also address the concept of trauma-informed agencies, ensuring that appropriate resources are available to employees, focusing on evidence-based interventions. By attending this workshop, attendees will be better equipped to understand the potentially short- and long-term impacts of trauma, as well as how to adapt investigative approaches and provide resources that will lead to increased chances of not only a positive work environment, but likely a more efficient and cost-effective solution to maintaining employee health and well-being to avoid burn-out and decreased cognitive abilities that may impact service provision and job performance.

*Chair:*

**Amanda L. Farrell, PhD**  
Marymount University  
Arlington, VA

*Co-Chair:*

**Jonathan D. Bethard, PhD**  
University of South Florida  
Tampa, FL

*Faculty:*

**Timothy J. Ainger, PhD**  
University of Kentucky  
Lexington, KY

**Daniel E. Katz, MFS**  
Maryland State Police Forensic Sciences Division  
Pikesville, MD

**Lurena A. Huffman, BS**  
Houston Forensic Science Center  
Houston, TX

**Christopher J. Scallon, MS**  
Norfolk Police Department  
Norfolk, VA

**Targeted Audience:** All Disciplines

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 60 Pages

# WORKSHOPS

*Pre-Registration Required — \$250 w/registration; \$300 workshop only*

## **W25      Working Toward a Wellness Mindset for Forensic and Investigative Personnel: Addressing Stress and Trauma in the Workforce and Taking Steps to Change Agency and Professional Culture**

**Program Description:** This workshop will aid attendees in identifying factors associated with these needs and their expression, particularly with regard to identifying “problem behaviors,” and detecting the symptoms of post-traumatic exposure, in addition to identifying and implementing empirically supported strategies for proper identification and management of cognitive concerns. Attendees will be exposed to a wide array of behaviors, as well as to how these behaviors can be identified and addressed. Topical discussions will be further supported by case studies and videos.

### **Program:**

|            |   |            |                                                                                                                                                        |
|------------|---|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:30 a.m.  | - | 8:40 a.m.  | <b>Welcome</b><br><i>Amanda L. Farrell, PhD; Jonathan D. Bethard, PhD; Lurena A. Huffman, BS</i>                                                       |
| 8:40 a.m.  | - | 9:00 a.m.  | <b>Introduction: Context, Approach, and Panel</b><br><i>Amanda L. Farrell, PhD</i>                                                                     |

## WORKSHOPS

---

*Pre-Registration Required — \$100 w/registration; \$125 workshop only*

### **W26      Overcoming Analytical Challenges Inherent in New Psychoactive Substances With Gas Chromatography Coupled With Vapor Phase Infrared Detection (GC-IRD)**

**Tuesday**

**February 18, 2020**

**1:00 p.m. – 5:00 p.m.**

**3.75 CE Hours**

**Learning Overview:** The goals of this presentation are to obtain: (1) a more comprehensive awareness and understanding of the analytical challenges inherent in the analysis of novel and emerging drugs; (2) an overview and better understanding of the role of GC-IRD applications in the analysis of seized drugs; and (3) knowledge and tools for the optimization of GC-IRD methodology for the analysis of opioids, synthetic cathinones, and synthetic cannabinoids.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by informing attendees that GC-IRD is a useful alternative for the rapid detection and identification of novel substances when routine analytical techniques yield limited information.

*Chair:*

**Agnes D. Winokur, MS**

Drug Enforcement Administration/Southeast Laboratory  
Miami, FL

*Co-Chair:*

**Reta Newman, MA**

Pinellas County Forensic Lab  
Largo, FL

*Faculty:*

**Jose R. Almirall, PhD**

Florida International University  
Department of Chemistry  
Miami, FL

**Randall Clark, PhD**

Auburn University  
School of Pharmacy  
Auburn, AL

**Targeted Audience:** Criminalistics, General

**Knowledge Level Required:** Basic (little to no knowledge of subject presented)

**Expected Handout Length:** 50 Pages

**Program Description:** This program will be broken down into three main sections. Section 1 will address the struggles that forensic scientists are experiencing in their ability to detect and identify new psychoactive substances. Section 2 will focus on the theory and on demonstrating how the role of GC-IRD methodologies are increasing the capabilities of forensic laboratories. The last section will illustrate how GC-IRD applications and modern technological advances can facilitate the rapid analysis of opioids, synthetic cathinones, and synthetic cannabinoids.

# NATIONAL INSTITUTE OF JUSTICE

## Forensic Science Research and Development (R&D) Symposium

### American Academy of Forensic Sciences 72<sup>nd</sup> Annual Scientific Meeting

*Pre-Registration Not Required — Open to All Meeting Attendees*

## Tuesday

February 18, 2020

8:30 a.m. – 5:10 p.m.

The National Institute of Justice (NIJ) Forensic Science R&D Symposium is an open meeting where attendees can learn about NIJ-funded research across a variety of forensic science areas. AAFS meeting registration is not necessary. Feel free to stop by and listen to specific presentations or stay all day and learn about the diverse NIJ forensic science R&D portfolio.

Information will be available at [www.forensicCOE.org](http://www.forensicCOE.org).

### Program:

8:30 a.m. - 8:40 a.m.

**Welcome and Opening Remarks**

#### **Morning Session I – Forensic Biology/DNA**

*Moderator: Andrea M. Borchardt, MS*

8:40 a.m. - 9:05 a.m.

**Efficient Sequencing and Analysis of Degraded and Trace DNA Samples Using a Novel Targeted Ligation-Free Method (2017-DN-BX-0140)**

*Jannine Forst*

9:05 a.m. - 9:30 a.m.

**Microhaplotypes: Moving Scientific Research to a Forensic Casework Panel (2018-75-CX-0041)**

*Kenneth Kidd, PhD*

9:30 a.m. - 9:55 a.m.

**DNA Typing Strategies Via Real-Time Nanopore Sequencing for Forensic Analyses (2018-DU-BX-0179)**

*Courtney L. Hall, BS*

9:55 a.m. - 10:20 a.m.

**The Development of Entire Mitogenome Reference Data Using an Automated High Throughput Sequencing Workflow (DJO-NIJ-17-RO-0219)**

*Kimberly S. Andreaggi, MFS*

10:20 a.m. - 10:35 a.m.

**Break**

#### **Morning Session II – Controlled Substances and Toxicology**

*Moderator: Frances Scott, PhD*

10:35 a.m. - 11:00 a.m.

**The Detection and Quantitation of Fentanyl Mixtures by Surface-Enhanced Raman Spectroscopy (SERS) and Chemometrics (2015-IJ-CX-K006)**

*Ling Wang, MS*

11:00 a.m. - 11:25 a.m.

**A Portable Surface-Enhanced Raman Spectroscopy-Paper Spray Ionization-Mass Spectrometry (SERS-PSI-MS) Dual Analysis Platform Using Gold Nanoparticle-Embedded Paper for Trace Detection of Illegal Drugs (2017-R2-CX-0022)**

*Jeremy Driskell*

11:25 a.m. - 11:50 a.m.

**Forty-Plus Ways Not to Analyze Beverages for Cannabinoids (2017-R2-CX-0029)**

*Carl E. Wolf II, PhD*

# NATIONAL INSTITUTE OF JUSTICE

---

## Forensic Science Research and Development Symposium

*Pre-Registration Not Required — Open to All Meeting Attendees*

---

### Program cont.:

11:50 a.m. - 12:15 p.m. **Investigating the Rise and Fall of Opioids Using Data Acquired by Liquid Chromatography/Time of Flight/Mass Spectrometry (2017-DN-BX-0169)**  
*Judith Rodriguez Salas, MS*

12:15 p.m. - 1:35 p.m. **Lunch**

### **Afternoon Session I –Impression and Pattern Evidence/Trace Evidence**

*Moderator: Gregory Dutton, PhD*

1:35 p.m. - 2:00 p.m. **Quantitative Measures for Footwear Impression Comparisons (DJO-NIJ-17-RO-0202)**  
*Steven P. Lund, PhD*

2:00 p.m. - 2:25 p.m. **Testing the Accuracy and Reliability of Palmar Friction Ridge Comparisons: A Black Box Study (2017-DN-BX-0170)**  
*Heidi Eldridge, MS*

2:25 p.m. - 2:50 p.m. **Rapid Detection of Inorganic and Organic Firearm Discharge Residues by Laser-Induced Breakdown Spectroscopy and Electrochemical Sensors (2018-DU-BX-0186)**  
*Tatiana Trejos, PhD; Luis E. Arroyo PhD*

2:50 p.m. - 3:15 p.m. **Facilitating the Adoption of Glass Evidence Analyses in Forensic Laboratories (2015-DN-BX-K049)**  
*Jose R. Almirall, PhD*

3:15 p.m. - 3:30 p.m. **Break**

### **Afternoon Session II – Forensic Anthropology and Forensic Pathology**

*Moderator: Danielle L. McLeod-Henning, MFS*

3:30 p.m. - 3:55 p.m. **Developing an Online Resource for Species Identification of Skeletal Remains (2018-DU-BX-0229)**  
*Heather M. Garvin, PhD*

3:55 p.m. - 4:20 p.m. **Development Responses to Fluctuating Temperatures of a Forensically Important Blow Fly (*Cochliomyia Macellaria*) (2016-DN-BX-0204)**  
*Travis Rusch*

4:20 p.m. - 4:45 p.m. **Understanding the Role of the Thanatomiobiota in the Decay of “Reproductive Organs” in Human Decomposition (2017-MU-MU-0042)**  
*Gulnaz T. Javan, PhD*

4:45 p.m. - 5:10 p.m. **Using Microbiome Tools to Estimate the Postmortem Interval of Human Remains (2015-DN-BX-K016)**  
*Jessica L. Metcalf, PhD*

# NATIONAL ASSOCIATION OF MEDICAL EXAMINERS

## 2020 Interim Scientific Program Mass Fatality: Planning and Management

### Tuesday

February 18, 2020

1:00 p.m. – 5:00 p.m.

This program will include a multidisciplinary panel discussion relative to mass fatality planning and management.

#### Program:

|                       |                                                                                                                                                                                                                                               |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1:00 p.m. - 1:05 p.m. | <b>Welcome and Introduction</b><br><i>Sally S. Aiken, MD, President, National Association of Medical Examiners</i>                                                                                                                            |
| 1:05 p.m. - 1:10 p.m. | <b>Opening Remarks</b><br><i>Suzanne R. Utley, MDL</i>                                                                                                                                                                                        |
| 1:10 p.m. - 1:40 p.m. | <b>National Missing and Unidentified Persons System (NamUs) for Critical Incidents</b><br><i>Emily A. Craig, PhD</i>                                                                                                                          |
| 1:40 p.m. - 2:10 p.m. | <b>Calling an Audible: Continuity of Operations Planning (COOP) and Mass Fatality Incident (MFI) Planning</b><br><i>Shawn Wilson</i>                                                                                                          |
| 2:10 p.m. - 2:40 p.m. | <b>Mass Fatality Management—Preparation for a Complex Coordinated Attack (CCA)</b><br><i>Roger A. Mitchell, Jr.</i>                                                                                                                           |
| 2:40 p.m. - 2:50 p.m. | <b>Break</b>                                                                                                                                                                                                                                  |
| 2:50 p.m. - 3:20 p.m. | <b>Planning, Partnerships, and Preparing for the Unexpected</b><br><i>Melanie Rouse, MS</i>                                                                                                                                                   |
| 3:20 p.m. - 3:50 p.m. | <b>Flight 3407: A Commercial Airline Crash in Western New York</b><br><i>Katherine F. Maloney, MD</i>                                                                                                                                         |
| 3:50 p.m. - 4:20 p.m. | <b>Mass Fatality Preparedness—Lessons Learned From the October 1, 2017, Shooting in Las Vegas</b><br><i>John Fudenberg, MBA</i>                                                                                                               |
| 4:20 p.m. - 5:00 p.m. | <b>Mass Fatality Planning and Aftermath: Panel Discussion</b><br><i>Sally S. Aiken, MD; Suzanne R. Utley, MD; Emily A. Craig, PhD; Shawn Wilson; Roger A. Mitchell, Jr.; Melanie Rouse, MS; Katherine F. Maloney, MD; John Fudenberg, MBA</i> |

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of MedChi, The Maryland State Medical Society, and the National Association of Medical Examiners. MedChi is accredited by the ACCME to provide continuing medical education for physicians. MedChi designates this live activity for a maximum of 3.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Continuing Education Administration Fee:** There is an administrative charge (\$75 pre-registration, \$100 at the door registration) for persons wishing to receive this credit. It will be necessary for you to complete a program evaluation as well as pay the administrative fee to receive CME credit for this meeting.

**Self-Assessment Module:** The American Board of Pathology has deemed the National Association of Medical Examiners to be an approved provider of Self-Assessment Modules (SAMs) for the Life-Long Learning and Self-Assessment Requirement (Part II) for Maintenance of Certification in Forensic Pathology. This activity has been planned and implemented in accordance with those guidelines and qualify for a maximum of 3.5 hours of SAMs. There is an administrative charge of \$35 for Members and \$105 for Non-Members.

**Registration Fee:** There is a registration fee of \$150 for Members, \$200 at the door and \$200 for Non-Members, \$250 at the door. Registrations are totally separate from the AAFS. Contact Denise McNally at 660-734-1891 or email [name@thename.org](mailto:name@thename.org) to receive a registration form.

# HUMANITARIAN AND HUMAN RIGHTS RESOURCE CENTER

## Poster Session

American Academy of Forensic Sciences 72<sup>nd</sup> Annual Scientific Meeting

*Pre-Registration Not Required — Open to All Meeting Attendees*

## Tuesday

February 18, 2020

6:00 p.m. – 8:00 p.m.

The Humanitarian and Human Rights Resource Center (HHRRC) of the American Academy of Forensic Sciences (AAFS), with support from the National Institute of Justice's Forensic Technology Center of Excellence, provides needed resources and support to apply modern forensic science to global humanitarian and human rights projects. This Humanitarian and Human Rights Poster Session is an open meeting where attendees can meet our HHRRC researchers and learn about the application of forensic science to investigate humanitarian and human rights injustices.

Information will be available at [www.forensicCOE.org](http://www.forensicCOE.org).

### Moderator:

**Douglas H. Ubelaker, PhD**

Smithsonian National Museum of Natural History  
Washington, DC

### Co-Moderator:

**Jeri D. Roper-Miller, PhD**

RTI International  
Research Triangle Park, NC

### Program:

6:00 p.m. - 8:00 p.m.

**Urban Scavenging of Skeletal Remains by the Slender Mongoose  
(*Galerella sanguinea*) in Johannesburg, South Africa**

*Craig A. Keyes, MS; Jolandie Myburgh, MSc; Desiré Brits, PhD*

6:00 p.m. - 8:00 p.m.

**Application of Stable Isotopes for Geolocating Unidentified Border Crossers  
From the Texas-Mexico Border**

*Eric J. Bartelink, PhD; Sarah A. Hall, MA; Samuel A. Mijal, BS; Vanessa C. Reeves, BA;  
Alina Tichinin*

6:00 p.m. - 8:00 p.m.

**Building Forensic Capacity in Post-Conflict Uganda**

*Hugh H. Tuller, MA; Paul D. Emanovsky, PhD; Jaymee Kim, PhD;  
Dawnie W. Steadman, PhD*

6:00 p.m. - 8:00 p.m.

**Scene Documentation for Human Rights Investigators**

*Tal Simmons, PhD; Scott Edwards, PhD*

6:00 p.m. - 8:00 p.m.

**Humanitarian Forensic Action for Resolving and Preventing the Missing**

*Morris V. Tidball-Binz, MD*

6:00 p.m. - 8:00 p.m.

**Strategies for the Identification of Migrants in the Mediterranean:  
The Shipwreck of April 18, 2015**

*Cristina Cattaneo, PhD; Debora Mazzarelli, BS; Giulia Caccia, BSc;  
Danilo De Angelis, DDS; Annalisa Cappella, PhD; Pasquale Poppa, BS;  
Douglas H. Ubelaker, PhD; Luca Sconfienza, MD; Zuzana Obertova, PhD;  
Richard Jantz, PhD; Stephen D. Ousley, PhD; Laura Manthey, MD;  
Tony Fracasso, MD, PhD; Lucie Biehler-Gomez; Barbara Bertoglio, BSc;  
Carlo Previderé, PhD; Morris V. Tidball-Binz, MD; José P. Baraybar, MSc, PhD;  
Oran Finegan, MSc; Rossella Di Liberto; Federica Giannotta; Giuliana Perrotta, MA*

Latham, PhD</i>                                                                                                  |
| 11:30 a.m. - 1:00 p.m. | A9  | <b>Application and Evaluation of Adult Morphological Sex Traits Using the Subadult Innominate</b><br><i>Stephanie J. Cole, MS*</i> ; <i>Kyra E. Stull, PhD</i>                                                                                                               |
| 11:30 a.m. - 1:00 p.m. | A10 | <b>Sex Estimation of the Subadult Pelvis Prior to Acetabular Fusion</b><br><i>Heather M. Garvin, PhD*</i> ; <i>Katherine A. Marciniak, BS</i> ; <i>Laura E. Cirillo, MA</i> ; <i>Michala K. Stock, PhD</i> ; <i>Kyra E. Stull, PhD</i>                                       |
| 11:30 a.m. - 1:00 p.m. | A11 | <b>3D Models of Paranasal Sinuses to Establish Age, Sex, and Ethnicity Across Three Modern Populations</b><br><i>Madeline H. Robles, MS, MRes*</i> ; <i>Ruth M. Morgan, PhD</i> ; <i>Carolyn Rando, PhD</i>                                                                  |
| 11:30 a.m. - 1:00 p.m. | A12 | <b>Assessing the Accuracy of Current Ancestry and Sex Estimation Methods on a Japanese Sample</b><br><i>Cassie E. Skipper, MA*</i> ; <i>Marin A. Pilloud, PhD</i>                                                                                                            |

# ANTHROPOLOGY

---

- 11:30 a.m. - 1:00 p.m.    **A13**    **Crossing the Borders of Linguistics, Ancestry, and Race in the Field of Forensic Anthropology**  
*Alba E. Craig, BA\*; Krista E. Latham, PhD*
- 11:30 a.m. - 1:00 p.m.    **A14**    **The Use of Eye Tracking Technology in Forensic Anthropology: An Empirical Approach to Advancing the Understanding of Complex Visual Tasks in Cranial Macromorphoscopic Trait Evaluations**  
*Sherry Nakhaeizadeh\*; Micayla C. Spiros, MS; Joseph T. Hefner, PhD; Tim Thompson, PhD; Ruth M. Morgan, PhD*
- 11:30 a.m. - 1:00 p.m.    **A15**    **Eye Tracking to Assess Decision-Making in Cranial Macromorphoscopic (MMS) Trait Evaluation: Implications of Education and Training in Method Application**  
*Micayla C. Spiros, MS\*; Sherry Nakhaeizadeh; Ruth M. Morgan, PhD; Tim Thompson, PhD; Joseph T. Hefner, PhD*
- 11:30 a.m. - 1:00 p.m.    **A16**    **Metric and Non-Metric Ancestry Evaluation Analysis of the Craniofacial Region in Greek-Cypriots: A Pilot Study**  
*Madyson R. Stephenson\*; Anna S. La Valley, MS; Xenia P. Kyriakou, MA*
- 11:30 a.m. - 1:00 p.m.    **A17**    **Craniofacial Modularity and Integration: Implications for Ancestry Assessment**  
*Janet E. Finlayson, MA\*; Michala K. Stock, PhD*
- 11:30 a.m. - 1:00 p.m.    **A18**    **Re-Evaluating Skeletal Ancestry Traits Using Three-Dimensional Technology**  
*Elisabeth Cuerrier-Richer, MSc\*; Tracy Rogers, PhD*
- 11:30 a.m. - 1:00 p.m.    **A19**    **A Comparison of Two Data Collection Methods for the (hu)MANid Program on a Diverse Sample of Mandibles**  
*Paige A. Lynch, MS\*; Luis L. Cabo, MS*
- 11:30 a.m. - 1:00 p.m.    **A20**    **Craniometric Variation and FORDISC® Misclassification in Latin American and Asian Individuals**  
*Miriam Rangel, BS\*; Kanya Godde, PhD\**
- 11:30 a.m. - 1:00 p.m.    **A21**    **Geographic Origin Estimation of Latin American Individuals Using Craniometric Data**  
*Kari Helgeson, MA\*; Kate Spradley, PhD*
- 11:30 a.m. - 1:00 p.m.    **A22**    **The Impact of Error in Femur Subtrochanteric Measurements on the Assessment of Population Affinity**  
*Briana T. New, MA\*; Emily S. Silverman, MA; Sabrina C. Taàla, MA*
- 11:30 a.m. - 1:00 p.m.    **A23**    **Odontometric Variation of Male Skeletal Samples From the United States and South Africa**  
*Dori E. Kenessey, BA\*; Tatiana Vlemincq-Mendieta, MS; G. Richard Scott, PhD; Marin A. Pilloud, PhD*
- 11:30 a.m. - 1:00 p.m.    **A24**    **Influence of Ancestry on Sexual Dimorphism in the Human Mandibular Canine**  
*Brittney L. Blevins, MA\**
- 11:30 a.m. - 1:00 p.m.    **A25**    **Human Trafficking: A Challenging Case of Age Assessment**  
*Greta Cena, MD\*; Caterina Bosco, MD; Luana Bonaccorso, MD\*; Davide Santovito, MD; Sara S. Racalbutto, PsyD; Elena Coppo, MD; Giancarlo Di Vella, MD, PhD\**

## Thursday—Session I

### Search and Recovery Protocols and Identification of Victims in Wildfires: Multidisciplinary Perspectives

*Moderator:* Alison Galloway, PhD  
University of California  
Santa Cruz, CA

*Co-Moderator:* Angela L. Harden, MA  
The Ohio State University  
Columbus, OH

|           |   |           |            |                                                                                                                                                                                                                                                                                                                    |

|            |   |           |            |                                                                                                                                                                                                                                                                                                                                                                                        |
|------------|---|-----------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:30 a.m. | - | 1:00 p.m. | <b>A43</b> | <b>The Infant Injury Database</b><br><i>Miriam E. Soto Martinez, PhD*</i> ; <i>Jason M. Wiersema, PhD</i> ; <i>Deborrah C. Pinto, PhD</i> ;<br><i>Julie M. Fleischman, PhD</i> ; <i>Christian Crowder, PhD</i> ; <i>Jennifer C. Love, PhD</i> ;<br><i>Sharon M. Derrick, PhD</i> ; <i>Christopher S. Greeley, MD</i> ; <i>Marcella Donaruma-Kwoh, MD</i> ;<br><i>Angela Bachim, MD</i> |
| 11:30 a.m. | - | 1:00 p.m. | <b>A44</b> | <b>Pediatric Posterior Rib Terminus Defects: An Investigation of a Potential Mimic of Traumatic Injury</b><br><i>Jason M. Wiersema, PhD*</i> ; <i>Miriam E. Soto Martinez, PhD</i> ; <i>Deborrah C. Pinto, PhD</i> ;<br><i>Julie M. Fleischman, PhD</i> ; <i>Dwayne A. Wolf, MD, PhD</i> ; <i>Aubrie M. Sanchez, MS, MPH</i>                                                           |
| 11:30 a.m. | - | 1:00 p.m. | <b>A45</b> | <b>Evaluating Bone Fracture Healing and Variability Across Forensic Samples Using an Anabolic/Catabolic Model of Bone Repair</b><br><i>Donna C. Boyd, PhD*</i>                                                                                                                                                                                                                         |
| 11:30 a.m. | - | 1:00 p.m. | <b>A46</b> | <b>Anthropological Examinations of the Hyoid, Thyroid Cartilage, and Cricoid Cartilage in Cases of Possible Neck Trauma</b><br><i>Christopher W. Rainwater, MS*</i> ; <i>Esther H. Choo, BA</i>                                                                                                                                                                                        |
| 11:30 a.m. | - | 1:00 p.m. | <b>A47</b> | <b>Utilizing Reflectance Transformation Imaging (RTI) for the Analysis of Saw Mark Characteristics on Kerf Walls: A Comparison of Traditional Imaging Techniques</b><br><i>Britny Martlin*</i> ; <i>Carolyn Rando, PhD</i>                                                                                                                                                             |

- |            |   |           |            |                                                                                                                                                                                                                                                                                                                        |
|------------|---|-----------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:30 a.m. | - | 1:00 p.m. | <b>A48</b> | <b>Micro-Computed Tomography (micro-CT) Analysis of False Starts on Bones After Prolonged Exposure to Fire: An Experimental Study</b><br><i>Giovanni Cecchetto, MD, PhD*; Chiara Giraudo, MD; Ludovico Fava, MD; Chiara Vignotto, MD; Marco Bisceglia, MD; Amalia Lupi, MD; Paolo Fais, PhD; Massimo Montisci, PhD</i> |
| 11:30 a.m. | - | 1:00 p.m. | <b>A49</b> | <b>Dehydration-Induced Quantitative Morphometric Alterations to Sharp Force Trauma on Bones</b><br><i>Taylor M. Flaherty, BS*; Carolyn Rando, PhD; Rebecca Watts, PhD</i>                                                                                                                                              |
| 11:30 a.m. | - | 1:00 p.m. | <b>A50</b> | <b>Fracture Patterns Associated With an Airplane Propeller Strike: A Case From the West Tennessee Regional Forensic Center</b><br><i>Jenna M.S. Watson, MA*; Benjamin J. Figura, PhD</i>                                                                                                                               |
| 11:30 a.m. | - | 1:00 p.m. | <b>A51</b> | <b>A Survey of Peri-Mortem Vertebral Trauma in Historic Cases</b><br><i>Andrea Palmiotto, PhD; Brittany S. Walter, PhD*; Larkin F. Kennedy, PhD; Emily R. Streetman, PhD</i>                                                                                                                                           |
| 11:30 a.m. | - | 1:00 p.m. | <b>A52</b> | <b>Prediction of Bullet Type From Cranial Gunshot Trauma</b><br><i>Elizabeth A. DiGangi, PhD*; Tessa Somogyi, MA*; Elizabeth A. Evangelou, MA*; Gary D. James, PhD</i>                                                                                                                                                 |
| 11:30 a.m. | - | 1:00 p.m. | <b>A53</b> | <b>Atypical Gunshot Wounds in a Controlled Experiment</b><br><i>Elizabeth A. Evangelou, MA*; Tessa Somogyi, MA*; Kevin E. Sheridan, PhD; Elizabeth A. DiGangi, PhD</i>                                                                                                                                                 |
| 11:30 a.m. | - | 1:00 p.m. | <b>A54</b> | <b>Radiographic Evidence of Gunshot Defects in Skeletal Remains: A Preliminary Study</b><br><i>Naomi S. Levin, BA*</i>                                                                                                                                                                                                 |
| 11:30 a.m. | - | 1:00 p.m. | <b>A55</b> | <b>Fracture Pattern of Midface Ballistic Trauma</b><br><i>Casey File, MS*; Deborah C. Pinto, PhD*; Si Gao, MS; Jason M. Wiersema, PhD; Julie M. Fleischman, PhD; Miriam E. Soto Martinez, PhD</i>                                                                                                                      |
| 11:30 a.m. | - | 1:00 p.m. | <b>A56</b> | <b>The Effects of Diabetes Mellitus (DM) on Bone Fracture Susceptibility and Repair With Applications to Non-Accidental Forensic Fracture Interpretation</b><br><i>Donna C. Boyd, PhD; Sadie R. Friend*</i>                                                                                                            |
| 11:30 a.m. | - | 1:00 p.m. | <b>A57</b> | <b>The Reliability of Morphoscopic Data From 3D Surface Scans</b><br><i>Sarah Schwing, BA, BS*</i>                                                                                                                                                                                                                     |
| 11:30 a.m. | - | 1:00 p.m. | <b>A58</b> | <b>Experimental Assessment of the Surface Quality of 3D Printed Bones for Evaluative Interpretation in Forensic Anthropology Reconstructions</b><br><i>Rachael M. Carew, MSc*; Ruth M. Morgan, PhD; Carolyn Rando, PhD</i>                                                                                             |
| 11:30 a.m. | - | 1:00 p.m. | <b>A59</b> | <b>Investigating the Impact of Opioid Abuse on Intracortical Porosity and Bone Cellular Density: A Synchrotron-Radiation Micro-Computed Tomography (SRμCT) Approach</b><br><i>Janna M. Andronowski, PhD*; Reed A. Davis, MS; Mary E. Cole, PhD</i>                                                                     |
| 11:30 a.m. | - | 1:00 p.m. | <b>A60</b> | <b>Oh Deer! Detecting Non-Human Skeletal Remains Using Bone Collagen Fingerprinting</b><br><i>Dana Austin, PhD*; Miranda M. Ehlers, BS*</i>                                                                                                                                                                            |
| 11:30 a.m. | - | 1:00 p.m. | <b>A61</b> | <b>Investigating the Predictive Relationships Between Oxygen and Hydrogen Isotopes in Bottled Water and Human Hair in Mexican Populations</b><br><i>Chelsey A. Juarez, PhD*; Belinda S. Akpa, PhD</i>                                                                                                                  |

# ANTHROPOLOGY

---

- 11:30 a.m. - 1:00 p.m. **A62** **An Assessment of How “Predictive” Human Geolocation Models Perform When Compared to a “Known” Geolocated Human Enamel Data-Set**  
*Momoko Ueda, MA\**; *Lynne S. Bell, PhD*
- 11:30 a.m. - 1:00 p.m. **A63** **Subadult Body Mass Estimation From Skeletal Remains: Validation for Femoral Cross-Section Methods in a Contemporary Taiwanese Population**  
*An-Di Yim, MA, MS\**; *Lyle W. Konigsberg, PhD*; *Hsiao-Lin Hwa, MD, PhD*; *Jo-Yu Chen, MD*; *Hon-Man Liu, MD*
- 11:30 a.m. - 1:00 p.m. **A64** **A Comparative Analysis of Nasal Profile Estimation Methods for Facial Reconstruction**  
*Dong-Ho Eddie Kim, BSc\**; *Hankyu Kim*; *Deog-Im Kim, PhD*; *Dae-Kyoon Park, MD, PhD*; *U-Young Lee, MD, PhD*; *Yi-suk Kim, MD, PhD*
- 11:30 a.m. - 1:00 p.m. **A65** **The Application of Morphometric and Morphoscopic Features of the Nose in Facial Reconstruction: A Study on a North Indian Population**  
*Tej Kaur, MSc\**; *Bahadur Singh, MSc*; *Kewal Krishan, PhD*; *Adarsh Kumar, MD*
- 11:30 a.m. - 1:00 p.m. **A66** **Nose Approximation From Cone-Beam Computed Tomography (CBCT) Using a New Computer-Assisted Method**  
*Alison F. Ridell, PhD*; *Fabrice Demeter, PhD*; *Ericka N. LAbbe, PhD\**; *Dirk Vandermeulen, PhD*; *Anna C. Oettle, PhD*
- 11:30 a.m. - 1:00 p.m. **A67** **The First Recovery and Identification Project of Missing Casualties in the Korean Demilitarized Zone (DMZ)**  
*Yu Ryang Jang, PhD\**; *Nahyok Im, PhD*
- 11:30 a.m. - 1:00 p.m. **A68** **Historical and Cultural Complications of Repatriating Forensic “Cases” in the Southeastern United States**  
*Alice F. Gooding, PhD\**; *Jonathan Eisenstat, MD*
- 11:30 a.m. - 1:00 p.m. **A69** **Skeletal Preparation Using a Modified Steam Kettle: A Fast, Easy, and Low-Maintenance Method for Processing Human Remains**  
*Kerianne Armelli, MS\**; *Jered B. Cornelison, PhD*; *Carolyn V. Isaac, PhD*
- 11:30 a.m. - 1:00 p.m. **A70** **Salary, Wage Transparency, and Forensic Anthropology**  
*Nicholas V. Passalacqua, PhD\**; *Elaine Y. Chu, MA*; *Marin A. Pilloud, PhD*
- 11:30 a.m. - 1:00 p.m. **A71** **Learning From Our Casework: The Forensic Anthropology Database for Assessing Methods Accuracy (FADAMA)**  
*Cris E. Hughes, PhD\**; *Chelsey A. Juarez, PhD*; *Katharine Chapman Pope, MA*; *Brian F. Spatola, MA*
- 11:30 a.m. - 1:00 p.m. **A72** **3D Slicer as a Tool for Creating Virtual Bone Models From Computed Tomography (CT) Data: Toward Validating a Step-By-Step Method**  
*Madeline H. Robles, MS, MRes\**; *Rachael M. Carew, MSc*; *Ruth M. Morgan, PhD*; *Carolyn Rando, PhD*
- 11:30 a.m. - 1:00 p.m. **A73** **Gerdy’s Tubercle Shape and Associated Biomechanical Factors**  
*Hailey Collord-Stalder, BA\**; *Nathan Blair, BS\**
- 11:30 a.m. - 1:00 p.m. **A74** **Fatal Shotgun Trauma to the Cranium With Discrimination Between Manners of Death**  
*Samantha W. Coberly, MA\**

## Issues Surrounding Human Rights and Migration

*Moderator:* Krista E. Latham, PhD  
University of Indianapolis  
Indianapolis, IN

*Co-Moderator:* Brittany S. Walter, PhD  
Defense POW/MIA Accounting Agency  
Identification Laboratory  
Offutt Air Force Base, NE

## Thursday—Session II

### Taphonomy and Postmortem Interval

*Moderator:* Joan A. Bytheway, PhD  
Sam Houston State University  
Huntsville, TX

*Co-Moderator:* Summer J. Decker, PhD  
University of South Florida  
Department of Radiology  
Morsani College of Medicine  
Tampa, FL

## Wednesday

### Poster Session

|            |   |           |            |                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------|---|-----------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:30 a.m. | - | 1:00 p.m. | <b>B1</b>  | <b>Complex DNA Mixture Analysis: Massively Parallel Sequencing (MPS) of Rare Single Nucleotide Polymorphisms (SNPs)</b><br><i>Martha Petrovick, PhD*</i> ; <i>Natalie Damaso, PhD</i> ; <i>Tara Boettcher, BS</i> ; <i>Josh Dettman, PhD</i> ; <i>Darrell O. Ricke, PhD</i> ; <i>Philip Fremont-Smith, MS</i> ; <i>Kyleen E. Elwick, PhD</i> ; <i>Mark F. Kavlick, PhD</i> ; <i>James M. Robertson, PhD</i> ; <i>Eric Schwoebel, PhD</i> |
| 11:30 a.m. | - | 1:00 p.m. | <b>B2</b>  | <b>Implementing Hematoxylin Into Casework at the North Carolina State Crime Laboratory</b><br><i>Lindsey Admire, MS*</i> ; <i>Kristen Crawford, MS</i> ; <i>Melanie Carson, BS</i> ; <i>Samantha McDonald, BS</i> ; <i>David M. Freehling, BS</i>                                                                                                                                                                                        |
| 11:30 a.m. | - | 1:00 p.m. | <b>B3</b>  | <b>The “Secondary Burial” in Southern Italy: How Traditional Funerary Practices Affect DNA Preservation in Forensic Human Identification</b><br><i>Ciro Di Nunzio, PhD*</i> ; <i>Michele Di Nunzio*</i> ; <i>Aldo Di Nunzio*</i> ; <i>Pietrantonio Ricci, PhD</i> ; <i>Matteo Borrini, PhD*</i>                                                                                                                                          |
| 11:30 a.m. | - | 1:00 p.m. | <b>B4</b>  | <b>The Student Experience in Participating in a Collaborative Exercise for Methylation-Based Body Fluid Identification</b><br><i>Carly E. Mills, BS*</i> ; <i>Yijian Cao, BSc</i> ; <i>Daniele S. Podini, PhD</i> ; <i>Hwan Young Lee, PhD</i>                                                                                                                                                                                           |
| 11:30 a.m. | - | 1:00 p.m. | <b>B5</b>  | <b>A Student Experience Evaluating the Ability of a Methylation-Based Age Prediction Model to Be Implemented in the Forensic Laboratory as Part of a Collaborative Study</b><br><i>Yijian Cao, BSc*</i> ; <i>Carly E. Mills, BS*</i> ; <i>Hwan Young Lee, PhD</i> ; <i>Daniele S. Podini, PhD</i>                                                                                                                                        |
| 11:30 a.m. | - | 1:00 p.m. | <b>B6</b>  | <b>A Comparison of InnoQuant® and Quantifiler® Trio as Quantification/Degradation Methods for Predicting Next Generation Sequencing (NGS) Success</b><br><i>Jessica M. McLamb, MS</i> ; <i>Natalie Damaso, PhD</i> ; <i>James M. Robertson, PhD*</i>                                                                                                                                                                                     |
| 11:30 a.m. | - | 1:00 p.m. | <b>B7</b>  | <b>Further Evaluation of a Dry Vacuuming Technique for Recovery of DNA From Handwritten Documents</b><br><i>Christian Hopkins, BS</i> ; <i>Patrick McLaughlin, BS</i> ; <i>Mechthild K. Prinz, PhD*</i>                                                                                                                                                                                                                                  |
| 11:30 a.m. | - | 1:00 p.m. | <b>B8</b>  | <b>Eye and Skin Color Identity Single Nucleotide Polymorphisms (SNPs) Screening Using Polymerase Chain Reaction (PCR) High Resolution Melt (HRM) Assays</b><br><i>Lakin Prescott*</i> ; <i>Farah Narmouq*</i> ; <i>Kelly M. Elkins, PhD</i>                                                                                                                                                                                              |
| 11:30 a.m. | - | 1:00 p.m. | <b>B9</b>  | <b>Assessing Potential Inhibitory Effects of Personal Lubricant on the Ability to Detect Biomarkers Consistent With Semen, Saliva, and Vaginal Fluid</b><br><i>Catherine O. Brown, MSFS*</i> ; <i>Heather E. McKiernan, PhD</i> ; <i>Phillip Danielson, PhD</i> ; <i>Kevin M. Legg, PhD</i>                                                                                                                                              |
| 11:30 a.m. | - | 1:00 p.m. | <b>B10</b> | <b>Developing a Forensically Relevant Single-Cell Interpretation Strategy for Human Identification</b><br><i>Amanda J. Gonzalez, MS*</i> ; <i>Harish Swaminathan, PhD</i> ; <i>Ken Duffy, PhD</i> ; <i>Catherine M. Grgicak, PhD</i>                                                                                                                                                                                                     |
| 11:30 a.m. | - | 1:00 p.m. | <b>B11</b> | <b>High-Throughput and Simultaneous Analysis of 12 Cannabinoids in Hemp Oil Using Liquid Chromatography With Ultraviolet (LC-UV) Detection</b><br><i>Liguo Song, PhD*</i> ; <i>Shashi B. Pathipaka, MS</i> ; <i>James D. Leese, BS</i> ; <i>Madison Chao, BS</i> ; <i>Tranellie Collins, BS</i> ; <i>John P. Westein, BS</i>                                                                                                             |

|------------|---|-----------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:30 a.m. | - | 1:00 p.m. | <b>B12</b> | <b>Cannabinoid Content in Commercially Available Oils</b><br><i>Tiffany M. Matyja*</i> ; Kenyon M. Evans-Nguyen, PhD; John Struss, PhD                                                                                                                                                                   |
| 11:30 a.m. | - | 1:00 p.m. | <b>B13</b> | <b>The Detection and Identification of Synthetic Cathinones by Portable Nano-Liquid Chromatography (Nano-LC) With Dual Wavelength Ultraviolet (UV) Detection</b><br><i>Marisa C. May, BS*</i> ; David C. Pavone, BS; Ira S. Lurie, PhD                                                                   |
| 11:30 a.m. | - | 1:00 p.m. | <b>B14</b> | <b>Retrofitting Massively Parallel Sequencing (MPS) for HLA-DQA1 and Polymarker (PM) in Forensic Casework</b><br><i>Audrey V. Hoyle, BS*</i> ; Erin Weaver, BS*; Fabio Oldoni, PhD; Robert Lagacé, BS; Daniele S. Podini, PhD                                                                            |
| 11:30 a.m. | - | 1:00 p.m. | <b>B15</b> | <b>A Method Development for Analyzing 17 Benzodiazepines and Metabolites Used in Crimes Using Solid Phase Extraction-Tandem Mass Spectrometry</b><br><i>Vadoud Niri, PhD*</i> ; Kimberly E. LaGatta, BS; Michaela Gysbers; Taylor Maslin; Shokouh Haddadi, PhD                                           |
| 11:30 a.m. | - | 1:00 p.m. | <b>B16</b> | <b>“Free Range” Gunshot Primer Residue: A Study on Multiple Transfers of Gunshot Primer Residue</b><br><i>Christopher P. Chany, MS*</i> ; Thomas R. White, BS; Stephanie A. Freiwald, BS                                                                                                                 |
| 11:30 a.m. | - | 1:00 p.m. | <b>B17</b> | <b>Ambient Ionization Mass Spectrometry (AMS): A New Forensic Tool for Adhesive Tape Evidence Discrimination</b><br><i>Maureen E. Oliva, BS*</i> ; Yinglei Pu, BS; Dong Zhang, BS; Gerardo Gamez, PhD                                                                                                    |
| 11:30 a.m. | - | 1:00 p.m. | <b>B18</b> | <b>Supplementary Viewing Techniques of Gunshot Residue (GSR) Utilizing Infrared (IR) and Fluorescence</b><br><i>Christopher L. Ardell, BS*</i> ; Zachary E. Weitzel, BS; Charles A. Smith, BS; Amanda L. Bazzanini, MS                                                                                   |
| 11:30 a.m. | - | 1:00 p.m. | <b>B19</b> | <b>The Development of a Rapid, Reliable Detection Method for Synthetic Cathinones</b><br><i>Mario O. Vendrell-Dones, BS*</i> ; Chiara Deriu, MS; Ling Wang, MS; Bruce R. McCord, PhD                                                                                                                     |
| 11:30 a.m. | - | 1:00 p.m. | <b>B20</b> | <b>A Validation Study of the Synthetic Cannabinoid 5-Fluoro PB-22</b><br><i>Trista Gray, BS*</i> ; Erin Shonsey, PhD                                                                                                                                                                                     |
| 11:30 a.m. | - | 1:00 p.m. | <b>B21</b> | <b>Metabolism of Furanylfentanyl in Fresh Human Hepatocytes: Detection and Confirmation of Furan Ring-Opened Carboxylic Acid Metabolite</b><br><i>Tatsuyuki Kanamori*</i> ; Yuki Okada, MS; Hiroki Segawa, PhD; Tadashi Yamamuro, PhD; Kenji Kuwayama, PhD; Kenji Tsujikawa, PhD; Yuko Togawa Iwata, PhD |
| 11:30 a.m. | - | 1:00 p.m. | <b>B22</b> | <b>An Analysis of Smokeless Powders, Smokeless Powder Residues, and Pyrolysis Products by Gas Chromatography/Mass Spectrometry (GC/MS)</b><br><i>Emily C. Lennert, BS*</i> ; Candice Bridge, PhD                                                                                                         |
| 11:30 a.m. | - | 1:00 p.m. | <b>B23</b> | <b>An Analysis of Test Exemplar Techniques in Relation to Footwear Examinations</b><br><i>Ismail M. Sebetan, MD, PhD*</i> ; Paul Stein, PhD*; Amy Laabs, MFS*                                                                                                                                            |
| 11:30 a.m. | - | 1:00 p.m. | <b>B24</b> | <b>Magneto-Archimedes Levitation (MagLev) Separation of Drugs</b><br><i>Joe Bozenko, MSc*</i> ; Christoffer K. Abrahamsson, PhD; Michael J. Fink, PhD; Amit Nargarkar, PhD; Dan Preston, PhD; Shencheng Ge, PhD; George Whitesides, PhD                                                                  |
| 11:30 a.m. | - | 1:00 p.m. | <b>B25</b> | <b>An Investigation Into the Use of Amino Acid Ratios to Distinguish Between the Hairs of Similar Individuals</b><br><i>Allison M. Macri*</i> ; Alyssa L. Marsico, PhD                                                                                                                                   |

## Criminalistics Believe It or Not!

*Moderator: Sandra B. Sachs, PhD*  
*Oakland Police Department*  
*Oakland, CA*

*Co-Moderator: Jason L. Linder, MFS*  
*Nebraska State Patrol*  
*Lincoln, NE*

- 7:00 p.m. - 9:00 p.m. **Criminalistics Believe It or Not!**

Please set aside some time Friday evening to join the casual Criminalistics Believe It or Not! session. The evening is intended to be an informal, entertaining, yet informative session; past presentations have regaled crowds with stories of bullets and explosions going awry, investigations of the same, how hair played a pivotal role in a case, unique or historical evidence substrates, koalas, the forensic story of capturing the Golden State Killer, interesting drug submissions, cats at crime scenes, the arc of building a case in court, and dare it be said, poop!

Just like last year, this year's list of Believe It Or Not! speakers, as well as the subject matter of each presentation, will be kept under wraps until the last minute to keep our attendees in suspense.

After the more serious science has finished for the day, come and listen to your friends and colleagues share stories of their forensic (mis)adventures. If you've ever found yourself with nothing to do on the Friday night before the end of the annual meeting, this session is for you!

# CRIMINALISTICS

9:45 a.m. - 10:00 a.m. **B189** **The Detection and Identification of Synthetic Cannabinoids by Portable Nanoflow Liquid Chromatography-Ultraviolet (LC-UV) Detection**  
*David C. Pavone, BS\*; Marisa C. May, BS; Ira S. Lurie, PhD*

10:00 a.m. - 10:30 a.m. **Break**

## Drugs II

*Moderator: Jason L. Linder, MFS  
Nebraska State Patrol  
Lincoln, NE*

10:30 a.m. - 10:45 a.m. **B190** **2020 Update From the Scientific Working Group for the Analysis of Seized Drugs (SWGDRUG)**  
*Sandra E. Rodriguez-Cruz, PhD\**

10:45 a.m. - 11:00 a.m. **B191** **Qualitative and Quantitative Characterization of Complex Samples Containing Fentanyl From Supervised Consumption Sites Using Quantitative Nuclear Magnetic Resonance (qNMR) and a Multi-Component Multiple Resonance Post-Processing Quantitative Algorithm**  
*Richard R. Laing, MS\**

11:00 a.m. - 11:15 a.m. **B192** **An Examination of Fentanyl and Fentanyl Analog Samples in Canada: Trends and Strategies for Analysis**  
*Michelle Boileau, PhD\**

11:15 a.m. - 11:30 a.m. **B193** **Using Silica-Hydride-Based Stationary Phases for Dual-Mode Ultra High Performance Liquid Chromatography (UHPLC) Separation of Synthetic Cathinone Positional Isomers**  
*Carly Ploumen, BS\*; Ioan Marginean, PhD; Ira S. Lurie, PhD*

11:30 a.m. - 11:45 a.m. **B194** **An Analysis of Emerging Benzodiazepines by Thermal Desorption/Direct Analysis in Real Time-Mass Spectrometry (TD/DART®-MS)**  
*Sydney Jones, BS\*; Edward Sisco, PhD; Ioan Marginean, PhD*

11:45 a.m. - 1:00 p.m. **Lunch**

## Drugs III

*Moderator: Jason L. Linder, MFS  
Nebraska State Patrol  
Lincoln, NE*

1:00 p.m. - 1:15 p.m. **B195** **A Comparison of Expected Drug and Confirmed Findings in Samples Submitted by Clients of Supervised Consumption Sites in British Columbia**  
*Aaron M. Shapiro, PhD\*; Kenneth Tupper, PhD; Christopher Mill, MS; Samuel Tobias, MS; Olanrewaju Kayode, BS; Priya Patel, MPH; Lianping Ti, PhD*

1:15 p.m. - 1:30 p.m. **B196** **Identifying Powdered Illicit Drugs Using Magneto-Archimedes Levitation (MagLev), Signal Processing, and Digital Finger Printing**  
*Christoffer K. Abrahamsson, PhD\*; Markus P. Nemitz, PhD; Michael J. Fink, PhD; Daniel J. Preston, PhD; Joe Bozenko, MSc\*; George Whitesides, PhD*

|------------|---|-----------|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:30 a.m. | - | 1:00 p.m. | <b>D1</b> | <b>Amusement Park Accidents Caused by Fatigue Failure</b><br><i>Chan-Seong Park, PhD*</i> ; <i>Honh-Pil Jeon</i> ; <i>Kwangsoo Choi, MA</i> ; <i>Jae-mo Goh, PhD</i> ;<br><i>Nam-Kyu Park, PhD</i>                                                                                                                                                                                                                                                      |
| 11:30 a.m. | - | 1:00 p.m. | <b>D2</b> | <b>The Role of the Dynamometer in the Analysis of Manner of Death by Asphyxia:<br/>A Case Report and Review of the Literature</b><br><i>Matteo A. Sacco, MD*</i> ; <i>Fabrizio Cordasco, MD*</i> ; <i>Francesco Sicilia, MD*</i> ; <i>Luigi De Aloe, MD</i> ;<br><i>Orazio Malfa, MD</i> ; <i>Carmen Scalise, MD</i> ; <i>Gionata Fragomeni, PhD</i> ; <i>Pietrantonio Ricci, PhD</i> ;<br><i>Santo Gratteri, MD</i> ; <i>Isabella Aquila, MD. PhD*</i> |
| 11:30 a.m. | - | 1:00 p.m. | <b>D3</b> | <b>Railway Fatalities: The Importance of the Autopsy for the Reconstruction of Railway<br/>Accidents</b><br><i>Claudia Perrone, MD*</i> ; <i>Ilaria Santoiemma</i> ; <i>Alessandra Stellacci</i> ; <i>Salvatore Moliterno, MD</i> ;<br><i>Lucia Nardelli</i> ; <i>Alessio Ostuni, MD</i> ; <i>Francesco Vinci, MD</i>                                                                                                                                   |

## Thursday—Session I

### Weapons: Knives & Firearms

---

*Moderator:* Kurt D. Weiss, MS  
Case Study Collision Science, LLC  
Santa Barbara, CA

|            |   |            |           |                                                                                                                                                                    |
|------------|---|------------|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:30 a.m.  | - | 8:50 a.m.  | <b>D4</b> | <b>A Comparison of Scientifically Valid and Traditional Firearm Trigger Mechanism<br/>Evaluation Techniques</b><br><i>John Nixon, MBA*</i>                         |
| 8:50 a.m.  | - | 9:10 a.m.  | <b>D5</b> | <b>A Defect Investigation of a Gun Rack</b><br><i>Darren Franck, MSME*</i> ; <i>Harold Franck, MSEE</i>                                                            |
| 9:10 a.m.  | - | 9:30 a.m.  | <b>D6</b> | <b>The Effect of Fabric Tension on Knife and Tool Damage</b><br><i>Patrick H. Geoghegan, PhD*</i> ; <i>Debra J. Carr, PhD</i> ; <i>Sarah V. Hainsworth, PhD</i>    |
| 9:30 a.m.  | - | 10:00 a.m. | <b>D7</b> | <b>The Effectiveness of Overt and Covert Protection Against Attacks by Sharp Implements</b><br><i>Sarah V. Hainsworth, PhD*</i> ; <i>Patrick H. Geoghegan, PhD</i> |
| 10:00 a.m. | - | 10:15 a.m. |           | <b>Break</b>                                                                                                                                                       |

# ENGINEERING & APPLIED SCIENCES

---

## Fire & Explosion Investigations

---

*Moderator:* Darren Franck, MSME  
Advanced Engineering Associates, Inc  
Charleston, WV

- |            |   |            |            |                                                                                                                                                                                |
|------------|---|------------|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10:15 a.m. | - | 10:30 a.m. | <b>D8</b>  | <b>The Impact of Ventilation on Fire Patterns in Full-Scale Structures: Experiments, Analysis, and Education</b><br><i>Daniel Madrzykowski, PhD*; Craig G. Weinschenk, PhD</i> |
| 10:30 a.m. | - | 10:50 a.m. | <b>D9</b>  | <b>The Explosive Destruction of a Horse Trailer With Integrated Living Quarters</b><br><i>David R. Bosch, PhD*; Mark C. Pozzi, MS*</i>                                         |
| 10:50 a.m. | - | 11:05 a.m. | <b>D10</b> | <b>An Investigation Into the Cause of a Fire Engulfing Two Collided Buses</b><br><i>Qiang Chen, PhD*; Xiao Hu*</i>                                                             |
| 11:05 a.m. | - | 11:25 a.m. | <b>D11</b> | <b>Understanding and Controlling the Potential Risk of Jobsite Construction Hazards</b><br><i>Daniel M. Honig, PE*</i>                                                         |
| 11:25 a.m. | - | 11:40 a.m. |            | <b>Break</b>                                                                                                                                                                   |

## Poster Session

---

- |            |   |           |            |                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------|---|-----------|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:30 a.m. | - | 1:00 p.m. | <b>D12</b> | <b>Improving the Accuracy of the Quantitative Method for Evaluating Fracture Load by Blunt Force: A Proposal for the Fracture Load Analysis Method Using the Victim's Bone Shape, Bone Mineral Density Distribution, and Soft Tissue Thickness</b><br><i>Tatsuya Fukuoka, ME*; Yasumi Ito, PhD; Ryuichi Yamada; Yoshiyuki Kagiya, PhD; Tomotaka Matsubara; Sonoka Okura; Tetsuya Nemoto, PhD</i> |
| 11:30 a.m. | - | 1:00 p.m. | <b>D13</b> | <b>Physical Properties of Additive Manufacturing to Combat the Illicit Use of 3D Printing Technology</b><br><i>April Bowen, BS*; Ryan G. Zdenek; Brooke W. Kammrath, PhD; Maria-Isabel Carnasciali, PhD</i>                                                                                                                                                                                      |
| 11:30 a.m. | - | 1:00 p.m. | <b>D14</b> | <b>Hot-Air Ballooning—Rare as Disastrous Incidents: An Italian Case Report</b><br><i>Eloisa Maselli, MD; Aldo Di Fazio; Gianni De Giorgio*; Alessandro Dell'Erba, PhD</i>                                                                                                                                                                                                                        |

## Samples, Magnets, & Trace Elements

---

*Moderator:* Harold Franck, MSEE

|------------|---|------------|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:40 a.m. | - | 11:55 a.m. | <b>D15</b> | <b>Complexity vs. Uncertainty in Models</b><br><i>Willem A. Schreuder, PhD*</i>                                                                                                                                                                                                                                                                                          |
| 11:55 a.m. | - | 12:10 p.m. | <b>D16</b> | <b>Bulk and Micro-Scale Trace Element Analysis of Glass Standard Reference Materials (SRMs) Using Modern Nuclear Analytical Methods and Laser Ablation-Inductively Coupled Plasma/Mass Spectrometry (LA-ICP/MS)</b><br><i>Nicholas Sharp, PhD*; Jamie L. Weaver, PhD; Maria Martinez, PhD; Ruthmara Corzo, PhD; Rick Paul, PhD; Jose R. Almirall, PhD; Eric B. Steel</i> |

12:10 p.m. - 12:25 p.m. **D17** **The Strange Case of the Magnet on the Electricity Meter: When Wrongly Executed Tests Show a Non-Existent Tampering Effect**  
*Alessandro M. Ferrero, MSc\*; Veronica Scotti, LLM*

12:25 p.m. - 1:25 p.m. **Lunch**

## Forensic Linguistics & Research

*Moderator: Sarah V. Hainsworth, PhD  
Aston University  
Birmingham, UNITED KINGDOM*

1:25 p.m. - 1:45 p.m. **D18** **Qualifications for Professional Work in Forensic Linguistics**  
*Carole E. Chaski, PhD\**

1:45 p.m. - 2:05 p.m. **D19** **A Validation Test of SynAID in Authorship Attribution Using Legal Transcriptions**  
*Timothy Habick, PhD\**

2:05 p.m. - 2:25 p.m. **D20** **Challenges and Opportunities for Integrating Epistemic and Evidential Information Into Author Recognition Systems**  
*E. Allyn Smith, PhD\**

2:25 p.m. - 2:45 p.m. **D21** **Detecting Linguistic Markers of Religious Extremism in an Online Environment: A Pakistan Case Study**  
*Mariam Dar, PhD\**

2:45 p.m. - 3:05 p.m. **D22** **Forensic Linguistic Research Collaboration Between an Industry Research Institute and a Forensic Science Laboratory**  
*Carole E. Chaski, PhD\*; Andrea Ledic, MS*

3:05 p.m. - 3:25 p.m. **D23** **Formalizing Spanish Markedness: Working Toward a Spanish Version of the Automated Linguistic Identification & Assessment System (ALIAS) Syntax-Based Authorship Identification (SynAID)**  
*Ángela Almela, PhD\*; Pascual Cantos, PhD; Moisés Almela, PhD*

3:25 p.m. - 3:40 p.m. **Break**

## Collision Analysis & Investigations

*Moderator: David Pienkowski, PhD  
University of Kentucky  
Lexington, KY*

3:40 p.m. - 4:00 p.m. **D24** **Driver Seat and Fuel System Failure in a Rear-End Collision**  
*Kurt D. Weiss, MS\*; Mark C. Pozzi, MS\**

4:00 p.m. - 4:15 p.m. **D25** **Electrical Bike (E-Bike) Deceleration Analysis Using Advanced Electronic Systems**  
*Berislav Barišić-Jaman, BS\*; Igor Spoljaric, MA*

4:15 p.m. - 4:30 p.m. **D26** **Rear Seat Crashworthiness: Predictable Failures of Seats, Belts, Liftgates, Vehicle Structures, and Loss of Occupant Survival Space in Rear Impacts, Especially in the Third Row**  
*Mark C. Pozzi, MS\*; Carley C. Ward, PhD; Kenneth J. Saczalski, PhD\*; Parris Ward, JD\*; David R. Bosch, PhD\**

## Poster Session

11:30 a.m. - 1:00 p.m. **F8** **Is Communication Between the Surgeon and the Anesthesiologist Really Necessary? What Are the Medicolegal Implications?**  
*Lucia Nardelli\**; *Alessandra Stellacci*; *Claudia Perrone, MD*; *Salvatore Moliterno, MD*; *Francesco Vinci, MD*

## What Does the DNA Really Tell Us?

*Moderator: Amy M. Curtis, JD*  
*Virginia Department of Forensic Science*  
*Richmond, VA*

*Co-Moderator: Raymond Valerio, JD*  
*Bronx County District Attorney*  
*Bronx, NY*

1:00 p.m. - 1:30 p.m. **F9** **Recent National Institute of Standards and Technology (NIST) Activities in Forensic Science: Examining Scientific Foundations and Innovation-to-Implementation Issues**  
*John M. Butler, PhD\**; *Robert M. Thompson, MFS\**

1:30 p.m. - 1:45 p.m. **F10** **The Elusive Holy Grail of Simple Yet Adequate DNA Mixture Evaluation Method, or How to Frame a Suspect?**  
*Charles H. Brenner, PhD\**

1:45 p.m. - 2:00 p.m. **F11** **DNA Confronts Bayes and There's Trouble**  
*Charles H. Brenner, PhD\**

2:00 p.m. - 2:30 p.m. **F12** **Probabilistic Genotyping in the Courtroom: Admissibility, Families, Secondary Transfer, and Competing Statistics**  
*Rachel H. Oefelein, MSc\**; *Alicia M. Cadenas, MS*; *Samantha Orans Wandzek, MS*; *Cristina L. Rentas, MFS*; *Daniel I. Aguilar, MS*

2:30 p.m. - 2:45 p.m. **F13** **Scientific Transparency vs. Trade Secret: Issues Surrounding Disclosure of Computer Software Programs, User Manuals, and Source Codes**  
*Jennifer Friedman, JD\**

2:45 p.m. - 3:00 p.m. **Break**

## Learning As We Go

*Moderator: Quandee Semrow, JD*  
*Cook County Public Defender*  
*Forensic Science Division*  
*Chicago, IL*

*Co-Moderator: Tia D. Villeral*  
*Prairie View A&M Univeristy*  
*Houston, TX*

3:00 p.m. - 3:30 p.m. **F14** **The Fast and the Furious**  
*Matthew J. Marvin, BS\**; *Sarah Chu, MS\**

3:30 p.m. - 4:00 p.m. **F15** **The Nose Knows? Residual Odor and Cadaver Dogs: A Review**  
*Dana Delger, JD\**

4:00 p.m. - 4:30 p.m. **F16** **The Evolution of Wrongful Convictions in Fire Cases**  
*Terry-Dawn Hewitt, LLM\**; *Wayne J. McKenna, LLB*

4:30 p.m. - 4:45 p.m. **F17** **Post-Conviction DNA Testing: A Law School and University Collaboration as a Model to Identify and Evaluate Post-Conviction Cases**  
*Katherine A. Roberts, PhD\**; *Paula Mitchell, JD*; *Cassandra Olsen, JD*; *Nikki Herst-Cook, JD*; *Mehul B. Anjaria, MS*

# ODONTOLOGY

---

11:30 a.m. - 11:50 a.m. **G36** **Demirjian 2.0**  
*Corinne D'Anjou, DMD\**; *Derek M. Draft, DDS\**; *Arto Demirjian, DMD*; *Sigrid I. Kvaal*;  
*Normand Bach, DMD*

11:50 a.m. - 1:30 p.m. **Lunch**

## Poster Session

---

11:30 a.m. - 1:00 p.m. **G37** **An Analysis of a Dental Prosthesis Technique in Korean War Casualties**  
*Seoeun Oh\**; *Hyejin Lee*; *Seokdong Oh*; *Kyoungmin Koh*; *Yu Ryang Jang, PhD*

11:30 a.m. - 1:00 p.m. **G38** **The Advantages and Limitations of Various Dental Age Estimation Methods in Forensic Odontology: A Systematic Review**  
*Jagmahender Singh Sehrawat, PhD\**

11:30 a.m. - 1:00 p.m. **G39** **Disaster Victims Identification (DVI) Using Digital Radiology: A Case Report of a Brumadinho Victim Identification by the Dental Comparative Method**  
*Sandra G.G. da Silva\**; *Luciene M. Corradi, MS*; *Denise V. Travassos*

## Dental Age Assessment

---

*Moderator: Grace Chung, DDS*  
*Clark County Office of Coroner/Medical Examiner*  
*Las Vegas, NV*

1:30 p.m. - 1:45 p.m. **G40** **A Data-Driven Process, Prediction, and Reporting Model to Improve Human Identification Using the Mobile Application Intelligent System in Automation of Legitimated Examination Methods (iSALEM)**  
*Salem Altalie, FACLM\**

1:45 p.m. - 2:00 p.m. **G41** **The Estimation of Sex From Dental Arch Dimensions: An Odontometric Analysis**  
*Tanuj Kanchan, MD\**; *Rutwik D. Shedge, MSc*; *Vinay Kumar Chugh, MDS*;  
*Ankita Chugh, MDS*

2:00 p.m. - 2:15 p.m. **G42** **Cementum Annuli: Technique, Microscopy, and Assessment of Age**  
*Michael Clay, DMD\**; *Murray K. Marks, PhD*; *James M. Lewis, DMD*; *Paula C. Brumit, DDS*

2:15 p.m. - 2:30 p.m. **G43** **Morphological Examinations of the Teeth and Jaw Fragments Retrieved From an Ajnala Skeletal Assemblage: A Forensic Odontological Study**  
*Jagmahender Singh Sehrawat, PhD\**; *Ashith B. Acharya, GDFO*

2:30 p.m. - 2:45 p.m. **Break**

---

## Thomas Krauss Memorial Bitemark Session

---

*Moderator: Roland G. Chew, DDS  
Fremont, CA*

# QUESTIONED DOCUMENTS

---

## Poster Session

---

- 11:30 a.m. - 1:00 p.m.    **J9**    **Testing the Perceptual Accuracy of a Subject's Ability to Identify Their Own Handwritten Numbers and Words**  
*Jacqueline Joseph\**
- 11:30 a.m. - 1:00 p.m.    **J10**    **Database Usage in Handwriting Comparisons**  
*Dilara Oner, MS\*; Salih Cengiz, PhD; Gursel Cetin, PhD*
- 11:30 a.m. - 1:00 p.m.    **J11**    **Education and Training in Forensic Document Analysis Offered as an Elective Course to Undergraduate Forensic Science Students in Turkey**  
*Sevil Atasoy, PhD\*; Zekai Genç, PhD; Kaan Yilancioglu, PhD*

## Questioned Documents

---

Moderator: *James A. Black, BS*  
*Lake Forest, CA*

Co-Moderator: *Zain Bhaloo, MSc*  
*Canada Border Services Agency*  
*Ottawa, ON, CANADA*

- 1:00 p.m. - 1:20 p.m.    **J12**    **Investigating the Interlaboratory Reproducibility of Magnetic Flux Measurements of Toners**  
*Carrie Polston, BA\*; Williams Mazzella, PhD; Patrick Buzzini, PhD*
- 1:20 p.m. - 1:50 p.m.    **J13**    **Decipherment of Latent Handwriting Impressions: Point/Counterpoint**  
*Thomas W. Vastrick, BS\**
- 1:50 p.m. - 2:10 p.m.    **J14**    **Infrared (IR) Luminescence With Different Paper Substrates**  
*Dennis J. Ryan, MBA\**
- 2:10 p.m. - 2:30 p.m.    **J15**    **X-Ray Cabinets Applied to Forensic Document Examination**  
*Samiah Ibrahim, BSc\*; Tobin A. Tanaka, BS\**
- 2:30 p.m. - 3:00 p.m.    **J16**    **Practice Management Software: The Key to Staying Organized**  
*Linda L. Mitchell, BS\**
- 3:00 p.m. - 3:15 p.m.       **Break**
- 3:15 p.m. - 3:30 p.m.    **J17**    **Forensic Document Examination: Early Incorporation of the Forensic Intelligence Paradigm**  
*Samiah Ibrahim, BSc\**
- 3:30 p.m. - 5:00 p.m.    **J18**    **Crossing Borders: Issues From Inter-Jurisdictional Casework**  
*Linton Mohammed, PhD\*; Thomas W. Vastrick, BS\*; Tobin A. Tanaka, BS\*;*  
*Samiah Ibrahim, BSc\**

## Thursday

### Annual Lectureship in Toxicology (Not Eligible for CE Credit)

**Moderator:** Sabra R. Botch-Jones, MS  
Boston University School of Medicine  
Boston, MA

**Co-Moderator:** Madeleine J. Swortwood, PhD  
Sam Houston State University  
Huntsville, TX

- 9:00 a.m. - 10:00 a.m.      **The Effects of Low Blood Alcohol Concentrations on Human Performance and Behavior**  
Dary D. Fiorentino, PhD  
Van Nuys, CA
- 10:00 a.m. - 10:30 a.m.      **Break**

### Drugs and Driving Special Session

**Moderator:** Dayong Lee, PhD  
Houston Forensic Science Center  
Houston, TX

**Co-Moderator:** Michael R. Corbett, PhD, LLM  
University of Ontario  
Mississauga, ON, CANADA

- 10:30 a.m. - 10:45 a.m.      **K46      Emergence of Delta-8 Tetrahydrocannabinol (THC) in Driving Under the Influence of Drugs (DUID) Investigation Casework**  
Ayako Chan-Hosokawa, MS\*; Loan Nguyen, BS; Renee L. LaFord, MS; Wendy R. Adams, PhD
- 10:45 a.m. - 11:00 a.m.      **K47      A Seven-Year Review of Vehicular Crash Toxicology Data at the West Tennessee Regional Forensic Center**  
Elizabeth C. Conner, MPH, CHES\*; Erica Curry, MD
- 11:00 a.m. - 11:15 a.m.      **K48      Toxicological Findings and Demographics of Phencyclidine (PCP) Use in Houston From 2013 to 2018**  
Dayong Lee, PhD\*; Peter R. Stout, PhD
- 11:15 a.m. - 11:30 a.m.      **K49      The Prevalence and Crash Risk of Drugs in Injured Drivers in Victoria, Australia**  
Dimitri Gerostamoulos\*
- 11:30 a.m. - 11:45 a.m.      **K50      The Effects of Synthetic Cannabinoids and Poly-Drug Use on Drug Recognition Expert Evaluations**  
Amanda L.A. Mohr, MSFS\*; Judith Rodriguez Salas, MS; Alex J. Krotulski, MS;  
David Andrascik, BS; Barry K. Logan, PhD
- 11:45 a.m. - 1:00 p.m.      **Lunch**

# BRING YOUR OWN SLIDES (PowerPoint®) BYOS.ppt

Wednesday Evening: 8:00 p.m. - 10:00 p.m.

In order to keep BYOS.ppt informal, fun, and informative for the large and diverse audience, here are a few things to keep in mind for the BYOS.ppt program at the 2020 AAFC Annual Meeting in Anaheim, CA:

- Presentations must be in PowerPoint® format. 35mm slides are not accepted.
- Proposals must be submitted on this form accompanied by a "6-slides-per-page" printout of the presentation and an electronic copy on CD or flash drive.
- BYOS is not intended as a forum to present scientific papers. It is designed as a means to present interesting information and/or unusual case(s) that may be educational and blended with humor.
- Speakers should plan on ten minutes in which to present their material.
- Material being presented in other parts of the AAFC scientific program will not be accepted at BYOS.ppt.
- Tables, charts, and graphs should be avoided, making every effort to use slides of scenes, bodily findings, and evidence.

This completed form, a "6-slides-per-page" printout, and the electronic presentation copy should be delivered to the on-site AAFC Staff Office by 4:00 p.m. on Wednesday, February 19, 2020. Presentations will be selected and scheduled based on perceived interest to the audience and in the order in which the completed submissions are received. This form and required printout are needed to organize the BYOS.ppt program and to allow appropriate allocation of continuing education credit. A BYOS.ppt Program Form also will be placed in each registrant's meeting packet.

## BYOS PROGRAM FORM

Name and Degree(s): \_\_\_\_\_

Job Title: \_\_\_\_\_

Place of Employment: \_\_\_\_\_

AAFC Section Affiliation (if none, write "none"): \_\_\_\_\_

The presentation is being offered primarily to:

- ☐ Solicit input/advice on a challenging case
- ☐ Present interesting information or case(s) for education purposes
- ☐ Entertainment

Presentation is:

- ☐ A single case
- ☐ A series of cases with a common topic
- ☐ Multiple cases with unrelated topics
- ☐ Other (please specify): \_\_\_\_\_

Briefly describe the material to be presented: \_\_\_\_\_

\_\_\_\_\_

What are the major points to be emphasized?: \_\_\_\_\_

\_\_\_\_\_

How will the attendees benefit from this presentation?: \_\_\_\_\_

\_\_\_\_\_

Is there commercial interest in the material being discussed?: ☐ No ☐ Yes (if yes, please describe): \_\_\_\_\_

\_\_\_\_\_

How much presentation time is required?: \_\_\_\_\_ minutes      How many PowerPoint® slides will be shown?: \_\_\_\_\_

Presenter's local hotel: \_\_\_\_\_ Room #: \_\_\_\_\_ Phone #: \_\_\_\_\_

U.S. Cell Phone: \_\_\_\_\_ Email you can access while at the meeting: \_\_\_\_\_

The BYOS agenda, scheduled presentation times, and continuing education credit hours will be posted near the BYOS meeting room. If you have any questions, contact Sonya Bynoe at [abstracts@aafs.org](mailto:abstracts@aafs.org) or at the on-site AAFC Staff Office.

AAFC STAFF USE ONLY: Date Received: \_\_\_\_\_ Time: \_\_\_\_\_

# PROGRAM COMMITTEE FINANCIAL DISCLOSURE

As a sponsor of continuing education, the American Academy of Forensic Sciences (AAFS) must ensure balance, independence, objectivity, and scientific rigor in all its educational activities. All faculty participating in a sponsoring activity are expected to disclose any significant financial interest or other relationship: (1) with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services discussed in an educational presentation; and (2) with any commercial supporters of the activity. (Significant financial interest or other relationships can include such things as grants or research support, employee, consultant, major stockholder, member of speaker's bureaus, etc.) AAFS has an established policy regarding conflicts of interest that includes decisions the Program Committee members may make in selecting content for the Annual Scientific Meeting Program. By serving on the committee, regardless of the role, each member has agreed to comply with Section 1.4.7. of the AAFS *Policy and Procedure Manual*.

To serve on the 2019-20 Program Committees, it is required that relevant AAFS staff members, program committee members, and/or reviewers complete a Financial Disclosure Form before being provided access to review submissions for the program. For continuing education accreditation purposes, the disclosed relationships are published below so learners are aware of the nature of any relationships that may impact the selection of presentations for the program. If a committee member failed to provide complete disclosure of a relevant financial interest or relationship, the committee member or reviewer was not allowed to serve. The executed Faculty Disclosure Forms are on file in the AAFS Office.

## *The following 2019-20 Program Committee members have disclosed financial relationships with commercial entities.*

Marilyn A. Huestis, PhD – Reviewer

Evanostics, Intelligent Fingerprinting, Pneuma, Thermo Scientific™ (Consultant Fees).

Philip M. Kemp, PhD – Reviewer

Analytical Research Laboratories (Consultant Fees).

Jason C. Kolowski, PhD – Reviewer

LG Chem, Ltd. (Consultant Fees).

## *The following 2019-20 Program Committee members disclose no financial relationships with commercial entities.*

# PRESENTING AUTHOR FINANCIAL DISCLOSURE

---

As an accredited provider of Continuing Medical Education, the American Academy of Forensic Sciences requires speakers to disclose any real or apparent conflict of interest they may have related to the content of their presentation(s). The existence of commercial or financial interest of authors related to the subject matter of their presentation(s) should not be construed as implying bias or decreasing the value of their presentation(s). However, disclosure should help participants form their own judgments. AAFS and the Program Committee review the submissions to ensure that the content is educational and not a commercial presentation for companies and their products. Participants may notify AAFS by email (abstracts@aafs.org) should any presentation be considered solely a commercial endorsement presentation. Notification should include presentation number/ID (e.g., BS10, E100, W30) and speaker name.

If an author failed to provide complete disclosure of the discussion of commercial products, a relationship with the manufacturer including employee/employer relationship, sources of support for the research project, and/or the discussion of unlabeled or unapproved uses of pharmaceuticals/medical devices, the presentation was not accepted. Authors are required to disclose at the beginning of each presentation any information disclosed and listed below. Copies of the executed disclosure forms are kept on file in the AAFS Office.

*The following presenting authors have disclosed financial relationships with commercial entities.*

## A

---

Jose R. Almirall, PhD - W26  
Agilent®, Analytical Solutions and Providers (ASAP Analytical)  
(Discussion of Commercial Products or Services).

## B

---

# PRESENTING AUTHOR INDEX

The presenting author index can provide a quick reference to find when and in what section presenting authors are scheduled to present at the 2020 Annual Scientific Meeting. The reference table below assists you in finding the section in which the presentation will be given. Letters correspond to the scientific discipline/section in which the presentation is being made while the number corresponds to the numerical sequence of the presentation within the section.

|   |                                 |    |                      |
